July.

Spires of swinging bell-flow'rs, drifts of rosy phlox,
Pinks in spice-sweet clusters, softly-color'd stocks,
Blue-flam'd larkspur torches splendid 'gainst the sky—
Ah! That's Summer's pageant, ah! that's sweet July.

Magic beds of poppies, roses rich and rare,
Roses darkly damask, roses ev'rywhere,
Roses tossing gold-cups with the wind on high—
Ah! That's pomp of Summer—ah! that's sweet July.

Hollyhocks most stately, silken-bloom'd and sweet,
Freakish pansy faces smiling at their feet,
Sweet-peas pois'd like fairies, forth at dusk to fly—
Ah! That's Summer's wonder—ah! that's sweet July.

Lilies of Our Lady pale and cool as snow,
Lavender all blue mists, herbs in order'd row,
Songs at dusk and dawning, soft airs stealing by—
Ah! That's Summer's zenith, best-belov'd July!

—Augusta Hancock in the London News.

SUGGESTIONS FOR PLANT GROWERS.

Pansies.

For winter blooming the seed of pansies should be sown early. Procure a strain of seed that will produce large flowers, and unless they are to be grown in considerable quantities mixed colors are to be preferred. To obtain plants enough for winter blooming it will be better to plant the seed in flats and place them in a cool shady location in the house, where they are much more easily cared for than out in the open. If such a location is not to be had they can be sown in a cold frame and a sash that is quite heavily shaded placed over them until the plants begin to grow. As soon as large enough they should be planted in a cold frame until the bench is made ready, about the middle of September, in the house. The soil for winter growing should be good, and of the richest, in order to obtain large flowers, and the house in which they are planted should be maintained at a cool temperature, about 45 degrees at night after settled fall and winter weather commences. Pansies are not, as a rule, troubled much with insect pests, but sometimes in the fall in the houses they are attacked by green fly and they are quickly checked in their growth if the aphis gets a good hold upon them. A careful watch should be maintained and if they are found to be infested with aphis constant spraying with nicotine solutions will keep the insects down.

Office Housecleaning.

Nearly all growing establishments at the present day have what is termed the office, and during the busy season, in many places, but little attention is given to keep it in a tidy condition. Now is the time, after the carnations are housed and before the fall work commences, to have a thorough cleaning up of the office and workroom and get them in readiness for the coming season. Get all the papers filed away in proper shape and fix up all accounts as far as possible, and thereby get rid of much of the worry and trouble. Clean up the workroom and give it a clean coat of paint, and straighten out the supplies. If the stock of baskets has grown dirty get a little gold paint and give them a coat of this, which will certainly make them more attractive than the dingy supplies too often seen hanging on the walls or standing around. The florist too seldom appreciates how the customer likes to trade in a clean, up-to-date place, and often endeavors to excuse the dirty appearance by remarking, "It is impossible where so much dirt is handled to keep the place clean." Such a one is only fooling himself. The present-day customer, of whom many are ladies, know better; they see other places that are kept neat and clean, and they cannot be imposed upon with such tales. Now is the time to get everything shipshape for the fall and winter trade.

Roman Hyacinths.

The first bulbs to arrive will be the Roman hyacinths, and everything should be in readiness to properly care for them as soon as received. When the cases arrive the bulbs should be placed in a cool, dry place; if packed in bags they should be spread out either in flats or shallow boxes and placed where they will neither be too moist or yet in too dry and warm a location. While it is too early to plant for the winter blooming, still a succession of plantings may be made every week until cool weather, when the balance can be planted up. Almost any soil will grow bulbs successfully, but fine results are obtained with soil that has been thrown out from the carnation or rose benches and has laid out over winter to allow it to sweeten a little. Where a fall pot plant is wanted a few of the hyacinth bulbs can be planted in bulb pans, but in growing for cut flowers flats are to be preferred, for they are much more economically handled and do not require as much care. In planting the bulbs cover the bottom of the flats with about an inch of soil, placing the bulbs on this quite closely together, yet not touching, as can be done with other bulbs. The flat should then be filled with soil, which should be packed between the bulbs with the ends of the fingers. They should then be given a good watering, enough to wet the soil all the way through and settle it

around the bulb. The flats should be placed outside and covered to the depth of about three inches with sand or coal ashes or something that will lie close enough to prevent drying out. A label should be placed at the end with the date of planting, so that the several plantings will be kept separate and can be readily moved into the houses. In four to six weeks they should be well enough rooted to bring them into the house, where they can be placed under a bench until they begin to throw up their flowering spikes.

Delphiniums.

This perennial has become quite a popular cut flower for summer use and is very decorative and showy. Those that have a stock can increase the plants of the better varieties by propagation at this time. When the plants bloom those that produce the best spikes and are of the best colors should be marked. After the blooms are cut the small growths that break from the stem are very easily rooted. Prepare a bed in a shaded frame and insert the cuttings, watering heavily when first put in. They will need frequent syringing during the hot weather and will root in three to four weeks, when they can be either potted or planted in a frame where they can be given attention. As soon as well established they can be planted in their permanent location, but should be given a little protection during the first winter by throwing a little old straw or some such material over them.

Asparagus Baskets.

There is always a good call for hanging baskets of Asparagus Sprengeri and there is nothing more decorative in a store or greenhouse than these beautiful baskets when well put up and when they are growing nicely. The young 3-inch stock will make nice basket work. The wire basket frame should be of good size, eight inches in diameter at least. Line the outside with green sheet moss, which makes a much better appearance than spaguum, and then fill with good rich soil and plant the young plants in this. The basket, after planting, should be placed in a warm, moist house to encourage rapid growth; a house with a temperature such as palms are grown in is about right. They should be frequently syringed, and as soon as the long fronds have made a good growth they can be removed to lighter and cooler quarters.

Anemone Japonica.

One of the most useful perennials for the fall is the Anemone Japonica. It blooms at a time when flowers are very scarce, and if planted where it can be protected from the early frosts will produce quantities of bloom that can be made of use in all classes of floral work. The successful blooming of this plant depends much upon its summer culture. If the season is dry it will require constant watering, in fact, a good soaking. It is a good plan to place the hose in a bed of this and let the water run until the ground is thoroughly wet, and do this as often as may be required. It will amply repay in the long, strong shoots that will be produced in the fall full of blooms. The florist not possessing a good stock of this beautiful perennial should procure some of it and plant a bed for fall cutting.

The Coronation Bouquet.

The coronation bouquet presented to Queen Mary by the Worshipful Company of Gardeners consisted of carnations of the variety Hermoine. The flowers used in the coronation bouquet, and also in the other, which was presented to her Majesty for the state procession, were magnificent specimens, excellently arranged by Piper's, florists, Bayswater. Queen Mary was also pleased to accept from the Company of Gardeners a basket of carnations which we illustrate, which consisted of white and pink seedling varieties raised by Charles Blick, Hayes Nurseries. Her Majesty bestowed her own name on the pink seedling and that of King George on the white variety. The gold basket, modeled from that which figures in the arms of the company, was made by Messrs. Elkington.—The Gardeners' Chronicle.

National Rose Society's Gift to Queen Mary.

The magnificent basket of roses which we illustrate, was presented to Queen Mary on the occasion of her coronation by the members of the National Rose Society. Members were invited to contribute blooms, and in response to the invitations flowers were sent from all parts of the British Isles. They were arranged in a basket to a height of eight feet, nearly 3,000 blooms being employed. The principal varieties utilized were Rayon d'Or, Edward Mawley, Danae (probably the first time these three new varieties have been used in a decoration of this kind), Juliet, Lady Hilligdon, Lyon Rose, Mrs. A. Waddell and Goldfinch. On a card was written, "As a mark of loyal gratitude from rosarians of the British Isles." A somewhat similar basket was also presented by the National Rose Society to Queen Alexandra. The work of arranging the flowers was entrusted to R. F. Felton, of Felton & Sons, Florists, Hanover Square, whose abilities as floral artists are well known. So many roses were contributed that Mr. Felton was able to send several hundred blooms to the various London hospitals.—The Gardeners' Chronicle.

BASKET OF CARNATIONS KING GEORGE AND QUEEN MARY PRESENTED TO THE QUEEN OF ENGLAND BY THE WORSHIPFUL COMPANY OF GARDENERS.

Reproduced from the Gardeners' Chronicle.

Summer Table Decorations.

HYDRANGEAS.

An oblong flat basket on which the mass is not banked too high, covered with clusters of pink hydrangeas is very showy and attractive, when combined with white roses. Place the roses at intervals between the hydrangea flowers, allowing them to extend considerably above the hydrangeas. Around the stem of the roses and extending from the flowers fasten rose leaves in such a manner as to make it look like a green collar. This, if daintily arranged, is effective and pretty. Finish the edge of the basket with the leaves of the hydrangea, making a scarf of the leaves to lie flat on the table on either side; on the oblong side, a touch of pink could be added to this scarf by making a border of pink hydrangeas. Pink roses can also be used effectively instead of white.

The blue hydrangeas as outlined above combined with the passion flower instead of roses is excellent. Maiden hair should be used in this arrangement to harmonize with the daintiness of the passion flower.

Three passion flowers with maiden hair fern tied with soft satin ribbon the shade of the blue hydrangeas is good.

A DECORATION OF FRUIT.

As everyone looks to something cooling as well as effective during the torrid days the simple yet pretty suggestion would be to take four good square pieces of ice. If the table is round, chip off the edges at the end to make the blocks of ice rounding; if the table is oblong, have the two pieces of ice which extend lengthwise, longer than the side pieces. A good size place should be left in the center in which a cluster of electric lights covered with green catgut may be placed. On the top of each block of ice place large green leaves of hot house grapes and on these arrange bunches of dark hot house grapes in an artistic way, allowing their rough stems or branches to extend above the fruit.

Of course these blocks of ice have to be placed on tins to which drainage is attached. Around the ice arrange large blue pond lilies, using their foliage for a background on the table. This arrangement should be somewhat higher on the outer center of ice gradually lowering to each corner where it should be finished with a rounded flat effect on table. This to be the garnishing for each corner. The large grape leaf could be effectively used under each corner group of blue pond lilies.

If a chandelier is available above the table, arrange grape leaves with small tendrils around it using bunches of the fruit to fall in pretty groups over the table. A. E. KLUNDER.

Diseased Phlox.

ED. AMERICAN FLORIST:

I mail you spikes of phlox Miss Lingard on which the leaves turn brown and the stem dies. We have a 25-foot row, this being the second year from field grown clumps. Last year, to some extent, and this year to a much greater extent, have the plants been affected after blooming began. Last year the height of the row was practically uniform, this season a few of the plants refused to grow to the usual height. The phlox is at the back of a bed in which Coreopsis lanceolata, Stokesia cyanea, and zinnias thrive. Will you advise us as to the probably cause and suggest treatment? Cutting back severely, liming and a mulch of cow manure have been suggested.

Michigan. R. I. L.

If, as seems probable, judging by the specimens of Phlox Miss Lingard sent they are diseased, and this has recurred in greater degree this year, the obvious remedy is to dig up and destroy the affected plants at once. Also as soon as it is safe to do so, plant the remainder in another portion of the garden, this can be done as soon as the plants are out of bloom if well watered at the time. We confess that this affection is new to us, and with plant diseases it is best where it can be done to take radical measures, for dosing with either lime or manure would not help matters much, it will be well to treat newly planted healthy pieces liberally as to manure and enable these to resist disease. This particular phlox is usually so very healthy there should be no difficulty in saving those that are not already affected.

E. O. ORPET.

BASKET OF ROSES PRESENTED TO QUEEN MARY BY THE NATIONAL ROSE SOCIETY OF ENGLAND.

Reproduced from the Gardeners' Chronicle.

THE CARNATION.

Planting in the Young Stock.

The extremely hot weather of the past two or three weeks has put the finishing touch on the old stock of carnations, gradually reducing the size of the flowers until there is little left, and at the same time encouraging the red spiders, thrips and other pests that all do their respective parts towards lowering the quality. But with the school commencements over, the June weddings a matter of history, and a large portion of the flower-buying public away from home, there is not much demand for carnations, and the sooner the old plants are out, the benches emptied and refilled, and the young stock planted in, the better it will be for all concerned.

The emptying of the benches entails much labor, but is a work of necessity, even in July, and the removal of the soil is only one portion of the work, the repairing and cleaning, then whitewashing the interior of the benches, and finally the refilling with good soil, and when space enough has gone through this annual housecleaning to give room for a start, then the fresh stock is lifted from the field, protected as much as possible from sun and wind, and replanted just as rapidly as circumstances will permit.

It is at this period that the question of shaking off the soil or of leaving a good ball of earth arises in the minds of some growers, and this is a question that must be settled in accordance

with the conditions under which the stock is grown. If the soil in the field is heavy and hard, the plants will need a fair ball, but if the soil be light and sandy the plants will make more roots and will transplant more readily than those from the heavy soil, even though the greater portion of the field soil should fall off. But it is no more reasonable to expose the entire root system of a carnation plant to the sun and air than it is to serve any other plant or shrub in that manner, and personally I prefer to have the roots covered with a reasonable ball of earth at the time of transplanting. With proper attention to ventilation and plant food to cover a season of ten to eleven months. Shallow cultivation between the plants is beneficial in allowing the soil to be aerated more freely, and at the same time allows the water to get through more evenly. After the plants are established, spraying with fungicides and insecticides is in order at regular intervals, and thus the round of work goes on from season to season.

W. H. TAPLIN.

Planting in the Houses.

The time for planting the field plants into the houses is now drawing near and a week or ten days will find this very important work in full swing. About the first thing that comes to our mind in this connection is what about the plants out in the field? Are they in the best condition for planting? Which means have the weeds been kept down so that the plants are good and hard and not soft from being covered up with the weeds; also has the work of keeping the shoots pinched back been followed up closely so that the plants are now well-branched, vigorous stock. If the shoots have got lengthened out and another pinching is necessary do the work while the plants are in the field and let them remain out another week before bringing them into the house, it is much better to do this than bring them in with buds and long growths on them. The same with plants that have been smothered up with weeds, the growths are so very soft that they have difficulty in starting up root action again. In both cases it is best to leave them out a little longer to get into condition.

Bringing in the soil and getting it into condition to receive the plants is the first work, presuming that the repairing and cleaning has been attended to, also all the cracks inside the benches being treated to a thorough coat of lime wash. The next question is covering up the large cracks in the bottom of the bench and still retain plenty of drainage, several different kinds of material are used for this purpose; strips of sod that have been cut several days and left laying in the sun to kill the grass is used quite extensively, and when placing it on turn the grass side down. Leaves that have been stored up from last fall are also good for this purpose, and if the soil is very rough the coarse part can be spread over the bottom of the benches and the finer soil on top. Many growers used a well-rotted prepared horse manure at the bottom of the benches to prevent the soil sifting through, this is good also as extra nourishment for the plants later on.

We now come to one of the most important questions of all, which is that of the soil, the grower who has a specially prepared compost pile has only to bring it into the benches first seeing that it is thoroughly pulverized, but many others have to mix the soil at the ends of the houses or in the field after a fresh ploughing. In these cases well-rotted live stable manure should be added, one part to four of soil. The work of getting in the soil is very tedious and hard, especially during very hot weather. Enough help should be used to push it along as fast as possible, but first of all do not forget a good thick mud shade on the glass, which makes it more comfortable for those working inside, beside being necessary for the newly planted carnations. Fill in the benches even full, so that after a slight firming down the depth of soil is about five inches. We

AUTOMOBILE PARTY AT WENDLAND & KEIMEL'S, ELMHURST, ILL.

Messrs. Wendland and Keimel, J. Cassidy and Phil. Foley in the Automobile.

moisture such plants seldom fail to re-establish themselves in a short period.

Frequent spraying for the first four or five days after the plants are brought in helps much in their recovery from the shock of transplanting, the frequency of this operation depending much upon the weather, it being sometimes necessary to spray four or five times a day for a few days, while at other times two sprayings may carry the plants through nicely. The main thing to keep in mind is the fact that the object is to keep the foliage cool and moist, and not to get the soil soggy. It is a very simple proposition, but requires the exercise of common sense, just as many other plant growing problems do. A light shading on the houses at this season not only adds greatly to the comfort of those working in them, but also helps the newly planted stock, for the ventilators have to be kept rather low for a few days, but just as soon as the plants show that the roots are working the ventilation should be increased.

Staking and tying should begin as soon as the first crop of weeds is cleared out, for it does not benefit the plants to lie around on the surface of the soil, apart from the lack of neatness that is noted where plants are thus neglected. Keep the surface of the soil free from weeds at all times, for a good crop of weeds simply means the loss of a certain portion of plant food from the soil, and with but five inches of soil in the benches there is not likely to be any great overplus of

'OW'S THAT FOR 'IGH?

give the surface of the soil a light dressing of fine bone meal, mixing it in with the hands or a three tined hoe, after this the beds are leveled off and are now in condition to receive the plants.

The digging of the plants is a part of the work that should be entrusted to an experienced man only, one who is careful enough to preserve all the roots possible, and others should follow up the digger closely, putting the plants into flats deep enough for them to stand upright and get them out of the wind and sun as quickly as possible. The question sometimes comes up whether to lift the plants while the weather is dry or wait for a rain before doing it, but we have found it best to plant during dry weather, even if we have to wet the plants down a little before digging or dipping the roots in water directly after being dug. The plants after a dry spell are good and hard in tissue and root action is quicker after planting than if transferred during wet weather. The work of planting in the benches is the most particular job of all, see that the roots are spread out evenly, do not plant any deeper than the plant has been growing in the field, leaving a slight basin directly around each plant so that it can be watered at the plant only without wetting the whole of the soil in the bench.

After the planting is finished and everything is cleaned up in the house the temperature should be held a little close for a few days until the roots begin to get hold of the soil, but do not carry this to the extreme and run up the temperature to an excessive point. Continual light mistings or sprayings will have to be given the first few days to prevent the plants wilting, but guard against getting the soil over wet. C. W. JOHNSON.

CHRYSANTHEMUMS

Exhibition Blooms.

Early in the month of July may be considered as one of the critical periods in the life of the plants being grown for exhibition cut blooms. The growth has now attained a good size and the wood of the early propagated stock is getting ripe and woody, many of the varieties are continually budding, which is altogether too early to do anything with them as regards selection for bloom; consequently the important point is to see that the work of removing these early buds, and that of pinching out the side shoots is followed up closely, so as to encourage growth and vigor to produce good strong buds for taking in August. To do this work right, so that it will redound to the best advantage for the plants and blooms, requires considerable judgment and care. The growths, as they now appear, are a center bud with a growth shoot on each side, one a little above the other, at the apex of the plant. In removing these growths the proper way is to start at the top so that in case of the top one being accidentally broken, while performing the work, you still have another below to fall back upon. In the first place remove the center bud and then select the strongest of the side growths to go on to growth again. Most experts claim that finer blooms can be grown from the second growth than from the top one, but my experience in this respect is that when the disbudding is followed up closely, there is very little difference—providing the top shoot is good and plump—but if the rubbing out of the growths is delayed and the growth becomes extended, the top shoot is liable to lengthen out and get spindly quicker than the second one and thus will bud up in a very short while, before a reasonable amount of growth has taken place.

The exhibition stock should be given regular feedings from now on once every week or ten days, it is best for the feeding at this early stage to be in the form of top-dressing—a very light sprinkling of Clay's fertilizer scratched into the surface of the beds or pots will benefit the plants greatly, but this fertilizer must not be used in large doses, particularly in hot weather, or it will kill the roots, it being highly concentrated, and if applied too liberally, the plant cannot assimilate it. A sprinkling of fine bone followed up in about a week with a dressing of pulverized sheep manure is also good for a change of feed. While the grower of exhibition stock expects when he starts out to feed liberally and push the plants to the limit, even at the expense of a few abnormal flowers, but to be successful he must know his plants and feed them according to their present conditions and requirements. The nature of the soil which the plants are growing in is also an important factor, one year it may be that the soil will be particularly suitable to the plants' growth and they will respond better than in other years, though as far as we could make it the elements of the soil were the same. We have had this experience several times and conclude that the condition of the compost pile at the time of preparing has something to do with it, if the soil gets a good wetting through to give the manure a chance to work properly and thoroughly incorporate the whole, the plants will start off and attain a vigor of growth which they are unable to do in soil that has laid dry from the time of mixing. These conditions ought to

be studied out and taken into consideration. When a plant is forcing lots of growth and vigor into itself, don't try to push things too hard by heavy feeding, aim rather to supplement the present favorable conditions by steady moderate feeding. If the plants do not respond as they should to the treatment now being given, it may be a good move to examine the condition of the soil, which, if in a light spongy condition seldom is favorable to vigorous plant growth, and a good pounding down with a pounder may materially help matters quite a lot.

During this very hot weather the plants require an abundance of water and ample syringings, and while syringing pay particular attention to the under side of the foliage, this is where the red spider gets a foothold and a good force of water is the best means of keeping them down. Continual sprayings with nicotine preparations, to rid the plants of aphis must be given right along, and even after the plants are comparatively clean the sprayer should still be kept going every few evenings. Attend to the staking and tying up of the plants as this is the season for the stems to quickly get crooked or broken. C. W. JOHNSON.

THE ROSE.

Summer Culture.

At this writing the extreme hot weather is universal, the temperature under glass often reaching 120° or more at noon. This high temperature makes it next to an impossibility to work indoors with safety and naturally the stock is having a hard time making any headway. At the same time one can help matters considerably by the use of the water supply. Water and syringe the plants early in the day and do not fail to keep the walks well soaked. Of course, the plants must be watered carefully as it is a great mistake to keep the soil soggy even if the houses are above the maximum temperature. Of course, it isn't advisable to let the surface of the soil become dry, but by syringing several times during the hottest days after watering carefully early in the day, the soil will usually be quite moist on the surface.

Cultivating should be done with great regularity. Each house from now on will require cultivating once a week until the roots reach the surface, as they are in danger of being injured. All that is necessary is to cultivate the surface to about an inch in depth. Disbudding from now on will take up much of the grower's time and there is some difference of opinion as to the proper method of doing this work, that is, whether to top out the young growth or allow the buds to show color before removing them; we prefer to have the buds removed just before or about the time they show color, cutting back always to a firm eye, even if it should mean removing several joints. In order to produce strong, thrifty plants great care must be used when disbudding, and if the buds are simply snipped out carelessly the result will be a plant carrying perhaps a quantity of foliage but very little productive wood. We would also suggest doing a little disbudding every two or three days instead of removing all the buds at one time. In this way cropping is to a certain extent prevented.

The grafted stocks usually have a tendency to throw up canes from the manetti, and in order to remove all of these the plants should be gone over once per week for this purpose alone, for there is nothing that retards the young stock more than this strong wild growth. Remove as close to the bark as possible to prevent further growth.

We have spoken of staking and tying the plants, and if this work is done as neatly as it should be it adds greatly to the appearance of the houses, and everyone likes to see things "shipshape" and it does not detract from good business methods either. There is a certain amount of neatness and care visible at all well regulated plants and one seldom sees anything half accomplished or that neglected look when visiting the establishments of any of our successful growers. This care goes further than the care of the plants; the paint work and repairs are at no time to be neglected. The boiler requires careful inspection every summer and numerous little details crop up that if taken care of promptly will keep the place on a paying basis and it will have the appearance of prosperity, a good advertisement in itself. E.

OFFICERS OF THE FLORISTS' CLUB OF WASHINGTON.

Michigan Cut Flower Exchange Outing.

The Michigan Cut Flower Exchange will give a complimentary boat ride to florists of Detroit and vicinity, their families and employes on Monday, July 31. An invitation has been extended to all those in the trade to enjoy an afternoon's outing at the expense of the company. The boat will leave the foot of Bates street at 1:30 p. m. and will proceed to Peche Island, returning at 7:30 p. m. The Exchange will close at 1:00 p. m. on the afternoon of July 31 that all may enjoy the outing, and they are desirous that the retailers give as many of their help as possible a half holiday that they may accept the invitation for the trip so generously extended.

FLORISTS' FERNS.

Growing Young Stock.

The young ferns of this season's growth, namely, those from spores sown the past winter, and which were, or should have been, pricked out into flats or pans, will shortly be in condition to be potted off into small pots, a good time for this operation being during the month of July. This gives plenty of time to prepare nice stock for filling ferneries during the coming fall and winter, and in the case of some of the strong growing varieties and species there will be time enough to prepare some four inch stock that will prove useful in filling baskets at Christmas.

When growing plants for the purpose of filling table ferneries only, it is more satisfactory to pot up the seedlings in small clumps rather than singly, from the fact that this method produces more bushy stock, but if the plants are intended for sale singly or for growing on into larger sizes, then they may be separated more closely, or divided to single crowns if need be. But the single crown plants are likely to throw up stronger fronds, and thus become too tall for small work, while the compound plant will produce a number of short fronds that form just the sort of plants one needs for filling a fernery to advantage. In potting off this sort of stock, some fine sifted soil is needed, from the fact that the roots of the seedlings are delicate and the pots used are small, being usually either two or two and a half inches in size, and some care and knack is required in handling them.

This work should always be done in the shade, for the seedlings soon suffer when exposed to the sun or wind, and it is therefore best not to lift or separate too many of the plants at once, else they are liable to wilt before they are potted, and a wilted fern does not recover very quickly. Then the plants should be stood away on sand or fine ashes, and carefully watered with a fine rose, after which they need protection from sun and wind for a few days until they begin to root, when they may gradually be inured to both sun and air. These little details will naturally seem rather trifling to those long familiar with fern growing, but some attention to these small matters on the part of the novice will be fully repaid in the final results.

During hot and dry weather the small ferns are quite likely to be attacked by thrips, some of the pteris family and cyrtomium falcatum being quite susceptible to these attacks, and where the ferns are placed in a cold frame it is not so convenient to fumigate. In such a case they may be sprayed with a nicotine solution, being careful in having the solution weak enough to avoid injury to the young fronds. If the stock is growing in the greenhouse, one may take advantage of a favorable night or two, and fumigate with nicotine paper, if possible fumigating two nights in succession in order to catch the stray insects. The nicotine paper may be used in proportion of twelve strips of the paper to a house 20x100 feet, and will do no harm to the majority of commercial ferns, an exception to this rule being found in the case of Cibotium Schiedei, the young fronds of which are likely to suffer from strong fumigation.

The 40 per cent solution of nicotine may be used for spraying ferns when diluted in the proportion of half a pint of nicotine to 25 gallons of water, with little or no risk of injury to the foliage, and will kill the insects with which it comes in contact, with the possible exception of red spider and hard scale. The amount of injury done to ferns by fumigating will depend largely upon the condition of the plants, though as we have already noted, there are some species that are more subject to injury than others, the indications seeming to point out that those species with soft and hairy foliage are more susceptible to nicotine fumes than are ferns with smooth and glossy fronds.

Spraying with nicotine solution may also be practiced at intervals as a protective and preventive measure when growing Boston ferns and the various other members of the nephrolepis group that are so subject to attacks of a certain scale insect. This insect is very common throughout the country where Boston ferns are grown to any extent, spreads very rapidly, and does great injury to the plants, and it is well worth while to adopt preventive measures.

W. H. TAPLIN.

George F. McClure.

The president-elect of the Buffalo Florists' Club, George Edward McClure, was born in Scotland and came to the United States with his parents at the age of ten years. Being the son of an all around florist and landscape gardener, he naturally inclined toward his father's occupation and as early as he could find overalls and rubber boots to fit him, assisted his father who had charge of several commercial establishments and private places in New Jersey, Illinois and Buffalo, N. Y. He first became interested in plant culture especially chrysanthemums, which were then coming into favor. At the age of 17 he was in charge of the orchid and propagating houses of William Scott of Buffalo and at 19 had charge of the large collection of orchids and chrysanthemums at the Kate B. Lewis place in the same city.

When he reached the age of 21, being desirous of more knowledge and a larger field he went to St. Louis, taking charge of the orchid and stove plants at the Missouri Botanical Garden. During the seven years he was there he increased the collection of orchids from 250 species and varieties to over 900 and the other department in like proportion. He also studied botany and plant diseases at the Botanical Garden and at Washington University, developing an interest in landscape gardening. At his father's solicitation he then returned to Buffalo entering the concern of Geo. W. McClure & Son in the business of landscape gardening, which has been very successful the firm being well known in New York state. He is married and with his wife is blessed with a happy home and three children. BISON.

"Bulb Talks."

A neat little booklet entitled "Bulb Talks" has been issued by Ralph M. Ward & Co., New York, which is being distributed to their trade, containing much that is of interest to florists written in the inimitable Ward style, about bulbs in general and of lilies in particular, besides much of business methods that many should read and absorb. The article on kickers is right to the point showing an intimate knowledge with those whom it is intended to represent, and a short story entitled "Totem Poles" applies to many a grower. The story reads as follows:

"In Alaska the Eskimos use the totem poles as a distinguishing mark indicating a certain family or clan, and sometimes their occupation. In this country the greenhouse is the totem pole of the florist and that's about as far as their identity goes. There are thousands of greenhouse plants in the United States without a sign of the proprietor's name about the place. You may pass a dozen plants along the railroad and be unable to call any one by name or otherwise. In this respect a very valuable asset is neglected and lost. No matter whether the grower is a retailer or wholesaler a prominent sign with his name would be an asset which would likely pay for the expenses a dozen times over during the life of the sign. Get busy and put up a respectable sign—let people know who you are and what your business is."

An article entitled "Go After It" contains good advice to many. It says: "The writer has lived in various cities during his life time, and he has never had a florist solicit business at his residence. * * * Get out and create business, that's the way fortunes are made, and let common labor wallop the pots in the sheds and greenhouses. When a new family moves in a neighborhood there'll be half-a-dozen grocers after the business; but did you ever hear of a florist after trade? Don't wait for someone to die or get married, but get out and create a family trade. * * * Go after trade and don't wait for them to come to you. Advertise and let people know what you have to sell, how much the cost is, and that you are sometimes more than a sad-rag decorator and a cemetery parasite. Think it over before you criticize."

"Vacations" and "Profits" are both timely and the book concludes with the following: "The hooks and eyes of the florist business do not always meet. One is necessary to the other; and they must harmonize to be of value. The eyes of some florists see more than their hooks can handle, and the wise ones employ more hooks (hands), while the unwise ones work their hooks so hard they can't see with their eyes. It does not pay a proprietor to work with his hands when he can do more with his head, for it is what you can induce others to do for you that pays more than what you can possibly do yourself."

Claude L. Ory.

President New Orleans Horticultural Society.

Legend of the Pansy.

A pretty fable about the pansy is current among French and German children. The flower has five petals and five sepals. In most pansies, especially of the earlier and less highly developed varieties, two of the petals are plain in color and three are gay. The two plain petals have a single sepal each, and the third, which is the largest of all, has two sepals.

The fable is that the pansy represents a family consisting of husband and wife and four daughters, two of the latter being stepchildren of the wife. The plain petals are the stepchildren, with only one chair; the two small, gay petals are the daughters, with a chair each, and the large, gay petal is the wife, with two chairs.

To find the father one must strip away the petals until the stamens and pistils are bare. They have a fanciful resemblance to an old man, with a flannel wrap about his neck, his shoulders upraised and his feet in a bath tub. The story is probably of French origin, because the French call the pansy the stepmother.

GLEN COVE N. Y.—Preparations are being made to hold a dahlia show by the Nassau County Horticultural Society, September 27.

NEW YORK.—Charles Walsh has a new beautifully fitted store at the corner of Broadway and One Hundred and Eighth streets, which he will soon occupy.

NEW HAVEN, CONN.—Charles Munro of 974 Chapel street sailed July 5 on the Mauretania for a business trip to Holland, Belgium and other European countries. He expects to return about September 1.

THE DAHLIA.

Cultural Notes.

While thorough cultivation is absolutely essential for the best results with dahlias yet alone it will not insure it. I have seen magnificent plants, covered with flowers, but it would have been impossible to cut a single long stem flower. Some varieties of dahlias make good stems naturally but even dwarf sorts will give long stems by disbudding.

Many growers say it does not pay to disbud at the prevailing prices. Look at the cut dahlia proposition of 20 years ago and today. Each year you read of the overproduction. Suppose each grower disbudded and grew only as many as the plants would develop to perfection. There would be a smaller quantity on the market while the extra quality would increase the demand and enhance the price. There is no general rule to follow, as generally any bud will make a good flower. The best plan is to leave the terminal bud and remove all laterals until you have the desired length stem. Some varieties have a tendency for blasted buds. Remove these and all imperfect buds, giving the first good bud a chance. Where there are no good buds on a shoot remove it, if there are too many shoots, or if not enough, cut back to two eyes.

On stock planted early a good plan is to pinch out the center of the main shoots when three or four pair of leaves have formed and each of the branches later, then disbud each of the shoots, by carefully timing this operation you can get the entire crop off during a period of 30 days, which about corresponds with the dahlia cut flower season; the gap between asters and chrysanthemums. Where dahlias are planted late, allow them to come into bud and then pinch out the first two, three or four buds, according to the habits of the varieties, and disbud the branches. Take a plant now in bloom, and suffering from the hot, dry weather, disbud by removing all side buds and shoots of each branch, thus reducing several fold the number of buds and amount of foliage, and you will be surprised at the results.

I have often been amused and surprised at growers claiming to be specialists, stating that the buds develop one sided or blast from being stung by insects. They do not say what insects or give a remedy. In nine times out of ten the plant with a dozen branches with only a terminal bud on each, would give a dozen first-class long stem flowers in the course of a month. The eyes at the base of these branches would develop into shoots by the time the first long stem flower was cut, and by the time the last of the first crop was cut, would themselves be almost ready.

Take Kriemhilde as an example of the blasted bud type. One grower came to our place last year to see how we managed it, and was surprised at the simplicity of our method, which was no more than to leave the first three buds, removing the others. This gave all the strength of the shoot to these buds and usually resulted in at least one first-class flower. With this variety, however, you must work quickly, before the buds blast. Where there are too many branches or shoots remove

some of them. After getting this system under way, you will find less and less trouble as the season advances.

Many ask "Do you prune your dahlias?" We do, inasmuch as we cut the flowers or long stems; but, as a matter of removing surplus wood we do not. We simply do not allow it to grow. We prefer a limited number of strong, healthy shoots and a good flower at the end of them. This means healthy plants, as well as size, color and keeping qualities for the flowers. Once more I will say, do not overload your plants. Do not think you can carry through the extra quantity by overfertilizing. You will only exhaust the plants and next year you will find they are having that "off year" so many growers speak of. Top dressing with manure or fertilizer should be followed when flowers grow smaller, but in reason, but disastrous results follow if carried to excess.

The dahlia has always been considered a fall flower, yet it can be brought into bloom in this latitude (Philadelphia) by June 15 and by disbudding a constant supply until killed by frost. Why is the dahlia called a fall flower? Because they are usually planted early, fed heavily, watered and given every care. The plants produce a few fine flowers, but the large, soft plants are in no condition to stand hot, dry weather. Consequently the wood hardens, flowers come imperfect, one sided, the foliage is discolored, and finally they cease to bloom. Then the fall rains revive them, start the young shoots and as "Jack Frost" comes along are covered with blooms and buds. Planted later they will start blooming in July or August and keep it up. A friend once wrote me of his experience with dahlias after accepting my advice to make three plantings: "Last year I made three plantings and as we had a cool, wet season all did well. This year I planted them all early so as to get more flowers, but in June found room for a few more so sent you an additional order which was received and planted June 13. We had the worst drought we ever experienced and I had no flowers until the last of September except the few planted in June which came into bloom in August. So the prediction of the good Book came true, for verily "the last were the first and the first were last."

L. K. PEACOCK.

The "Off-Year" Question.

The question, "Do dahlias have an 'off-year?'" has frequently been asked and already partially answered in the affirmative. In my opinion, they certainly do have an off-year, like every other plant, when conditions are wrong or unfavorable. Nature made a wise provision when she decreed that every living, growing thing should have a regular period of rest. Nothing is so wise, so kind nor so cruel as nature. Obey her laws and all is well; but notice how surely and quickly any infraction of her laws is followed by punishment. She can not impose a fine of a thousand dollars on any one for working one minute over eight hours nor can she put any one in jail for working on a holiday (in Massachusetts), but she does impose a fine that is just and proportionate to the offence.

Dahlias are as variable as human beings (or any other animals) in the amount of work they are able to perform. Some of them are very strong and hardy and are able to put in long hours without showing the slightest fatigue, and they can and will do it day after day and seem to thrive and even get fat on it. Now there are a good many other kinds that are very beautiful, but are incapable of doing even half the work of some of the stronger varieties. When a dahlia or any other plant is forced by stimulants beyond its natural, normal pace—in other words, when it is forced to overwork itself—it draws on its reserve energy faster than it can be accumulated; and when it is completely exhausted, as it surely will be if the forcing is long continued, reaction is sure to follow, and this reaction means rest and recuperation before it can resume work again. One winter's rest is often insufficient to completely restore this exhausted energy; which fact will in a large measure, I think, account for the "off-year."

As a further illustration of the effect of overwork and overproduction, which a little attention at the proper time would have averted, I would mention the grape-vine in a cultivated state as a very striking example: I have known some productive kinds to bear themselves almost to death in a single season; and others were so enfeebled from the same cause, that the fruit was sour and unpalatable for two or three years subsequently. The example noted above is also true of many kinds of small fruit and plum trees. And I doubt whether this article will be read by any one who is not well aware of the fact that a very large number of apple trees bear only one crop in two years.

I have wandered from the subject in order to get evidence in support of my theory that some dahlias do have an "off-year" even when climatic conditions are equal. In conclusion I will say that the person who over-fertilizes and deluges his plants with water every day in order to produce flowers greatly in excess of the normal productiveness of the plants, has no right to expect similar results under similar treatment with the same stock for an indefinite period of time.—Edgar W. Ela in the Dahlia News.

New Orleans.

BUSINESS AT A STANDSTILL.

The florists of the city are now busy increasing their stock for the fall and winter trade, which promises to be very lively this season. Business is now at a standstill, except regular routine work.

NEW ORLEANS HORTICULTURAL SOCIETY.

The New Orleans Horticultural Society held its annual meeting on Thursday, July 20, when the following officers were elected for the ensuing year:

Claude L. Ory, president.
B. M. Wischer, vice-president.
John Eblen, treasurer.
C. R. Panter, secretary.
R. Eichling, secretary.

John Eblen, the treasurer-elect, has been the only treasurer the society has ever had, having served as such for 27 years. C. R. Panter, the secretary, is now in his eleventh term as such. The new financial committee is composed of Joseph Steckler, E. Baker and R. A. Chopin. The society is in a flourishing financial condition. Jas. A. Newsham exhibited the following orchid flowers, which were greatly admired for their beauty and perfect growth; Dendrobium formosum, Dendrobium Phalænopsis, Cattleya Trianæ and Cattleya Harrisoniana. After the meeting the members enjoyed a delightful supper in the Dutch room of Kolb's restaurant and several impromptu addresses were made.

NOTES.

The German Gardeners' Club gave their annual fishing outing at West End on Lake Ponchartrain on Thursday, July 20, where they spent a delightful day fishing and enjoying themselves to their heart's content. President Paul Abel and Secretary Otto Werner were untiring in their efforts to see to the comfort of the members and the invited guests.

Max Scheineux is busy improving his new nursery on Broadway, and is now building a fine greenhouse 24x120 feet.

John Rinck has built another greenhouse and is busy with his parks on the I. C. R. R.

Buchner & Krack are still adding to their large range of greenhouses.

Chas. Eble has a fine stock of palms and maidenhair ferns.

Mrs. F. Gruaz is doing well both in plants and cut flower work.

U. J. Virgin has a fine crop of asters and tuberoses just now.

P. A. Chopin is holding his own in floral work.

D.

Claude L. Ory.

Claude L. Ory, elected president of the New Orleans Horticultural Society at the meeting held July 20, was born and raised in New Orleans, and learned his trade at the establishment of his stepfather, the late J. H. Menard, one of the pioneer florists of the city. Mr. Ory is now manager of the same establishment in the interest of his mother, who succeeded to the business.

D.

Pansies.

"Pansies for Thought."

The breath of lover's passion is in the blowing rose,
Her perfume is by far too sweet to be profaned in prose,
So poets without number get their lyres into tune,
And praise sans stint the Rose of France and that of sunny June.
The Beauties of America, the roses wild, the "Jacks"
Have waxed far into fashion—some are fashioned into wax—
But not for me the platitudes with which the rose is fraught,
I sing the velvet pansy, for the pansy is for thought.

Rosemary for remembrance; rue signifies regret;
I do not know the meaning of the fragrant mignonette;
The lilies of the field are pure but lazy "ad infin."
Consider them, for O, they toil not, neither do they spin.
The lilac and the violet are well enough for those
Whose brains, as old Catullus says, are chiefly in the nose.
But all these loudly vaunted joys I set at less than naught—
I celebrate the pansy, for the pansy is for thought.

The rural bard has sung the charms of Mother Nature's child,
And lauded to the "azure dome" the dandelion wild;
The daisy that Dan Chaucer saw a-blooming in the wood,
The flowers carried by your friend Little Red Riding Hood;
Go, write about these floral things and dip your pen in dew,
To get the local color and the truly rural hue.
Give me no flower uncultured, nay—no bloom that is untaught,
I think the pansy is the only flower worth a thought.

O Maiden of the Pensive Eyes that shame the heaven's blue,
The pansy is for thought in that it makes me think of you.
Give me no common laurel wreath, no bays put on my head,
No musty crown of immortelles for me when I am dead;
But, Lady, of your bounty sweet this little boon I crave:
Please plant a bed of pansies on my whereso-ever grave.
And if between these halting lines no meaning you have caught,
Just go and ask the pansy, for the pansy is for thought.

THE AMERICAN FLORIST

1885 TWENTY SIXTH YEAR 1911

Subscription, United States and Mexico, $1.00 a year; Canada, $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from those in the trade.

Lecture, "Gladiolus Diseases," by Prof. Whetzel or assistant from Cornell University, followed by discussion and reports from state committeemen on diseases.

L. MERTON GAGE Cor. Secy.

New York to Baltimore.

The committee appointed by the New York Florists' Club, F. H. Traendly, chairman, have arranged for a special train to the S. A. F. convention at Baltimore on the Baltimore & Ohio Railroad, which will leave West Twenty-third street at 11:50 a. m. and the foot of Liberty street at 12 noon, Monday, August 14.

The fare, on the certificate plan, will be $4.60 going and $2.80 returning. Those desirous of joining the delegation should notify Frank H. Traendly, 131 West Twenty-eighth street, that the necessary arrangements for their accommodation may be made.

Boston to Baltimore.

The delegation to the S. A. F. convention at Baltimore will leave Boston by the Fall River Line at 6 p. m. Sunday, August 13, joining with the New York delegation at New York City, which leaves West Twenty-third street at 11:50 a. m. and Liberty street at 12 noon, August 14. The fare will be $8.65 on the certificate plan, with a three-fifths rate returning by the same route. The rate for staterooms on the Fall River line is $1.00 and $2.00 in each direction, according to location of room. Members from Western Massachusetts and Connecticut that go direct to New York City will kindly arrange to connect there with the train. Anyone desiring to join the Boston party should notify W. A. Hastings, care of Boston Flower Exchange, C. Park street, Boston, Mass., state vice-president S. A. F., before August 11, that stateroom and passage may be secured.

Chicago to Baltimore.

The Chicago Florists' Club, at its regular meeting July 6, decided in favor of the Monon Railroad for the Baltimore convention trip and arrangements have been completed by which the President's Special will leave Chicago Sunday, August 13, at 11:30 p. m., arriving at Cincinnati at 7:50 Monday morning. There will be a stop-over at Cincinnati for a couple of hours to get together the various delegations from Louisville, St. Louis, Peoria, Indianapolis, Dayton, Toledo, Detroit and other nearby points. From Cincinnati the President's Special will proceed direct to Baltimore, arriving Monday at 11:00 p. m. The fare for the round trip, Chicago to Norfolk, via Baltimore, good for 30 days, is $27.00. Lower berths, one way, are $4.50, upper berths $3.60. Many side trips can be arranged by rail or water to Washington, Philadelphia, New York, Boston, etc., at small additional cost. Reservations will be made at Chicago by Herbert Wiley, General Agent Passenger Department, Monon Railroad, 104 South Clark street. Telephone, Harrison 3309.

KENNICOTT BROS., 163 N. Wabash Ave, Chicago

NOTICE

—OF—

STOCKHOLDERS MEETING

CHICAGO, July 13, 1911.

Stockholders of the American Florist Company:

You are hereby notified that the annual meeting of the stockholders of the American Florist Company will be held in the Hotel Belvidere, Charles and Chase Streets, Baltimore, Md., Wednesday, August 16, 1911, at 3 o'clock p. m., for the purpose of electing directors and officers for the ensuing term and for the transaction of such other business as may come before the meeting.

J. C. VAUGHAN, Pres
M. BARKER, Sec'y.

Washington.

GOOD STOCK STILL SCARCER.

The condition of business remains practically unchanged, but the scarcity of even passably good stock is more pronounced. When it is considered that about all that is doing is in funeral work it will be readily understood that there is a miserable supply of stock. A few asters have appeared on the market, mostly greenhouse stock. No flowers have yet materialized on the field planted asters and though there has of late been plenty of rain, it seems doubtful at this time whether or not the plants that received such a fierce scorching during the hot spell will eventually make a crop worth anything. With much cooler weather and continued showers it is hoped that conditions will become no worse; they are at least much improved for the men who bear the burden and heat of the day under glass.

NOTES.

It is stated on good authority that J. H. Small & Sons will within a year remove from their present location, corner of Fourteenth and G streets N. W., to a new building now in course of erection on H street near Fourteenth opposite the Shoreham hotel. The building which they now occupy is a part of the Small estate. They have been in that location for a good many years, but the tendency of business is now as in the days of the fathers, toward the northwest. Incidentally it may be stated that the designers of the capital expected the city to spread eastward and that is why there is yet an east and a west front to the capitol. In brief, the calculations of the solons were upset, for the city to use Topsy's definition, "Just growed" west and northwest.

Joseph G. Schattmaier, head designer for Z. D. Blacksiston, starts this week on an extended eastern trip. He will visit Detroit and call on Philip Breitmeyer, Cleveland, and look over the activities of The J. M. Gasser Co., Toronto, where he expects to meet genial John H. Dunlop and possibly talk reciprocity which, depending on the viewpoint, is a fruitful theme or a fruitful scheme, it may be both. Mr. Schattmaier will also visit Niagara Falls and other points of interest.

The next meeting of the Florists' Club of Washington will be held on the lawn at W. F. Gude's residence on the night of August 1.

The Washington team went to Baltimore on the night of July 22 and rolled with the Baltimore bowling team. Washington won.

A. F. F.

Salt Lake City, Utah.

The greenhousemen are busy with the work of planting carnations and repairing their places at present, the storemen are taking it easy as there is not much of a rush in the retail business.

NOTES.

Many are taking advantage of the dull season to go upon vacations. Mr. Gray of the Huddart Floral Co. has gone to Idaho, hoping to benefit Mrs. Gray's health. They expect to be away from Salt Lake City for three months.

The Miller Floral Co. of Farmington have finished planting roses and they look excellent. They will begin at once the erection of a large house in which they will grow carnations.

Olif Lingreen of Bountiful has finished planting his roses and will now turn his attention to carnations.

UINTA.

HARTFORD, CONN.—J. Albert Brodrib is to erect a new greenhouse on Greenfield street, 28x125 feet with concrete foundations.

BASSETT & WASHBURN,

Office and Store: 131 N. Wabash Ave., Chicago. Greenhouses: Hinsdale, Illinois.

Chicago.

STOCK A LITTLE MORE PLENTIFUL.

The receipts of stock at the various stores the past week have gradually increased in many lines. Asters are in much larger receipt and roses are being received in larger supply. American Beauty is quite short and it is with difficulty that a good sized order is filled. Of other roses the supply is on the increase and the quality has improved considerably. The new crop is beginning to come in and the quality is improving rapidly. Richmond is in very good shape with some of the growers, some very fine blooms being obtainable. And there are also being received quite a quantity of Mrs. Aaron Ward. Killarney are of good color and of good quality, and some very fine White Killarney are to be had. There are not many Kaiserins to be seen, most of the growers now depending upon White Killarney. A few carnations are to be found, but there will be no quantity until the newly planted stock begins to bloom. Asters are now coming in well, but many are of inferior grade, the effects of the long continued hot weather still showing, but some very good flowers are obtainable and they bring good prices. Lily of the valley is in good supply and some of excellent quality. Lilies, both longiflorum and speciosum, are to be had and the quality is good. Gladioli are especially good, in fact, about the best flowers on the market and are coming in more freely. The heavy rain of July 21 will materially increase the cut and quality. There are still good receipts of orchids, as many as the demand calls for. Sweet peas are not up to the usual standard. The flowers are good, but the bulk of the crop is very short stemmed. Trade is none too active and the Baltimore convention is the theme of conversation, now that the annual picnic is a matter of history.

NOTES.

Phil Foley had to postpone his proposed St. Louis trip at the last moment on account of pressure of business. For the same reason his fishing season has been cut away to thin air this year and the hot weather has prevented him from even dreaming about pickerel and bass, pike and muskies. Catch him at meals, the only time possible these busy days, he gives off fishing lore with Waltonian volubility, but it is all vaguely reminiscent, hazy as of the far past, and seems unreal without the bronzed epiderm and unmixed content that attend the fishermen of 1911. Phil does not recall that he ever used chips for bait, if he could get minnows. The catch with chips is not good eating.

Miss Pearson, the efficient stenographer, is back from her vacation and is again "tickling the ivories" at Vaughan & Sperry's store. Max Ringer is now on the list of absentees and will be followed later by A. L. Vaughan who is planning on spending his vacation in Michigan. No doubt one of the young growers in this vicinity will regret to hear that Miss Paradise, the cashier, is to leave soon for her home in Marquette, Mich.

The new houses that the Des Plaines Floral Co. is building this season are, under the supervision of John Prickett, rapidly being completed. The field grown carnation plants seen at this place are in splendid condition, especially Washington, the popular new variety.

Frank Johnson of the A. L. Randall Co. states that business is as good as could be expected for this time of the year. Casmer Genza, assistant cashier, has returned from a most enjoyable visit to Milwaukee and is again attending to his duties at the store.

Joe Weis of the J. A. Budlong force returned July 24 from a most enjoyable visit at Tomahawk Lake, Wis. Joe lived up to his reputation as a fisherman by sending some fine specimens of the finny tribe to the store, where they were seen on July 20.

Weiland & Risch are now busy getting in their carnations which will wind up the planting season. If this firm has not forgotten the secret of growing Killarney roses, their customers can look for some unusually good stock the coming season.

Frank Pasnkiet, assistant shipping clerk at the Wietor Bros.' store, left Monday, July 24, on his vacation. Charles Drissler has returned from a most enjoyable visit at Clear Lake, Wis.

H. C. Blewitt says that the bath treatments which he recently took at Benton Harbor, Mich., did not help him very much, for he is still troubled with rheumatism.

William Graff, formerly with Kennicott Bros. Co., is now in the employ of the Chicago Flower Growers' Association, having entered upon his duties July 24.

A. E. Hunt is busy at his place in Evanston superintending the erection of two new greenhouses, one 24x130 and the other 24x100 feet.

Peter Srocyniski is planning on enlarging his greenhouse plant on North Harding avenue. The addition is to be four houses 25x112 feet.

J. E. Franke and wife will leave for Thunder Lake, Mich., August 1, where they will spend a month looking over their timber claims.

Frank Hagen has charge of the George Reinberg store while Robert Northam is away on his vacation.

Hoerber Bros. are supplying their customers with an exceptionally fine grade of Killarney roses.

Julius Zschau is making preparations to build a new greenhouse 20x100 feet.

Hunt Bros. of Park Ridge are cutting a good grade of asters.

Can supply them all the Year
Once tried you will have no other

The George M. Garland Co. is experiencing a very prosperous season and judging from the many orders that are received the next few months promise to be very busy ones. J. B. Gray who has entered the employ of this concern as draughtsman, is proving to be of valuable assistance during the rush. This firm has the contract to furnish the material for the following orders: Brown Floral Co., Canton, O., three houses, 35x200 feet; Fargo Floral Co., Fargo, N. D., two houses, 34x100 feet; A. N. Kinsman, Austin, Minn., one house, 27x106 feet. The proprietors are so confident that the Garland handy truck, which has been placed on the market, is going to be a success, that they are shipping them out express prepaid to the growers for 30 days' trial. The cost is so small and the truck so handy that it will soon be in use in a large number of the greenhouses throughout the country. The truck will be sent free for trial to any address upon request.

The Chicago Flowers Growers' Association's new store at 176 North Michigan avenue is rapidly taking on a business-like appearance, the interior has been newly painted, the ice-box and tables installed and other necessary changes are being rapidly made. Everything will be in readiness for August 1 when the store will open with a full and complete line of cut flowers. J. F. Kidwell, president of the association, says that everything will be sold strictly at wholesale and that all other orders entrusted to their care would be filled through the florist nearest the point of destination. Otto W. Frese, the hustling manager, is mailing invitations to the local florists requesting them to be present at a "smoke-talk" on the opening day, when the officers and directors will endeavor to entertain them.

A. G. Kunderd of Goshen, Ind., had a beautiful display of seedling gladioli at the J. B. Deamud Co.'s store this week which was greatly admired by all who saw them. They certainly were very beautiful and the bloom and colors were worthy of all the praise they received. Mr. Kunderd took a great deal of well deserved pride in showing the flowers. There were seven vases containing some 60 spikes, and the light pink and white shades were particularly attractive. Some especially brilliant reds and a magnificent yellow were also noted.

The President's special will leave Chicago on Sunday, August 13, at 11:30 p. m. on the Monon Railroad, stopping at Cincinnati enroute to gather in the delegations from other west and southwestern points. The train is due to reach Baltimore at 11 p. m. Monday night. A large delegation is expected to go from this city to accompany President Asmus.

The large shipments of cat-tails, Typha latifolia, that John Krutchen is receiving are sold to the local trade almost as soon as they reach the store. This reed with its long round stems and sheathing leaves helps considerably in giving the window displays a wild and wood-like appearance.

Bob Newcomb is brightening the air in the stores upon his return to this city from his business travels. His drummers' tales always provoke a laugh and he is a welcome visitor, and when that light suit and pleasant smile appears he is immediately the center of an interested audience.

John Degnan has returned to the Winterson Seed Store from his vacation with an added color and he says he had a most enjoyable time. The fishing was good and he proved himself an ardent follower of Isaak Walton by landing at least one of the finny tribe.

"The Busiest House in Chicago."

J. B. DEAMUD CO.

160 N. Wabash Ave., CHICAGO.

Long Distance Phone, Central 3155.

Anthony Gabel, one of the popular young carnation growers at the Poehlmann Bros. Co.'s plant at Morton Grove, spends his day off at the White Sox ball park. His many friends are wondering what has become of his bunch of ball tossers.

August Lange writes from Colorado Springs: "Pike's Peak continues to be the center of attraction in these parts. The most popular way to reach the summit is by way of cog railway. Walking is good, however, and burro-back next best."

Mrs. Adolph Kunkle has returned from a pleasure and business trip to Milwaukee, Wis. While there she called on some of her fellow florists, gaining many points of information which she hopes to put to use.

Schiller the Florist was relieved of his telephone and incidentally the money box attached thereto when a smooth spoken blonde chap took the telephone and box under pretext of putting in a new one.

H. Natzke, at 2336 W. 19th street, is making arrangements to tear down one of his greenhouses and erect a three-story brick building. The plans call for two stores, one of which will be occupied by him.

Chas. L. Washburn is suffering from an injury to the little finger of his right hand. The member is badly swollen, probably from the scratch of a rose thorn, and is causing him many sleepless nights.

ROSES, our selection, - $3.00 per 100

WIETOR BROS., 162 N. Wabash Ave., Chicago

The stock at the George Wittbold Co.'s establishment at Edgebrook is in splendid condition and some of the finest carnation and chrysanthemum plants we ever had the pleasure of looking upon were seen here. The dahlias are also in good condition and just commencing to bloom. The recent rain did wonders with the outdoor plants and nursery stock and everything is now looking at its best and is certainly a credit to the grower. The demand for plants, palms and ferns is fairly good and large numbers are shipped out daily. Otto Wittbold, the enterprising superintendent, has just purchased a new $260 Remington typewriter with a Wahl adding machine attachment. He is well pleased with it and thinks it would be just the machine for commission men to use, as it adds, subtracts and tabulates.

Albert E. Radke, a brother of the well-known grower of Maywood, has returned from a long stay in West Virginia. He has evidently come to the conclusion that this is the part of the country in which to live, for he will make his home here and build a new range of greenhouses in Maywood.

N. J. Wietor says that they have finished planting their carnations at the greenhouses. Some 80,000 plants, which are better than usual this year, have been set out. If his prediction comes true his firm will be among the fortunate ones to have an early crop.

The S. Wilks Mfg. Co. is receiving inquiries from all parts of the country in regard to their hot water boilers. An illustrated catalog describing their boilers, has been issued and will be mailed free to any one of our readers upon request.

H. E. Philpott will leave in a few days to attend the convention of the Canadian Horticultural Association to be held at Ottawa, Can., returning in time to accompany the local delegation to the convention at Baltimore.

John Poehlmann is busy these days supplying the customers of Poehlmann Bros. Co. with a fancy grade of Richmond roses. This rose is of exceptionally good quality and are among the best to be found in the market.

Henry Van Gelder recovered sufficiently from his recent illness to be at the store July 24, much to the relief of his mother and friends, who had feared that his condition might prove serious.

Headquarters for **ORCHIDS** and all Fancy Stock

CHAS. W. McKELLAR,

162 N. Wabash Avenue, CHICAGO.

Mention the American Florist when writing

Ben O'Conner of the Kyle & Foerster force is back from his vacation in Englewood. H. Rowoldt, the efficient bookkeeper, will leave soon to visit his home in Little Rock, Ark.

Lawrence A. Jensen, who recently opened the Jensen Floral Shop on Chicago avenue, says that business is very good for the summer months, much better than he expected.

Wm. Duntemann and family will leave soon for a brief visit at Kilbourn, Wis., after which they will enjoy an auto ride to St. Louis and other Missouri towns.

Max H. Awizzus, better known as E. C. Amling's "Killarney Kid," will leave this week to join his wife, who is visiting relatives in New Castle, Pa.

Philip Breitmeyer, Detroit, Mich., was in the city this week looking over the stores with a view to securing pointers for his new flower shop.

The Batavia Greenhouse Co. is cutting some very good American Beauty roses, and Mrs. Francis King, Augusta and America gladioli.

Warren Garland is deriving much pleasure from his new Ford automobile by making frequent trips to and from the city.

A local wholesale house received word that Burr Bros. have opened a store in Rockford with W. F. Hiser in charge.

Chas. W. McKellar says the supply of orchids is somewhat short, cattleya gigas now commencing to go off crop.

John Ziska, Jr., has returned from a week's visit with friends and relatives at Oxford Junction, Ia.

The Northwestern Floral Co. of Gross Point is booking orders for field grown carnation plants.

Louis Wittbold and family are having a most enjoyable visit with relatives in Wheeling.

C. Young and a party of friends from St. Louis arrived in this city by auto on July 22.

August Poehlmann and wife and family are at Lake Geneva on vacation.

John and Adolph Poehlmann have ordered new automobiles for family use.

Mrs. Otto W. Frese is ill in the Lake View hospital.

Visitors: J. P. Jorgensen, Minneapolis, Minn.; Mrs. E. E. Shed, Valparaiso, Ind.; Chas. Frueh and son, Saginaw, Mich.; A. Rice, Minneapolis, Minn.; H. B. Dorner, Urbana.

Chicago Florists' Club Picnic.

The annual picnic of the Florists' Club, held at Ehrhardt's grove, Park Ridge, July 23, was largely attended, about 200 people being present. Although the spirits of the picknickers were somewhat dampened by the heavy rain which was falling when the trains left the station, everyone reports having had a most enjoyable time. Fortunately, the rain ceased in the afternoon, which allowed the several contests to take place as scheduled. Allie Zech, chairman of the sports and pastimes committee, says that financially, the picnic was a great success, the receipts of the day being large enough to pay all expenses. The winners in the various contests were as follows:

Girls, 6 years and under, 25 yards—L. Kohout, first; H. Covert, second.

Boys, 6 years and under, 25 yards—L. Zech, first; F. Ottenbacher, second.

Pie-eating contest—L. Koropp, first; McDonald, second.

The baseball game was very interesting and the team representing the wholesalers trimmed the retailers by a score of 17 to 11. The feature of the game was the pitching of Zech and the batting of Johnson, who made two home runs. The line-up of the teams was as follows:

Wholesale—Lorman 1b, Einweck ss, Johnson 3b, Graff lf, Solvirch 2b, Winterson rf, Krauss cf, Keefe c, Zech p. Retail—Ballouf 1b, Christiansen ss, Schumacher 3b, Enders lf, Olsen 2b, Donahue rf, Koropp cf, Kreutz c, Wolff p.

Detroit.

THE DROUGHT BROKEN.

Never before at this season of the year were flowers of all kinds as scarce as they have been this month. The excessive heat and continued drought are alone responsible for this condition. The total amount of outdoor flowers coming in are inconsiderable and the greenhouse product consists alone of roses and a few poor carnations. The drought now, however, is broken, the entire lower part of the state being favored by copious rains and some improvement is expected in the quantity and quality of outdoor stock soon. The midsummer demand is surprisingly good but the great difficulty in supplying it is the florists' only trouble at present. The aster crop in this district is a failure this year and unless consignments are received from new fields the present local shortage will continue to the serious detriment of the trade.

NOTES.

The Michigan Cut Flower Exchange will tender a complimentary boat ride to all in the trade in this vicinity July 31. The boat will leave the foot of Bates street at 1:30 p. m. The outing will be to Peche Island, where refreshments and some entertainment will be given, returning at 7 p. m.

Walter Taepke and wife are enjoying an extended outing in eastern Canada and will spend much time on the St. Lawrence river before they return.

B. Schroeter is delayed in his new store building because of the reluctance of the present tenant to move until obliged, which will be August 1.

Raleigh Wells of the Michigan Cut Flower Exchange is again at his post after an extended visit at his former home in western Michigan.

A. C. Schmidt, who succeeded R. Kohler in business, reports encouragingly of his trade and is making preparations for fall activity.

Chas. Plumb spends much of his time at his Algonac summer home, where good fishing is his recreation.

Wm. Hielscher and his bride are now nicely fixed in their new home on Rohns avenue.

Visitor: S. S. Skidelsky, Philadelphia, Pa. J. F. S.

NEW YORK.—About 600 members and friends of the Florists' Club of Manhattan attended the annual outing at Rockaway Beach July 16 and made their headquarters at the Seaside house.

St. Louis.

STOCK SCARCE.

There has been quite a call for flowers of all kinds this week, but there is very little coming in. White flowers were in good demand but could not be obtained. Light colored gladioli were cleaned up upon arrival. There is a great scarcity of smilax and retailers are at their wits' end when orders for casket covers come in. A number of the retailers are taking their vacations.

ST. LOUIS FLORISTS' CLUB PICNIC.

The eighteenth annual picnic of the St. Louis Florists' Club was held Thursday, July 20, at Ramona park. The morning was cloudy and a light drizzle kept up until noon all of which had an effect on the attendance, but the sun shone brightly in the afternoon. W. J. Pilcher, F. J. Fillmore and J. J. Beneke were at the gate, and W. C. Smith was on hand early, and every comer, old and young, was presented with a rattle, kindly donated by the W. C. Smith Wholesale Floral Co. and a fan by Geo. H. Angermueller, and lemonade was dispensed free. The music was furnished by Max L. Pelletier's band. The games were very interesting and were in charge of Frank Windler, Al Gumz, Paddy Patton. After the events a group picture was taken by Freshmann. J. F. Ammann of Edwardsville, Ill., Edwin Denker of St. Charles, and B. Escher of Philadelphia, Pa., were among the visitors.

The winners in the several contests were as follows:

Walking match, for growers only—John Connon, president of the club.

Young ladies' race, 25 yards—Annie Bishop.

Girls' race, under 16, 25 yards, box of candy—Elenora Lowe.

Boys' race, under 12, 25 yards, ball and bat—Wheeler Detgen.

Gentlemen's ball throwing contest, knife—Al Gumz.

Ladies' ball throwing contest, bottle of perfume—Mrs. Faerber.

Men's race, 50 yards, pipe—J. J. Beneke.

Young men's race, 100 yards, box of handkerchiefs—Oliver Sanders.

Married ladies' egg and spoon race, 25 yards, fan—Mrs. Oscar Kuehn.

Hop, step and jump for young men, tie pin—Al Gumz.

Tug of war for men, wholesalers, retailers, growers, declared a tie. Box of cigars donated by Belleville florists.

Baseball game, a short game was played, wholesalers declared the winners.

PICNIC NOTES.

Dr. A. S. Halsted, E. H Fehr and E. W. Guy represented Belleville, Ill.

Otto Bruenig and Geo. Schriefer were both missed from the gathering.

The Kirkwood contingent seemed to enjoy themselves, taking part in all the games

NOTES.

Frank Vennemann has seven houses which are planted with carnations, sweet peas and violets in season. He is now cutting Gladioli America and Augusta from outside. J. E. Muldoon, his brother-in-law, has two houses 30x 100 feet, in which he has Enchantress and White Enchantress carnations. He has also a nursery of 10,000 maple trees and privet.

Robert Windler has two houses 26x 100 feet planted to chrysanthemums in fine condition of the following varieties: Clementine, Touset, Yellow Touset, Col. D. Appleton, W. H. Chadwick and Dr. Enguehart. He is a good grower and has been very successful.

F. H. Weber, state vice-president of the Society of American Florists, is hustling to get new members and pushing the society in Missouri. The Pennsylvania railway has been selected as the route to the convention.

Gustav Vennemann will grow carnations, sweet peas and violets this winter. W. F.

Cleveland.

STOCK MORE PLENTIFUL.

There is a slight increase in the amount of stock received, but no improvement in the quality. Insects are playing havoc with the water lilies; some of them look as though they had been shot to pieces. Sweet peas and carnations remain the same as last week. Asters are not in sufficient supply to meet the demand. Gladioli so far are small and mostly of dark colors. Roses are about equal to the demand in all grades and colors. Funeral work is about the only outlet, and little or nothing has been sold to the street faker for some time.

NOTES

The picnic held at Puritas Springs Park by the Florists' Club was a grand success, nearly all the florists and growers attending, and almost all brought their families. The ball game was won by the retailers, score 12 to 8. All the other athletic events went off without friction of any kind, and everybody had a most enjoyable time. Dancing and bowling occupied most of the time in the evening. The match game of bowling was also won by the retailers.

Kirchner's were heavy buyers on the local market the past few weeks, funeral work and bridal bouquets keeping them very busy.

Miss Jessie Nichols, cashier at Kirchner's, left Monday, July 17, for a two weeks' camp at Silver Lake.

Miss Nettie Heideman of the Cleveland Florists' Exchange is away on a two weeks' vacation. C. F. B.

Cleveland Florists' Club Outing.

The annual picnic of the Cleveland Florists' Club was held at Puritas Springs Thursday, July 20. There were abot 200 men, women and children present and they all had a most enjoyable time. The weather was ideal and the base ball game and athletic events were held on scheduled time. Cash prizes to the amount of $70 were given in the several competitions, the amount being subscribed by the wholesale and retail houses and private individuals. The club furnished the liquid refreshments. The ball nines were composed as follows: Retailers: Peters, c., Graham, p., Knoble, 1st b., Meyers, 2nd b., Wagner, 3d b., Darnell, s. s., Kirchner, l. f., Duncan, c. f., Flynn, r. f. Wholesalers: Findlay, l. f., Bastian, 2nd b., H. Bate, s. s., Wright, c., Smith, 3d b., G. Bate, c. f., Geo. Bate, 1st b., J. Roland, r. f., Lingmen, p. The retailers won by the score of 13 to 8. Following are the winners in the athletic events:

Babies' race, under 5 years—Bud Smith, first; Erma Bate, second.

Girls' race, 5 to 8 years—Georgia Smith, first; Josephine Wassner, second; Estelle Piggott, third.

Boys' race, 5 to 8 years—Will Kramer, first; Allen Kirchner, second; Don Smith, third.

Girls' race, 8 to 12 years—Marie Kramer, first; Helen Hart, second; Maud Borleuf, third.

Boys' race, 8 to 12 years—Geo. Bate, Jr., first; Emment Berger, second; Ralph Traukner, third.

Single ladies' race—Emily Schneider, first; Gertrude Kramer, second; Hertha Stehn, third.

Single men's race—L. Utzinger, Jr., first; R. J. Hughes, second; Chas. Fleming, third.

Married ladies' race—Mrs. Chas. Kirchner, first; Mrs. Gust, Stehn, second; Mrs. Smith, third.

Married men's race—Frank Findley, first; Al Lingmen, second; Chas. Kirchner, third.

Sack race, boys'—Eugene Berger, first; Ernest Berger, second.

Three legged race, men—Frank Findley and Chas. Kirchner, first; Walter Priest and Al Lingmen, second; Guy Bate and Herb. Bate, third.

Hop, skip and jump, standing—H. P. Knoble, first; Frank Findley, second.

Bowling contest: The retailers won from the wholesalers. It would be a shame to mention the scores.

Ladies' Bowling—Mrs. Fred Pontiny, first, 94; Mrs. Padgett, second, 90; Mrs. Duffner, third, 68; Mrs. Kirchner, fourth, 62.

Bowling, second teams—First team: John Kirchner, Fred Panting, Floyd Wright, Jack Rowland, Al Lingmen. Second team: John Blechschmidt, W. Warnke, Herman Hart, Adam Graham, Paul Backhofen. The first team won, 529 to 499.

HOERBER BROS.

Wholesale Growers of Cut Flowers,

Telephone Randolph 2758.

Greenhouses DES PLAINES, ILL.
Store, 162 N. Wabash Avenue CHICAGO

Cincinnati.

SMALL SUPPLY OF STOCK.

The general scarcity of flowers continues unabated. Practically everything available is more or less short in supply. Prices are the highest considering the time of the year they have been for many seasons. The supply of roses has decreased somewhat, while the demand is very good. Lilies are good property and include Easter lilies, L. auratum, rubrum and the like. Gladoli still run very shy of the supply of past years and as a result are bringing top prices. Very few asters arrive as yet and those that come in are mostly white. Some hardy hydrangea and phlox find an easy market. Carnation season is now completely over until the new cut starts for the growers are throwing out the last of the old stock. The green goods supply is ample for all requirements.

FLORISTS' OUTING.

The local florists held their annual outing under the auspices of the bowling club at Coney Island on July 20. About 350, including members of the craft and their families, attended. The day was an ideal one until late in the afternoon, when a hard rain stopped the baseball game after a half inning had been played. This was finished as a bowling contest between the growers and the storemen, in which the former with the assistance of two stars won. Each of the winning team received scarf pins. The winners of the various events and the donors of their prizes was as follows:

Boys' baseball game, won by team captained by Ben George, Jr.

Boys' 100-yard dash, Geo. Culver; prize, glove; Heckman Floral Co.

Sack race, A. Demler; prize, $1.00; P. J. Olinger.

Single girl's race, Miss Marie Hoffmeister; prize, $2.00; Avondale Floral Co.

Men's 100-yard dash, Chas. Windram; prize, cuff links; J. M. McCullough Sons Co.

Married ladies' race, Mrs. Wilhelmi; prize by E. G. Gillett.

Senior men's race, Ed. Murphy; prize, box of cigars; R. Witterstaetter.

Men's tug-of-war, won by team captained by Lou Pfeiffer, with the aid of C. E. Critchell's athletic self; prize, cigars; Frank W. Ball.

Men's mile run, Chas. Ludwig, first; Chas. Windram, second; prizes, silk umbrella, C. E. Critchell; and scarf pin, J. M. McCullough Sons Co.

Bowling (ladies), highest score, Mrs. Ehland, first; prize, La Valliere, L. H. Kyrk. Mrs. Pfeiffer, second; prize, veil pin; John Jennings. Booby prize, Mrs. R. C. Witterstaetter, box of toy ten pins; (men's) Wm. Schumann, first prize, $5.00; Wm. Sunderbruch, second prize, leather bowling shoes, Ray Murphy; Ray Murphy, third prize, watch fob, C. H. & O. H. Hoffmeister; Al. Lunderbruch, fourth prize, box of stogies, Al. Horning. Booby prize, Ed. Horning, box of toy ten pins. Highest score, R. C. Witterstaetter, 203; prize, 50 rooted cuttings of the new Delhi carnation, Wm. Murphy. Highest number of strikes and spares in series of three games: Wm. Schumann, first, prize fountain pen, Lawrence Fritz; Ray Murphy, second, prize knife, J. M. McCullough's Sons Co.

The mile run furnished a most exciting finish. But six inches separated first and second men. The pace had been a very gruelling one; in fact, competent judges said it was fast enough for a quarter mile dash. The outing, judging from "boasts" on all sides, was an unqualified success.

NOTES.

P. J. Olinger spent several days of last week with relatives at Chicago.

FLOWERS STILL SCARCE.

Conditions are about the same as our last report, but trade is still good and flowers are scarce. Roses are selling well, the quality is not up to the usual standard but after passing through the heat the plants have, little else could be expected. A few growers are sending in asters, the quality is far behind that of former years, but they are sold quickly without any remarks about the price. It is many years since the trade in July has been so good and the growers have taken advantage of it. The markets are practically cleaned out by eight o'clock.

NOTES.

A party of 28 headed and chaperoned by Commodore Hastings left the flower market Friday morning early for a fishing trip in deep water. At Swampscott they boarded the yacht Letter D, some of our most prominent men being numbered in the party. About five miles out the fishing began. Orders were given that no trade talk would be allowed, two 12-pound fish being caught as soon as the anchor was let go. The most expert fishermen in the party were Captain Pierce and Messrs. Comley, Leidman, Gray, Millar, and Wheeler. We refrain from saying who caught the dead fish. Sam Goddard lost a young shark, then he caught hold of the Atlantic cable but couldn't move it. Allan Pierce claimed there wasn't another fish in the Atlantic. Moses Leidman brought one out, caught by the tail. The executive committee immediately went into session and voted that a medal of special design be struck and presented to Moses for the great act. Wheeler caught a gold fish, Captain Pierce caught two weighing 16 pounds, he gave them to Bob McGorum. Bob had nothing, and by the way, he was baiting his hooks, he was fishing for whales or sharks, but Bob claimed if he had had a rod he might have done better. Moses Leidman treated the party to some wine from grapes grown on his private estate in Jerusalem. The Agony Quartet gave a few selections from the old masters. Hastings, Gammon, Boyle and Leidman were the artists. Boyle was the only sick one in the party; he claimed he got seasick trying to get a glimpse of Ireland. Commodore Hastings caught a fine cod. He says he is going to have it embalmed, to take out to Baltimore to show the boys at the convention what can be caught in the old Bay State, and it may be an incentive to have the S. A. F. locate here next August. Hastings, Millar and Leidman saw to it that the inner man was well supplied, and there seldom has been a party that enjoyed themselves so thoroughly as those on board the Letter D that day, but sh—some, it is whispered, went to the fish markets in Boston and bought fish to take home to show their better halves what fine fishermen they were. The prize for the biggest fish caught was divided between Henry Comley and James Millar. May we have another such day in the near future.

Edward Wood of Lexington informs us of a peculiar happening in that town. The owners of bees have practically lost all their honey makers, the insects being poisoned by taking the pollen from sprayed trees, and this has resulted to the disadvantage of the cucumber growers, the vines grow, but the flowers not being pollinated the fruit does not set.

STOCK SCARCE.

There is nothing to add to last week's report. Stock still continues scarce, and will be so until late asters arrive. Lily of the valley is extremely scarce. Greens of all kinds are a glut.

NOTES.

J. B. Smith, McKeesport, started overland to Rochester, N. Y., in his auto and is setting by the wayside at Greenville.

Geo. Marshall is spending a couple of weeks in the tall grass. "Country life is just about right," he says.

Miss Kyle, bookkeeper for The McCallum Co., has returned from two weeks' vacation east.

A. McCoyd, Arcade Florist, is spending two months at his old home in Rhode Island.

Miss McKinly of Randolph & McClements, is taking a quiet rest.

Ed. McCallum is spending week end at Chautauqua.

A. W. Smith Co. is showing a pretty window of lilies.

BUSINESS QUIET.

'Tis scarcely midsummer and everything pertaining to the selling end of the business is almost at a standstill. What little work there is attracts attention for an hour or so in the morning and all is over for the day. There is not much change in the stock offered from that of last week. Eastern American Beauties sell out clean, as they are so much better than the local cutting. Killarneys are poor as a rule, although there are a few specials that find ready sale. My Maryland sells well, as do the Kaiserin and White Killarney, while not a very good color, finds favor with quite a good many. Carnations have given way to asters, which are now to be had in all colors and with good length of stem. Gladioli are seen in quantity and the choicer sorts such as America, Augusta and May, are good sellers. Easter lilies are selling out clean, being popular for funeral sprays. Lily of the valley is poor but is in good demand.

NOTES.

The Robert Craig Co. is enlarging their Norwood plant by the addition of four large houses. Dracænas, crotons and ferns are grown here in large quantities, but the demand in spite of all they can do draws on the supply to such an extent that stocks of the larger sizes appear never to be equal to the orders. It is now proposed to set blocks apart that are not to be drawn upon until they measure up to the standard desired, which will insure the buyers of choice specimen dracænas, crotons and other fine plants a full line if they do not leave ordering too late. Some exceptionally fine Phœnix Rœbelenii are seen and Areca lutescens of the specimen sizes that take us back to the days when the areca was "it," as the palm for all purposes.

Godfrey Aschmann, who keeps up his advertising campaign summer and winter, says his business is very good for the season of the year, orders being received daily for choice araucarias, which are a specialty with him. He has just received an importation of 6,000 plants and is able to offer plants in all stages of growth from 4-in. pots to specimens three feet or more in height. Kentias, cocos, eycas and arecas as well as all the more popular ferns are also good sellers.

The Harris type or sport of the Boston fern is one of the best of the many variations of this nephrolepis. As seen growing at Wm. K. Harris' is most beautiful and why he never introduced it as a new variety has always been the wonder of many in the trade, as it has been seen in the stores in the city for five years at least and has always been a good seller.

Harry and Mrs. Bayersdorfer, who are still abroad, do not forget their friends, who are the recipients of post cards mailed from the various cities on their journey. Many of the new goods selected by Mr. Bayersdorfer are arriving and are wonderful in their variety. Mr. and Mrs. Bayersdorfer will be home the first week in August.

S. S. Pennock-Meehan Co. are enlarging their office quarters. How this business does grow, one addition after another is made, always providing most ample space at the time, but in a short while this is filled and the cry is for more. The cut flower industry is growing and the live ones are helping it along.

The Leo Niessen Co. is having a good sale on field grown carnations, which stock is handled on a large scale.

Berger Bros. say that summer business is ahead of their expectations. Harry Berger is summering in the Maine woods far from the worries of the old Quaker City.

The Joseph Heacock Co. say that oders for fall delivery are coming in very satisfactorily. The large sized kentias as seen here are hard to beat and late comers are nearly always disappointed in finding "sold" signs on stocks of sizes that they particularly wanted.

K.

Indianapolis.

TRADE QUIET.

The summer lull is now on in full force. The retail stores are idle, while the growers are busy,—busy getting in carnations. Most everyone in this vicinity has at least a part of his carnations in by this time. Adolph Bauer has four long benches planted. Albert Pittet has all of his indoors. Asters are becoming more plentiful now and are of good quality. Gladioli are still scarce inasmuch as they are slow to open this year.

NOTES.

The Pahud Floral Co. has abandoned the idea of building up a new place this year. They found that they could not get their material in time. Instead, they are repairing some of their oldest houses so that they will stand the hardships of just one more winter. Next summer there will be a fine large plant where now the old one stands. C. S. Dark, an architect of this city, has drawn elaborate plans for all the green houses and supplementary buildings, including an up-to-date office and store building.

VARIABLE PRICES.

Having for several years been out cutting turf in other boglands, it was not only a pleasant but a deep mine full of complex modern conditions that presented themselves in the New York flower markets July 24 when we started out to gather for the readers of THE AMERICAN FLORIST something worth while. It is 5:45 a. m. at Twenty-sixth street when shades and ghosts and very live relics of the past may be seen as of yore, trundling along with their (to them) most precious baskets of flowers that bloom in July. Wideawake speculators seem to know for a certainty what each basket contains. At six a. m. bang goes the gong, and all the treasures are uncovered. Then there occurs a grabbing and scurrying off with all that is presentable, and between the aforesaid speculator and the omnipresent Greek there is given an atmosphere of false activity, a penny balloon aviation of prices, which benefits only the (in this case) most vital party concerned, that is the poor grower who grubs along year after year and not only carries but sells his own stock. But there is another side to this which seems rather sharp to us, and that is, the stock thus speculated in often drops from two to six cents in value in the course of a few hours. The man who comes from the suburbs, or the early order man in the city who cannot wait, is taken advantage of—but ah! well, what's the use? Of course it's the old story that Saturdays and Mondays are stocking up days and in the majority of cases the rest of the week are retrenching days, and it is not fair to give quotations only for the average, for instance, Harrisii and longiflorum lilies brought as high as ten cents on Saturday. Eight cents was asked this a. m. at 6 o'clock and at nine they could be had for five and six. Gladioli from three to five cents; roses, such as Killarneys, pink and white, and Bridesmaids and Brides, went early at from 50 cents to $4.00 per hundred and you could be sure that no "ringers" got among those at $4.00 per 100. Rather a great mass of those with the requisite length of stem would have to be overhauled in order to select the few at top notch price. In fact, much of the stock we saw were open trash only fit for sidewalk peddlers and was destined to go at any price above 25 cents per 100. We noticed that dark pink Killarney was in demand, not only for its color but for its more apparent stability. Color counts even when there is no business. I found Manager Joe Millang handling the best American Beauties on the market. He quoted specials at 12 to 25 cents, fancies at 10 to 20 cents, extras at eight to 15 cents. All depends on the head or face with roses as with most other things. John Reimels of Woodhaven, L. I., was completely surrounded by a crowd of Greek merchants who demanded a share of his asters. He has the best asters I saw this morning; they are grown on 18-inch and two-feet stems. The seed he says came from a Western firm under the title of "Queen of the Market." He is getting 25 cents a bunch, sometimes three for a $1.00. Talking about asters, although the season has been extremely unfavorable both from black bug and torrid weather, most of the stock offered is very poor and of short stems. Nevertheless, we notice that the same old types are kept in cultivation that the same growers grew 30 years ago. Some people save their own seeds or depend on bargain counter prices, ignoring the demands of the market. There is a tremendous future in New York for high class and well grown stocks and asters. Dahlias are commencing to appear and we hear there is a veritable ocean of them to be cast on the New York market shortly. Those will be the happy days for expressmen and wholesalers. Quite a quantity of Lilium rubrum and L. roseum are to be seen, but very few L. auratum. We saw some pretty Vanda cœrulea and fine cattleyas. The former at a very indefinite price. The latter at from 25 to 75 cents, according to variety and quality. Lily of the valley going at from $1.50 to $3, and so on through the general run of stock the price depends on the spasmodic temper of demand. To specialize is to realize; for instance, at W. F. Sheridan's we see carnations from a man who thinks, though the blooms are of a summery appearance, yet in combination with their stems they are presentable and one can honestly call them by their right name.

BOWLING.

Only four veterans appeared on the club's alleys on July 21, and the scores, which are to count in their averages, were: J. Manda, 124, 161, 159; Shaw, 147, 140, 151; C. W. Scott, 131, 140, 127; Kakuda, 174, 125, 179. We noticed that in other games rolled on the same alleys that night, these same "boys" in almost every game went all the way from 150 to 199, so it would not be safe for any one to consider the low averages recorded. One thing is certain, that a good strong team of bowlers will represent this city at Baltimore, and with the new balls to be presented by the F. R. Pierson Co. to those winning the highest average through the past season. The presentation of these new good luck balls will shortly be the occasion of a delightful little gathering of enthusiasts. It is hoped and naturally expected that some of the principal prizes will be brought here. It is expected that Capt. Chadwick will organize his team next week with a few good substitutes. There is going to be some hot work on the alleys at Baltimore.

NOTES.

It is to the point to talk convention, and it is understood that a good big crowd of New Yorkers will attend at Baltimore; in fact, for attendance and general importance the coming Baltimore convention promises to break all records. It is easy to get there—the center of immense interests and the women and children promise to swell the crowd to an unprecedented figure. All the same in the line of usefulness to all, there is going to be something doing, and if there are any undecided minds they had better get on the cars and not have cause for regrets later. There'll be things to see and lots to learn which will be of priceless value all the year round.

C. W. Scott, John Donaldson, J. Meisem, and Philip Kessler were a merry week-end party entertained by Frank Nicquet at his hospitable home at Patchogue, L. I. The boys didn't visit Medford as some one insinuated, but caught immense lots of fish and various things out on Long Island Sound. This group of good fellows are certainly enjoying this good old summer time. What's the use if one doesn't, anyhow?

One of our interesting characters here, one who was the pioneer in the fern, laurel, pussy willow and daisy trade, has just died under painful circumstances. He was a Frenchman and no one knew him by any name but Charlie. For the past quarter of a century his smiling face and cheery laugh brought light into many a gloom.

Charles Miller, W. F. Sheridan's right hand man, is away with his family for a few weeks at Rockaway. May he bring back the strength of the waves. These and many years of health, is the sincere wish of a multitude of friends.

Charles Millang, David Dean, Jr., and William Siebrecht, Jr., were out in their automobile to view the wonders about Hicksville and report Frank Finger's field of dahlias a grand sight.

Theo. Karampas, St. Marks place, sailed July 22 for a well deserved visit to his home in Greece. Theodore is a member of all the leading Greek fraternities here and is very popular with the trade.

Old reliable every one's friend Geo. Golsner of College Point reports all satisfactory in his specialties, Ulrich, Brunners, Moss roses, and white carnations are his mainstays, and they go well.

We are glad to be able to state that S. S. Butterfield is recovering from his illness and will again be heard from shortly.

HYDRANGEAS

For Summer Flowering

We have an unusually fine lot of Hydrangeas, which have been held dormant all winter. These plants are now in bud and bloom, and will flower in fine shape during July and August. We have a fine lot of **Blue Hydrangeas,** as well as pink. Plants are in splendid shape for immediate use, and will flower during July and August—at a time in the year when they are in the greatest demand. We can furnish these plants in ordinary butter tubs at $2.00 and $3.00 each.

Plants in new cedar tubs, painted green, with handles, as follows: Well budded plants in 14-in. tubs, $3.00 each; 16-in. tubs, $4.00 and $5.00 each.

FERNS

We have an exceptionally fine lot of **Boston Ferns** of the Harrisii type; also a splendid lot of **Pierson Ferns.** Good bushy, well-grown plants in 8-in. pots that will please the most critical buyer, **$1.00 each.**

Lilium Harrisii, The Bermuda Easter Lily.

We offer a selected and carefully grown stock of the original pure Harrisii. There are only one or two lots of bulbs on the island as good as the stock that we offer. We take pleasure in offering this stock, because it will be found to be very superior to the average stock that is generally offered. This is one of the healthiest and cleanest lots, and will give much better satisfaction than the stock usually obtainable. Our customers who had Harrisii from us last year stated it was the best they had received in years. We have only a limited stock, which we are offering, and when stock is exhausted, we shall have no more to offer this season.

Fine selected bulbs, 6-7 inch, 350 to the case, **$16.00** per case, or full 1000 lots at **$45 00** per 1000; 7-9 inch, 200 to the case; **$17.00** per case, or full 1000 lots at **$80.00** per 1000; 9-11 inch, 100 to the case, **$18.00** per case, or full 1000 lots at **$175.00** per 1000,

F. R. PIERSON CO.,

Tarrytown-on-Hudson, New York.

"The Kenilworth Strain" of Giant Pansy Seed

Must Not Be Compared With the Flimsy Trimardeau

It is much larger and of good substance; the immense flowers, of 3½ to 4 inches, are of perfect form, and every tint and shade is produced in striking combinations and endless variations of beautiful colors and markings. It is the result of years of selections. The Stock Plants are taken from many thousands of plants grown for the market. It is rich with shades of brown, bronze, red, mahogany and many others too numerous to mention. **Light, Medium or Dark Mixtures.**

1911 SEEDS NOW READY 2000 Seeds, 50c; 5000 Seeds, $1.00; ¼ ounce, $1.25; ounce, $5.00.

Pansies in Separate Colors

Giant Adonis, beautiful light blue.
Giant Emperor William, ultramarine blue.
Giant King of the Blacks, coal black.
Giant Lord Beaconsfield, violet, shading to white.
Giant Golden Queen, yellow
Giant Golden Yellow, with dark center.
Giant Masterpiece, beautifully ruffled, splendid color.
Giant Red, a fine mixture of red shades.
Giant White, very fine.
Giant White, with large violet center.
Giant Royal Purple, fine large flower.
Giant Orchid-Flowering, rare shades.
Giant Bronze and Copper Shades.
Giant Light Blue, delicate shades of blue.
Giant Dark Blue, deep blue shades.

Trade Packet, each, 25c; any 6 Packets, $1.00; any 11 Packets, $2.00.

RAINBOW is a blend of over 50 of the latest introductions of Giant Pansies of the most beautiful gorgeous colors, blotched, striped, veined, margined, etc. With every $1.00 worth of Pansy Seed, I will send, free, 1000 seeds of Rainbow, and with other amounts in like proportion.

Heacock's Palms and Ferns

Home Grown, Strong, Clean and Well Established

Order Now for Fall Delivery

We grow all our Kentias, above 6-in. sizes, in cedar tubs made especially for us, **avoiding breakage of pots** in shipments and giving better satisfaction to our customers; and while they cost us a great deal more than pots, we sell the plants for the same money. We order these tubs by the carload. With more glass, our stock is much larger than ever before.

When in Philadelphia, call and see our stock before placing your order.

20 minutes ride by rail; 100 trains every weekday; Railway Station Jenkintown.

American Seed Trade Association.

Leonard H. Vaughan, Chicago, President; Marshall H. Duryea, New York, First Vice-President; Edgar Gregory, Marblehead, Mass., Second Vice President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

Next annual convention, June, 1912.

SALSIFY looks as though it would be wanted.

WINTER VETCH seed is in good demand at advanced prices.

CORN crops in the west and northwest are in good condition to date.

GLADIOLUS bulb crops in the United States are suffering from heat and drought.

MIDDLE west onion seed, though hurt to some extent by the hot weather, still looks better than ordinary.

EVERY seedsman is trying to pick up a little beet seed here and there, as it is evident this item will be scarce.

GEO. C. THOMSON, with Northrup, King & Co., Minneapolis, Minn., is in California looking over the seed crops.

HOWARD M. EARL, of W. Atlee Burpee & Co., is making a western inspection trip as far as Utah, and possibly to the coast.

CHICAGO.—The heavy rain of July 21 came too late to help the onion set crops, the great bulk of which was already in the crates or ready to pull.

BURNING heat and drought call attention again to the great importance of some irrigation facilities for emergency use wherever valuable crops are grown.

SEEDSMEN can advise farmer customers, who have had their spring grass and clover sowings burned out, to disc their stubble land now and sow clover and timothy before August 15.

THE seed potato situation is critical. Some Michigan growers believe there is still time, with wet and cooler weather, to make good crops of late varieties, but no one knows where the early kinds will be found.

THE early plantings of garden beans in Michigan are very spotted, in many places poor stands, the result of the early rainy spell. The plants blossomed in the hot weather and the pods are not filling well. Late plantings look promising.

F. H. HENRY, of Henry & Lee, New York, who for the past three months has been actively engaged in the business of L. Boehmer & Co., at Yokohama, Japan, sailed for home July 15.

Dutch Bulb Growers' Society.

The following awards were made at the recent meetings of the floral committee of the Dutch Bulb Growers' Society of Haarlem: Awards of merit for Iris hispanica Amethyst, with fine formed flowers, soft blue and violet; lip light blue, spotted orange and yellow; obtained from seed, to A. van der Eng. Hz at Uitgent. Iris angelica, Alexandre Dumas. Flowers very large, azure blue, spotted dark indigo, lip with a large white spot, striped yellow, obtained from seed to P. Byvoet & Co., at Overveen. Iris Kaempferi Hasaka. Flowers of an extraordinary size, dark purple, obtained from seed, to C. G. von Tubergen Jr. at Haarlem. Anemone single, L'Unique. Flowers salmon-rosy, a very fine color; petals broad and round; obtained from seed, to Poakkum & Kabel at Uitgent.

Nebraska Seed Crops.

FREMONT, July 24.—The most of our corn crop reports so far received show from fair to good stands, also fair growth and condition, but in every case the growers express the need of rain and in some cases report more or less damage to some of the crops but not sufficient damage as yet to cause total failures, although we do not believe favorable conditions from now on will make full crops.

Our vine seed reports confirm the loss of some of our acreage on account of the dry weather and damage from cut worms, bugs, etc. In most cases, however, they have had some moisture and the crops are in a good growing condition. The most damage has been done to the muskmelon and pumpkin crops which for some reason failed to make good stands and in a number of cases some of the crops will prove total failures.

Cucumber, watermelon and squash are faring better and we look for good average crops in most varieties. E.

WATERLOO, July 22.—The entire growing season has been unusually dry, with periods of extreme heat. Crops, however, in our immediate vicinity have been holding their own and doing remarkably well considering conditions. Early sweet corns have been damaged somewhat, later sorts in good shape. Vine seed crops holding up well, with fair setting of fruit. There are some few complaints of grubs injuring winter varieties of squash. All crops need rain. A fair shower two weeks ago relieved conditions, but the ground is getting very dry again. There has been no excessive heat during the past two weeks. R.

Nashville, Tenn.

Trade has been very dull for the past two weeks, only funeral work keeping up to any great degree, but there has been plenty of that. The florists are utilizing the time in great preparations for next season and report everything in fine condition with bright prospects for a plentiful supply of the very best of flowers. Large quantities of bulbous stock have been provided, and there will be no scarcity along these lines.

NOTES.

The Joy Floral Company has laid in a big stock of orchids, finding a good demand for them all through the season. They have made quite a success in growing orchids and will have a more extensive supply than ever before. All of their winter stock is looking fine and they say they never had better outside, notwithstanding the drought, which really affected them very little. They have now for their supply American Beauty roses, asters, Japanese and Harrisii lilies. Gladioli has been plentiful, as well as phlox and outside asters. The inside asters are just beginning to come and will make a plentiful supply very soon.

Geny Bros. say it has been dull with them excepting for funeral work. They have roses, Harrisii lilies, gladioli, asters, and a plentiful supply of double white althea. Their winter stock is coming on magnificently, roses, chrysanthemums and better carnation stock than ever before. Their last new house, 30x200 feet, completed only a short time ago, they have put entirely in carnations and they are the finest ever. They are moving three houses from the old plant to the new, still leaving enough to house their palms in the houses near the store.

McIntyre Bros. are turning their attention more and more to their new place of thirty-six acres. They have all the material, lumber, girders and glass on the place and have begun work on the new greenhouses. In the meantime they are losing no time at the old, but by the same industrious methods which have always characterized them are making ready for a fine supply for the coming season.

Leon Geny, of the firm of Geny Bros., is building him a handsome new residence in the Murphy Addition on Twenty-second avenue in a fashionable locality. It is a two story brick with nine rooms. Mr. Geny has an interesting family of two bright children, a girl and a boy.

Florists' drummers of all kinds have been circulating among the trade.

M. C. D.

DUBUQUE, IA., July 14.—Emanuel Plum, of McCartney, today married Anna Pickel, of Potosi, Wis. The romance began among the green fields of Grant County, Wisconsin, when the branch of the Plum tree and the tendril of the Pickel family were children. Mother Pickel and Mother Plum attended their respective sprigs during the nuptials, at which Judge Buckley officiated.

Baltimore.

VERY LITTLE STOCK ARRIVING.

Business conditions are about the same as reported last week. There is but very little stock arriving and what does come in is far from being first class. It is a difficult matter to obtain any long stemmed roses, for what do arrive are short stemmed and pretty well open. Carnations are no better, the blooms being very small. Phlox is in good supply and sells well. Sweet peas are shortening up, but they still have a good call. Greens are in good demand. Pot plants are moving slowly. Funeral work is about all that is called for among the retailers. The drought has at last been broken and better stock is now looked for, both growers and retailers have had their troubles, but, like all florists, are a good set of fellows, and have made the best of it during the season.

CONVENTION NOTES.

The city is wide awake for the convention and from all reports everything will be in readiness. The merchants will decorate their stores and buildings, everybody has become interested, and for the present all are florists and the delegates will find a warm welcome. We had the pleasure of entertaining many members of the society six years ago when the convention was at Washington, and they had a royal time, but this year we will have the whole society. If anyone is crab or fish hungry take the trip down Chsapeake Bay and he will get his fill.

Annual meeting at Boston Mass., 1911.

Melons and Cucumbers.

Our melons and cucumbers this season have made excellent growth, in fact the best we ever had at this date. This is owing to ample water supplied by overhead pipes. We are careful to start the first vines lengthways of the rows for many reasons. We can cultivate longer, spray easier and prevent twisting by winds, for as soon as two vines meet they lock and no further upsetting is possible. Of all things that damage melons high winds are about the worst for twisting and upsetting is disastrous to vines. In fact, vines resent any handling whatever. They should never be moved in hoeing or handled in any shape. In severely exposed places we always intercrop our vine crops to provide protection. This can be done in numerous ways; we have planted among onions, cabbage, sweet corn and potatoes with success; that is, omit a row or two of the others to allow for the melons. Some people believe that pinching the vines is a benefit. They are mistaken. These days with disease lurking everywhere we must avoid any injury. One of the advantages of spraying is to keep off the striped bugs, as no doubt they spread the wilt disease by biting various plants. Mulching with manure, hay, straw, litter or weeds is very desirable as it retains moisture and provides a hold for the tendrils. After July 15 the Bordeaux spray should go on and be kept up the balance of the season. MARKETMAN.

Davenport, Ia.

There has been very little doing the past two or three weeks, an occasional funeral order being about all, and hardly enough flowers to fill the few orders that did come in. Flowers are flowers in name only, as one-tenth of an inch rain in eight weeks, with the glass hovering around 100° every day, is not very conducive to the growing of first-class blooms. Everything outside has suffered awfully, and plant life has never looked so bad to the writer's knowledge at this time of the year. Where the florist is going to get his cuttings from this fall is at present a mystery, as the stock plants are about the same size as when they were set out, and if anything a little smaller. Asters are coming in, but like everything else grown outside, are very poor. Those grown under glass are fine and of these there will be plenty in another week.

CLUB MEETING

The July meeting of the Florists' Club which was to have been held at the home of Henry Gaethje, was, owing to the serious illness of Mrs. Gaethje, held at the Rock Island Turner Hall, and notwithstanding the torrid weather the meeting was well attended. "Forcing, and Outdoor Culture of Sweet Peas" was the evening's topic. The committee on the annual picnic reported everything in readiness for the largest blowout the club has ever held. The picnic will be held on August 3 at Wm. Knees' summer home on Rock River, and everything to make this a record breaking outing has been provided. T. E.

Los Angeles, Calif.

An important event and one of the greatest interest to California horticulturists was the special meeting of the Los Angeles County Horticultural Association held at the Chamber of Commerce assembly room on July 6. O. E. Essig, chairman of the horticultural commissioners of Ventura county, was the principal speaker and his address on "Insect Pests in Southern California and the Best Methods of Control" was a masterly speech showing that Mr. Essig has a thorough grasp of his subject and is an enthusiast in his work as well as one of the best posted authorities on this extremely important subject. President Theodore Payne opened the meeting and introduced the speaker who in his opening remarks said that while much of the work of his department was still of an experimental nature yet much more was practically of such a character that results were assured given the correct circumstances and conditions. Treating upon the various insects he showed that their manner of feeding had to be taken into consideration when preparing methods for their destruction and gave detailed instructions for the annihilation of various scales, weevils, the codlin moth and other troublesome insects and fungi. The lecturer laid great stress on the importance of arsenate of lead as a poison for biting insects, preferring it to Paris green on account of its greater safety and decreased liability to burn. For contact sprays for sucking insects he described several emulsions and mixtures. We gathered that he preferred the lime-sulphur wash to de-hydrated lime as easier to apply effectively. For mealy bug he recommended carbolic acid emulsion as the most likely to pierce the wooly coat of this troublesome pest. Mr. Essig believes in saving trees wherever possible and deprecates the wholesale slaughter of trees as practised in some sections. He also holds that nurserymen should be advised when any trees are refused admittance to certain sections through quarantine and not that the trees or seedlings should be destroyed indiscriminately. The nurseryman, he thinks, should be given the chance to reship his goods if he wishes to. He also said that he found nurserymen glad to help the commissioners in their work and to cooperate with them, while in the discussion that followed the address local nurserymen spoke highly of the way in which they had been treated by inspectors. By the tone of the complaints that had reached the society it seemed that disgruntled people who had been warned by inspectors to clean up their trees, had not done so and now objected to paying for its being done by the inspectors, were they who were aggrieved and that the trade generally had no "kick coming." A few cranks can make a lot of disturbance and one it appeared was a disappointed applicant for a position as inspector. P. D. Barnhart again repeated his little tale of woe about an inspector mistaking fly specks for scale, a story he has told so often at meetings of the society that we are beginning to know it by heart. J. Dietrich spoke of the considerate treatment he had received at the hands of inspectors in his business as a nurseryman and after a spirited set-to in which the horticultural commissioners' end of it was upheld, Doctor Houghton proposed a vote of thanks to Mr. Essig for his able lecture, which was undoubtedly well deserved and cordially given.

The Nursery Trade

American Association of Nurserymen

J. H. Dayton, Painesville, O., President; W. H. Wyman, North Abington, Mass. Vice-President. John Hall, Rochester, N. Y., Sec'y. Thirty seventh annual convention to be held at Boston, Mass., 1912.

MANCHESTER, CONN. — The Burr Nursery Co. is building a new concrete storehouse 75x100 feet and 16 feet high on Oakland street, which will have a capacity of 10,000 trees and shrubs.

Association of Park Superintendents.

The annual meeting of the American Association of Park Superintendents will be held at the Baltimore Hotel, Kansas City, Mo., August 8-10. Papers will be read by Dr. Ernst C. Meyer on "Uniform Park Accounts and Reports and the National Census Bureau"; J. J. Levison, Forester City Parks, Brooklyn, N. Y., on "Shade Trees"; Dr. Frank Baker, Superintendent Zoological Park, Washington, D. C., on "Architecture of Animal Buildings"; Hon. Henry D. Ashley, Park Commissioner, Kansas City, Mo., on "Parks Are to Cities What Lungs Are to Man"; and Herman W. Merkel on "Insects." A discussion will be held on "Road Construction and Maintenance." Automobile rides will be enjoyed through the parks and boulevards, with luncheon at Budd Park and dinner at Swope Park, and a trolley ride to Leavenworth where the Soldiers' Home, Penitentiary, and Fort Leavenworth will be visited.

Railway Gardening Association.

The fifth annual meeting of the Railway Gardening Association will be held in Chicago August 15-18, 1911. Papers will be read on the following subjects: "Uniformity in Railroad Gardening and How to Bring It About," by E. A. Richardson; "Interesting Railroads in Beautifying Their Station Grounds," by N. S. Dunlop; "Fences, Including Hedges, Where to Use, Material, Maintenance, Etc.," by Joseph Carson; "Sodding and Seed Lawns, Comparative Value, Best Time to Do It," by J. E. Rice; "The Gardeners' Jurisdiction, How Far Beyond the Park Fence Should It Extend?" by R. W. Hutchinson; "How Best to Prevent Stock from Trespassing on Our Grounds," by C. W. Eichling; "Hardy Herbaceous Perennials in Landscape Work," by W. H. Waite; "Plants for Permanent Effect, Extent of Their Use, Varieties," by George E. Kessler; "Should Railroad Companies Purchase or Grow Their Stock?" by F. W. Vail; "Treating Cuts and Banks to Prevent Washing and Sliding," by H. S. Moulder; "Fertilizers," by J. A. Byrne; "Maintaining Parks During Drought," by J. E. Smith. A tour of inspection of the Chicago Parks will be made on Tuesday, August 15, and an inspection of the Burlington Railroad station grounds and Vaughan's nurseries and greenhouses at Western Springs, Ill., on Wednesday, August 16. The Kaiserhof Hotel has been selected as headquarters.

The officers of the association are Patrick Foy, president; J. E. Smith, vice-president; J. S. Butterfield, secretary and treasurer; A. V. Smith, F. W. Vail and H. A. Bode, executive committee.

Viburnums at the Arnold Arboretum.

The Arboretum is indebted for no small part of its early summer beauty, says the Bulletin of Popular Information issued by the Arnold Arboretum, June 27, to four shrubby pieces of native viburnums which have been planted in large numbers through its border plantations. The first of these to flower, Viburnum dentatum, has already shed its flowers which during the summer will be followed by great clusters of bright blue fruits. This is a common roadside and meadow shrub in the northeastern part of the country and, like several of the other American viburnums, it improves with good cultivation, growing larger and producing better foliage and handsomer flowers and fruit. The second of this group of four species, Viburnum cassinoides, is also out of flower. This is a native of swamps and of the northeastern part of the country where it sometimes grows twenty feet high. In cultivation this has proved one of the handsomest of all the viburnums introduced into the Arboretum. The leaves, which are thick and lustrous, vary greatly in size and shape. The flowers are slightly tinged with yellow and are borne in large slightly convex clusters. The fruit is larger than that of the other species mentioned in this bulletin and, at first yellow-green, later becomes bright pink and finally blue-black and covered with a handsome pale bloom, fruits of three colors at a certain period occurring together in the same cluster. The third of these species, Viburnum venosum, is now in full flower. This resembles Viburnum dentatum, but it blooms a couple of weeks later and the young branches and the under surface of the leaves are covered with a thick coat of stellate hairs. This species is found growing naturally only in the neighborhood of the coast from Cape Cod and Nantucket to New Jersey. A larger and handsomer plant, with larger leaves, more showy flowers and larger, later-ripening fruits, is our fourth species, Viburnum Canbyi. This plant appears to be confied to eastern Pennsylvania and to northern Delaware where it is by no means common. This is the last of the viburnums to open its flowers in the Arboretum.

Attention is called to Clematis tangutica. This very hardy climber from the extreme western part of China has been in bloom for the past three weeks and the flowers will continue to open for some time longer. They are vase-shaped and bright clear yellow, and as they fade are succeeded by heads of fruits with long, glistening hairy tails. As the flowers open gradually through several weeks flowers and fruits are on the plant at the same time. Among perfectly hardy vines recently introduced this is one of the best.

Of the plants now in flower in the Arboretum, however, there is not one more beautiful or more worthy of a place in every garden than Magnolia glauca, which is sometimes called the Sweet Bay. For nearly three weeks its cup-shaped, creamy white flowers have been opening and fading and they will continue to open for several weeks. Their fragrance fills the air, especially at sunset.

Brampton, Ont.

The welcome change in the weather which set in last week, lowering the temperature in the greenhouses from 124 to normal summer heat, has proved a great help to the stock, and with gladioli and asters now coming in it is possible to do just a little business in this branch of industry.

NOTES

An event which bespeaks the attention of all interested in flowers is the fourteenth annual convention of the Canadian Horticultural Association which is to be held at St. John's Hall, Ottawa, on Wednesday, Thursday and Friday, August 9-11. Satisfactory arrangements have been made with the customs authorities for exhibits that may come from the United States, and application for space for trade exhibits should be made to E. I. Mepsted, care of Scrim's, Ottawa, Ont. The convention offers many attractions to those in the trade, such as the Parliament buildings, the government experimental farm, the grounds of the governor general's residence, and several good greenhouse plants. A good programme has been arranged and good live topics will be discussed. Splendid arrangements have been made for the entertainment of the members of the association, and it is expected that everyone will endeavor to make the Ottawa convention one of the best in the history of the association.

The Dale estate, having just erected three long houses for violets for the coming season, are about to start on a new cold storage plant which promises to be one of the most up-to-date buildings of the kind ever erected in Canada.

Private gardens and lawns everywhere in this neighborhood suffered severely from the unprecedented weather, whose like we trust we may never experience again. W. G. P.

VAUGHAN'S GIANT PANSIES
Vaughan's Cut Flower Mixture

This mixture is put up by ourselves and contains mostly light colored sorts. We have sold this mixture for several seasons to some of our Chicago cut flower growers, who have realized big returns from the sale of the flowers. Pansies are as easily grown as violets, require less care and bring better returns. **Trade pkt., 50c; ⅛ oz., $1.00; ¼ oz., $2.00; oz., $8.00.**

Vaughan's "Giant Pansy Mixture"

Embraces besides all the separate shades and colors, five special strains not listed elsewhere, and which can only be had in this and our International mixture. This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trimardeau, the splendid Cassier strain. **Trade pkt., 25c; ⅛ oz., 60c; oz., $4.00; ¼ lb., $14.00.**

Vaughan's International Pansies
The World's Best

This is one of the specialties which has established and held the reputation of Vaughan's Flower Seeds, and this is one which we maintain most carefully, not alone as to quality, but in vitality and germination. You are beginning right in Pansy growing when you start with Vaughan's International Mixture. **Trade pkt., 50c; ⅛ oz., $1.50; ½ oz., $5.00; oz., $10.00.**

CINERARIA
Vaughan's Columbian Mixture

Trade pkt. (500 seeds), 50c; 3 trade pkts., $1.40.

Northern Indiana Florists' Association.

The annual meeting of the Northern Indiana Florists' Association was held at Winona Lake July 19. There was a large attendance and a very interesting and successful meeting resulted. The matter of holding a flower show at Fort Wayne the coming fall was freely discussed and in all probability the association will hold an exhibition in that city. The election of officers resulted as follows:

J. D. Connor, Wabash, president.

H. White, N. Manchester, vice-president.

A. J. Wagoner, Columbia City, secretary and treasurer.

Among the noteworthy exhibits was the display of gladioli by the Kundred Gladioli Farm of Goshen. Magnificent specimens were shown of Arizona, pink; Blizzard, white; and Governor Hawley dark red. These were greatly admired and caused much comment. Other varieties that promise to become leaders were Amaryllis No. 1, Red Canna No. 1, King Cardinal, Pink Delight, and Orange King. These were all represented by fine specimen blooms. The banquet was a most enjoyable affair and the steamboat ride on beautiful Winona Lake was such a pleasure, and the charms of the beautiful sheet of water so alluring, that the party lingered longer than was intended, and when it finally did leave it was with a feeling that meetings such as this were too few and too far between.

Among those present were J. J. Martin and wife, North Manchester; Miss Dora Brown, A. G. Kunderd, Anthony Kunderd, Robert Kunderd, Goshen; L. C. Smith, Marion; F. A. King, Winona Lake; C. M. Ten Eyck, Auburn; W. H. Troyer, Elkhart; W. W. Dederich, Warsaw; H. W. Johnson, Kendallville; A. J. Wagoner, James Miner, Columbia City; J. D. Connor, Wabash; John E. Haugh, Anderson; Willis Kenyon, South Bend; Virgin Williams, J. H. Sheldon, Rochester; Simeon Feld, Muncie; George Pastor, Huntington; and Robert Newcomb, representing Vaughan's Seed Store, Chicago.

THE BOOK OF GLADIOLUS

THE first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120 page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

PRICE, POSTPAID, $1.25

AMERICAN FLORIST CO.
440 So. Dearborn St.
CHICAGO.

Montreal.

DRY WEATHER—FLOWERS POOR.

Trade during this hot weather consists chiefly of funeral work, the death rate among the children under five years is said to have been the highest on the continent. Flowers of all description are very poor and of little substance. The advent of asters and sweet peas will relieve the scarcity a little and give better material to work with. Rain is badly needed, vegetables everywhere show signs of the terrible heat and drought.

NOTES.

The Gardeners' and Florists' Club had present at its last meeting a representative of the Davy tree surgeons, who are doing wonderful work at W. W. Ogilvie's Redpath street, (John Walsh, gardener). The method of their work was explained, and possibly Mr. Davy, who at present is visiting the city, will give a lecture before the club. The picnic will be held at High Gate Springs, Vt., Wednesday, July 26, and a large attendance is expected and a good time guaranteed.

The Montreal Horticultural Society has everything ready for their September exhibition. The hall is secured and the prize money guaranteed. The judges for the garden competition are A. J. Bowles, R. Burrows, J. Bennett and Wm. Wilshire.

S. S. Bain mourns the loss of his favorite granddaughter, aged 22 months. The clothes of the child caught fire and she was so severely burned that her death followed.

The tussock moth has greatly damaged the shade trees in the city. A special appropriation was voted by the board of control to fight the pest.

Wm. C. Hall will spend his holidays at Valleyfield and the invitation to St. Agathe is postponed until August.

T. Martel entertained a party of gardeners at St. Agathe July 16. We were sorry to have to miss it.

The St. Bruno Floral Co. has commenced to build at their new plant near the station.

BOBBINK & ATKINS

World's Choicest Florist and Nursery Products.

GEORGE GIATRAS
West Hoboken, N. J.

Araucaria Excelsa, Robusta and Compacta

You will never be sorry. It will pay you well. Do it now, and lay in a stock of Araucarias. Every day is valuable to you, because they grow into money for you.

THE ARAUCARIA

In thine own land thou art a king amongst the forest trees:
From thy green boughs the love birds sing songs wafted on the breeze:
Thy buried feet in burning sand, the tropic sun thy light;
Royal thou art, forever great, in thy majestic might.

And in the cottage home thy charm, like a perpetual spell,
Wins all our love, our cares disarm, our lips thy praises tell:
Among the plants we make our own, thou art fairer than the rest;
Stately and beautiful alone, 'mid others thou art best.

Thy branches are as living hands, full of good cheer for those
Who love to tend the shining strands of earth's well-woven robes,
Whose gems are flowers whose fabric life, whose gifts art always fair.
Yet who yield homage without strife to King Araucaria.

Araucaria Excelsa Our Specialty.

Warning—Don't be deceived. Now, as well as for the last twenty-five years, we hold the ground as leaders in importing, growing and shipping of our specialty, the Araucarias.

Araucaria Excelsa, Robusta compacta, Glauca, and **Palms, etc.** Florists, you all know we are leaders for the last 25 years in importing, growing and shipping of this so well known evergreen decorative plant, the **Araucaria,** more in favor than ever, from Atlantic to Pacific Ocean. To every florist our Araucarias is interesting, therefore no argument is needed for our goods. We know what our customers need, therefore we have provided and set aside special specimen plants, Spring 1910 importation, for lawns, porches, verandas, bungalows, private summer residences, the hotels and boarding houses on the seashore and elsewhere. This plant is one of the most desirable evergreen decorative plants adopted for this above mentioned purposes. For decorative purposes, in connection with palms, they will make a fine display.

Araucaria Excelsa, raised from top cuttings, 6-7 inch pots, 4 to 5 years old 5, 6 and 7 tiers 25, 28, 30, 35, 40-in. in height..... $1.00 $1.25, $1.50, $2.00 to $2.50 each

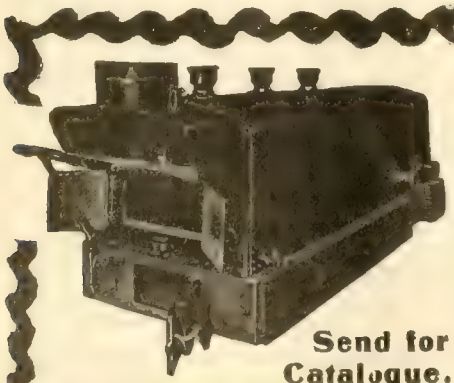
What the Users say



Use Kroeschell Boilers and Kroeschell Generators and Piping System; Satisfaction Guaranteed.

"Received your inquiry of the 9th inst. in regard to **Kroeschell Generator** purchased from you. We can safely say that without your Generator it would be almost impossible to heat our houses with any degree of safety as our expansion tank is but 18 inches above the highest pipe line, and we had **no trouble whatever** in keeping the required temperature during the recent cold spell with the thermometer at 12° below zero. We are glad of the opportunity to recommend your Generator, Boiler and Piping Plans to our fellow florists, knowing that when placed as directed they will give perfect satisfaction. **We did our own piping,** and none of us ever had any experience in that line before."

SEEDS.

Exclusive cultivation of PANSIES since '93 enables us to say that we sell more blooming plants at higher prices than any establishment on the western hemisphere. Books open to your inspection. We have never spent a dollar to advertise our blooming plants. They simply outclass all others. We have done this by selecting the one best for seed and selling the other ninety-nine. Watch this space for more details. A limited quantity of seed is offered 1911 crop, 1-12 oz., $1; oz., $9. STEELE'S WESTERN PANSY GARDENS, Portland, Oregon.

Seeds, onion, peppers, early tomato, cauliflower, beans 97 var.; melons, celery, egg plant, Federico C. Varela, Teneriff, Canary Islands, Spain.

Seed, onions, lettuce, sweet peas, carrot, celery, leek, mustard, parsley, parsnip, radish, salsify. C. C. Morse & Co., 48-56 Jackson St., San Francisco, Calif.

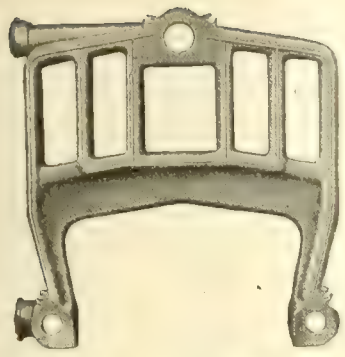
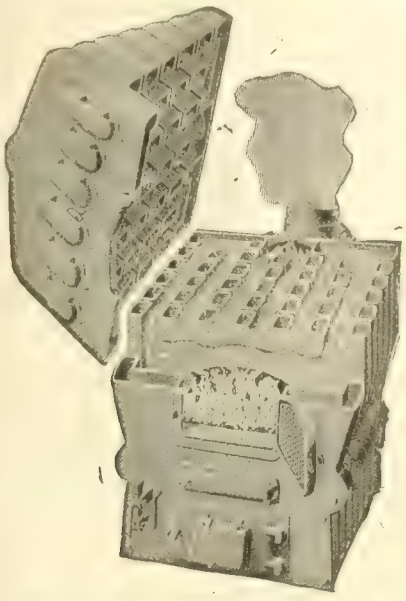
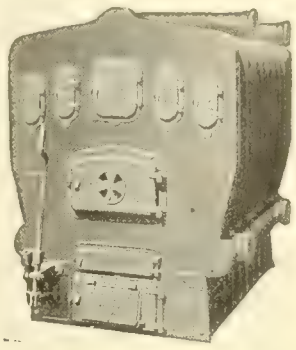
ILLINOIS PIPE & MFG. CO.,
2113 S. Jefferson St., CHICAGO



A section of the new 36 inch Burnham. Note how **low** and broad it is. Hub connections can be furnished on any number of sections wanted.



Seeing is believing—so here is a Burnham with the lid off. There's not another greenhouse boiler made that has a three times back and forth fire travel, which is equivalent to a six times travel in the entire boiler.



And this is that new model Burnham. It has a 36 inch grate. The fire pot is 41 inches wide. It is more economical than the old 36. We have proven it by a series of severe tests.

Every Time You Pay Your Coal Bill It Jars You--Doesn't It?

Now suppose you felt sure that every pound of coal burned gave you the largest possible amount of heat returns, and that you got that heat with the least possible attention—wouldn't you feel a lot freer in mind, to say nothing of the money you would make, by the money you would save? Then why don't you get that kind of a boiler?

A boiler that's built by greenhouse people to meet greenhouse demands—and meets them. A boiler that burns any kind of fuel without change of grate—that has all the latest improvements, from clinker door to damper regulator at the front. A boiler that combines some of the flue qualities of a tubular with the quick heating and enduring points of a cast iron boiler. A boiler with a fire that has no dead spots—a boiler that responds instantly—one that holds a slow fire when you want a slow fire held—a boiler that demands less attention and does more for the attention you give it than any other boiler—a boiler that above all is one of economy—a real, genuine greenhouse boiler. Then buy a "Burnham" and buy it now—and now means NOW with "Burnhams."

It means now for this reason—everybody is pretty much like everybody else when it comes to wanting boilers—they want them with a rush—write hurry up letters—wire us "Why in thunder" and all that sort of thing, but all we do, is ship the boiler in the order's turn. The chap with an order for one stands the same chance as the five boiler man. But why take a chance? Get busy and order it now.

Which are you?

One of the old timey growers, with old methods and heavy shade casting houses—or one of the up-to-date hustling men who turn on the electric light and see things exactly as they are and spend their good dollars for the lightest, most enduring house money can buy? Which? It is a noticeable fact that owners of our Iron Frame Houses are money makers. They have got hold of the new century idea, that you have to spend money to make money. In other words they look upon one of our houses as an investment and not an expense. Stop looking at your business with a candle—get out of the shadow by turning on the full light of Hitchings up-to-date ideas. Send for us at once and we will help you turn them on.

Contains 590 Pages **Price: $3.00 postpaid**

The Winthrop Range at Lenox in the Berkshires

HERE'S the truth. All these houses are not our construction, but that curved eave house and the one next it is. Our idea in showing them was to put particular emphasis on our curved eave construction. You know some people, if they don't pay a big price for a thing, think it can't be good. Then there are others who don't think a thing's worth the money if the price is not squeezed down to the last notch. Then there is still another class who find out **how good a thing is,** and then if it still fills their needs—**they buy it.** Buy it because of its merit, not because of **its price.**

Because of its merits we added this 11 x 75 Curved Eave house to this range.

Just so you won't confuse our Curved Eave construction with several others that look somewhat like it, send for our catalog. When you do, kindly send your employer's name also, and we will see that one is mailed to him on the same day.

Lord and Burnham Co. Factories: Irvington, N. Y. and Des Plaines, Ill. New York St. James Building. Boston Tremont Building. Philadelphia Franklin Bank Bldg. Chicago Rookery Bldg.

MASTICA

MASTICA is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass, as occurs with putty. **Lasts longer than putty.** Easy to apply

Greenhouse Construction.

By Prof. L. R. Taft. Price $1.5(
AMERICAN FLORIST CO.
440 S. Dearborn St., CHICAGO

This is the U Bar the bar that makes U-Bar Greenhouses the Famous Greenhouses They Are.

You can talk about the things cold frames will do for you "until the cows come home," but if you want real flowers, real bedding plants that you can count on being top notch year in and year out—then a greenhouse is the only thing. The only thing because it is the **sure thing.** With a greenhouse your frames become double valuable, as then one helps the other greatly to the advantage of both. With a greenhouse you control temperatures and conditions and can have what you want when you want it. But don't allow anyone to persuade you that any other curved eave house is just as good as the U-Bar. It is not so. We want to show you exactly why. Send for the catalog as a starter.

SUGGESTIONS FOR PLANT GROWERS.

Hydrangeas.

The young stock that was propagated this spring can be grown either for Easter blooming with a single stem or for summer blooming with three or four heads. The plants should be now potted in 4-inch pots and plunged in a frame, where they will receive attention. They should have a good rich soil and a strong, sturdy growth encouraged. For those that are to be bloomed early, as soon as the pot becomes full of roots a little liquid manure will help the formation of a good strong bud. Those that are wanted for summer blooming, the tip can be rubbed out and branches will form. Leave the plants outside until the first light frost, which will harden off the wood, and they can then be stored in a cool house or pit where they will not freeze. Those wanted for Easter will have to be placed in heat by the first of the year.

Begonia Gloire de Lorraine.

The early rooted Begonia Gloire de Lorraine will now need shifting into 3½-inch pots, and should be given a little stronger soil than the young stock was potted in, but the manure used should be well rotted, and, where obtainable, a generous addition of leafmold. As the plants grow, space them out so that they will not become drawn and so that there is a good circulation of air around each plant. They will need a little shade on the glass for a few weeks yet, but it should not be too heavy. As the nights become cool it is well to close the frames down if they are outside, or if in the greenhouse close the ventilators, leaving a small crack of air on, or the house will sweat, which is not at all beneficial to begonias, as it is very apt to cause spot on the leaf. If this occurs remove the leaf at once. Care should be taken in the watering not to wet the foliage any more than possible. The later rooted stock will not need potting up until later, but all the growth possible should be obtained by giving them the best of attention. If the grower has not stock enough on hand, now is the time to purchase before the plants are shifted into large pots, when the price will be higher and the transportation charges increased.

Paper White Narcissus.

The Paper White narcissus are now being received, and as soon as delivered should be unpacked and spread out in flats or on shelves in a cool, dry place. If they remain in the original cases, they are apt to become moist or heated when packed closely. They should be handled carefully and not thrown around so that they become bruised or the outer covering torn off. This covering is a great protection for the bulb, preventing it from drying. Plan how the bulbs are to be flowered, that is, how many are to be brought forward each week, and start at once to box up the first lot and then continue the plantings at the desired intervals. The flats or boxes should be prepared at once, not only for these, but for the other bulbs. It is the general custom to use any old box that can be obtained, and they are, therefore, of different sizes and different depths. They do not pack closely when placed outside, neither do they seem to fit on the bench in an economical manner. Our experience has been rather than to buy a mixed lot of boxes of different sizes, it is better and cheaper to purchase stock at the lumber mill and saw it into the proper length. Get one-half-inch stock, three inches wide for the sides and bottom and one-inch stock the same width for the ends. Saw the ends 12 inches long and the sides 24 inches. This will make a flat 24x13 inches by using four pieces for the bottom and will allow proper drainage. A flat of these dimensions will hold about 50 Paper White narcissus or 60 to 70 tulips, and will cost but little more in the price of the box and can be made with much less labor, and when the boxes are all of one size they can be placed upon the benches with much saving of room. As soon as the bulbs are planted in the flats they should be placed in a dark, cool place and covered with soil or ashes until rooted, when they can be brought into the houses. The early planted bulbs will require good heat to bloom them successfully, much warmer temperature than the later planted bulbs.

Pyrethrums.

An early summer flower that is very showy and beautiful, ranging in colors from white to the deepest scarlet with all the intermediate shades, is the Pyrethrum roseum, and it is being much more grown every year for cut-flower purposes. The best flowers are to be obtained by buying named varieties, but good selected seed will give fair satisfaction and many handsome flowers. The greatest trouble in growing these plants in the north is the danger of winter killing and crown rot during extremely wet spells during hot weather. Seed sown during July and August and wintered in houses or cold frames will produce plants that will flower next summer. Obtain the best seed possible and sow in flats and as soon as large enough pot in 2½-inch pots. These can be grown on in a frame until cold weather comes on, when they can be securely covered or carried into a cool house and wintered under a bench, started in March and planted out as soon as secure from frost, and will flower in June and July.

Sweet Scented Geraniums.

The grower who has a stock of rose or other sweet scented geraniums can turn them into good account by planting them in a bench in the greenhouse and can obtain some fine sprays for winter cutting. This green is very much appreciated by the best trade and there is always a demand in the stores catering to that class for more of this than can be obtained. The sprays are cut 12 to 14 inches long and are used in the boxes of cut flowers. There is also a demand for the leaves, to be placed in the finger-bowls at luncheons. It is easily grown in a cool house and very rapidly makes long sprays fit to cut. The plants can be set about eight inches apart, which will give them plenty of room, provided the sprays are cut as soon as they are long enough for use.

Growing Callas.

ED. AMERICAN FLORIST:—

What is the best calla to grow for cut flowers? Do they bloom better planted in benches or in pots in the fall? J. F. P.

There is but one calla grown for cut flowers, Richardia Africana, but several forms have been named and placed on the market: candidissima, spathe large, pure white; gigantea, plant very large; Godefreyana, dwarf, white and grandiflora, spathe large. The dwarf form nana compacta (Little Gem), which grows but 12 to 14 inches high is sometimes grown for small flowers. Of the larger forms there is but little difference in their blooming, the size of the flowers and growth having caused the separate names.

They will grow equally well in pots or benches but many growers think that the pot grown plants produce more flowers and the bench grown the large blooms. Those grown in benches will not require the attention that pot grown plants will, especially in the spring when the pots will have to be watered copiously and often. W.

LOUISVILLE, KY.—The annual picnic of the Kentucky Society of Florists was held at Stowers' grove Thursday, August 3. Sports and contests were held and a good orchestra and dancing were enjoyed in addition to other amusements.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Sangster's Window Display, Buffalo, N. Y

A window display that was a decided attraction and the topic of everyone's conversation who saw it, and which we illustrate, was arranged in the store of Joseph Sangster, 1291 Jefferson street, Buffalo, N. Y. It represented a wooded scene with its moss-grown log building, a stream of water coursing by, over which was a rustic bridge, with a background of palms and ferns. Mr. Sangster's store is in the flourishing Northeast side district, where he located three years ago, and has built up a nice business. The window received a generous press notice, which it certainly merited. BISON.

F. W. Taylor.

F. W. Taylor, well known in connection with horticulture and agriculture at the St Louis world's fair and more recently identified with irrigation interests in the west, has been appointed director of agriculture in the Philippines, a position somewhat similar to that of secretary of agriculture in the United States.

Summer Decorations.

WHITE POND LILY SUGGESTION.

Make a pond of good size for the center of table, placing around it a low lattice made of square thin wood with the blades painted green. On each outer blade place a miniature electric light; around this miniature fence bank maiden hair ferns in a hedgelike manner, using the Adiantum Farleyense for a mat on the table around the hedge. On the water in the center of table place four white pond lilies in the form of a square, graduating the lilies in twos and threes toward the lattice fence, allowing sufficient space between each of the four groups.

On either end of table place a spiral vase filled with the small cup-like yellow pond lily, using maiden hair ferns for a mat. For corsages use three pond lilies—one open, one green bud and one partly open bud—tie with a yellow gauze ribbon. The electric lights covered with yellow catgut are most effective.

THE GRAPE DECORATION.

Take four small tree trunks or branches measuring about five inches across and about twelve inches high, for corner posts and cover these with maiden hair; on top of each place a cluster of electric lights covered with pink catgut. Suspend a strong wire across from each post covered with green silk ribbon, from which arrange bunches of hot house grapes. This arrangement should have a mirror beneath it to reflect the grapes. Around the base of each post place thick garlands of pink double geraniums with their foliage as a frame work, using maiden hair to finish off the mirror with a tiny garland of the pink geraniums as a finish.

Use pink geraniums for the corsages, made in colonial fashion, using ribbon streamers of the dark rich color of the grapes as a finish.

RED POPPY CENTER PIECE.

Place a large bunch of red poppies in a spiral vase, arranged in colonial style, around this cluster gather loops of green gauze ribbon, allowing several gauze streamers to trail on the table. On these streamers, arrange the green leaves of the poppy. Make a full large mat of poppy leaves. Then tie red satin ribbon of the dark poppy shade placing in the knot about six large poppies. Four of these bow knots are effective with the poppies added. If the table is oblong allow the ribbon ends to extend the entire length of the table letting them fall over the ends. If two widths of red ribbon are to be used place a garland of the green poppy leaves between and falling over the edge. At the end tie a few poppies for a finish. Make colonial bouquets for corsages tied with silver gauze ribbon. A. E. KLUNDER.

New French Cannas.

The following new cannas of merit are noted in one of the French trade papers, Firebird being an introduction of the well known house of Vilmorin-Andrieux & Co. of Paris, and the others new Crozy Cannas:

Firebird (Oiseau de Feu), described as a sensational novelty. The foliage is green and dense, the spike extremely large, the flower the largest known, seven to eight inches in diameter and of a brilliant cardinal red color. Height 3½ feet vigorous growth.

Aime Guilland — 3½-feet, foliage green, flowers very large, sulphur yellow, spotted with red, spike tall and strong.

Mlle. Elisabeth Pottier—3-feet, foliage green, floral spikes forming a bouquet of large lilac rose flowers, the throat and lower petal straw color. Constant and free of bloom.

Louis Reverchon—3½-feet, foliage purplish brown, plant robust and floriferous, spikes large, flowers red and very large, well above the foliage, superb variety.

William Bathes — 3½-feet, broad green foliage, flower spikes large, flowers Indian yellow with veining of carmine, reverse of throat coppery red, very large. Very effective plant.

Mme. Noel Garonne—3½-feet, broad glaucous foliage, very decorative, flower spikes form a bouquet of very large red flowers with violet carmine center. Of good habit and free-blooming.

Docteur Louit—3½-feet, long green foliage, spike strong and dense, large red flowers, throat pale yellow washed with vermilion.

Provincial Horticultural Exhibition.

Under the auspices of the Winnipeg Horticultural Society, the Provincial Horticultural Exhibition, formerly known as the Winnipeg Flower Show, will be held in the Horse Show Amphitheatre, Winnipeg, Man., September 1-4, 1911. Prizes are offered for plants, flowers, fruits and vegetables, among which are the following valuable cups which we illustrate: The Porte & Markle cup, for the best collection of vegetables exhibited by any agricultural or horticultural society within 20 miles of Winnipeg; the Dingwall cup, for the same, by any society outside of 20 miles; the Blackwood, Ltd., cup, for collection of vegetables; the Czerninski cup, for collection of sweet peas for amateurs; the Lawrie Wagon Co. cup for professionals; the D. N. Stevens cup for florist display, and the Fielding cup for collection of vegetables by amateur.

PRIZE CUPS OFFERED BY THE WINNEPEG HORTICULTURAL SOCIETY.

Ardisia Crenulata.

For some reason, comparatively few growers undertake the culture of ardisias, preferring usually to purchase their stock, yet A. crenulata, one of the finest Christmas plants we have, is easily grown if a little thought is given to its culture. Old notions die hard and the old idea that this plant needs a stove temperature is one of the evergreen ones that many growers cannot forget. The plant is a native of high mountains in Mexico and not only are the foliage and berries finer in an ordinary greenhouse temperature than in more warmth, but the latter last better, and one crop hangs on until the next is ready, making a fine, handsome specimen.

Although A. crenulata may be propagated from cuttings of half ripened wood at any season of the year, the most convenient method is from seed. Select the best berries, that is, the largest, ripest and best colored, and sow as early in the new year as possible. Ardisias delight in a fibry, open soil rather than a heavy, sticky loam and where the soil is inclined to be heavy some fibry peat should be mixed with it, also a good proportion of sharp, gritty sand. It is just as well to use this peaty soil from the beginning and fill the seed pans or pots with it. Sow thinly and cover about one-quarter of an inch with fine, sandy soil. The reason for thin sowing is that the young plants may then be left until strong enough to be potted singly before being disturbed. This occurs when they are about one and one-half inches high.

Pot in the 2-inch size and keep them in a moist frame or close house for a couple of weeks until re-established, when they may be inured to the ordinary greenhouse temperature and be grown on quickly yet solidly by allowing plenty of air and light and maintaining a moist atmosphere right along. A few weeks will see these small pots filled with roots, when the plants will need a shift, this time into 6-inch pots. This is perhaps the most dangerous period in the growth of the plants, as they are so apt to be over-watered. Firm potting is essential and it is well to see that they are well soaked with water once, then they will go for a long time without any more than moistening the atmosphere regularly. As they dry out, water again thoroughly and keep this up. Those growers who are always watering in dribblets and never allow their plants to look for moisture may just as well leave ardisias alone, for they will not thrive under such conditions. This will be the fruiting-size pots and very nice little specimens of 8-10 inches high with one whorl of berries will be produced the first season, these making finer specimens if given another season's growth. After the pots are well filled with roots, weak liquid manure may be given at intervals of about 10 days, but this should be discontinued after the berries have attained full size and begin to color.

Those who have old plants left over from Christmas sales or stock that has been used for furnishing or decorating and have become lanky and bare of leaves below need not throw them away. Cut down and grown, in another season they make nice plants again. Allow them to get well on the dry side, much as poinsettias are treated, then cut down to within a couple of inches of the soil and keep dry until young shoots appear. Then water very moderately and spray lightly until a couple of inches of growth have been made. Turn the plants out of the pots, shake away most of the soil and cut back the roots a little to enable them to be placed in pots rather smaller than those in which they have been growing. A warm corner of the house or a close frame is best now for the plants and the shoots should be reduced to one or two and grown on as described for seedling stock, repotting when these pots are full of roots. During summer a night temperature as near 60° as possible is high enough for these plants, while in winter they will hold their berries well in a house that does not go below 45°. It will thus be seen that with very little trouble and practically no expense for fire heat, these pretty and salable plants may easily be grown by anyone having the convenience of an ordinary greenhouse anywhere and southern growers may cultivate them well and cheaply under lath. H. R. R.

MARTINSVILLE IND.—Nixon H. Gano started here ten years ago and has rebuilt and added to his greenhouse plant until he now has over 10,000 feet of glass, the greater part of which he devotes to carnations, producing blooms of high quality. He also makes a specialty of pansies, of which he grows a large quantity.

WINDOW DISPLAY OF JOSEPH SANGSTER, BUFFALO, N. Y.

Reinberg for Governor.

A testimonial banquet was given to Peter Reinberg on the evening of July 27 by the democrats of Chicago, most of whom were from the Twenty-sixth ward, which he represents as alderman, and a five-pointed diamond star was presented as a testimonial. In pinning the star on Mr. Reinberg's coat Mayor Harrison said, "The gold in this badge is not purer than your heart, and the gems are not more brilliant than the smile with which you greet your friends. If the people of Chicago appreciate you at your true worth as a man and as a public official, you will hold a much higher office than you do now." Speeches were made by enthusiastic admirers of the alderman, one of whom predicted that he would be the next democratic governor of Illinois.

Phil Foley Fishin'.

Someone has been slandering Phil Foley. He did go fishing; he did get sunburned till his nose peeled like a dry onion; and he did ship home some fish. As to who caught those fish I refuse to state. Observe the illustrations. In the center he will be seen hard at work fishing; at the left he is again hard at work helping get dinner; at the right he is again hard at work watching for the coffee to boil. If these pictures are not sufficient evidence that Foley went fishing, the readers of THE AMERICAN FLORIST must be very skeptical.

There was another occurrence which caused considerable anxiety, but we succeeded in getting outside of the state without being captured, and we have legal advice that the offense is not extraditable. In explanation it should be stated that the lake where the offense was committed is some four miles long and a mile wide. There is a dam at the lower end which is very carefully watched night and day and is used for regulating the supply of water to operate the paper mills below. Foley was really not to blame for what happened as it was done, not maliciously, but thoughtlessly and carelessly. He went down to bathe one evening—which all will admit is a harmless and proper thing to do—but he threw himself into the water all over at once, and the result was that the dam overflowed and the enormous and unusual rush of water put the paper mill machinery out of commission.

During this trip a few miles away from the lake the sheriff of the county was shot and killed and one of the deputies seriously wounded. One of the assassins was described as being a very large man; Foley was missing at about the time this crime was committed and appeared shortly after with a wild look in his eye and talked incoherently about a monstrous bass that had broken his line and got away with his hook. Fortunately the local authorities did not note any connection between the two, and his friend, guardian and mentor refused to inform on him so that he escaped suspicion.

W. N. R.

Flower Photography.

Texture is the important factor to be considered in the photographing of "Nature's beautiful" and its achievement depends on proper lighting of the specimens themselves, and careful development of the resultant negatives. As at present we are compelled to render in monochrome the various colors encountered in nearly every specimen, the task we have is to present in our print with its limitation to one color or tone, a pleasing likeness of the original.

Alderman Peter Reinberg, Chicago.

Harshness in lighting is to be avoided in all cases, or the results obtained will be of a hard, contrasty nature, lacking in the necessary detail and gradation, so essential in this class of work. Outdoors illumination does not lend itself particularly well to flower studies, as the light cannot be controlled as when working indoors, and the results have a tendency toward flatness, without roundness or relief. Some specimens, however, such as wild flowers, blossoms, and the like when photographed in their natural surroundings necessitate an outdoor exposure; and I have found that the best results can be obtained when photographing this class of subject by taking them in the shade, having the light come from one source as much as possible, by the use of the focusing cloth placed where it will be of advantage. In working indoors one window is the best source of illumination, as light coming from more than one source is apt to give the effect of cross lighting besides making it difficult to render the flowers with the necessary relief. A north window is best on account of the uniformity of the illumination, but other windows can be used as well, if the light is properly controlled.

A piece of cheese-cloth or other similar thin material should be tacked across the window to soften the light, and the flowers to be photographed placed several feet away and slightly to the rear. A small mirror can be used to lighten up the shadows during exposure by moving it so that the portions of the flower in shadow receive the illumination reflected from it. A white piece of cardboard can be used to advantage, however, by placing it on the shadow side, and some distance away, so that the shadows are not illuminated too much, just enough to relieve their intensity.

In order to suggest the texture in the finished prints, this quality should be observed on the ground glass before making an exposure. By moving the camera or flowers, or both, the texture can be observed, as it becomes quite apparent to the eye when the flowers are viewed in a certain angle of light. The stand or support holding the specimens should be quite rigid if there is any amount of motion in the house, as the flowers are apt to quiver if they are not placed on a stand of solid nature, and any vibration means failure, the blurred blossoms attesting this fact. Where I live I have much to contend with on account of numerous cars and passing trains, and I find it difficult to photograph flowers at times. I have an ordinary barrel I use for a stand, well weighted down, with a flat board for a top, and while this arrangement is not the handiest thing in the world, it has the merit of being very rigid.

Before attempting any studies at all, it would perhaps be well to call attention to the fact that flowers have individuality like people, and the aim should be to present each specimen in a manner most consistent with its character. If we crowd them in a

FOLEY HELPING COOK DINNER.

PHIL. FOLEY FISHIN'.

WHY DON'T THAT COFFEE "BILE?"

THE FIFTH REGIMENT ARMORY, BALTIMORE, MD.—S. A. F. CONVENTION HALL.

vase without method or meaning, the results will be far from pleasing, and any individuality the flower possesses will be destroyed. Much can be learned by studying the growing plants, noting that each specimen has habits peculiarly its own. Thus, it would not be convincing to picture the stately lily in any but a characteristic manner, while certain others with a drooping tendency are of opposite character, and should be so presented. Simplicity is a virtue in this class of work, a few well selected specimens photographing far better and producing a more convincing effect than a meaningless jumble of blossoms without apparent motive or arrangement. Often a single specimen makes a most pleasing subject, if photographed in large size and its individuality convincingly presented.

In regard to the lens to be used, I will say that for my use I prefer a rapid rectilinear of 8½-inch focus. An anastigmat has a persistency of focusing on one plane, making it difficult to render all of the planes equally sharp. And to my notion they should be rendered sharp, as we usually view a flower at close range, and the detail is the most apparent thing to the eye, and when we present our studies in monochrome, in the absence of color, all that we have at our command is this detail to suggest the color of the original specimen. A lens of less than 8-inch focus is not to be commended, as it has a tendency to exaggerate the perspective, especially when photographing in large size. Strange as it may seem, the aberration present in the rectilinear lens is a help in this class of work, as the use of a small stop corrects this defect, whereas an anastigmat renders the plane nearest to it sharp, and if any depth is desired a very small stop must be used. The camera should be preferably one with a long draw of bellows, as this will be required if the flowers are to be photographed in large size.

Isochromatic plates are a necessity, even with white flowers, on account of the green leaves. A ray screen or color filter I have found to be unnecessary with the majority of flowers, as its use sometimes gives a flat effect. Where there is yellow or light blue to contend with, the use of the filter is an advantage. I would not advise the photographing of dark and light flowers in the same picture, as the prolonged exposure needed for the dark ones overexposes the light ones almost beyond printing density. As to backgrounds, a medium shade of gray is about the best that I have found, and different depths of shade can be obtained by placing the ground at varying angles to the light. Black backgrounds destroy all of the depth and relief of the subject, and give a cutout appearance to the flowers. Avoid shadows on the background if you wish any relief to your studies, as they destroy the atmosphere so essential in order that the flowers appear to stand out from the ground with due prominence.

If vases be used, select those in harmony with the flowers and of unobtrusive patterns, otherwise they will attract attention from the studies themselves. An ordinary tall glass tumbler can be used to advantage for some subjects. Hyacinths and other small flowers attractively arranged in such a receptacle make pretty studies, and the stems showing through the glass add to the effect. The development of flower negatives should be carried on in a developer very much diluted with water. Personally I prefer M. Q. diluted from four to five times its normal strength. In this dilute solution the density of the negative is deceptive, leading the worker to take it from the developer too soon. A few trials will suffice, however, to give the worker the necessary knowledge. If the negative is too thin, slight intensification will greatly improve matters, as usually the detail has all been coaxed out, and needs merely to be strengthened. I like a thin negative with soft gradations, as I can retain them with a suitable printing paper. Over-development must be guarded against, as it will block up the lights, and give anything but a convincing result. Over-exposure is vastly better than under-exposure, as we can save the former in the development, while with the latter no amount of coaxing will bring out the detail, especially in the shadow portions. Therefore give generous exposures, and develop in the dilute developer. Printing should be done on a soft grade of developing paper, or platinum. Carbon green gives pretty results with certain subjects where much green predominates. —Roy J. Sawyer in American Photography.

Vice-President Vincent.

TELLS ABOUT THE CONVENTION.

In a very short time from now, our city will open to receive you as our guests, coming here from far and near to this the twenty-seventh annual convention of the Society of American Florists, and we stand ready to extend the right hand of fellowship to one and all.

We hope that none will miss this opportunity to be here to renew old friendships and make new friends. We firmly believe our society is growing, and the indications are that this will be one of the best meetings and largest trade exhibits that the society has ever had. So "Come one, come all," and let us have the pleasure of welcoming you in this our beloved city, Baltimore, and when we extend the parting hand, may you return to your homes well repaid for your visit and with pleasant memories of the Baltimore Convention.

The different committees have worked faithfully together with the single idea of making this meeting the most successful in the history of the society. The hotel accommodations will be found ample and in equipment equal to any in the country, and reasonable rates, so that accommodations can be gotten to suit everyone's taste from the costly to the more moderate. Terms and conditions will be found in the trade papers. W. Feast, who is the head of the hotel committee, will be more than pleased to locate any one of you as you may wish if you will communicate with him.

A large amount of space has already been taken in the Armory for exhibition purposes, but more good space is still left, as we have one of the largest and finest exhibition halls in the country, where everyone will be on an equal footing, as all is on one floor. The Armory also contains rooms for the general and committee meeting; also rooms for rest, comfort and convenience. Come and take possession and everything we have is yours for the time being. Also try and bring some new member with you, so that he or she may be benefited, and the society may increase in strength and usefulness. RICHARD VINCENT, JR.

Society of American Florists.

Preliminary programme, twenty-seventh annual meeting and exhibition, Baltimore, Maryland, August 15, 16, 17, 18, 1911.

TUESDAY, AUGUST 15.

Opening Session.

First Day, 2:00 p. m.

Address of Welcome.....
His Honor, the Governor of Maryland.
Address of Welcome.....
His Honor, the Mayor of Baltimore.
Response.....Robert Craig
President Asmus's address.
Report of Officers, Committees, etc.
Report of Committee on President's address.

Discussion.

Miscellaneous Business.
Judging of Trade Exhibits.

Evening Session.

First Day, 7:30 p. m.

President's Reception.
President Asmus wishes it distinctly understood that the reception will be informal and that the most comfortable costume will be the most appropriate.

WEDNESDAY, AUGUST 16.

Morning Session.

Second Day, 9:30 a. m.

Reciprocity with Canada on Floral Products. From the American Standpoint.....P. Welch
From the Canadian Standpoint.....E. I. Mepsted

Discussion.

Advisability of a Spring Meeting.....Wm. F. Kasting

Second Day, 10:30 a. m.

Selection of Next Meeting Place.
Nomination of Officers for 1912.
Report of Judges of Trade Exhibit.
Annual Meeting Ladies' Society of American Florists.

Afternoon Session.

Second Day, 2:30 p. m.

The Private Gardener.....Wm. Duckham

Discussion.

The National Flower Show.....F. R. Pierson

Discussion.

Evening Session.

Second Day, 8:00 p. m.

Illustrated Lecture, "Ornamental Horticulture Abroad".....J. K. M. L. Farquhar

THURSDAY, AUGUST 17.

Morning Session.

Third Day, 9:00 a. m.

Sectional Meetings.
Florists' Telegraph Delivery.
American Gladiolus Society.
American Carnation Society.
American Rose Society.
National Sweet Pea Society.
Florists' Hail Association.

Third Day, 11:00 a. m.

Election of Officers.
Amendments to Constitution and By-Laws to be acted upon.
To amend Article IV, Section 2 to read as follows:
Section 2. Fees and Assessments.—Any eligible person may become a member of the Society on the payment of $5.00, and such payment shall cover the annual dues for the balance of the calendar year.
The annual dues shall be $3.00 per year, payable in advance on the first day of January. Any person may become a life member on payment of $50.00 and be exempt from all further assessments.

Afternoon—No Session.

Third Day.

Bowling Contests and Other Sports.

Evening Session.

Third Day, 8:00 p. m.

In hands of Ladies' Society of American Florists.

FRIDAY, AUGUST 18.

In hands of the Baltimore Gardeners' and Florists' Club.

SPECIAL RATES TO BALTIMORE.

Applications for special rates were made of all traffic associations. The Trunk Line Association has granted a rate of one and three-fifths on the certificate plan. Tickets may be secured not earlier than August 11 and not later than August 16, except from stations where it is possible to reach Baltimore by noon of August 17 when tickets may be secured on that date. Tickets will be good returning up to and including August 22.

In securing your tickets purchase a regular full one-way first-class fare and be sure to request a certificate. Inquire at your home station and ascertain whether certificates and through tickets can be obtained to the place of meeting. If not, purchase your ticket to the nearest point where they may be secured and there purchase a through ticket and certificate. No reduction in fare will be made unless a certificate be secured at the time of the purchase of the ticket.

Immediately upon arrival at convention hall, present your ticket and twenty-five cents to the secretary. A fee of twenty-five cents is charged for each ticket validated. An agent of the association will be present at the office of the secretary on August 16-17, from 9 a. m. to 6 p. m. to validate certificates. No certificate will be signed before or after that date.

When returning, present your certificate at the railway ticket office and a ticket at three-fifths of the regular rate will be furnished you. These certificates are only good provided one hundred or more are presented.

For those living outside of the Trunk Line Association inquiry should be made of your local agent for rates to eastern points. There are many rates in force during August and it is possible to travel at a much reduced fare.

Where members are desirous of joining parties from the larger cities information concerning the trip may be secured by writing to the secretaries of the local florist organizations as follows:

Chicago, Ill.—A. T. Pyfer, 388 Duncan street, Joliet, Ill.

New York, N. Y.—John Young, 101 W. 34th street.

St. Louis, Mo.—J. J. Beneke, 1216 Olive street.

Cincinnati, O.—George Bartlett.

Boston, Mass.—Geo. Cartwright.

THE TRADE EXHIBITION.

The trade exhibition will be held in the Armory which is, without exception, the best and largest hall ever offered for the use of the society. From reports coming from the superintendent the prospects are that the hall will be filled to overflowing. The most gratifying thing about the hall is that all the exhibits will be upon the same floor.

The meetings of the society will also be held in the Armory but in a separate room and free from the usual noise.

"Exhibitors are reminded that the duties of the judges are limited to the consideration of and the making of awards to novelties and imported devices only. Exhibitors are required to make previous entry of all such exhibits with the superintendent in writing." Full rules and regulations, together with rates, may be obtained by addressing "Mack" Richmond, Superintendent, 1813 Pulaski street, Baltimore, Md.

The trade exhibition will be open from the morning of Tuesday, August 15, to 10:00 p. m. of Friday, August 18. During this time no exhibitor will be allowed to pack up or remove any exhibit or part of exhibit until 10:00 p. m., August 18.

Notice is also given that the public will be admitted every evening from 7:00 to 10:00 p. m. and on Monday and Friday afternoons from 2:00 p. m. until closing time. Members should keep this in mind in the transaction of their business.

DUES.

All members should send in their dues in advance and secure their certificates and badges and so avoid the necessity of waiting at the secretary's office to pay their assessment. This will also be a great convenience to the secretary, who has many other duties to perform. Dues cannot be paid while meetings are in progress. A badge and membership receipt are absolutely nec-

JACQUEMINOT ROSES AND SPIREA.

Reproduced from Study by the Late Paul de Longpre.

essary before any individual can sign the roll and receive invitation cards for any of the entertainments. This rule will be strictly enforced. Badges will also be necessary in order to get into the exhibition hall. All not having badges will be required to pay the admission fee.

On receipt of $3.00 from those who have paid their 1910 dues or $5.00 from all others, the secretary will promptly mail to the sender a certificate and badge. Bring your certificate to the convention with you.

CONVENTION NOTES.

Although my two years service as secretary have been pleasant ones, I wish to announce to my friends that I will not be a candidate for re-election. My duties at the university have increased to such an extent that it will be impossible for me to spare the time necessary for the work of the S. A. F. The duties connected with the office of secretary are rapidly increasing and the time is approaching when the secretary will be compelled to devote all his time to the interests of the society. Knowing the importance of the position, I feel that I should make this statement in order that the members have enough time to think over the situation and select a new candidate.

S. A. F. pins will be issued shortly to all life and pioneer members and to those annual members who have paid their dues for 1911. This pin will be necessary for admission to the exhibition hall.

Attention of florists should be called to the fact that to get the benefit of the meetings, the exhibition and the entertainments it will be necessary to be a member of the S. A. F.

By order of the president, a meeting of the executive board is hereby called for 10 o'clock Tuesday, August 15, at the Belvedere Hotel, Baltimore, Md.

Hotel Belvedere—Headquarters.

Room without bath, one person	$2.00 to $2.50
Room without bath, two persons	3.00 to 3.50
Room without bath, two persons, twin beds	4.00
Room with bath, one person	$3.00 and up
Room with bath, two persons	4.00 and up
Room with bath, two persons, twin beds	5.00 and up

Hotel Rennert.

Room without bath, one person	$1.50
Room without bath, two persons	$2.50 to $3.50
Room with bath, one person	2.00 to 2.50
Room with bath, two persons	3.50 to 5.00

Hotel Stafford.

Room without bath, one person	$2.00
Room without bath, two persons, twin beds	3.00 to 3.50
Room with bath, one person	$3.00 to $5.00
Room with bath, two persons	4.00 to 5.00
Twin beds	5.00 to 7.00

H. B. DORNER, Sec'y.

PACKING ROOM AND CELLAR OF THE DALE ESTATE, BRAMPTON, ONT.

Baltimore Items.

The first steam railroad in the world—the Baltimore and Ohio—1828.

First monument to the memory of George Washington.

The first two cruisers of the present navy.

The first silk ribbon mill in America.

The first submarine boat—built by Ross Winans.

The first College of Dental Surgery.

The first iron building—the old "Sun" building.

The first telegraph line—between Baltimore and Washington.

The first telegraphic dispatch, worded "What God has wrought."

The first metal pens used in America.

The first medical society in the United States—organized 1788.

The first gas light company in America.

The first water company in America.

The first electric railway—Baltimore to Hampden.

The first lodge of Odd Fellows—1819.

The oldest shot tower in the United States—still standing.

Baltimore packs more oysters and vegetables than any other city in the world.

Baltimore is the largest manufacturer of straw goods and fertilizers in the United States.

Baltimore has the finest natural forest park in the United States in Druid Hill.

Baltimore built the largest dry dock in the world—The Dewey—now at Manila.

The best hall in America for the purpose of holding exhibitions—60,000 square feet of unobstructed floor space.

The first monument to Christopher Columbus.

The leading clothing manufacturer in the United States.

The Star Spangled Banner was written in Baltimore by Francis Scott Key.

Baltimore has the finest oysters in the world, fresh every day from the Chesapeake Bay.

Baltimore has one of the finest trolley systems in the world, including a line between Baltimore and Washington.

THE PERENNIALS.

Poppies and Lilies.

Now that the bulbs are all past flowering and the foliage nearly matured, it may safely be cut off to improve the appearance of borders and other plants may be put in to take their place and cover the ground, bare spaces do not look well, and annuals are often used with good effect for this purpose, even if sown where they are to bloom or set out of pots or frames. Very many kinds too will be past flowering, and as some of the best garden plants become weed-plants out of place, if allowed to bear seed and come up where they please, the old flowering stems must be cut off as soon as possible. Aquilegias, larkspurs and phlox are apt to cause trouble in this way.

It is a good time now to sow in frames seed of hardy plants, and if kept shaded for a time from hot sun and then transplanted into the borders later when strong enough, they become established before winter and do well next year. It is almost indispensable to have a reserve stock to draw on even in small gardens, and for florists' purposes it is well to sow after the rush of bedding plants is over and there is lots of room in the frames, to handle the young stock in the earlier stages of their growth. Complaints are common this year of seeds not germinating well even when

OFFICE OF THE DALE ESTATE, BRAMPTON, ONT.

purchased from reliable sources, and a comparison of our experiences with that of others brings out the fact that most of our failures are similar. It is a pity that so much poor seed is sold, for this seems to be the trouble, and with hardy plants there is no excuse as they seed freely, and are not costly, but the failure to grow is very often a dear experience to the florist who has to make good from outside sources of supply in plants instead of seeds. It is therefore good practice to save our own seed whenever there is a chance to make sure of a good germination, and add to this a careful selection of strains. Just what is desired may be had and the same varieties perpetuated or improved. Larkspur seed will soon be ripe, and as it is not too late to choose the best forms while in bloom, mark them for seed. We recently cut down several hundred in full bloom in the reserve ground, saving only half a dozen for seed. The rest were too poor to keep, but will bloom again late in summer sufficiently to warrant their being kept until then. Hollyhock seed should be sown now to be sure of strong plants in spring that will bloom next summer. Transplant when large enough in a position where protection can be afforded during winter by placing sash over them or many will die before spring, especially if grown in rich soil.

We have been enjoying lately a lot of Shirley poppies in a vista that is kept in a semi-wild state. These were seeded broadcast last autumn, mixing lot of sand with the seed, four ounces to a water pail of sand. The soil was made good to plant lilies, then the poppy seed thrown on, and they will seed themselves this year, and the experiment will be extended the length of the vista. The lilies will flower after the poppies are past so that the colors will not clash at any time. Had we included L. elegans these would have been in antagonism, as they flower at the same time. There are few ways that one can get so much for a little as with these beautiful strains of annual poppy. We much prefer the pink shades. Sold separate as such there will then be red enough among them for variety. In regard to Lilium elegans, we were reminded recently of this old favorite by seeing it in a front yard, close to a much traveled way. There was not even lawn grass there to set off a beautiful large clump in bloom. It had seemingly been there for years and had increased in a hard clay soil. There are many forms of this lily now with great gradation of color, dwarf, hardy and persistent as a Golden Glow. It should be included in the best dozen lilies and more frequently seen than it is.

The two native species of lily L. Canadense and L. superbum are great garden plants when placed in good moist situations. They will stand a lot of shade too, as they are often found growing in shady woods, but do best in full sun to bring out the best coloring. When one says shade in this connection, it too often means under trees where the soil is poor and very dry at the surface during the hot months. Few things thrive in such locations, least of all the lilies named. They are naturally of the soil that contains plenty of humus and are seen at their best among rhododendrons where these shrubs do well. In such a situation one would not recognize the species owing to the vigor they attain. The two other eastern species, L. Grayi and L. Philadelphicum, are not at all amenable to garden culture. They are untamable and remain wildlings, as do the beautiful Californian species, for they are very beautiful indeed, but with the possible exception of L. pardalinum are not easy to suit when away from their native haunts. This is not difficult to understand if we remember the climatic differences that state contains. We are told it is possible to bathe in the ocean in the morning and throw snowballs in the afternoon of the same day, and in a zone somewhere between the lilies grow. The trouble experienced with many plants in cultivation can be traced to just such conditions and our inability to imitate them, either as to altitude or purely mechanical reasons as soil constituents. On the whole, it is surprising how well we can do most things—if there is money in it.

E. O. ORPET.

BEGONIA GLOIRE DE LORRAINE.

See Page 53.

The Dale Estate, Brampton, Ont.

The Dale Estate of Brampton, Ont., has a wide and well earned reputation throughout the Dominion of Canada and in the United States and we illustrate two of the buildings of the well known firm, the 100-foot packing room from where the immense cut of the large plant is shipped, and the entrance to the office. The building is of reinforced concrete and is covered with Ampelopsis Veitchii, which gives it a very fine appearance throughout the summer.

LOS ANGELES, CALIF.—The annual picnic of the Los Angeles Horticultural Society was held July 23 at the park and nursery of Deiterich & Turner at Montebello, there being about 250 present. Addresses were made by Vice-President H. J. Goudge, George C. Roeding, president of the Pacific Coast Association of Nurserymen, and others.

BEGONIA GLOIRE DE LORRAINE.

Native Trees and Shrubs.

HARMONY IN PLANTING.

Portion of a paper read by E. Bollinger, Lake Forest, Ill., before the Illinois State Horticultural Society.

History informs us that our first parents were placed in a garden and from that until the present history proves that a taste for gardening has kept pace with the progress of civilization and the influence upon the progress of mankind is too well known to dwell upon. Even before the Christian era the gardens of Babylon were noted, the Persians, the Greeks, and the Romans devoted much attention to gardens and public parks. For five centuries, however, or during the dark ages of Europe, the monks were perhaps the only class who kept gardens and cultivated fruits, flowers, herbs and vegetables. After the fifteenth century gardening began to revive from its slumber and the Italian gardens show, until the present day, the skill of the ancient gardener, closely followed by the French and Dutch and English.

The early settlers on American soil had no time nor money to spend on improving their home grounds, much less was there any call for a public park. The struggle for existence was so great that at least for fifty years very little progress was made along those lines, not because they had no sense of beauty, but because there was no time for such work. Indeed it is only within a comparatively short period that landscape gardening has become a fixed profession or art, but so rapid was its progress that today the embellishment of home and public grounds has become a pleasure to lovers of art, and I wish to emphasize that it is impossible to overestimate the influence of environments on the formation of character. The happiness centers in the home life, if the environments are pleasant the busiest man and woman feels at home, rests and soon forgets the worries of business. Next to the home is the public school and its grounds. I think money is well spent to make the schoolhouse and everything about it attractive and beautiful. Here is at least one of the centers of life in every community, city as well as district schools. We try to make good American citizens, and as I said before the influence of environments, neatness, harmony and beauty influence the character, especially that of a child, and it seems to me that it appeals to and awakens the finer nature of the child. Next of importance is the planting of public streets and highways. A most deplorable condition exists along these lines and especially in cities and even the rural districts where trees must give way to the telephone and telegraph wires. Of course we all must have a telephone but I often wonder why would it not be possible to run the wire a few rods away from the roads and save the trees for shade and comfort. The public park in cities and towns is another important factor for the happiness of men. Large cities all over the land made one common mistake by not realizing in due time the necessities of reserving tracts of land to be utilized for park purposes when necessities call for it and when the city's population has become congested, and not only for park purposes but for school grounds and other public buildings, and I would urge every person here tonight, but above all the young men in the prime of life, should opportunities present themselves, use your utmost efforts and help to preserve ample grounds for your public park and buildings, and do not forget the school grounds.

It does not matter how old you are, or how far you are away from home, the surroundings of your home, school and garden remain an endearing and sacred association. For this reason we should endeavor to embellish our home and public grounds the best we know how. Much is said about landscape gardening. If I understand the term right I would say landscape gardening is a combination of the beautiful in nature and a union of natural expression, capable of affording us the highest and most ideal enjoyment to be found, if we desire the most enjoyment from the home life, we must

John Connon, Hamilton, Ont.
President Canadian Horticultural Association.

beautify the home to the fullest possible extent. You may have a costly house, yet if the surrounding grounds are not attractive by nature, the home will not be inviting; the lawn, the flowering shrubs, the different kinds of trees, the various colored flowers are missing; in other words the home lacks the most essential thing, namely harmony. How can we obtain harmony?

The ancients sought to attain this by a studied and elegant regularity of design in their gardens; but the modern landscape gardener, by the creation or improvements of grounds, though of limited extent, exhibits a grace and natural beauty. Gardeners in their work embrace the whole scene about a house, by collecting and combining beautiful forms in trees and shrubs, surfaces of grounds, buildings, drives and walks; in short, he tries to harmonize the beautiful, embodied in a home scene. We attain it by the removal or concealment of everything unkempt and discordant, and by the introduction and preservation of forms pleasing in their expression, their outlines and their fitness for the benefit and happiness; in an orchard we hope to find and satisfy our palate, in the flower garden the eye and the smell, but in the landscape we appeal to that sense of the beautiful, the harmonious and the perfect, which is one of the highest attributes of our nature. This embellishment of nature springs naturally from a love of country life, a desire to render that place attractive, a feeling which at the present time seems more or less strongly fixed in the mind of the average man.

There is no doubt, however, most of its beauty and charms may be enjoyed in five, ten or twenty acres of ground, fortunately situated, and since gardening in America, combined and working in harmony as it is, with our fine sceneries, gives us results more beautiful than those produced abroad, since our lovely residences, the many noble rivers, and multitudes of lakes give the landscape gardener ample opportunities to show his skill and create effects that are often truly enchanting. But if landscape gardening in its proper sense cannot be applied to the embellishment of the smaller cottage, residence in the country or suburban towns, its principles may be studied with advantage, even by those who have only three trees to plant for ornament, or perhaps a few dozen shrubs in front of their house or along the walk or drive, and I hope no one will think his grounds too small to feel willing to add something to the general amount of beauty and harmony for the benefit of his home town, city or village by aiming to embellish his cottage lot in accordance with propriety, not as one so often sees a costly and ridiculous embellishment with no system or harmony, but let us hope and try to seek delight in learning good taste and simplicity of the whole arrangement.

Canadian Horticultural Association.

The fourteenth annual convention of the Canadian Horticultural Association will be held in St. John's hall, Ottawa, Ont., August 9-11. The programme includes a trip to Aylmer, Thursday afternoon, August 10, visiting R. H. Wright and his modern establishment, returning to St. John's hall for early evening session commencing at 6 p. m. On Friday forenoon, August 11, the government house and Graham Bros.' establishment will be visited and in the afternoon the experimental farm and Scrim's greenhouses. Mayor Hopewell, of Ottawa, is scheduled to welcome the visitors and the programme includes President Connon's address, reports of Secretary Wm. C. Hall and Treasurer C. H. Janzen, with papers as follows: "What Can the Private Gardeners Do to Advance Horticulture and Benefit Their Own Position?" by Mr. McVittie, gardener to Sir Henry Pellat, Toronto, Ont.; "What Inducement Does the Future of Horticulture Hold Out for Young Men?" by A. W. Ewing, Woodstock, Ont.; "The Use of Accessories in the Retail Florist's Store," by Wm. C. Hall, Montreal, Que.; "A Retailer's Opinion of Recent Introductions in Flowers and Plants," by A. C. Wilshire, Montreal, Que.; "Fifteen Years' Progress in Horticulture and Its Future Possibilities."

FITCHBURG, MASS.—C. W. Moeckel is erecting a greenhouse 20x75 feet off of Pine street.

HIGHLAND MILLS, N. Y.—Mrs. George A. Merritt has sold the property including the greenhouses to George Percy. He has rented them to Wright & Lynch, who have been conducting the same under the name of G. A. Merritt & Co.

OUTING OF CONNECTICUT NURSERYMEN'S ASSOCIATION AT ELM CITY NURSERY CO.'S, NEW HAVEN, CONN.

Connecticut Nurserymen's Association.

The annual summer outing of the Connecticut Nurserymen's Association was again held this year on the grounds of the Elm City Nursery Co., New Haven, Conn., July 26. The day was perfect in every respect. The recent rains made verdure everywhere fresh and attractive. A special feature at the nursery which was a source of universal interest among the members is a collection of rare Japanese plants which were personally selected last winter in Japan. After journeying through the nursery's fields of well cultivated stock and comparing notes of mutual interest, the members took automobiles to the West-shore, where they liberally feasted. Later, after a short business session, the members gave themselves over generally to the attractions of the shore. All agreed that this season's outing proved to be a most enjoyable one.

Cleveland.

STOCK MORE PLENTIFUL.

Business for July has been better this year than last. Stock is becoming more plentiful. American Beauty roses are very much in demand, the quality being exceptionally fine for summer stock; Kaiserin are again in crop and a little better in quality than heretofore; My Maryland and pink and White Killarney are mostly short-stemmed and sell well; Richmond are not much in demand. A few good carnations are still arriving, but not enough to go around. Sweet peas are plentiful, some very good stock coming in. Greens of all kinds are over-abundant. Asters are beginning to arrive in quantity, but a slight shortage of light colors was noticeable the past week. Good lily of the valley is always to be had, but water lilies will soon be a thing of the past, and Easter lilies of exceptionally fine quality are finding a good market.

NOTES.

L. L. Lamborn of Alliance, O., visited the city July 25. Mr. Lamborn has been on the sick list for some time, and his visit was for the purpose of seeing a specialist relative to his illness. We are pleased to say he is much improved.

T. B. Stroup and family of New Philadelphia passed through Cleveland en route to Michigan in their automobile, July 25. C. F. B.

Baltimore.

GOOD STOCK SCARCE.

The business conditions are about the same as at the last writing. The society folk are most all at their summer homes, or traveling, and there is little doing except funeral work, and this is not as large as it has been lately. Stock is not over-abundant, and that of good quality is very scarce. Asters are more plentiful, but not up to the usual standard, many being of inferior grade. Carnations are very small and are hardly saleable. Roses are having a fairly good call, but the quality is not by any means number one. Gladioli are quite plentiful with good demand. Sweet peas are still to be had but there is but little call for them. Lily of the valley sells well, and greens are having a steady sale.

CLUB MEETING.

The Gardeners' and Florists' Club held a busy meeting July 24. Convention matters were thoroughly discussed, and from the reports made all the arrangements will be completed by the time of the next meeting. It was promised at the meeting last year at Rochester that the convention here would be a record-breaker, and the several committees have worked hard and success is assured. The secretary read the names of the members of the club, the total membership being nearly 200. Two propositions were received and R. L. Graham, Jr., and N. F. Ekas were elected to membership. During the meeting cigars were passed. Previous to the meeting a well-attended session of the executive committee was held, nearly all the chairmen of the several committees being present and everything was reported as being in first-class shape. C. J. Graham of Cleveland was present, talking over the arrangements for the sports and seemed well satisfied with the progress made.

NOTES.

The Maryland Week Exposition will be held in the Fifth Regiment Armory the week of December 4, under the auspices of the Maryland State Horticultural Society, the Cereal and Forage Crop Breeders' Association, the Maryland State Dairymen's Association and Maryland Beekeepers' Association. It is intended to make Maryland week a bouncing success.

George Talbert, the financial secretary of the club, left last week to visit his old home at Didsbury, Manchester, England, expecting to be abroad about six weeks. During his absence C. H. Wagner will perform the duties of his office.

The business men of the city have agreed to decorate their stores during convention week and J. L. Towner, the hustling chairman of the committee, having this matter in charge states that the decoration will be a great feature.

Applications for tickets for the trolley ride and luncheon for the ladies have been mailed, and returns must be made to Mrs. J. J. Perry by August 5.

An attractive electric sign will be placed over the main entrance to the convention hall.

The base-ball team is practising hard for the game to be held.

J. L. T.

THE AMERICAN FLORIST

1885 TWENTY SIXTH YEAR 1911

Subscription, United States and Mexico, $1.00 a year; Canada, $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from those in the trade.

A LILY to a live friend is better than 10 to a corpse.—Ralph M. Ward.

LENOX, MASS.—On account of the backward season, the exhibition of the Lenox Horticultural Society of annuals and perennials has been postponed until August 10.

THE MONON RAILROAD.—As many of our readers are aware, the Monon Railroad has taken quite a conspicuous part in the affairs of the Society of American Florists. In 1885 this was the road selected by the trade for the trip from Chicago and points west to the first convention at Cincinnati. It was at this convention, they say, that the Monon Railroad furnished, without charge, a special train to convey the visitors from Cincinnati to Dayton, to visit the Soldiers' Home, where a bountiful dinner was served by the railroad management of that day. The Monon Railroad carried the Chicago delegation to Cincinnati again on the occasion of the twenty-fifth anniversary convention in 1909 and now the Chicago contingent is planning to start for the Baltimore convention on the same road, the President's Special leaving Sunday, August 13, at 11:30 p. m. Details of the trip will be found elsewhere in this issue.

Chicago to Baltimore.

The Chicago Florists' Club, at its regular meeting July 6, decided in favor of the Monon Railroad for the Baltimore convention trip and arrangements have been completed by which the President's Special will leave Chicago Sunday, August 13, at 11:30 p. m., arriving at Cincinnati at 7:50 Monday morning. There will be a stop-over at Cincinnati for a couple of hours to get together the various delegations from Louisville, St. Louis, Peoria, Indianapolis, Dayton, Toledo, Detroit and other nearby points. From Cincinnati the President's Special will proceed direct

New York to Baltimore.

The committee appointed by the New York Florists' Club, F. H. Traendly, chairman, have arranged for a special train to the S. A. F. convention at Baltimore on the Baltimore & Ohio Railroad, which will leave West Twenty-third street at 11:50 a. m. and the foot of Liberty street at 12 noon, Monday, August 14.

The fare, on the certificate plan, will be $4.60 going and $2.80 returning. Those desirous of joining the delegation should notify Frank H. Traendly, 131 West Twenty-eighth street, that the necessary arrangements for their accommodation may be made.

Boston to Baltimore.

The delegation to the S. A. F. convention at Baltimore will leave Boston by the Fall River Line at 6 p. m. Sunday, August 13, joining with the New York delegation at New York City, which leaves West Twenty-third street at 11:50 a. m. and Liberty street at 12 noon, August 14. The fare will be $8.65 on the certificate plan, with a three-fifths rate returning by the same route. The rate for staterooms on the Fall River line is $1.00 and $2.00 in each direction, according to location of room. Members from Western Massachusetts and Connecticut that go direct to New York City will kindly arrange to connect there with the train. Anyone desiring to join the Boston party should notify W. A. Hastings, care of Boston Flower Exchange, C. Park street, Boston, Mass., state vice-president S. A. F., before August 11, that stateroom and passage may be secured.

Hydrangeas.

ED. AMERICAN FLORIST:—

Will you kindly inform me what is the blooming season for potted hydrangeas? Do they require a rest between flowering seasons? J. F. P.

Minnesota.

Hydrangeas can be bloomed from March to August, depending upon the time when they are started. They will require a rest to properly ripen the wood after making their growth, and should lose nearly all the old foliage. To have them in bloom in March the plants should have obtained a good growth by the fall, and ripened off as early as possible, if not by cool weather by gradually drying off, and started in a cool house as early as January 1, being brought into greater heat as soon as well started. To have them in bloom later, they should be kept in dark, cool locations where they will not grow until it is desired to start them. W.

Baltimore Hotels.

The following are the principal Baltimore hotels, with rates:

Hotel Belvedere—Headquarters.

Room without bath, one person....$2.00 to $2.50

M. BARKER, Sec'y.

The Best Color Chart

For Florists, Seedsmen and Nurserymen.

ERFURT, GERMANY, May 9, 1911.
AMERICAN FLORIST CO., Chicago, U. S. A.,
Dear Sirs:—If you have any copies left of the comparative color plate compiled by F. Schuyler Mathews, I shall be obliged if you will send me one, my copy having somehow got mislaid and I do not like to be without this excellent little production.
Yours truly, ERNST BENARY.

Published and For Sale by the

American Florist Co., 440 S. Dearborn Street, **CHICAGO.**

Price One Dollar, Postpaid.

Wichita, Kans.

The midsummer dullness in the retail trade has surely arrived. Add to this the fact that no rain fell from May 27 to July 9, and that June in addition to being a dry month also broke the record for the hottest June, and for the hottest day for 20 years, and the condition of matters pertaining to the florists' trade will be left to the reader's imagination, for it is too unpleasant a subject for detailed discussion on a hot July day. Outdoor stock has done very poorly in most lines, it being almost impossible to more than keep it alive even with the most careful cultivation and watering. Such stock as sweetpeas have scarcely paid for their room; even when watered at the roots the exceeding dryness of the atmosphere and hot winds ruined the crop for this year. Asters have fared a little better, persistent watering and cultivation kept at least a part of the crop in shape and something may yet come of it, if more favorable conditions prevail. The past two weeks show much improvement in weather conditions. Beginning with an inch of rain and followed by cooler weather and occasional showers, and outdoor stock is in much better condition, and as "hope springs eternal," etc., and the florist being by nature a hopeful being, we are all making the most of it, and working to make the rest of the season redeem as far as possible the damage already done. Chrysanthemum planting in the greenhouses is over and most of the stocks are doing fairly well. The total amount planted will not vary much from last year.

NOTES.

A recent visit to the plant of Chas. P. Mueller found everything in good shape. Mr. Mueller has recently installed a system of sub-irrigation for his outdoor crops. This consists of perforated cement piping arranged as mains and laterals, with valves for controlling the same, all laid below the surface and fed from a central reservoir. Results so far have in the main been fairly satisfactory. Mr. Mueller thinks that the distance apart of laterals must be largely determined by experiment and experience based on the varying characteristics of the soil to be irrigated. He is changing his carnation houses from solid beds to raised benches, believing them better adapted to his soil and also less likely to be disturbed by moles which have given him trouble heretofore and have been worse than ever this summer in the field.

Ralph Culp and Mrs. Culp spent a week in the country at the farm of Grandfather Culp, where fried chicken, fresh eggs and home-grown vegetables are the common things of life and roast beef and that class of goods figure as something special. He says he did not make any loud call for the specials.

J. E. Bidelman has about 20,000 feet of glass to lettuce, with tomatoes for an early summer crop. He complains of a very poor yield of tomatoes, the vines being shy in flowering and setting fruit. He blames the hot dry weather of May and June.

Elwood Kline has resigned his position in the store of W. H. Culp & Co. and gone to Lawrence, Kansas, to take charge of the business there recently acquired by his brother, Norval Kline.

Otto Kuechenmeister has given up his position with the U. S. Express Co. and returned to his old place in the Kuechenmeister greenhouses.

It is doubtful if Wichita will be represented at the convention, the distance and various other reasons presenting sufficient obstacles.

W. I. CHITA.

DANVERS, MASS.—William O'Neil will erect greenhouses on the land recently purchased on River street.

The President's Special

TO THE

Twenty-Seventh Convention

Chicago.

A LARGER SUPPLY.

The great feature of the market during the past week has been the continual increase in the supply and the marked advance in quality. With the exception of American Beauty roses and carnations both of these factors is very noticeable. The weather has been most conducive to good growth, not too warm and frequent showers have brought back much of the vigor to the outside stock, which suffered greatly during the long hot spell. With the exception of the sweet peas the stock is gradually taking on the general condition at this season of the year. The roses are much improved in quality. American Beauties are in short crop but the teas and, hybrid teas are plentiful, especially the white roses and some very fine flowers are to be obtained. Carnations are not received in any large quantities and the majority of those seen are of inferior quality, yet some growers still have blooms that can be truly called carnations, a few outside grown showing up well. Sweet peas are almost all short stemmed, the crop with some growers outside was almost an entire failure, the vines simply could not stand the extreme heat and no amount of watering was able to carry them through. Of lilies there is a good supply and they are of fine quality. The cut of longiflorums is not heavy but sufficient to meet the demand and there is a good stock of L. rubrum and auratum, some splendid spikes of the latter being offered. Gladioli are particularly fine, some elegant spikes being seen and of all the gorgeous colors of this flower, and the lighter colors are very useful in all kinds of work. A fine lot of an almost pure white was seen on the market this week. Asters are now coming in in large quantities and the price has taken a slight fall, although the extra quality blooms are still being sold at good figures, one grower quoting six cents for an exceptionally good quality. Lily of the valley is in good supply and of good quality, and there are some especially fine orchids to be had. The early dahlias have made their appearance, and the growers will soon have a good cut. The colored water lilies are still attracting a great deal of attention in the retail windows, a fine showing of the beautiful flowers in white, blue and pink were displayed in one of the retail stores this week. A large quantity of outside stock is being used for window decorations including Rudbeckia Golden Glow, feverfew, achillea and large bunches of Golden rod. The trade is not over active, summer conditions prevailing, and there is an odor of new paint in some of the stores.

NOTES.

J. C. Arnold of the Pulverized Manure Co. is enjoying his vacation with friends and relatives at Trenton, Mo. Dwight L. Harris, the efficient manager, is busy filling the many orders that are received from both his old and new customers. His firm is having an exceptionally good year and as one turns over the pages of the order book, he will find that Poehlmann Bros. Co., Wietor Bros., Peter Reinberg, Geo. Wittbold Co. and many other well known local growers are constant users of the Wizard Brand manures.

The explosion of a bomb beside the greenhouses in Washington park on the morning of July 30, caused damage to the amount of $200. It is thought that the bomb was the outcome of labor troubles. The damage consisted of injury to the plants outside and the breaking of glass in the greenhouse but of the more valuable plants few were injured.

USE Budlong's Blue Ribbon Valley.

It will be of interest to the many friends of J. S. Wilson, formerly of this city, to know that he is one of six delegates chosen to represent the Des Moines Admen's Club at the convention to be held at Boston, Mass. He holds the position of governor of the club, being chairman of the house committee. The party left Des Moines for Boston, July 28.

J. T. Helbok, the Wrightwood avenue florist, is putting in a new store front and making other extensive improvements to his store. He is still planning on visiting his home in the old country and says he will dispose of his property if a suitable buyer can be found.

Frank Ayres' many friends will be pleased to hear that his mother, who has been seriously ill at Paris, Texas, is improving and that an early recovery is looked for. Mr. Ayres writes that the temperature in the Lone Star state last week was 110 degrees in the shade.

Edgar Winterson has returned from a most enjoyable outing at Round Lake, Wis., and is again attending to his duties at the E. F. Winterson Co.'s store.

The A. Dietsch Co.'s employes are busy as bees turning out greenhouse material for the many orders that they have on hand.

Louis Wittbold and family returned July 30 from a most enjoyable visit with relatives in Wheeling.

POEHLMANN'S FANCY VALLEY
EXTRA FINE HARRISII LILIES

We make these a specialty.
Can supply them all the Year
Once tried you will have no other

Frank Oechslin, the well-known Quincy street grower, is still nursing his broken arm or "baby" as he calls it. A visit to the greenhouses last week found the stock in splendid condition especially the chrysanthemum plants which are exceptionally fine. The stock of Boston ferns, palms, crotons and pandanus are also at their best and some fine looking specimens can be seen here. The new range of greenhouses is rapidly being completed and the planting of these will commence the latter part of this week James G. Hancock, who so successfully looks after the clerical duties, is anxiously awaiting the time when he will be comfortably located in this firm's new office which is nearly ready for occupancy.

John Poehlmann says that Poehlmann Bros. Co. is cutting more heavily in American Beauty roses than they have for some time past. The other rose shipments are also larger and some excellent blooms of all the leading varieties can be seen at the store this week. The asters that this firm is receiving are of the first quality and are eagerly sought for by the best trade.

J. W. Schmidt, the Montana street grower, is devoting his spare time to rebuilding and repainting his greenhouses. Mr. Schmidt speaks very highly of the Daylite glass cleanser and says that the Andersen Specialty Co. did something worth while when they placed this solution on the market.

Kalacinski Bros., of 4657 Irving Park boulevard, are in hopes of securing a store in the new North Western Trust & Savings Bank building, now under construction at the junction of Milwaukee avenue, Division street and Dickinson street.

J. G. Schouten is back from his vacation and is again attending to his duties at the Geo. Wittbold Co.'s store.

Growers, Attention

Why not sell your own stock?
We have the finest location in the Chicago market and space enough to accommodate several growers selling their own stock.

PERCY JONES

56 East Randolph St., CHICAGO

F. W. Nelson is planning on spending his vacation at Galesburg and some of the larger cities further west.

Miss Hertha V. Tonner left Wednesday, July 26, for Russell, Kansas, where she attended the funeral of her sister's child whose death was caused by being severely scalded a few days previously.

Albert Cole of the Poehlmann Bros. Co.'s force is showing his friend Wm. Hunt around the city this week. Mr. Hunt is in the employ of Arthur T. Boddington, the well-known seedsman of New York.

Vaughan's Seed Store report their Lilium formosum bulbs now afloat and due in this city in good time in August.

Wm. E. Schofield, the North State street florist, is the proud possessor of a new seven-passenger Pierce-Arrow touring car.

Kyle & Foerster's store presents a very pleasing appearance in its new coat of white and brown paint.

J. A. Budlong is supplying his customers with a good grade of both in-indoor and outside carnations.

Otto Goerisch of the A. L. Randall Co. is spending his vacation at Milwaukee and Michigan resorts.

Anton Then, who has been suffering from blood poisoning, is now declared out of danger.

N. J. Rupp will represent the John C. Moninger Co. at the Baltimore convention.

VAUGHAN & SPERRY

Long Distance Phone Central 2751. **161 N. Wabash Ave., CHICAGO.**

The Thirty-first street Business Men's Carnival and Fair, which was participated in by all the retail dealers along East Thirty-first street, turned out to be a grand success. Among its many supporters were W. J. Smyth, H. S. Morton, and G. C. Wagner, all well-known local florists.

M. B. Hirsch, who is well known and very popular among the Hyde Park residents, has opened a very attractive and up-to-date floral establishment in the Willard Theatre building, at Fifty-first street and Calumet avenue, to be known as the Willard Florist.

F. C. Struvy has disposed of his store at 1810 South Halsted street to J. I. Salach, who has had an extensive experience in the floral business across the pond. He expects to manage and carry on the business in the same successful way as his predecessor.

A. Briet of 7455 Ridge avenue, who had a plentiful crop of "cukes" this year, has sold his property and greenhouses to his brother-in-law, Michael Kloss. Mr. Briet is now spending a few weeks in the Lone Star State speculating.

Daniel Branch is now comfortably located in his new store at Prairie avenue and Fifty-eighth street, and is occupying his spare moments by putting the finishing touches on the greenhouses built in conjunction with the store.

Mathias Mann was found cleaning the mud from his buggy resulting from an unsuccessful attempt to reach the florists' picnic. He is glad there is no such vehicle required on the Baltimore trip, which he expects to make.

C. Hengesch, of 7360 Murphy avenue, has had several severe attacks of rheumatism and is spending these dull days in the company of J. P. Jaeger at Benton Harbor, Michigan, where he is taking the mineral bath cure.

H. S. Morton, who has done an extensive business on the south side, is now interested in "Florida Land" and will dispose of his store at 436 E. Thirty-first street at the first opportunity.

J. F. Czarnick, of the company bearing his name, has returned from a much-needed rest at South Bend, Ind. He is now figuring on opening a branch store in the loop district this fall.

Jacob Hailes is now busy replanting and renovating. He tells us his crop this year was not only large but of a high grade quality and that he was able to get a good price for the same.

Henry Hanson and his daughter, Maydell, are touring the wilds of Colorado. Some of the many places of interest visited by them were Colorado Springs, Pueblo and Cripple Creek.

Sidney Buchbinder, of the well-known firm of Buchbinder Bros., says his firm has been very busy the last month filling many orders for florists' refrigerators and fixtures.

Kloeckner & Sons have had a very strenuous season at 5350 South Ashland avenue, and are renovating their greenhouses and putting things in shape for a busy year.

C. Swanson had a fine crop of carnations this spring and is in expectations of having a good large crop of chrysanthemums and carnations for the market this season.

F. G. Mueller has been kept busy with a great deal of funeral work, and is waiting for a chance to get a long-needed vacation, with his friends in southern Illinois.

The Palace Floral Co., 207 E. Twenty-sixth street, have been kept busy supplying a large quantity of cut flowers to the visitors and patients of Mercy Hospital.

E. A. Lowatsch has had a very successful season with his ferns. He is now busy renovating his store and greenhouses in expectation of a heavy season.

USE Budlong's Blue Ribbon Valley.

M. B. Steczynski, 1166 Milwaukee avenue, who belongs to several west side organizations, tells us he is kept busy catering to his many fellow members.

John Paulus has experienced a very successful season, and is now making arrangements to break into Rogers Park politics. We wish you luck, John.

Margaret Huberty, the efficient manager of F. Burmeister's store on Cemetery drive, is enjoying a month's vacation with friends in Rochester, Minn.

Joseph Hain, 2150 West Fifty-first place, reports that he sold every fern in his greenhouse with a demand for more could he have obtained them.

A. Cichy reports a large demand for artificial flowers on Milwaukee avenue. As a side issue he has entered the steamship brokerage business.

William Burmeister, better known as Fred, has enjoyed a very profitable season, especially in the sale of pot plants, being entirely sold out.

William J. Smyth has left for Anaheim, Calif., where he expects to spend a restful vacation, returning about September 1.

Nick Monsen, at 1500 West Huron street, is kept busy these hot days with a large amount of funeral work.

Wilder Deamud took a trip to Minneapolis to see his lady friend, who is visiting there for a week.

Peter Reinberg,

New No. 30 E. Randolph St., CHICAGO.

The Geo. Wittbold Co. expects to have an early crop of chrysanthemums and carnations at their Edgebrook establishment; the plants are well advanced and in very good condition. The Sangamo carnation plants are doing fine and on one plant were counted 18 flower spikes, and it is safe to say that there will average at least 12 flowers to a plant. Otto Wittbold, the industrious superintendent, is deriving much pleasure in driving through beautiful Edgebrook behind his favorite three-year old driving horse.

Wietor Bros. are planting their second section of carnations and when this is completed they will have all told 160,000 plants instead of 80,000 as published in last week's issue. The American Beauty roses that this firm is cutting are of their usual good quality with good color, plenty of foliage and long stems.

Fred Ottenbeacher, Zech & Mann's right hand store man, is enjoying his vacation at his old home in Morton Grove. He is planning on taking an extended trip to Englewood, Bowmanville, Niles Center and other Illinois cities, and his many friends wish him a safe journey and a speedy return.

Fred Sperry has returned from his vacation feeling much improved in health and is again looking after the wants of his many customers at the Vaughan & Sperry store. Miss Paradise, the popular young bookkeeper, will leave next week for a two weeks' visit at Marquette, Mich.

H. E. Philpott has returned from a most enjoyable visit to Detroit, Mich., and will leave in a few days for Ottawa, Can., where he will attend the convention of the Canadian Horticultural Association.

Tim Matchen, the popular young manager at the Peter Reinberg store, and his wife, are visiting in Portage, Wis. They will also spend a few days at the Dells, Packwaukee and Devil's Lake.

John H. Miller can't see anything but carnations this winter, and says now that they have finished planting the market can look for an unusually good crop from this source.

Chas. W. Schleiff, 5655 E. Ravenswood Park, has enjoyed a very prosperous season and is now preparing for the cold days by putting his boilers and greenhouses in shape.

Matthew Weber has sold his interest in the range of houses in Rogers Park to his brother, Fritz, the firm of Weber Brothers now consisting of Fritz and Michael.

L. Hoechner, better known as "Stogie," is trying to tell his friends that the bump he is carrying on his forehead came from splitting kindling wood.

Ernest Farley has returned from his vacation and reports having had a most enjoyable time with his old acquaintances at Indianapolis, Ind.

The R. C. Whitsett Coal and Mining Co. have just delivered a large shipment of Sunshine coal to the Geo. Wittbold Co. at Edgebrook, Ill.

The next meeting of the Florists' Club will be held at the Union Restaurant, 72 West Randolph street, August 3, at 8 p. m.

Miss Marie Olmert, bookkeeper at the Chas. W. McKellar store, is enjoying a two weeks' vacation, yachting on Michigan lakes.

Frank Pisternick has the sympathy of the trade in the loss of his mother whose death occurred on Wednesday, July 26.

Mrs. Otto W. Frese has recovered sufficiently from her recent illness to be removed from the hospital to her home.

John Michaelsen says that one of the E. C. Amling Co.'s growers is in cut with a good crop of American Beauty roses.

A. J. King, the enterprising florist of Mattoon, visited the city this week on his way to Canada on a fishing trip.

Harry Manheim says that Hoerber Bros. have commenced cutting a new crop of My Maryland roses.

Robert Northam has returned from his vacation and again is in charge at the George Reinberg store.

The Chicago Rose Co. is showing an exceptionally fine grade of gladiolus.

WIETOR BROS., 162 N. Wabash Ave., Chicago

A thoroughly equipped, up-to-date store was what the visitors found when they entered the new quarters which the Chicago Cut Flower Growers' Association opened August 1 to their guests. And the officers of the association as well as Manager Frese were on deck to make everybody feel at home at the launching of the new enterprise. As our readers have been already informed, the association has leased the entire building at 176 North Michigan avenue, and will occupy the first and second floors and the basement for their own use. The store is commodious and has been beautifully finished but with the sole idea of being adapted to the needs of the business. On entering the store the office is at the right with the telephone close at hand. Tables have been provided ample to hold the stock and these occupy the floor space. On the right side are three large refrigerators, guaranteeing space for a large amount of stock. In the rear is the shipping room, which is large enough to allow of several hands to pack the stock and also to store the boxes and necessary supplies. Elevator service is provided to get either to the upper floor or to the basement. Last but not least is a platform scale that a thorough check may be had on the avaricious express companies. With its coat of white paint one could but admire the new quarters and its fittings, and on the opening day President Kidwell, Secretary Weiland, Treasurer Then and the directors ably did the honors, and after cigars were passed escorted the visitors around the beautiful store, and one and all wished the enterprise a safe and prosperous voyage.

Chas. L. Washburn and a party of friends returned Sunday evening, July 31, from a most enjoyable auto tour through Wisconsin and Illinois cities. Mr. Washburn acted as guide and chauffeur and the total distance of 340 miles was covered in five days with stops at Channel Lake, Lake Geneva, Oconomowoc, Waukesha, Kenosha, Racine and Milwaukee. Their stay in the Cream City was a most pleasant one, and the auto ride in H. V. Hunkel's new Overland touring car was thoroughly enjoyed by all. The genial wholesale man speaks in glowing terms of the lotus beds at Fox Lake, which were in full bloom when they visited them last week. Otto Schumann, the enterprising florist of that place, gave the party a boat ride around this bed, which is one mile in length and a half mile wide. These flowers in full bloom are a sight worth seeing and are the center of attraction for the many tourists in that vicinity. Mr. Washburn says that the florists along the way in most cases are enjoying a good season with plenty of funeral work on hand. The trip was made without a mishap and not even a tire was punctured on the long journey.

Fred Lautenschlager will leave next week for Baltimore with a carload of exhibits for Kroeschell Bros. Co. The number 14 boiler that this firm will have on exhibition has already been sold and will be delivered to eastern parties after the convention.

Applications for berths are being assigned to those who will attend the convention and make the trip on the President's Special, which leaves Chicago on the Monon Railroad, Sunday, August 13, at 11:30 p. m.

Frank N. Kidwell and Rudolph Ellsworth of the Wellsworth Farm Gardens made the first shipment of Killarney roses to the Chicago Flower Growers' Association store on July 31.

The John C. Moninger Co.'s new catalogue of commercial greenhouses erected by this firm has just been issued, a handsome book of 94 pages, well illustrated.

H. Van Gelder is busy nowadays trying to interest the growers to sell their own stock on the second floor of the building that Percy Jones occupies.

Miss Nettie Parker, the Chicago Carnation Co.'s popular young stenographer, is missed at the store this week.

W. H. Kidwell is making frequent trips to Eagle Lake, Mich., where his summer home is located.

James E. Jones of the Advance Co., Richmond, Ind., was a most welcome visitor on August 1.

A. C. Kohlbrand is back from his vacation with some good fish stories.

Visitors: H. W. Metz, Odell; — — Grohmann, Saginaw, Mich.; James E. Jones, Richmond, Ind.

USE Budlong's Blue Ribbon Valley.

St. Louis.

A SUMMER FLURRY.

Quite a demand for flowers was caused by the funerals of prominent people the last week. Gladioli are plentiful but the prices hold up well. A few field grown carnations are to be obtained. Asters are increasing in supply but little first-class stock is received. American Beauty roses are selling well as are also tuberoses.

NOTES.

J. Young, president of the C. Young & Sons Co., celebrated his sixty-second birthday July 23. His son Charles has returned from his auto trip to Chicago, and has many interesting tales of his trip, especially of his experiences during a breakdown at Litchfield, Ill.

It is expected that there will be quite a number of the local florists attend the Baltimore convention. F. H. Weber is making every endeavor to get a good sized delegation.

C. C. Sanders will have a very beautiful store on Delmar boulevard when completed. This is a fine location in a good residence locality.

Alex. Johnson will have two new houses this winter. Joseph North, manager of the store at Junction, reports good business.

Kalish Bros. Floral Co. is remodeling its plant, when completed this firm will have one of the finest store fronts in the city.

H. C. Berning is receiving American Beauty roses of good color that are finding ready sale.

The Kelley Floral Co. is renovating its store preparatory for the fall trade.

Miss Mary Ostertag's new store on Delmar boulevard is very attractive.

The Metropolitan Floral Co. is contemplating extensive alterations.

Visitors: Julius Dillhof, representing Schloss Bros, New York. W. F.

Cincinnati.

The market is somewhat easier than at last writing. Increased shipments of asters and gladioli have served to break the tightness, I may say, caused by the general scarcity of flowers. The above mentioned seasonable flowers are of exceptionally good quality and very many still attract fancy prices. According to advices on hand at the time of writing, the market will soon be able to take care of all requests for these flowers. Roses still continue in an even supply, but are short of meeting the call for them. The American Beauties are of good quality. All varieties of lilies, including longiflorum, auratum and rubrum, are generally good property. Hardy hydrangea sells well at pretty stiff prices. The supply, too, has increased greatly in the past week. Lily of the valley are conspicuous for their almost total absence. Green goods are ample, both as to quantity and quality. As a whole, the market and the business transacted is fairly satisfactory.

NOTES.

On July 20 Wm. Murphy and Tom Windram leave for the Snows to get the camp in shape for the arrival of their wives and the Misses Murphy, Mr. and Mrs. Adrian and Miss Cora Pherson. During last week Wm. Murphy and Chas. Tigler, his camping partner and a bottle manufacturer of Portsmouth, went to Parkersburg, W. Va., where they had recently purchased a 32-foot cabin launch for use on the lake at their camp, to superintend the loading of the vessel on a car. The boat is a new one and drew too much water for the river.

C. E. Critchell recently received from P. O. Coblentz of New Madison, a bunch of blooms of his new seedling gladioli. These blooms were generally even better than the many unbeatable ones he ships into the market each day.

C. E. Critchell intends joining the President's Special for the convention. After that is over he will go direct to Chicago and embark on a steamer for the lake trip.

E. G. Gillett, wife and daughter, leave shortly for a stay at Traverse City, Mich. H.

From all reports, the annual picnic of the Florists' Association was a mild affair this year. It was held at a public park where beer is tabooed, and on that account was not wet enough to suit the "Southern Division." In the near future another picnic will be held for all those that enjoy a bottle or two. This affair, however, will not be connected in any way with the association.

Frank Hasselman again left all cares behind last week and went on a fishing trip in Illinois. While Frank was in Illinois his brother James was in Wisconsin, also engaged in fishing. His success was great. On last Friday he sent home a twenty-six pound muskelunge.

Otto Lawrenz, of E. A. Nelson's force, is on his vacation. He is visiting relatives in Rushville, Ind.

TRADE QUIET.

There has been a slight lull in the market the past week, but there are fewer flowers coming in, which about evens matters up. The prices are still about the same. Asters are coming in more plentiful, but the quality is still not up to former years by a long way. Easter lilies are quite plentiful and lily of the valley is fine just now. Roses are very short. Brides are still to be seen. We noted some very good flowers cut from young stock with better stems and longer flowers than Killarney or Kaiserin, but when cooler weather sets in conditions as regards selling will likely reverse. American Beauty are excellent. Lady Hillington is seen in the market in small quantities, but it is eagerly sought and is bringing a better price than any other rose, with the exception of American Beauty.

NOTES.

Herbert Capers is receiving some fine Bouvardia Humbolti from John Foote, Reading, Mass.

Robert Montgomery, Natick, will go to his cottage on Bustin's Island, for his vacation.

Miss Lyons, for nine years with Galvin, will take a position with Penn August 1.

Walter Holden has gone on a fishing trip for one week.

CLUB PICNIC.

The members of the Gardeners' and Florists' Club and their friends to the number of about 500, held their annual picnic at the Caledonian Grove, West Roxbury, July 26. The day was unusually fine for the event, and everyone enjoyed the sports, which lasted from ten till six. The officers of the club are to be congratulated on the selection of the place as it can be reached quickly from any point. The judges were fair and impartial. President Peter J. Miller worked hard to make it a success, and it was pleasant to see everything working in harmony. The sports were good and well contested. Some of the members showed high training; even the ladies showed speed in the races that would put some professionals to shame. Ringmaster Kennedy received three cheers at the conclusion and he deserved it. The commercial men won the baseball match by a small margin, but the tug-of-war was hopeless—they were beaten before they started. It was one of the best day's outings in the history of the club.

The results of the games and athletic contests were as follows:

Baseball—Commercial vs. Private Gardeners; Captains A. E. Walsh and R. W. Curtis; prizes by Lunt Moss Co. won by the Commercials.

One hundred yard race, handicap—Prizes by T. J. Grey Co. and W. N. Craig; H. L. Prie, first; Wm. Iliffe, second.

One hundred yard race, boys under 15, handicap—Prizes by P. Fisher and M. A. Patten; C. Prie, first; I. Iliffe, second.

Flag race, married ladies, handicap—Prizes by Ames Implement & Seed Co. and H. F. Mitchell Co.; Mrs. F. Coles, first; Mrs. H. F. Woods, second.

Quoit match—Prizes by D. Iliffe and H. Terry; Fred Coles, first; A. K. Rogers, second.

Flag race, girls under 10 years—Prizes by Lord & Burnham Co.; Margaret Iliffe, first; Alice Iliffe, second.

A BETTER DEMAND.

There appeared to be a better demand for flowers the past week, and in consequence there was considerable hustling, as the supply of anything worth having is very meager indeed. White roses are very scarce, except in the lower grades, of which there are a plenty, but the long stemmed extras are only seen in lots of 25 and very few lots at that. Killarney and My Maryland also run short stemmed. Local American Beauties are very poor, some of the new crop, short stemmed, are of good color and find a sale because there is nothing better. Asters are plentiful but do not grade very high as yet, two dollars is about top price. Easter lilies of fine quality are a great help to the assortments. The cold storage of these bulbs has made the Easter lily an all the year round flower. Orchids are very scarce—it takes careful searching over large stocks of cattleyas to get a dozen flowers and the cut is oversold every day before they arrive on the market. Gladiodi are arriving in quantity and are largely used for window decorating, quantities are sold to the seashore resort hotels for use on the dining table.

CLUB MEETING.

The regular club meeting was held August 1. Xavier Schmidt's paper on Park Gardening was full of information and contained many up-to-date and practical ideas brought about in his long experience in Fairmount Park. He received many encomiums from the members present and the thanks of the club in a body. It was voted to go to Baltimore by the Baltimore & Ohio route leaving the station at Twenty-third and Chestnut streets on Tuesday, August 14, and the train will also stop at Wayne Junction. The fare for the round trip will be $4.00. There will be a special car and perhaps two, and Chairman Westcott states that nobody need suffer en route with either thirst or hunger. The feature at the next meeting will be a resume of the convention, several members having agreed to give their impressions and tell what they saw in their various lines. The bowling team as reported by Mr. Connor, will be composed of Dodds, Connor, Adelberger, Robertson and Irwin, which should make a very strong team.

NOTES.

As the time draws nearer considerable convention talk is heard and this city is sure to send a good sized delegation. As usual, Philadelphia will lead all other cities in the exhibition. H. Bayersdorfer & Co. and M. Rice & Co. will have large and complete displays of florists' supplies. H. A. Dreer, Joseph Heacock Co., Robert Craig Co., and Chas. D. Ball, will be there with their usual large exhibits. Henry F. Michell Co.'s exhibit, in charge of I. Rosnosky, will be the best they have ever put forward. These displays will be an exhibition in themselves, representing as they are sure to do, the best examples and the very latest things introduced in their various lines.

Mrs. Flora Shelley of Sixtieth and Pine streets, has sold her ground and purchased four acres at Highland Park, just beyond the terminal of the elevated road, and will erect six houses 20x100 feet. The material is now on the ground and it is hoped to have the houses completed in time for the winter season. The entire place will be given up to the forcing of cut flowers for this market. K.

New York.

STOCK IN GOOD SUPPLY.

As for business here in New York City—well of course where there are millions of people there must be something if condensed, but scattered it is so small that—well it is microscopic—and in consequence prices are like the ripple of a minnow's tail. There were at least ten thousand Lilium Harrisii and L. longiflorum on the market today. They were fine stock, too, but very few thousands were sold. What splendid stock some of these lilies we saw are, especially for decorative work in general and oh! what a splendid flower where funeral work is to be done. American Beauty roses are about the only ones that command a price worth mentioning. My Marylands were good, too. The vast majority of stock in the market of such as Killarney, pink and white, Brides and Bridesmaids, were unusually open and of poor quality. Lily of the valley would go only with the dead ones or the brides, and they were not asked for in either case. Gladioli are coming in strong. Smilax, asparagus and all manner of greens, most of which are put in gratis by the retailer, can be had for any price if you've time to sing or talk. W. S. Allen got in some Cattleya Dowiana from Julius Roehrs Co., also some fine C. gigas from same firm. Asters are coming in more plentiful and of a somewhat better quality. P. J. Smith makes a specialty of W. F. Fingers' dahlias, the one coming in now is a Gustave and would be fine for theatrical baskets, but alas, the moving picture and five-cent shows do not call for floral presentations. It is a waste of time, pencil and ink to conjure up even average prices just now where and when the little trade depends on summer visitors and the wills or friends of the departed.

NOTES.

Herbert A. Spavins of Mt. Kisco reports a good local trade, especially that of funeral work, and he is constructing a new house to keep up with extending trade. He informs us that the Westchester Agricultural Fair will be held at Mt. Kisco September 29-30. There is a splendid chance to display and win prizes for flowers, plants and vegetables here, and some of the best people in New York will attend. The annual flower show will be held at Mt. Kisco this year on Nov. 3-5. Mr. Spavins is manager of both and will be glad to assist all who intend to exhibit.

Philip Kessler says Matt Vlasveld, associated with him, sailed from Holland for home July 29 and is bringing some funny Dutch stories with him, also lots of news about plants, etc. Phil is desirous of introducing the new drink "lobster cocktail" at Baltimore. See him about it. By the way, he is the lily king in New York just now and his stock is very fine.

Mrs. Millang, Sr., who is now 80 years old, the mother of Frank, Charlie, August and Joe, is going up to the White Mountains with her daughter-in-law and niece, Mrs. Charles Millang and daughter, to spend a month or so. Mrs. Millang is now one of the oldest florists here and the mother of more florists than any other of her age in these parts at least.

A very important meeting was held in this city Aug. 1 by all concerned in making the Baltimore convention a record breaker for attendance and interest. Chairman Traendly requests that all those intending to go to the convention should notify him in order that the committee may make adequate preparations. Get busy and do it now.

Matt Sampson, manager for the New York Cut Flower Co., is away on his vacation. Robert Munroe, bookkeeper for W. F. Sheridan, is taking his vacation, but expects to be with the boys at the convention.

Meyer Othile, of Badgley, Riedel & Meyer, is back ready to treat the boys right and help fill any retailer's icebox. Some specially good asters are being sent in by W. G. Badgley from his place at Chatham.

C. W. Scott informs us that his firm just received a carload of calla bulbs from Japan. They are superfine and will be divided between here and their western trade.

J. B. Nugent is back on deck and looks like a two-year-old. Married life does make some men look happy.

BOWLING.

Bowling six were on the alley on Friday night. The scores were: Chadwick, 175, 153, 180; J. Manda, 156, 188, 140; Kakuda, 136, 134, 176; Shaw, 151, 143, 144; Highland Donaldson, 167, 133, 187; W. J. Stewart frae Boston, 103, 100, 200. On Friday night, August 4, there will be a Bra fight Thigin Thu on the New York Florists' Club bowling alleys between Astoria Irishmen and New York Jews. Capt. Donaldson from Astoria and Capt. Chadwick from New York are lining up both teams. And here arises a query: Why cannot Flatbush and Astoria have teams at Baltimore? If there are any rules to bar out those boys let us know it. I've only just come over in the steerage from Ellis Island. But I remember in Buffalo, Asheville, N. C., and elsewhere the Flatbush boys did good work. Astoria has some good men, too, and then again Totty, Duckham, Roehrs and Atkins may get a good Jersey team. The committee on sports must wake up; but they must have many and broad classes. The idea is that even if a city like New York has many villages attached, we as florists must not shut out those who help to make the S. A. F. what it ought to be, not what it is. Therefore we want to see Astoria, Flatbush and Jersey for the first time represented. Charlie Totty may get a lame duck from Dreer's at Riverton. I am not forgetting the boys of the Monmouth County sleepers—but somehow Jersey and other cemeteries ought to be and will be at Baltimore. The only grudge I have about Baltimore is, it was named after an Irish Lord.

Lord Baltimore is dead, says the Shan Van Voght.

Pittsburg.

FLOWERS MORE PLENTIFUL.

The commission houses are working only half time, as a few hours in the morning cleans up everything. The retailer certainly has his troubles when it comes to funeral work. Flowers are considerably more plentiful than at last report but still there is a decided shortage.

BASEBALL CONTESTS.

The McCallum Co. are the latest to enter the Florist Baseball League. They played their initial game Thursday evening, winning from the A. W. Smith Co. team, 6 to 4. Both teams put up a clean game. The attendance was 500.

A. W. Smith Co. played Pittsburg Cut Flower Co., Tuesday evening, the former winning, 15 to 4.

NOTES.

Wm. Murdock has returned from an extended auto trip which included Virginia, Maryland, New York and Connecticut. He relates many interesting experiences, especially where the worst roads were encountered.

The Florists' and Gardeners' Club will hold its annual picnic at Keystone Park. This beautiful spot is situated near the P. & W. R. R. and Butler car line handy to either. A great time is guaranteed.

W. A. Clark is spending three weeks with his family at Behmus Point, Chautauqua Lake. Mr. Clarke promises something exciting in the way of a fish story.

John Fitzsimmons, of G. P. Weaklen & Co., is spending three weeks in camp on Lake Erie.

All the wholesale stores will close on the day of the Florists' club picnic, August 8.

Miss E. B. Maxwell, Wilkinsburg, is going to take a quiet rest at Saxonburg.

Martin Lustick and wife of Washington were business callers this week.

J. Keller of the McCallum Co. is spending his vacation at Conneaut.

J. Higgins and wife sail for Duluth next week.

J. E. Bonsall, Salem, O., was a caller July 26.

Excelsa Robusta Compacta.

			Each.
5-inch pots	8 to 10 inches high,	2 tiers	$ 75
6 "	10 to 12 "	2 "	1 00
6 "	12 to 14 "	3 "	1 25
7 "	14 to 16 "	3 "	1 50

Excelsa Plumosa.

A comparative scarce form almost as compact in habit as Robusta Compacta and of a richer, deeper green color, very desireable.

5-inch pots	8 inches high,	2 tiers	65
6 "	10 to 12 "	3 "	75
6 "	13 to 15 "	3 to 4 "	1 00

We will also have on exhibititon a full line of other **Dreer Specials** and our staff of salesmen will be present to give full information regarding same.

If you are passing through Philadelphia stop off and visit our Nursery at Riverton and at the same time see our new Rive view Nursery, an inspection of both these places is certain to prove profitable and interesting.

HENRY A. DREER, 714 Chestnut St., Philadelphia, Pa.

"The Kenilworth Strain" of Giant Pansy Seed

Must Not Be Compared With the Flimsy Trimardeau

It is much larger and of good substance; the immense flowers, of 3½ to 4 inches, are of perfect form, and every tint and shade is produced in striking combinations and endless variations of beautiful colors and markings. It is the result of years of selections. The Stock Plants are taken from many thousands of plants grown for the market. It is rich with shades of brown, bronze, red, mahogany and many others too numerous to mention. **Light, Medium or Dark Mixtures.**

1911 SEEDS NOW READY 2000 Seeds, 50c; 5000 Seeds, $1.00; ¼ ounce, $1.25; ounce, $5.00.

Pansies in Separate Colors

Giant Adonis, beautiful light blue.
Giant Emperor William, ultramarine blue.
Giant King of the Blacks, coal black.
Giant Lord Beaconsfield, violet, shading to white.
Giant Golden Queen, yellow
Giant Golden Yellow, with dark center.
Giant Masterpiece, beautifully ruffled, splendid color.
Giant Red, a fine mixture of red shades.
Giant White, very fine.
Giant White, with large violet center.
Giant Royal Purple, fine large flower.
Giant Orchid-Flowering, rare shades.
Giant Bronze and Copper Shades.
Giant Light Blue, delicate shades of blue.
Giant Dark Blue, deep blue shades.

Trade Packet, each, 25c; any 5 Packets, $1 00 any 11 Packets, $2.00.

RAINBOW is a blend of over 50 of the latest introductions of Giant Pansies of the most beautiful gorgeous colors, blotched, striped, veined, margined, etc. With every $1 00 worth of Pansy Seed, I will send, free, 1000 seeds of Rainbow, and with other amounts in like proportion.

Chas. Frost Kenilworth, N. J.

Heacock's Palms and Ferns

Home Grown, Strong, Clean and Well Established

Order Now for Fall Delivery

We grow all our Kentias, above 6-in. sizes, in cedar tubs made especially for us, **avoiding breakage of pots** in shipments and giving better satisfaction to our customers; and while they cost us a great deal more than pots, we sell the plants for the same money. We order these tubs by the carload. With more glass, our stock is much larger than ever before.

When in Philadelphia, call and see our stock before placing your order.

20 minutes ride by rail; 100 trains every weekday; Railway Station Jenkintown.

The Seed Trade.

American Seed Trade Association.

Leonard H. Vaughan, Chicago, President; Marshall H. Duryea, New York, First Vice-President; Edgar Gregory, Marblehead, Mass., Second Vice-President; C. E. Kendel, Cleveland O., Secretary and Treasurer.

Next annual convention, June, 1912.

VISITED CHICAGO: Henry Nungesser, New York, on his usual western grass seed crop inspection trip.

FRENCH BULB crop reports indicate some surplus of white Roman hyacinths in all sizes, but apparently little or no surplus of Paper White narcissus.

KANSAS CITY, MO.—The Rudy-Patrick Seed Co. has been organized and will succeed the Frank Rudy Seed Co. In the new organization besides Mr. Rudy are Messrs. Patrick, Miller and Edwards, who have been with the J. G. Peppard Seed Co. for years, and the old employes of the Frank Rudy Seed Co.

CHICAGO.—Prices on the board of Trade August 2, for grass seed were noted as follows: Timothy, $12 to $14 per 100 pounds.—A. Henderson & Co. have leased larger quarters on the fourth floor of the Atlas Block, corner of Randolph street and Wabash avenue, the same building in which the business has been carried on heretofore.

The L. L. Olds Seed Co.

The rapid increase in the volume of business transacted during the last three years by the L. L. Olds Seed Co. is a revelation to a majority of the citizens of their home county according to a Madison, Wis., paper which makes this concern the subject of an extensive article. The amount of business during the last year amounted to nearly a quarter of million dollars and the increase for the last three years has reached nearly 170 per cent. The business having almost trebled since it removed from Clinton, Wis., to Madison, three years ago. The growth of the company has necessitated more capital, and it has been decided to increase the capital stock from $50,000 to $100,000. The company does both a wholesale and retail business and has a mailing list of over 200,000 names. The list of patrons includes those in every state in the union, as well as in foreign countries. One shipment of 100 crates of high grade Wisconsin grown seed corn went to Odessa, Russia. One hundred thousand catalogues are sent out. What this company means to its home section may be seen when it is understood that it pays out for labor nearly $15,000, for postage almost $6,000 and purchased $80,000 worth of Wisconsin grown seed during the year. A little known, but increasing feature of the business, is the trade in potato eyes, a thousand boxes of which were shipped last year. Good strong eyes are carefully removed from selected tubers and packed in damped moss in paraffin-lined boxes and sent by mail. The use of potato eyes for seed is cheaper than that of whole potatoes and have not failed to give satisfaction. The officers of the company are, L. L. Olds, president and manager; W. D. Curtis, vice-president; S. A. Wilson, secretary and assistant manager; E. F. Riley, treasurer; C. N. Brown, Dr. C. S. Sheldon, Madison, and J. F. Kemmerer, Clinton, directors.

The Tubergen Freesias.

Freesias readily lend themselves to crossing and bear such an abundance of easily-germinated seed whose progeny seems quite at home and content to grow in our cool English greenhouses, that having once tasted blood, those who know these firstlings in their varied tones of yellow, mauve and pink will never rest satisfied until further advances have been made in color, fragrance and size. Even now there is a small coterie of "Freesians" to whom the flowering of the new seedlings of each succeeding year is one of the looked-forward-to events of their lives.

Herbert Chapman of Rye, who has produced some beautiful yellow varieties, and Sutton & Son of Reading are the only English workers among these plants as far as known, writes a correspondent in The Garden, but we are now introduced to the work of the youngest of the Hoog brothers, who are known to plant-lovers as keen hybridists and collectors in many different directions, but whom I personally prefer rather to think of as the friendly and courteous nephews of "the dear old man who usually smokes at meals and very often in bed . . who can never find it in his heart to forbid his workmen the well-loved pipe . . who smokes everywhere in his barns . . but who, so far as I have heard, has never suffered loss by fire." ("Dutch Bulbs and Gardens," by D. Silberrad, page 112). This "dear old man," although he has something white under his black skull-cap, still officially calls himself a junior, for C. G. van Tubergen, Junior, is what we read on his bulb lists. The real "why" belongs to family history; but to those privileged to know him, the affix is but his true description, for, keen and enthusiastic as ever, he takes the greatest interest and pride in showing visitors the various works of his nephews' hands, and the rich collections of plants which he has in his well-filled gardens.

The freesia house at Zwanenburg Nurseries, Haarlem, must be a great sight in February and March, and a very surprising one to those who only know the old Leichtlinii and refracta alba. Heliotrope, Tyrian rose, violet rose, deep carmine violet, coppery rose, flesh pink, coppery yellow, new red, coppery red, Solferino red, salmon pink and bluish lilac are a selection of the color-names from the color-chart ("Repertoire de Couleurs") which accurately match some of the many shades of this new strain. The real things are different; but, all the same, it gives an idea of what they are like. Luminosa is one of the best that Mr. Hoog has raised. A tall grower, often 30 inches high, extremely floriferous, large individual blooms, pure lilac rose in color, with a white throat and with no pencilings or markings, it can only be described as very good indeed. The name has now been changed to Conquest, as Luminosa suggests a brilliant color, such as we find in Le Phare, whereas it is "very soft and pleasing."

Amethyst is an omnibus name, and includes paler and deeper shades of mauves that incline to the blue side, while roses and carmines come under Tubergenii. All these new hybrids, with the exception of Contrast, a flower like an "orange tip" butterfly, have scent, some more and some less. I am particularly glad to be able to say this, for to me scent is one of a flower's most valuable possessions, and we should never deprive them of it. It will be of interest to those about to begin seedling-raising to know that when the new and best varieties are crossed on to refracta alba there is only a small percentage of new shades, but the flowers are very good and large. It was from such a cross that Conquest (Luminosa) was raised, whereas Le Phare, having slightly smaller flowers, with a very striking shade of color, is an example of the lesser type of flower that is usually given by intercrossing the new shades with one another. There was a fine exhibit of these freesias at the Jubilee exhibition at Haarlem on March 23 of last year. I then marked as the best and most striking Luminosa (now Conquest), Dainty and Le Reve, with Contrast, Le Phare, Cinderella and Amethyst not far behind.

They are a beautiful race, these Tubergen hybrids. They possess not only the charm of novelty, but also that of beauty and sweetness. They are a valuable acquisition among early spring-flowering bulbous plants for our greenhouses and our living rooms, while to the hybridist they offer possibilities which at present exist only in the imagination of the enthusiast.

Fertilizer for Lettuce.

ED. AMERICAN FLORIST:

We have been growing Black Seeded Tennis Ball lettuce but it fails to head up solid. Have we been using a manure containing too high a per cent of nitrogen? Would it be better to use bone-meal or potash and less manure? What is the best variety of head lettuce? What is a good variety of forcing radish? What are the best fertilizers for each? G. A.

Nebraska.

The controlling factors in head lettuce culture are ample plant food, low temperature, and plenty of water. The absence of any one of these elements will cause failure. While nitrogen does produce leaf growth, it rarely spoils a crop if in the shape of manure, however if nitrate of soda is used too freely, it certainly means soft heads or no heads at all The writer has had wide experience with head lettuce in this country and in Europe and in most places hard heading is favored by an ample supply of phosphates. This can be supplied by fine bone meal or Peruvian guano, the latter preferred; common phosphate, known as rock phosphate or acid phosphate, does sometimes produce leaf burn. Nitrate of soda does no harm in cold weather, but as the season advances we omit it entirely, as the higher the temperature, the more tendency to leafiness, hence the less call for nitrates. In one case, we use a fertilizer somewhat like this—four per cent nitrogen, 10 per cent phosphoric acid and 10 or 12 per cent potash; this at the rate of 2,000 pounds per acre in two applications; and this fertilizer in addition to a heavy coat of manure. But no matter how well every other point has been covered, too high temperatures will spell ruin in any case. Head lettuce will not succeed where good Grand Rapids can be produced.

The question about varieties does not mention if intended for outdoors or indoors. There is no doubt for a cool location Big Boston heads the list. Tenderheart is a little earlier and almost as large and solid besides less leafy. If for outdoor culture, Big Boston and Tenderfoot are excellent for spring and fall use, but for midsummer use we grow All Seasons and Wonderful. These two latter will stand an enormous amount of heat and drouth. In head lettuce culture we must bear in mind that heading is a storing-up of plant food for future use, and the moment the plant suffers, it abandons all storage and makes an attempt to produce seed to reproduce itself; that is Nature's way. Hence for solid heads we must encourage storage.

In regard to forcing radish we use only Scarlet Globe and a good strain of it leaves nothing to be desired. We never found any benefit by using phosphates for radishes, hence in addition to manure we use nitrate of soda and sulphate of potash in proportion of two pounds of soda to one of potash, well pulverized, and top-dress when radishes are well up. Fully nine-tenths of failures in radish culture are caused by over-seeding and neglect of thinning.

MARKETMAN.

Influence of Soil on Strawberries.

I think it is generally admitted by experienced cultivators that the soil has a direct influence both on the color of the fruit and its flavor. In some districts strawberries are very highly colored, but of poor flavor; in others they are not highly colored but are of rich flavor. I would like to give an instance bearing out these facts.

When the variety Noble was first cultivated I planted several long rows of plants in a rather heavy, clayey soil, the latter being light in color. The resultant fruits were almost as scarlet as those of Royal Sovereign, and very rich in flavor—for Noble. A few miles away a doctor, who was very fond of gardening generally, had a plantation of Noble strawberries. His fruits were of a deep crimson, almost black, and he gleefully contrasted his fruits with my light-colored ones. But when it came to the eating test his fruits almost entirely lacked flavor, while mine were really very agreeable to the palate. The soil in which the doctor's plants were grown was dark, and had, in time past, been a part of old heath, or forest.

To digress a little. I once exhibited some apples at an exhibition at Earl's Court, writes a correspondent of the Gardeners' Magazine. While staging them some gentlemen remarked, "Those apples have been grown under glass; no apples grown in the open air were ever colored like those." As a matter of fact, the trees were grown in an almost pure clay bed, not the light-looking clay one so often sees, but dark red, and of a crumbling nature. To properly drain the orchard open trenches two feet and more in depth were made, a row of trees growing between each pair of trenches. In summer time, when the clay crumbled down and got baked in the sun, the particles were almost as hard as bullets. I told the gentlemen in question the conditions under which the apples had been grown, but I think they were disinclined at first to believe my statement. A silver medal was awarded. The trees are still growing in the same position, and are fruitful, but canker is a little troublesome.

Even in the same garden I have found that the fruits from young strawberry plants are more highly colored than those from three-year-old plants. I am quite convinced that many inexperienced growers allow too much space between their rows and the plants in them. As a private cultivator I grew about five hundredweight of strawberries each year for a considerable number of years. During that period I experimented, of course, and I found it to be much more profitable to discard my plants (grown in a medium light soil) after the second year's fruiting, so every year some rows were destroyed, and others planted. In a heavier loam I think the plants will last quite a year longer in a remunerative state—until after the third year.

I would urge cultivators who have only small gardens to deal with to grow a number of strawberry plants as annuals, putting out the plants 14 inches apart each way. Runners are plentiful, are easily rooted, and if the very earliest ones are secured, as in the case of runners for forcing in pots, the resultant crops from even a small plant would surprise the owner. Moreover, the fruits so grown are of the highest quality, both as regards flavor and appearance. The ground for the plants should be prepared early, and the runners secured as soon as possible, and treated generously.

The Nursery Trade

American Association of Nurserymen

J. H. Dayton, Painesville, O., President; W. H. Wyman, North Abington, Mass., Vice-President; John Hall, Rochester, N.Y., Sec'y.

Thirty-seventh annual convention to be held at Boston, Mass., 1912.

REPORT of the outing of the Connecticut Nurserymen's Association will be found on page 63 of this issue.

GALVESTON, TEX.—The meeting of the Texas Nurserymen's Association was held Thursday, July 27. A number of important papers of interest to the members were read and discussed.

REDLANDS, CALIF.—Sidney Hockridge has severed all connections with the City Nurseries of which he was manager, and has established a new business to be known as the Hockridge Nurseries.

JOHN H. BEATTY, superintendent of parks for Manhattan and Richmond, has been notified by Park Commissioner Stover to appear at the Arsenal in Central Park August 7 for trial on charge of incompetence.

New York Parks.

Poor boss-ridden New York City, and what we mean by the word boss is the avaricious, souless politician who uses all to land him into having a grand funeral some day. And what fools people can be. Here we have the marvel city of the world on every side. There are wonders to be seen. New buildings are pulled down and greater ones put up in their place, only to manifest the unrest of modern wealth—but to our first intent millions are spent yearly to render the park department here creditable, but alas, outside their natural aspect the park department of this city has always been a scandal, a blatant disgrace for the reason that politics have made it a beehive of drones who knew nothing but to vote and pay for their job. The latest news today is that Park Commissioner Stover is to be replaced by Julius C. Burgerin, superintendent of the Bronx parks. John H. Beatty, who was superintendent of the parks of Manhattan, is fighting for reinstation on August 8, and the whole matter promises to bring forth some interesting but mud-covered truths. The parks of New York City, like those of most great cities, will always be the prey of politicians until the florists' clubs and horticultural societies get away from idolizing sunflowers and attend to having all connected with plant life on their orbit. With a superabundance of magnificent material to select from it seems criminal to permit matters to proceed thus. We have a Society of Park Superintendents, Cemetery Superintendents and now a Railroad Gardeners' Superintendents, and when all is put together and politics cut out something can be done. As it is now these men send over to Europe for bulbs and nursery stock, ignoring their local seedsmen and plantsmen who pay the taxes which supplies their wages. I mention it here because I consider it vital to American horticulture and hope local societies will see that their interests will not be diverted to the hang-dog interests. And here is another matter. Millions are invested here on the growing of imported stock such as palms and bay trees, etc. We find here in the great city of New York that an almost unknown individual leases the stands or in some way has control of most of the flower, plant and bulb and seed stands in the great dry goods stores. We are given to understand that he goes to Europe, gets his stock direct and retails for less than what the other importers here can buy for. This is a case for the importers here, and whatever unprincipled growers there are in Europe. What's the use of organizations if they are impotent or deaf, dumb and blind D.

The Hardy Aristolochias.

The several kinds of aristolochia which may be grown outside in this country form an interesting group of climbing plants, for, in addition to the peculiarity in shape and the curious coloring of their flowers, the foliage of one or two sorts is very handsome. Moreover, their culture does not offer any serious difficulties, for, given moderately good loamy soil, they grow vigorously and soon clothe an unsightly fence or block out an undesirable object. They are also useful for planting on pergolas and summer houses, while they may be planted at the foot of a large bush or low tree and allowed to cover it with their long slender branches. They are not very easy plants to propagate, though with a little care cuttings may be rooted if inserted in sandy soil in a close case in summer. Young plants ought to be placed in permanent positions as early in life as possible, and until sites for them are selected, it is just as well to keep them in pots.

There are only a few kinds of aristolochia which may be grown successfully out of doors, says a correspondent of the Gardeners' Magazine, and the principel one is A. Sipho. It is a native of the United States, and is recognized by its large, dark green, heart-shaped leaves and small yellowish-brown flowers, which have the appearance of a siphon or curly-stemmed pipe, and are responsible for the common names of Dutchman's pipe and siphon flower, which have been applied to the species. The flowers are small, and not very conspicuous, as they are often shaded by the foliage; hence, if a person does not pay special attention, he might easily miss seeing them. Except in their peculiar shape and markings, they bear little resembalnce to the immenes showy flowers of some of the tropical species, for in the case of the tropical American A. gigas var. Sturtevanti, a single flower, including its tail-like appendage, may be anything between 3½ and 4½ feet long, and 12 to 15 inches wide in the widest part. A. Goldieana, again, from Old Calabar, is another with immense flowers. These large-flowered kinds are, however, more offensive than the small-flowered hardy ones, for the disagreeable carrion-like odor of the blossoms is very pronounced in their case, whilst it is not present to any great extent in the hardy ones.

A. Californica and A. tomentosa, from California and the southern United States respectively, are two other species which are worthy of notice. They may be separated from A. Sipho on account of their hairy stems and leaves, but the differences between themselves is not well marked. Though two of the three species here mentioned have been in cultivation for more than a century they cannot be said to be common, though their bold foliage and curious and interesting flowers warrant them attention from garden lovers. A. altissima and A. sempervirens are sometimes spoken of as hardy plants, but there are few places where they grow satisfactorily.

Philadelphus Lemoinei Virginal.

This splendid new flowering shrub is sure of a rare welcome in gardens, states the Gardeners' Magazine. It flowers with the freedom of the majority of the philadelphus and its spikes of pure white blossoms give out a delicious fragrance. Individually, its flowers are large for the genus and are double, but the doubling has not been carried so far as to make the blossoms heavy, yet far enough to give them substance and still retain a full measure of elegance and daintiness. Awarded a first class certificate at the Royal Horticultural Society, June 20, exhibited by Sir Trevor Lawrence (W. Bain, gardener). Burford Lodge, Dorking.

MARINETTE, WIS.—Geo. Vatter is building a new house 20x70 feet of Moninger material. Mr. Vatter, who has been located here 30 years, has just acquired three acres near his greenhouses for nursery purposes.

ONEONTA, N. Y.—C. W. Peck is building two greenhouses, 60 and 75 feet long respectively, of steel construction, to replace two wooden structures long in use. The work and material is supplied by the King Construction Co., North Tonawanda.

"All's Not Gold That Glitters."
There are Many Places to Order Pansy Seed.

Vaughan's Pansy Seed has a record for quality, variety of types and tested vitality. You make no mistake in ordering our seed on its 22-year record.

VAUGHAN'S GIANT PANSIES.

Vaughan's Cut Flower Mixture

This mixture is put up by ourselves and contains mostly light colored sorts. We have sold this mixture for several seasons to some of our Chicago cut flower growers, who have realized big returns from the sale of the flowers. Pansies are as easily grown as violets, require less care and bring better returns. **Trade pkt., 50c; ⅛ oz., $1.00; ¼ oz., $2.00; oz., $8.00.**

Vaughan's "Giant Pansy Mixture"

Embraces besides all the separate shades and colors, five special strains not listed elsewhere, and which can only be had in this and our International mixture. This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trimardeau, the splendid Cassier strain. **Trade pkt., 25c; ⅛ oz., 60c; oz., $4.00; ¼ lb., $14.00.**

Vaughan's International Pansies

The World's Best

This is one of the specialties which has established and held the reputation of Vaughan's Flower Seeds, and this is one which we maintain most carefully, not alone as to quality, but in vitality and germination. You are beginning right in Pansy growing when you start with Vaughan's International Mixture. **Trade pkt., 50c; ⅛ oz., $1.50; ½ oz., $5.00; oz., $10.00.**

CINERARIA

Vaughan's Columbian Mixture

Trade pkt. (500 seeds), 50c; 3 trade pkts., $1.40.

Vaughan's Giant-Flowered Cyclamen

Pure White (Mont Blanc); **Dark Crimson, Rosa von Marienthal,** "Daybreak" pink; **Dark Rose, White with Crimson Eye.** Per 100 seeds, 75c; 1,000 seeds, $5.00; 250 seeds of a color at the 1,000 rate.

Giant-Flowered Cyclamen, extra choice mixed. Per 1,000 seeds, **$0.50;** 250 seeds, **$1.15;** 1,000 seeds, **$4.50;** 5,000 seeds, **$20.00.** This mixture is made up from the above separate colors.

New Salmon (Glory of Wandsbek). **Per 100 seeds, 1.35; 250 seeds, $2.85; 1,000 seeds, $10.50.**

Giant Orchid-Flowered Cyclamen

These are exceptionally fine, with large flowers that are frilled and fringed in wonderful fashion.

Pure White, Red, Pink, White with Carmine Eye, and Lilac Colored.

Each, per 100 seeds, $1.00; per 1,000 seeds, $8.00.

Giant Orchid-Flowered Cyclamen, in choicest mixture; **25 seeds, $0.25; 100 seeds, 85c; 1,000 seeds, $7.00.**

English Grown Giant Cyclamen

Price, 100 Seeds, $1.00; 1,000 seeds, $8.00.

Princess May. Pale pink.
***Princess of Wales.** Giganteum variety. Pink.
Mauve Queen. Giganteum variety. Mauve.
***Duke of Connaught.** Giganteum variety. Purplish crimson.
***Duke of Fife.** Giganteum variety. Dark rose.
Salmon Queen. New extra choice color.
Rosy Morn. Giganteum variety. Delicate rose color. Claret base.
Picturatum. Light rose tinted, with claret base.
***Grandiflora alba.** The largest giant white grown.
Excelsior. White, with red base. Extra large flowers.

CALCEOLARIA HYBRIDA

Extra Choice Mixed

Trade pkt. (1,000 seeds), $0.50. 3 trade pkts. for $1.40.

CANDYTUFT.

Giant Hyacinth Flowered Improved Empress. The flower heads are pure white, 6 inches long and about 3 inches across. **1 lb., $2.50; oz., 20c; trade pkt., 5c.**

GLOXINIA HYBRIDA

Vaughan's Columbian Mixture. Trade pkt. (1,000 seeds), $0.50; 3 trade pkts. for $1.40.

MIGNONETTE

New York Market. Trade pkt. (about 1,000 seeds), 50c; per oz., $7.00; ⅛ oz., $1.00.

VAUGHAN'S SEED STORE

25 Barclay St. NEW YORK

Greenhouses, Trial Grounds and Nurseries: Western Springs, Illinois.

Sioux City, Ia.

Felix Schulte, for the past five years superintendent of the J. C. Rennison Co.'s establishment, has entered business on his own account, having acquired some five acres of good ground on the northeast corner of Twenty-eighth street and Iowa avenue where he will have a modern greenhouse plant, starting now with two houses 30x100 feet and a propagating house. He will grow bedding stock for next season and later take up the cultivation of carnations, roses and other cut flowers, wholesale. Felix Schulte Floral Gardens, Felix Schulte, proprietor, is the name of the business.

Mr. Schulte is a capable grower of considerable experience. Born in Berlin, Germany, in 1867, and coming to this country at the age of 14 years, he went to work as a boy of 16 with the late Robert Halliday, of Baltimore, Md. When 19 he was engaged by William Wilson at Astoria, L. I., and later by James Horan at Bridgeport, Conn. Soon after he took a responsible position with E. C. Buseck, of that place, with whom he remained 18 years. Mr. Schulte has our best wishes for his success.

Stamford Horticulturists.

The first annual outing of the Westchester and Fairfield Horticultural Society, held at Bonnie Brae Nursery, New Rochelle, N. Y., Wednesday, July 26, proved to be a most enjoyable time for all, much credit being due to the committee of arrangements and Thos. J. Wade, manager of Bonnie Brae Nursery. The athletic contests resulted as follows:

One hundred yard dash—Wm. Whitton, first; T. Aitchison, second; A. Powell, third.

Broad jump—Wm. Whitton, first; A. Possell, second; T. Stobo, third.

High jump—Wm. Whitton, first; T. Stobo, second; A. Patterson, third.

Hammer throw—A. Geddes, first; W. Whitton, second; T. Stobo, third.

Putting the shot—Wm. Whitton, first; T. Aitchison, second; T. Stobo, third.

Potato race—A. Geddes, first; A. Wymce, second; A. Nicoll, third.

Three-legged race—W. Whitton and G. Edmonds, first; A. Nicoll and W. Goodall, second; A. Patterson and T. Aitchison, third.

Mile race—Wm. Whitton, first; A. Possell, second; W. Goodall, third.

Fat men's race—T. J. Wade, first; Jas. Stuart, second.

Commercial men's race—Geo. Edmonson, first; Geo. Baldwin, second.

Football, Westchester vs. Fairfield, won by Westchester County, 5 to 1.

Tug of war, Westchester vs. Fairfield, won by Fairfield county.

Tug of war, Commercial vs. Private Gardeners, won by Private Gardeners.

Many useful and valuable prizes were awarded the winners in all events. Both counties were well represented at the outing. Altogether the first annual outing was socially a decided success. J. B. MCARDLE, Sec'y.

LILIUM HARRISII The Bermuda Easter Lily.

Let Us Supply Your Wants in Lilies This Season.

We think we can make it to your advantage to do so, as regards both quality and price.

The stock that we offer is not gathered indiscriminately from all kinds of sources, but is grown for us by a few selected growers whose stocks have been worked up from the true, original stock. In order to ensure the health of the product, the bulbs are not grown on the same field oftener than one season, other crops being grown on the field the preceding year. The ground is thoroughly manured when the previous crop is grown, leaving it in a high state of cultivation, and when the lily bulbs are planted no fresh manure is used, and this prevents disease and insures a crop of strong, healthy bulbs.

In addition to this, we do not dig our bulbs as early as they are usually dug, but leave them in the ground until they are thoroughly ripened and matured. When Harrisii is good, it leaves little to be desired. There is very little, if any, stock obtainable as good as the stock that we are offering. We are supplying only this one grade of selected stock, and when this is disposed of, we shall have no more to offer.

While the quality of the stock that we offer is of the highest, our prices are as low as, or lower than, the prices of those who offer the ordinary stock gathered from indiscriminate sources. We are sure buyers will find our stock very satisfactory, and much more so than the Japanese Longiflorum, which has badly deteriorated in recent years.

Bear in mind that we were the original introducers of Harrisii in Bermuda, and that we have exceptional facilities for obtaining our present supplies. Also take note that the smallest bulbs that we offer are 6-7 inch bulbs, not 5-7 inch, as usually offered.

6- 7 inch bulbs, 360 to the case, **$15.00** per case; full 1000 lots, **$ 40.00** per 1000.
7- 9 inch bulbs, 200 to the case, **$16.00** per case; full 1000 lots, **$ 75.00** per 1000.
9-11 inch bulbs, 100 to the case, **$18.00** per case; full 1000 lots, **$175.00** per 1000.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

THE BOOK OF GLADIOLUS

THE first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120-page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

THE HOME OF ARAUCARIAS

Araucaria Excelsa, Robusta and Compacta Our Specialty.

You will never be sorry. It will pay you well. Do it now, and lay in a stock of Araucarias. Every day is valuable to you, because they grow into money for you.

Come and inspect the home of plant production. ☞ Customers and friends visiting the Convention at Baltimore are cheerfully invited to stop off in Philadelphia and give our stock a careful inspection. See them grow at our establishment, the home of Araucarias and pot plants.

THE ARAUCARIA

In thine own land thou art a king amongst the forest trees:
From thy green boughs the love birds sing songs wafted on the breeze:
Thy buried feet in burning sand, the tropic sun thy light;
Royal thou art, forever great, in thy majestic might.

And in the cottage home thy charm, like a perpetual spell,
Wins all our love, our cares disarm, our lips thy praises tell:
Among the plants we make our own, thou art fairer than the rest:
Stately and beautiful alone, 'mid others thou art best.

Thy branches are as living hands, full of good cheer for those
Who love to tend the shining strands of earth's well-woven robes,
Whose gems are flowers, whose fabric life, whose gifts art always fair.
Yet who yield homage without strife to King Araucaria.

Araucaria Excelsa Our Specialty.

Warning—Don't be deceived. Now, as well as for the last twenty-five years, we hold the ground as leaders in importing, growing and shipping of our specialty, the Araucarias.

Araucaria Excelsa, Robusta compacta, Glauca, and Palms, etc. Florists, you all know we are leaders for the last 25 years in importing, growing and shipping of this so well known evergreen decorative plant, the **Araucaria,** more in favor than ever, from Atlantic to Pacific Ocean. To every florist our Araucarias is interesting, therefore no argument is needed for our goods. We know what our customers need, therefore we have provided and set aside special specimen plants, Spring 1910 importation, for lawns, porches, verandas, bungalows, private summer residences, the hotels and boarding houses on the seashore and elsewhere. This plant is one of the most desirable evergreen decorative plants adopted for this above mentioned purposes. For decorative purposes, in connection with palms, they will make a fine display.

Araucaria Excelsa, raised from top cuttings, 6-7 inch pots, 4 to 5 years old, 5, 6 and 7 tiers, 25, 28, 30, 35, 40-in. in height..... $1.00, $1.25, $1.50, $2.00 to $2.50 each

Araucaria Excelsa Glauca and **Robusta compacta,** 6-7 in. pots, fine bushy plants.....$1.25, $1.50, $2.00 each

Araucaria Excelsa, new importation, out of 5, 5½, and 6-in. pots, 2 to 3 years old, 3, 4 and 5 tiers, 10, 12, 14, 16, 18 and 20 inches high. 40c, 50c, 75c and $1.00 each

Robusta Compacta Excelsa Glauca, 5½ and 6-in. pots.....$1.00 to $1.25 each

Kentia Belmoreana, 4 year old, 30 to 35 inches high, $1.50.

Kentia Forsteriana, 4 year old, 30 to 35 inches high, $1.50.

Kentia Forsteriana, 4 year old, 24 to 26 inches high, 75c to $1.00.

Kentia Belmoreana, 4 year old, combination or made up of 3 plants, 26 to 28 inches high, $1.00, $1.25 and $1.50.

Kentia Belmoreana, combination or made up of 3 plants, 3 year old, 24 to 26 inches high, 75c to $1.00.

Kentia Belmoreana, 4 year old, 26 to 28 inches high, $1.00 to $1.25.

Kentia Belmoreana, 4-in., 25c, 30c to 35c.

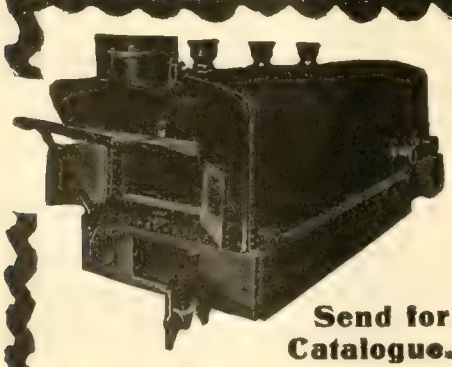
What the Users Say



Send for Catalogue.

Kroeschell Boiler, Generator and Heating System;

Insure Perfect Results.

"Having promised you a letter as soon as we had passed through a good fair test, I consider it now almost timely. We had the thermometer 18 degrees below and we've have just gone through a blizzard bad enough for most any season, and am very well pleased to inform you that our heating system was equal to the occasion. So far as we have gone, am certainly well satisfied with the Kroeschell Boiler, Generator and Heating System."
J. E. MATTEWSON, Sheboygan, Wis.

SEEDS.

Exclusive cultivation of PANSIES since '93 enables us to say that we sell more blooming plants at higher prices than any establishment on the western hemisphere. Books open to your inspection. We have never spent a dollar to advertise our blooming plants. They simply outclass all others. We have done this by selecting the one best for seed and selling the other ninety-nine. Watch this space for more details. A limited quantity of seed is offered 1911 crop, 1-12 oz., $1; oz., $9. STEELE'S WESTERN PANSY GARDENS, Portland, Oregon.

Seeds, onion, peppers, early tomato, cauliflower, beans 97 var.; melons, celery, egg plant, Federico C. Varela, Teneriff, Canary Islands, Spain.

The Chicago Coal Situation.

J. S. Holbrook, general sales agent for the Northwestern Fuel Co., Fisher building, Chicago, has the following to say in regard to the coal situation in Chicago: "The coal question in Chicago today is in a worse condition than it has been in for the last few years. There is scarcely any coal sold, the buyers holding off until fall, or until they actually are in need of it. Having been in close touch with the greenhouse business for a number of years, I feel it is my duty to the trade to advise that they order their coal supply now, and avoid all the rush and worry that is sure to come. Coal is selling at a very reasonable figure and it should be an inducement to the greenhouse trade as well as all other consumers, to place their orders now, and procure all the coal they can."

New Demands of Miners.

Wilkesbarre, Pa., July 24.—The convention of the United Mine Workers of District No. 1 came to a close July 22, after a continued session of one week. A new set of demands formulated at the convention will be brought forth when the working agreement with the operators expires April 1, 1912. A demand for an increase in wages was voiced, but was set aside to be acted on at the national convention.

The increase supposed to be wanted ranges from 10 to 20 per cent on the present scale, most of the miners seeming to favor a 15 per cent basis. Further demands made known were, first, the recognition of the union; second, the check off system for the miners; third, the weight of coal by the ton; fourth, the eight hour day. The check off system is a system whereby the colliery officers deduct the union dues from the wages of every man engaged in the coal industry. This necessitates every man being in the union.

Omaha, Neb.

Business has been very dull, and this may be a good thing, as stock is poor and hard to obtain. Out of door flowers are very few. Some gladioli can be seen in the florists' windows. The stock seen is mostly short-stemmed roses, and a few carnations.

CLUB OUTING.

The fourteenth annual picnic of the Omaha Florists' Club was held at Courtland Beach July 27. Everyone who attended declared it was the best picnic ever held. A reception for the ladies was held between two and three o'clock. Games and races for ladies and boys, the winners were: Ladies' race, Miss Anna Sorenson, first; girls' race, Anna Huxhold, first; boys' race, Glenn Doherty, first. A bowling match between the Omaha and Council Bluffs florists followed, so many taking part that two games were played and honors were even. After the bowling dinner was served and 70 happy faces were seated in the Courtland Beach dining room. After the dinner pictures were taken and the attractions in the park scattered the crowd.

NOTES.

A. Lange and wife, of Chicago, passed through Omaha on their way to Colorado Springs. G. H. Swoboda and family joined the Lange family at Manitou, Colo.

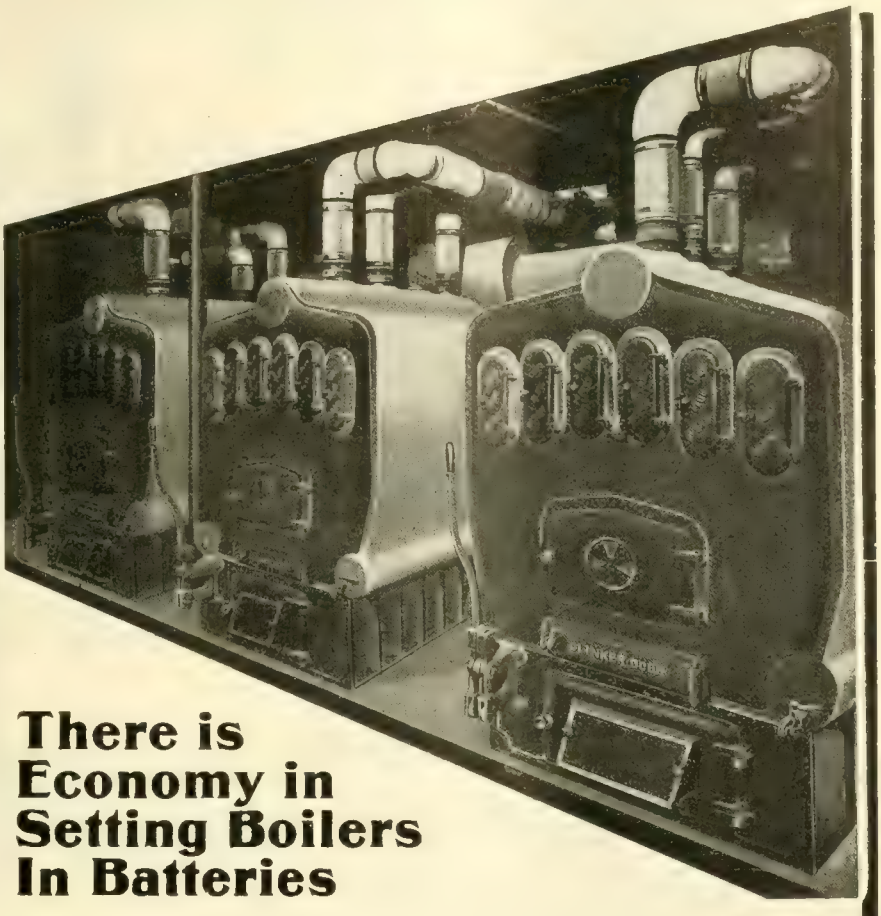
Hess and Swoboda are installing two new boilers, 150 horse power each. They are also remodeling their store.

Paul B. Flotte is remodeling some of his greenhouses and making other improvements.

Miss McNamara is putting in a new ice box 4x9 feet, and a new marble counter.

Mrs. Geo. Sorenson and daughter returned from their Colorado trip.

GRIPPE.



There is Economy in Setting Boilers In Batteries

Economy, because you have an absolute control of the coal you burn. You run only one boiler when one is needed. More, when more are needed. You are not running one immense boiler with its big grate to keep firing, no matter what the weather is.

Boilers in batteries mean not only just the amount of heat you need and no more—but a tremendous saving in coal and labor.

Then think of the ease with which the sections of even our large 36-inch boiler can be handled when setting up, in comparison with the tremendous task of installing one of those mammoth wrought steel boilers. Think of the masonry work necessary—think of the tubes that in a short time will need to be replaced.

So much for Batteries—now a word concerning the "Burnham" itself. It's made especially for greenhouse work and it works as no other boiler works—not only a matter of coal economy but time economy. It's quickly fired, quickly cleaned and we honestly believe it harnesses up more heat from less coal than any greenhouse boiler made.

Here is a suggestion: Order your Burnham **NOW.** Then we will set it up at the factory at once and give it a thorough pressure test. Then we will take it down, mark it, set it aside are and hold it for you. When you are ready the boiler will then be ready—no delays.

A good many of our orders for this Fall's delivery were booked along in February. The boiler costs you nothing until delivered and it protects you against delays of the rush season. Don't simply say—"Why that's a good idea," and then not do anything. Send your order and send it this very day.

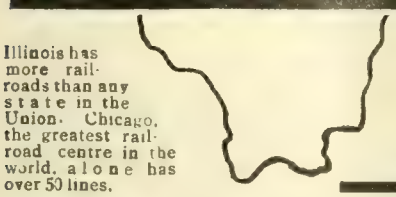
Illinois, "the Hot Bed of Railroads," Builds L. and B. Curved Eave Houses

Illinois is awake, wide awake, to the fact that the unattractive, unenduring cypress houses she has been building are not only a blot on the grounds but impractical and thoroughly unsatisfactory as growing houses.

Three years ago we put up our first curved eave house in the Chicago section and since then they have been going up like mushrooms. Only a short time ago Mr. T. H. Dennehy of Hubbard Woods ordered one which, besides its two compartments, has a conservatory and swimming pool attached.

This one shown is owned by J. K. Lyon, also of Hubbard Woods, Ill. Ask his gardener, Mr. F. Hinks, what he thinks of it, and how it compares with other houses in that vicinity.

All western orders are now being filled from our western factory at Des Plaines—12 miles out of Chicago. Send us your name and address and your employer's and we will send you both one of our beautiful 100 page catalogs.



Illinois has more railroads than any state in the Union. Chicago, the greatest railroad centre in the world, alone has over 50 lines.

THE TRADE OF BALTIMORE.

A Veteran's Reminiscences.

In common with the experience of all large cities the development of the florist and nursery trade in Baltimore was gradual and slow, but expanding with the needs and growth of its population. In the earlier stages flowers commercially considered were hardly any proportion of the product of the soil; homes were segregated both in country and city and almost all had some ground attached, a portion of which was devoted to the raising of what we now call "old-fashioned flowers." Some few residences had pretentious gardens and there were one or two greenhouses in the vicinity early in the last century, one of the first structures, with glass front and sides but with shingle roof, surviving to within twenty-five years.

The earliest pioneers of flowers for sale were the gardeners and small farmers, who with their vegetables, butter, chickens, etc., brought in each season the flowers that were in bloom. The very earliest professional gardeners erecting glass structures for producing flowering plants were the Hallidays, Feasts, Hesses, Reichmans, whose descendants to the third generation still occupy honorable places in the trade to this day. These pioneers soon began to offer their products in the markets which had been established for the convenience of the public, and James Pentland, who came into the trade somewhat later than those named, used to tell with much gusto how he would take his flowers and potted plants in a wheelbarrow to the "Old Marsh" market, distant fully two miles from his greenhouse, and very often push most of them back again unsold. But the taste for flowers and plants grew and there are men now living who recall that in the Lexington market, which has an almost world-wide reputation for the extent, variety and artistic arrangement of its products of field, garden, river and sea, there were only four stands selling plants, flowers, roots and seeds, whilst now in the busiest season there are some 400 persons engaged in the traffic.

The nursery business had correspondingly small beginnings. So far as known the Sinclairs were the first in the field, and after the lapse of a century their descendants, the Corses, carry on the same business on practically the same land. Richard Cromwell had a nursery across the river in Anne Arundel county devoted almost entirely to fruit trees, and especially to the peach. This gentleman at one time from his orchards supplied practically the whole city with peaches which were brought to the docks in his own barges. Samuel Feast was another early comer into the field, having a nursery for ornamentals, some of the fine trees which he planted still remaining in Harlem Park, where his operations were carried on. Robert Halliday, Wm. D. Brackenridge, Thos. Fairley and others came in later. The sites of their nurseries are now covered with rows of dwellings, and the business is conducted by Isaac H. Moss, Franklin Davis Co. and by concerns like J. G. Harrison & Sons, of Berlin, on hundreds of acres but remote from the city.

Comparatively early in the last century there were a few private places of considerable extent modeled after English patterns and including formal and natural gardens, with glass houses for sheltering large plants used for summer decoration, the orange predominating, with other structures for propagating annual plants with which to plant the garden beds. Hampton, the seat of the Ridgelys, was an early example, soon followed by the handsome places of Dr. Edmonston, Messrs. Lurman, Frick, Winans, Walters, Perot, McHenry, Hopkins and other gentlemen of means and taste who embellished their grounds by handsome planting and erected plant houses all up to the standard of those days. These places educated the people, stimulated them to imitation and were regarded, very properly, as evidences of progress and refinement. They were seconded by the skilled gardeners, put in charge of the operations, like William Fowler, Charles Campbell, William Saunders, Alexander Frazier and others whose glory was in the cultivation of the camellia, the azalea and other popular plants of the day, and even more notably of exotic grapes,

the perfect production of which evinced the acme of the gardener's art of the era.

These examples were seed which brought good fruit, and hundreds of beautiful suburban and rural homes are but the natural consequence of the production of refinement and beauty all over our section of the skilful planting of trees and shrubbery, the establishment of smooth lawns, and their embellishment by flowers.

The seed business had its similar small beginnings. At first there seemed some connection between the sale of seeds and of what were called shoe findings. Like some concerns in New York, there were some establishments here dealing in both. The first seed dealer in Baltimore seems to have been Samuel Ault, who also supplied shoe findings. Sinclair, Cromwell, Norris, Bolgiano, Mott and others long occupied the field and have been succeeded by the numerous modern houses like J. Bolgiano & Son, the Griffith & Turner Co., S. L. Lamberd Co., the Meyer-Stisser Co., J. Manus & Co., and many others whose volume of transactions is enormous compared with the earlier operations. These firms supply the "truckers" and gardeners not only of the immediate vicinity but all along the coast, where the production of vegetables is a great and expanding industry.

Prior to the civil war there were a few public squares in Baltimore, all of modest size and pretensions, but no real parks. About 1860 the city acquired Druid Hill, a grand example of a natural park, with noble trees of many varieties, fine undulations of contour, fertile soil adapted for almost all kinds of shrubbery and for grassy lawns. Upon this beginning has been built a system of parks, admirably planned and located, comprising thousands of acres almost entirely encircling the city, easily accessible to our people, with superb examples of indigenous and transplanted growths and with excellent roads—a benefaction for the whole populace, rich and poor, free to all, and availed of by every class as resorts for health and recreation, fresh air and innocent pleasures. During their existence the parks have had as superintendents only three men, Capt. Faul, Charles H. Latrobe, both eminent engineers and both deceased, and William S. Manning, a park man of thorough skill and long experience who has made the very best of his opportunities and done a work which will long survive as a monument of good judgment, taste and economical administration.

Time and space forbid reference to the present extent of the various branches of the trade alluded to. Baltimore has been no exception to the general rule of increase in every division. On all sides may be seen greenhouse establishments, some measured, like R. Vincent, Jr., & Sons, by the acre, and the natural order seems growth and extension. Some were erected on land which was used for farming purposes and were only surrendered when destined for city lots; but in most cases the owners moved farther from the centers of population, buying again by the acre to sell by the foot. The markets are veritable flower shows in the spring, with their wealth of bloom and though this is not esteemed as one of the great flower-loving communities, yet the number of persons employed in these vocations, as may be judged by the Florists' Directory, must run into the thousands.

Baltimore was the cradle of lovely roses. Here the first American seedling roses were produced, and enthusiasts, whether amateur or professional, have never let the work be dropped. Almost three-quarters of a century ago Samuel Feast raised and sent out Baltimore Belle and Queen of the Prairies. Anthony Cook made a great stroke with Cornelia Cook, and the magnificent pillar rose, Charles Getz. The same German gardener called to the attention of George Bancroft that splendid rose which George Field saw, found it could be forced, and which became the American Beauty—still the queen. James Pentland for years raised seedling roses, amongst them Beauty of Greenmount, Woodland Margaret and George Peabody, all good of their class.

John Cook.
The Baltimore Rosarian.

But more conspicuous and successful than all has been John Cook, who has hybridized thousands of roses, working with real enthusiasm and infinite patience and discarding without hesitation those that were too short of stem, too slow to open or with other qualities not fitting them for commercial use. Amongst those which have won and kept favor are Souvenir of Wootten, Marian Dingee, Radiance, Baltimore, Mrs. Robert Garrett, Enchanter, Admiral Schley, My Maryland and Cardinal, and he still keeps at the work, keen and energetic as ever, though always active in directing his ever-enlarging business.

The elder Halliday produced some fine camellias; so did Pentland and the Feasts, and the Cereus Feastii was noted as the largest cactus flower in cultivation. Thus Baltimore is secure in her reputation as a center of activity in originating new sorts. In commercial endeavor, Robert J. Halliday, of the second generation in the trade, established a fine reputation, adopted advanced methods, advertising widely and pushing the metropolitan houses with energy and zeal, and always at the front in good works.

Various agencies have been effective here in promoting the interests of horticulture in its various scopes—educational, commercial and decorative. About the year 1850 the Maryland Horticultural Society was organized. Dr. Edmonston, an amateur with great fondness for plants, trees, flowers and decorative gardening, was its president, and active in its work were such men as Capt. A. C. Pracht, Messrs. Kurtz, Hack, the Feasts and others in commercial and private life. But its existence was not of great duration, though its influence was felt.

A quarter of a century later a new society was formed. This was largely a plant society, though fruits and vegetables were included in its objects. It held annual and monthly shows, quite equal to those of other cities and affording much pleasure to thousands of visitors. Men of means with handsome collections and the commercial florists, sent their plants freely; but with the change in taste in these matters, public interest declined and after a career of some twenty-five years the society dissolved. From it, however, had sprung another association, the Gardeners' and Florists' Club of Baltimore, which took up the work, adapting its operations to the needs of the practical and professional gardener and including in its membership dealers in flowers, plants, greenhouse supplies, potters, etc. It had a beneficial scheme and some social features gave interest and animation to the work. Soon it began to give exhibitions, which have always been creditable to the craft and to the city. The headship of the club has been passed around amongst the trade, and the president now in office is Robert L. Graham, as intelligent, energetic and broad a leader as any association might desire. Naturally with its views and activity the influence for the advantage of the trade is not inconsiderable.

From the club in extension arose the Florists' Exchange, the general clearing house effecting between growers and dealers the distribution of products, the collection of bills, the providing of trade supplies, and all the operations which in many places are conducted by commission houses or middlemen. The Exchange is neither of these; it is the creature of the owners, not their master, and the owners are the men actually engaged in growing trees, plants and flowers, or in buying and selling them. Past volumes of THE AMERICAN FLORIST have given accounts of the methods and notable success of this institution, and the articles have attracted many visitors. Others will be welcomed during

Winter Prices of Coal at Leading Centers.

When a manufacturing corporation contemplates the erection of a new enterprise, one of the first considerations to be taken in deciding the location, after the proximity of the market is settled, is the ability and cost of procuring the supplies with which to conduct the business, and the means of transporting them to the plant, and in many cases, this matter takes precedence and decides the location. The largest expense which a greenhouse proprietor incurs in conducting his business, with the exception of the wages paid for labor, is the cost of the fuel with which to keep the plant at the necessary temperature. When the natural gas wells were discovered some few years ago, many prospective builders carefully examined the conditions, and in some cases greenhouse plants were erected in the adjacent territory because of the inducement of procuring cheaper fuel. Many growers throughout the country have been foresighted enough to thoroughly scrutinize the situation, not only the locating in the proximity of a good coal supply, but also near enough a transportation line to either have a short haul, or to have a spur track built into the grounds close beside the boiler houses, where the coal can be unloaded directly from the cars into the coal bunkers beside the boilers.

Coal is found in this country in nearly every state of the union and is of three different kinds, known as anthracite, or hard coal, bituminous, or soft coal, and lignite; the principal deposit of the former being found in central and eastern Pennsylvania, the second distributed throughout the central and southern states, and the latter in the western section of the country, but there are several grades of each kind, the different deposits varying greatly, some being much richer in heating qualities than others. The greenhouse proprietor is generally very particular in buying his stock and in the class of labor which he employs, often traveling thousands of miles to examine a novelty, in which he intends to invest a few hundred dollars. But on the matter of his coal supply, for which he will expend $100 to one dollar spent for stock, he is entirely in the dark, thinking the subject too intricate and relying upon the dealer's word and honesty. There is as much difference in the grades of coal as in any other product and its adaptability for the several uses to which it is put, and this should be carefully studied. Coal from some mines while good for some purposes, may be entirely inadequate or unsuitable for other services, other coal is full of sulphur and other foreign matter that is deleterious, to plant growth and boilers and is too expensive and dangerous at any price. It is now possible to have analyses made whereby the heat units in a certain grade of coal may be fully determined, and government and municipal contracts, as well as those made by some corporations, are often drawn with such specifications. With the majority of dealers coal is simply coal, and little attention is paid to the quality, or the purpose for which it is to be used, the main factor taken into consideration being the price, but in this as in many other products, the cheapest is often the most expensive. An amusing incident happened to the writer some few years ago. Being desirous of ascertaining, as far as possible by practical experience, the comparative values of two different brands of coal, one of which was priced at fifty cents a ton higher than the other, with the idea of further purchases in carlots, a contract was made with a local dealer to supply one brand one month and the other the next month. Careful notes were taken of the outside temperatures and the amount consumed. During the second month the driver of the coal wagon was asked what brand he was delivering, and the answer received was, "Sure I don't know, it is one kind on one side of the pile and the other kind on the other side." It is needless to say that experiments on a small scale were immediately dispensed with.

Anthony Cook.

A Pioneer of the Baltimore Trade.

With a view of ascertaining what kind of coal was in general use in greenhouse heating, and what were the variations in prices in different sections of the country, THE AMERICAN FLORIST has requested its several correspondents to furnish the prices prevailing during January, 1911, in their several cities, and the kind of coal most in use by greenhouse proprietors. In the majority of sections from which reports were received, soft or bituminous coal is what is generally used, except in the eastern cities near the anthracite supply, and where in many cases smoke laws prevail which prevent the use of anything but hard coal. The prices of anthracite which were furnished show a wide range, depending greatly upon the distance from the mines, and the grade purchased. In the cities near the mines much smaller coal, called pea and buckwheat, is used but as the cost of transportation is the same for all grades, but little of the smaller sizes is shipped to great distances. The report from Albany states that most of the coal used is of the small steam sizes bought in carload lots on yearly contracts, a few growers use larger sizes at $4.45 per long ton. Some soft coal is used, but not near the city, varying from $1 per ton for poor grade up to the price of pea coal. In New York, the growers within city limits use hard coal entirely, making contracts during the summer with dealers near wharves delivered as wanted, with the prices a little lower than that quoted. The following prices per ton were quoted in January, 1911, in the following cities where anthracite coal is mostly used for fuel in greenhouses:

Albany, N. Y.—Pea coal, $3.95; screenings, $2.50 per ton, in carload lots.

Montreal, Can.—$7.00 per ton, in car lots, $6.50.

New York—$6.25 per ton, delivered.

Philadelphia—Buckwheat, $2.35, in car lots.

In the bituminous coal the proximity of mines is also marked in the prices quoted and in the sizes used, and in some cases unexplained differences in price occur but different grades make it almost impossible to compare the value of the product to the users, but in many cases where the same coal is quoted it can be observed how much more expensive is the maintaining of a large plant. The quotations furnished from the several cities, with the kind of coal used, is as follows:

Baltimore—$1.25 to $1.40, with freight added.

Birmingham, Ala.—Soft coal, mine run, $3.50; in carlots, $2.50.

Boston—Soft coal, $3.75 in car lots.

Buffalo—$2.50 per ton in carload lots.

Chicago—Soft coal, Pocahontas, mine run, $1.35 per ton; Indiana steam lump, $1.50; Centerville 6-inch lump and Youghiogheny, $1.65; W. Va. splint, Hocking Valley and Indiana domestic lump, $1.75; Lower vein Brazil black, $2.50; f. o. b. in car lots.

Cincinnati—Pocahontas, mine run, $2.75 to $3.00 per ton; in car lots, $2.60 to $2.65.

Cleveland—Three-quarters lump and four-inch nut, screened, $2.50 per ton; in car lots, $2.00 on the track.

Davenport, Ia.—$2.50 to $4.50 per ton; in car lots, $2.00 to $4.00. The fuel mostly used is nut, three to five inches, soft coal at $3.00 per ton delivered.

Denver—Hard and soft bituminous coal, mixed, run through a 2½-inch screen. Soft coal, $1.90 to $2.00 per ton; hard coal, $2.80 to $3.00, in carload lots on the track.

Detroit—Ohio and Virginia lump, $2.75 per ton, and about the same to large consumers.

Indianapolis—Pocahontas, mine run, carload lots, $3.15 on the track.

Louisville—Soft coal, Pittsburg nut, $4.60 per ton; lump, $4.75. In car lots, Kentucky nut, $3.15 per ton; lump, $3.25.

Memphis, Tenn.—Kentucky, mine run, $2.75 per ton; in car lots, $2.60, delivered.

Milwaukee—Pocahontas, $3.50 per ton; in car lots, $3.25 f. o. b.

Nashville, Tenn.—Soft coal, mine run, in car lots, $2 to $2.75.

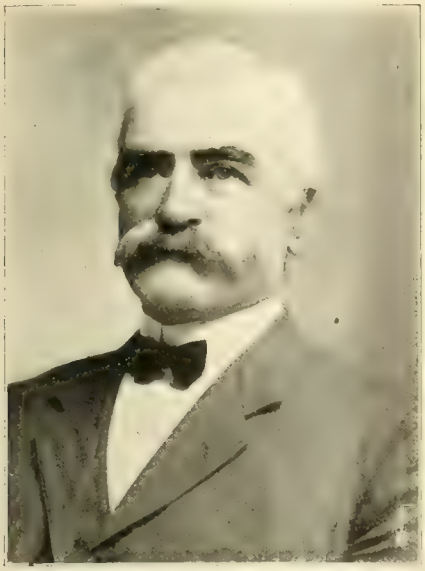
Omaha, Neb.—Cherokee steam, $2.45 per ton; delivered, $2.80.

Pittsburg—Slack, 82½ cents per ton at the mine; nut, $1.22½ per ton.

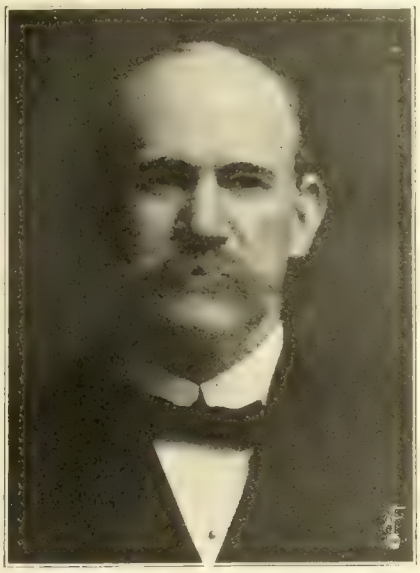
St. Louis—30-foot shaker, screened, $2.13½ in car lots, delivered.

St. Paul, Minn.—Youghiogheny lump, $5.35 per ton; in car lots, $2.75.

Salt Lake City, Utah—Soft slack, $3.50 per ton; in car lots, $2.75 on the track.



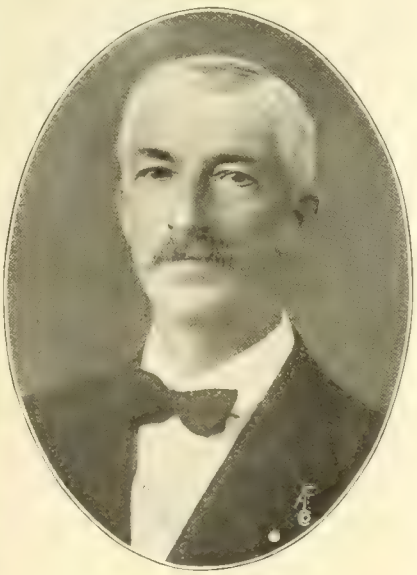
N. F. Flitton, Secretary.



Robert L. Graham, President.

F. G. Burger, Treasurer.

J. J. Perry, Transportation.



William Christie, Vice-President.

George Talbot, Financial Secretary.

Robert Halliday, Entertainment.

George Morrison, Reception Committee.

F. C. Bauer, Hotels.

SOME BALTIMORE PIONEERS, FLORISTS' CLUB OFFICERS AND CHAIRMEN OF COMMITTEES.

Tacoma, Wash.—The fuel mostly used is wood at $3.50 per cord. Coal is $4.75 per ton; in car lots, $3.25.

Terre Haute, Ind.—Soft coal, $2.75 per ton in car lots; slack, $1.40; mine run, $1.95; steam lump, $2.15 on the track. These prices by fall contracts.

Worcester, Mass.—Best soft coal, $5.00 per ton; in car lots, $4.00.

By a careful comparison of the prices quoted in the different cities a fair estimate can be made of the proportion of the cost that is paid for the transportation. Coal at the mines and after it has been hauled long distances are two different articles and as has been noted before, the freight on poor coal is just as much as that on the better grades. Another fact, brought out in the above quotations, is the great advantage of making contracts in the summer and receiving the low prices at which coal can be bought at that time on advance orders.

DRUID HILL PARK CONSERVATORIES, BALTIMORE, MD.

New York Botanical Gardens.

Visitors to New York should if possible pay a visit to these gardens. They are within easy reach by New York Central depot or by Third avenue elevated trains. There is much to be seen and learned there. Hunt up Dr. N. L. Britton or George V. Nash and they will make matters easy and pleasant for you. Many a time the best of us are puzzled over the names or nativity of some plants and nothing is lost but all gained by having a line of communication with a mine of such value as this is. There is of course a newness about it all—none of the glorious specimens seen in older botanical gardens, but the magnificent buildings contain splendid and ever-increasing collections of economic and plant exhibits. New or little known plants, many of which are destined to be of much commercial value, are continually being added to the collections and a study of these is more than worth while. There is an illustrated lecture given every Saturday at 4 p. m. Dr. Arthur Hollick was to have lectured on "Vegetation of the Swamps of Virginia" on August 5 last but owing to illness his place was taken by George V. Nash, who delivered a most interesting and splendidly illustrated lecture on "The Flora and Customs of the Black Republic of Hayti," San Domingo. Mr. Nash has been on a collecting expedition in that country and is familiar with it in every respect; his pictures and words showed immense possibilities in fruit and rubber cultivation. Here, you! what's the use of growing lapagerias for a penny? Whilst out there you get bananas, mangoes, pines etc., etc., grown for you by experts who work for fourteen cents each a day. Fie! Who talks about dago or Chinese when a French-talking negro can do this?

In the orchid houses we saw some fine blooms of Cattleya Dowiana, a splendid Stanhopea tigrina, and Cypripedium Ashburtoniæ, Calmanii, Grandianum, W. R. Lee, Selligeum, and Harrisonum superbum. An immense collection of palms, some of which are already touching the great roof, hint great possibilities for some future national show in this city. Out in the aquatic tanks in front of the houses are a very fine collection of water lilies, the most prominent of which is the "O'Mara Water Lily." N. O'Marana, a very beautiful bloom with a deep rosy blush either for its bachelor sponsor, or that so many Turks, barzabazooks and unchristian heathens stare at them. N. Deaneana, named for our old friend James Dean, has immense white blooms. Then there are N. Bisetti, Frank Treleese, William Stone, Kewensis, Devoniensis and George Huster, the latter being the most showy of all the hybrid nymphæas out at present. Victoria Crutziana with six large leaves and a magnificent bloom causes great attraction. Over in another tank are the nelumbiums and older types of nymphæas which are masses of various colored flowers. Away over in a sheltered vale are beds of classified medicinal and economic plants arranged to educate the public and student; very often classes from colleges and schools are given the uses and botanical peculiarities of these plants. In another part are the herbaceous beds in family groups. Yellows predominate among their blooms now and the prettiest of all is Ratibida pinnata. This beautiful chocolate-colored, lone flowered yellow queen shouts loudly for better recognition, it is a beautiful thing gracefully borne on long stems fine for cut flowers and whilst it would scarcely stand for market maulers, yet it should be grown by all who have to supply summer flowers. How finely shows the two black-eyed Susans here in cultivation. They flirt with every lover of beauty. Rudbeckia Sullivanti is by far the best for cutting and its longevity is remarkable, whilst that of Rudbeckia speciosa possesses charms of her own. Helianthus helianthoides and Helianthus Pitcheriana are too much alike to have different names,

LOOKING WEST FROM WASHING ON MONUMENT, BALTIMORE, MD.

at least in the same bed. Helianthus mollis and H. strumosus have individual charms also and where variety is needed there's room for them. Echinops Bannaticus and Eryngiums are good for odd work and that little Euphorbia corollata is a good thing for cutting, far better than many things we see on the market.

In the lily beds we noticed some fine L. auratum, L. Henryi, L. tigrinum

LAKE IN DRUID HILL PARK, BALTIMORE, MD.

splendens, L. elegans Wallacei, L. elegans, and many others, making up a most beautiful picture. Yes, visit the gardens—but be sure to smoke Pittsburg stogies or else the "moskeets" will just play with you. D.

Greenhouse Maintenance and Output.

In order to ascertain the cost of the maintenance and the output of greenhouses connected with cemeteries and public grounds Warren H. Manning of Boston, Mass., opened correspondence with sixteen different cemeteries and park boards requesting answers to the following questions: Area of square feet of glass under cultivation including greenhouses and frames; annual maintenance, including total cost and cost per square foot; number of plants grown per square foot; and cost per plant. This question of cost is almost as old as the florist business and has never yet been conclusively answered, each grower seeming to approach the matter of cost from a different standpoint and comparative costs always present a wide difference. The answers are far from complete and the figures obtained by Mr. Manning show a very wide difference; the cost of maintenance per square foot varies from $.93 to $.168, but the six answers to this question show an average of $.50 per square foot. The same wide difference is noted in the number of plants grown per square foot as well as the cost per plant, plainly showing that with some the space occupied by large and decorative stock plants is given, while with others the figures are evidently only those of the small plants, the number of plants varying from two to 13, with an average of 6.6 in 14 answers. With the wide variance in the number of plants per square foot, the same difference is noted in the cost per plant, which varies from $.027 to $.21, giving an average of $.072 in eight establishments reporting. The cost of greenhouse construction was also inquired into, but with one exception, where no doubt some expensive show houses were erected, the costs vary but little, being from $.70 to $.90 per square foot; the one exception is stated at $2.00 per square foot, the average of four establishments, not including the more expensive one, being $.785 per square foot. Greenhouse construction at the present time will vary more or less, taking into consideration the different manner in which greenhouses are erected, whether iron frame or wooden, or with more or less concrete used in their erection. Mr. Manning seems to regard the figures which he has obtained to have been of value to him, while on the other hand, W. N. Rudd, president of Mount Greenwood Cemetery, regards the data of no value whatever, commenting upon the results in a letter to Mr. Manning as follows:

"Referring to the greenhouse proposition, no doubt your figures regarding our own establishment are correct, but what is the use of it all? The table as you present it is not only worthless, but it is absolutely misleading. For instance, in one 6,000-foot establishment the cost of the plants is given as 21 cents each; in another 5,000 feet it is given as eight cents each, while in one establishment it seems to be a fraction under three cents, and the same variation exists as to the number of plants to the square foot. You seem to be proceeding on the assumption that a plant is a plant, while your informant undoubtedly reports everything from tiny seedlings, of which 125 or 150 may go in one flat, up to large plants in 10 or 15 inch or larger pots. For instance, during the present season, we forced 10,000 freesias; ten of these bulbs were placed in a 6-inch pot and the whole would take up just about the space of one well-grown geranium; and yet if you give these as 10,000 plants, it changes the entire state of affairs.

"The one who is paying 21 cents to grow his plants might have possibly been growing them cheaper than the man who is growing them for 2 7/10 cents. You nor I, nor any one else, can have any idea about it, so that I am compelled to say to you in all frankness that your conclusions under the 'number of plants per square foot' and 'cost of plants' are absolutely worthless; and if you publish them or put them out and any person takes them seriously harm will result; the old experienced greenhouse man will smile at them and let them go, but the man without experience is likely to think that they mean something, when they really mean nothing at all.

LOOKING NORTH FROM WASHINGTON MONUMENT, BALTIMORE, MD.

"The question of the cost of production is a perennial one among greenhouse men. Nobody has ever, so far as I know, been able to make an estimate of it which was worth the time taken in reading it. It certainly varies with each indivdual establishment and in each individual establishment it varies from year to year. The writer was formerly an accountant by profession and has made many fruitless attempts to solve this question of the cost of production in greenhouses and has simply given it up as a bad job."

Cyclamens.

One of the finest plants for the holiday trade and in fact during the whole winter, is the cyclamen, for with a little manipulation the grower may have cyclamen plants in bloom from December to March. The old-time gardener sowed his cyclamen seed in February and in order to produce large plants carried his plants through the first winter in rather small pots, keeping all the flowers picked off in order to induce the plant to reserve its strength and encourage the growth of the bulb. But times have changed and so have methods, and the more successful growers have found that by sowing the seed in September as large a plant can be produced, and the difficulties and uncertainties of carrying the bulbs over a second summer in the hot dry climate of America, are obviated.

The first thing necessary to be sure of having good plants is the procuring of a good strain of seed. Those who raise their own seed know what they have, but those who do not do this should purchase Cyclamen persicum giganteum, and if any quantity are to be raised, get seed of the separate colors. The soil in which the seed is sown should be light and friable and under no circumstances use a soil that packs down hard under frequent watering, for the seed is slow to germinate and when it starts to grow throws up a little white bulb on the top of the ground from which the leaves start, so the soil should be light enough that the little bulb can easily break through the upper covering of soil. If obtainable make the soil one-third leaf mould, which will guarantee a good light soil, and incorporate a good proportion of leaf mold in the soil throughout the plant's culture. As has been stated, the seed is slow to germinate and sometimes very uneven. They are very hard and many growers soak the seed in tepid water for 24 hours before planting, but care must be taken not to let them become dry again after being once well wet through.

With the soil and seed ready it is better to sow in flats. Fill the flats with the prepared soil to within about an inch of the top and plant the seed in rows about one-half an inch apart. This is much to be preferred to broadcast sowing, for no matter what methods are pursued it is impossible to have the seed all start at the same time and spacing between the seeds will give ample room for the plants to grow until all the seed has germinated. If planted broadcast some of the seeds will be so close together that the soil will have to be disturbed in order to transplant them before all the seed has grown enough to stand this disturbance, and beside, if properly spaced, the small plants can be grown for considerable time in the seed boxes, in fact, they can frequently be left in the seed flats until early winter. After the seed is sown sift on a covering of fine soil about one-eighth of an inch deep, being sure to cover all the seed well, so that there will be no danger of its drying out. During the warm weather it is better to place a light of glass over the top of the box until the plants begin to grow to prevent evaporation. The boxes should be placed in a warm, moist house and during the bright, sunny, warm days a paper or other shade should be laid on the glass. In four to five weeks the little white bulbs will be seen pushing through the soil, when the shade should be removed, but the glass had better be left on until the foliage begins to grow.

A FINE CYCLAMEN FOR CHRISTMAS TRADE.

During the early winter, depending greatly on when the seed was sown and the growth they make, the young plants will have to be transplanted. Just as soon as they begin to crowd or the foliage begins to touch, transplant to other flats about two inches apart. By this time the plant will have quite a bunch of roots and these should be disturbed as little as possible. Another transplanting will be necessary during late winter or early spring, but the plants are still better off in flats than in pots. At this time, if preferred, the plants can be set about three inches apart on benches filled with good soil. In April the plants should be large enough to be potted in 4-inch pots. They will be growing very rapidly now and in four or five weeks can be shifted to 6-inch pots and placed in a frame outside covered with lath frames. Here they can remain until September or October. Those that are to be flowered at Christmas are better brought into the houses in September, but those that are to be in bloom during the winter can be left out much longer, depending upon the weather, and being covered with glass sashes. When the plants are placed in the 6-inch pots be sure and give them ample drainage. No plant suffers quicker from blocked drainage than the cyclamen, and it is better to have them plunged in ashes during the summer than in soil, for there is less danger of angleworms in ashes than in soil and these worms will block up the drainage in the pot.

When brought into the houses many of the plants will require a shift into 7-inch pots, which should be large enough to assure of carrying a fine crop of flowers. Give the plants plenty of air and a temperature of about 50° after the weather becomes settled. If the buds are not setting well on the holiday stock by the latter part of October the heat may be raised a little up to 55° so as to be sure to have them in bloom at that season. After being brought into the houses they should be frequently fumigated, for if attacked by thrips or aphis they are quickly spoiled. These insects should be kept down during the early stages for after the plants begin to flower they will

A LARGE SPECIMEN CYCLAMEN.

not stand heavy smoking, and spraying or standing among tobacco stems must be resorted to after this period of growth.

When it is desired to raise seed the best plants should be selected and set one side and hand pollination is necessary in order to secure the setting of the seed. The method usually followed is when the flower is in full bloom to place the thumb nail under it and gently tap it with the other hand and the pollen will drop on the nail. Then rub the pistil which extends beyond the anthers with the pollen. After eight or ten flowers have been pollinated the remaining blooms should be removed and the plant placed in a house where the atmosphere is not too moist. When the seed is nearly ripe the seed pod must be watched carefully. The stem, which has been very stiff and rigid, will become soft and the pod open and the seed will drop out. As soon as the seed pod begins to show signs of opening it should be picked at once and placed in a dry place where the seed can be taken out.

There is no plant that blooms during the winter that the grower can sell with more assurance of its being satisfactory than the cyclamen, for it does well in nine cases of ten in residences and if given the proper amount of care will bloom for a long period and be a source of great pleasure. There is nothing difficult in their culture and if a good strain of seed is obtained and the plants given proper care successful results are assured.

Fragrant Cyclamens.

By means of repeated hybridizations of cyclamens which possessed a varying fragrance, a race has been produced by Vallerand of Asnieres, which possess an agreeable fragrance, says the Revue Horticole. The first flowers to attain this charm were the red with carmine eye, but during the last five years, the fringed, double, Papilio and Jobert varieties have been obtained with this added advantage of perfume, varying but always agreeable.

Blue Hydrangeas.

The most serviceable substance to induce a blue coloration in the flowers of Hydrangea hortensia is ammonia alum. The fact that some gardeners have obtained unsatisfactory results is, perhaps, due to not applying this substance in a proper manner. Writing in Moller's Deutsche Gartner-Zeitung (No. 23, 1911), W. Titze, who claims to have produced uniformly good results, recommends watering the plants copiously twice a week with a solution of ammonia alum at the strength of one-half ounce to one gallon of water. The plants must not be grown in full sun, or the blue color, though deeper, is apt to be blotchy. It is desirable to water with this solution in autumn until the plants pass into the resting stage.

THE DAHLIA.

Top-Dressing Dahlias.

Dahlia growing on a small scale affords the greatest pleasure as well as the best results. How many times a small grower will complain that he has no show with the big grower. It is all a matter of knowledge skilfully used, and all things being equal, the small grower can get better results, because he can give individual attention to his plants. For the same reason amateurs have, or should have, better results than professionals.

Nowhere, however, is a lack of knowledge more disastrous than in top-dressing plants. How many times is nitrate of soda used to the detriment of plants or flowers? Nitrate of soda is one of the most active elements of plant food and should be used sparingly on dahlias. Use bone and potash is my advice to amateurs and beginners as the best fertilizer for dahlias. A short, stocky, close-jointed plant, that has been normally grown will pass unharmed through a hot, dry season that will harden and singe the foliage of a large, rapidly grown plant, or will withstand heavy storms that would lay the large, soft plant flat.

With us top-dressing is all important. We sow rye and broadcast manure on all the poor or light places only. If the season is wet, we cultivate deeply, to make the growth less rapid, and pinch out the main plants to cause them to branch. As we grow for cut flowers and roots, we top dress with a mixture of one part of nitrate of soda, two parts muriate or sulphate of potash and four parts bone meal. This is applied between the rows and thoroughly cultivated in. This is applied in August and not only gives a crop of high-grade flowers for September and October, but insures the highest quality of roots for the following season.

The above system is radically wrong according to some of the highest authorities. However, let us stop and consider that climatic conditions in America are different from Europe or Central and South America. Thorough cultivation and disbudding will carry a dahlia through the dryest season in pretty good condition, and as the long, cool nights come, the top dressing made available by each shower or rain, will develop such a crop of blooms as to astonish the old line growers. Of the culture of dahlias at the Peacock Dahlia Farms, Edwin Lonsdale in THE AMERICAN FLORIST issue of October 11, 1902, page 374, wrote: "Those who expect to see dahlias growing in rich soil of a loamy nature, which are six to eight feet high, will be disappointed, for in Acto, with fields of sand to grow in, the dahlias are quite dwarf in comparison. The dahlias here, of course, grow in height somewhat according to the time they are planted. In one part of the farm that had been planted the first week in September many did not appear to be more than a foot high and most of those in the main plantations were from two and a half to four feet high. Mr. Peacock stated that they use little or no barnyard manure, but for plant food concentrated fertilizers are used, and they

are not applied until after the plants show well above ground and are then broadcasted and cultivated in. When mention was made that the plants are growing in nothing but a bed of sand—yes, sand, apparently, that a bricklayer or stonemason or plasterer would not hesitate to use in any of their respective operations—nor would a propagator demur at using it in which to root any or all kinds of cuttings—Mr. Peacock said that there is a clay subsoil."

With us in America, it is more a question of moisture, than fertility, hence the idea is to keep the plants low so as to shade the soil around the base and avoid the necessity of staking, also to avoid evaporation, which is far greater with large than small plants. Then the application of a top dressing toward the end of hot weather will give us not only the finest flowers, but fatten up the roots for the following season. Any kind of manure or fertilizer can be used for top dressing with good results, and it is always better to under than overfeed. Our mixture as mentioned above we apply at the rate of 500 pounds per acre, with a second application on any poor spots. This mixture is equal to one-half ton of regular fertilizer. When advised to use nitrate of soda, don't forget to add bone and potash; it will enhance the color and keeping qualities.

It is, of course, according to the point of view. Do you want plants or flowers? Do you just want flowers or the highest quality of flowers? Much also depends on the variety, but a good rule to follow is to give a top dressing in August and if flowers get smaller a second top dressing in September. Use any commercial fertilizer, manure, or fertilizing material at hand and apply all over the ground—not simply close to the plant.

LAURENCE K. PEACOCK.

Raising Dahlias From Seed.

The dahlias I have originated have all been accidental seedlings, and with two exceptions, were from seeds collected from a choice collection of varieties indiscriminately; but I have raised several sorts that have taken a leading position. My first batch of seedlings, says W. F. Bassett in the Dahlia News, came from about fifty seeds from a semi-double cactus, W. T. Abery, introduced by J. C. Vaughan. From these I raised forty-five plants, among them, American Flag and Fern-leaved Beauty, introduced by H. A. Dreer Co., and Harlequin, introduced by W. Atlee Burpee & Co. This variety I have previously named "The Brownie," and I think the name Harlequin very inappropriate. Frank L. Bassett, which, all points considered, I think is the best of my seedlings, probably came from seed of Claribel. Black Diamond came from seed of Black Prince, a well-known large decorative semi-double variety. Eloise, Olympia, Progress, Pendant, Gettysburg and Gaillardio, the latter single, are among those that originated with me and still hold a prominent place in many leading catalogues. Most of these were sold to and introduced by L. K. Peacock; and to show how circumstances sometimes change the appearance of dahlias, when I sold Olympia I had only one plant of it, and that was not larger than a good-sized pompon and was only selected for its good form and coloring; and when I saw it in bloom, the next year in the Atco grounds, as a very large flower, I did not recognize it. Blue Oban originated with me as a sport from Oban, and Perlhilde occurred as a sport from Kriemhilde simultaneously with me and with David Herbert & Son at Atco.

In 1897 I selected about thirty from my field of Perlhilde that were pure white; but about half of some hundreds grown from these reverted back to the Perlhilde color, and for this reason I have not offered it as Whitehilde, as I had intended to do. The Jack Rose came from a field where Storm King and Frank L. Bassett had been hybridized, and the appearance of the flowers would indicate that these were its parents, although the seed was self-sown and therefore nothing positive is known. For the last few years I have been raising dahlias especially for cutting and have not allowed them to produce seed; but last year I procured seed from a western firm, as Burbank's seed, more than four-fifths of which were small and

Specimen Cyclamen Plant.

imperfect and did not germinate at all, and those that did were wholly worthless.

I fully believe in scientific work; but I intend to plant certain varieties together to secure accidental crosses this season, and think I will stand about as good a chance of success as in buying seeds claimed to have been hybridized.

The Soap Nut.

In a recent number of the Scientific American E. Moulie, Jacksonville, Fla., has an account of a wonderful soap-bearing tree said to have originated from seeds brought from China by missionaries twenty-seven years ago. Mr. Moulie believes that the soap-nut industry may be made to pay in Florida and the warmer parts of the south and offers seeds free to those who wish to experiment in the matter. The botanical relationships of the soap-nut are not indicated but in this connection it may be noted that soap-trees are not unknown, even in this country, states the American Botanist. In fact, we have two native species, one of which, Sapindus acuminata, grows as far north as Arkansas. Many other soap trees belong to the genus Sapindus. Sapindus utilis has long been cultivated in Northern Africa for its soapy qualities, and the Chinese have another species, S. mucorossi, valued in the same way. It is possibly this latter species that has found favor in Florida. Still another species, S. saponaria, grows wild in the American tropics.

THE GLADIOLUS.

Cultural Notes.

Only a few days remain before the second annual exhibition of the American Gladiolus Society takes place at Baltimore and notwithstanding discouraging reports of damaging drouths from many parts of the country, I believe that our exhibition will surpass the splendid show that was made at Rochester last year. The growers that have kept the cultivator busy during the dry spell will be able to bring some good spikes of flowers to Baltimore. We have had practically no rain for two months at Orange, Mass., the first good rain coming July 24, and another good one July 29, but we kept the soil stirred twice a week and are now cutting as fine flowers as we have ever seen.

The judicious application of the solution of formalin on scabby bulbs has resulted in giving us the healthiest plants we could wish from such stock. The extreme hot weather forced some varieties into bloom a week earlier than we ever had them before, and a few days before they began to flower the buds scorched as though they were held over a blaze of fire. It was surprising to see how the rain brought them around again. It is generally believed that cutting the spike when the first two or three flowers open will result in producing a stronger bulb that will give a better spike of flowers the next year. We took this for granted for several years; but have been doing a little experimenting for the past three years, and find that nearly all bulbs that we have grown for seed give a spike of flowers equal to those from which the flowers were cut.

We have received some rare species of gladiolus bulbs from the Transvaal. These were sent us by a well known collector of botanical specimens, George Thorncroft, Barberton, who has discovered many rare plants, including gladiolus and a rare pink cyrtanthus, which has been given his name by the authorities of the Royal Botanic Gardens, Kew. Mr. Thorncroft has also sent us some bulbs of a new cyrtanthus with umbels of pure white flowars. A pot of a few bulbs are as beautiful as freesias. They flower around Barberton in May and June and multiply enormously from offsets. They grow in South Africa at an altitude of 5,000 feet, but the frosts there are not severe, so we do not yet know whether they are hardy enough to plant out in the fall here.

Returning to the gladiolus, Mr. Thorncroft tells us that there is a new species which is very beautiful, the finest one they have, that flowers in December. It is a large flowering variety; color, old gold, splashed with red. Many of these species are interesting; but of little use in breeding for garden sorts. L. MERTON GAGE.

NAPERVILLE, ILL.—Jacob Rohr, of this place, died August 8.

BURLINGTON, IA.—Joseph Bock, the well known florist, died Monday afternoon, August 7.

DAVENPORT, IA.—John T. Temple hardly expects to greet old friends at Baltimore, having a hospital operation on hand this week.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Bridal Bouquets.

The shower bouquet is still the most popular of all arrangements for the bridal ceremony and all the skill of the best designers in the country has been exerted in making beautiful this necessary feature of the wedding. Lily of the valley and orchids are the generally chosen flowers, yet sweet peas and sometimes roses are used. It is not necessary that the bouquet form be adhered to too closely, for many are now making these of the shower alone, with no bouquet arrangement for the hand, a large, well arranged knot of silk gauze ribbon being tied where the bouquet is often arranged and the flowers falling from it in a graceful spray. The spray which we illustrate was lately carried by a bride at a fashionable wedding and was made of lily of the valley and gardenias arranged with the gauzy ribbon draped behind them, and was a most beautiful and effective arrangement.

Floral Arrangements at the Convention.

Naturally every one attending the annual convention is deeply interested in the art of designing and what is called "making up," and it has always been a puzzle to us why the retail florists of the locality surrounding the place of meeting, or for that matter, those of the country in general, do not take advantage of this splendid opportunity to show their ability, and in this practical way show the general public their worthiness, assure their out-of-town florist friends dependable qualities in executing telegraphic orders, and in numerous ways doing immense good to the "cause" in general.

There can be no doubt about it at all that a creditable display of the retailers' art can be made the most interesting and attractive part of any exhibition. 'Tis only too true, and more's the pity, that little or no inducements are offered to the retailers and in many cases, too, the narrow-eyed, prohibitive rules or other reasons are invoked to destroy any possible intent to exhibit by the retailers, all of which is particularly lamentable. These annual trade exhibits may be distinctly and appreciably interesting to those who arrange them, but even a boiler or a bale of sticks can be so arranged as to appear more attractive and appliances can lose none of their qualities by their being appiled. The ever ready thought and hackneyed argument that most all flowers and plants are beautiful and need no other asset is merely child prattle when the commercial side is considered, and the vast majority, if not all, growers are retailers when the opportunity occurs. Therefore the uses to which the seasonable flowers and certain grades of the same can be put, the best way to arrange them, the adaptability and color effects, the importance of variety or of seldom grown stock, the superiority of that which is obtainable and the opportunities for that which is not, are all of vast importance to every person attending the convention. Then there is the general public who are not slow to appreciate the beautiful. On behalf of the other side it may be truthfully advanced that the retailers as a class are the most indifferent, the most jealous connected with the trade. There is, alas, too much truth on both sides. Arrogance and bitter

SHOWER BOUQUET OF LILY OF THE VALLEY AND GARDENIAS.

arguments will always be on the morgue side of any business. The live retailer will do well to grasp the splendid opportunity given to him by these annual convention shows; even if he has to pay for space, what better mode of advertising his goods and genius? But it is as a society we would like to see creditable things done. For instance, there will be thousands of gladioli on exhibition at Baltimore. Of course they must be arranged in classes and groups to meet the schedules specifications. Well after the judging in these classes are over and on the second day how good it would be to have a dozen or two floral artists get together and use most of these gorgeous flowers in showing how they can be used in table decoration, arrangement of vases, funeral bunches and designs, horseshoes and other designs and baskets.

Could the American Gladiolus Society do anything better to advance the popularity of this particular flower than by having competitions in the displaying of how they can be used and how beautifully they can be arranged? There are enough good artists going to attend this convention to make such a competition extremely interesting. Let all use the same material and have none use anything but superior ability.

Then again there are the plants. Who cares for a table or mound of plants after they are judged? Get some artist to show how much better they can be made to look. And, oh! you lily bulb dealers, did it ever occur to you to get together and have competition in lily classes? Magnificent lilies of many varieties are to be had now. Why not show some interest in them besides selling dormant bulbs? Their uses could also be portrayed.

Then there are the aquatics. What more beautiful than table decorations of water lilies, both for luncheons and dinners?

It's time some sensible thing was done to create a more friendly feeling and have all these great opportunities made use of. D.

CATTLEYA GIGAS.

Mignonette in the Garden.

Among the attractions of the open garden, one of the best is a bed of mignonette. In one large garden I had charge of for many years I had to cover the surface of some large rose-beds near the mansion with mignonette. Some may say: "How can mignonette be sown in a rose-bed?" asks a correspondent in Garden Illustrated. My method was to sow, at the end of April, a given number of 4-inch pots with a kind that gave the most perfume, placing the pots in a cold-pit. When large enough, these were planted out among the roses, when they quickly covered the surface of the beds. In some gardens it is difficult to get mignonette to grow by sowing it in the open, and in soils deficient of lime all the more so. It is astonishing the space that can be covered when a few pots of good, healthy plants are planted out two feet apart in suitable soil. There is a considerable difference in the scent of some kinds of mignonette compared with others. Undoubtedly great improvements have been made in size and color, often at the expense of scent. No one can deny this when he sees many kinds growing side by side. I have often heard people say they could see no difference in the color of various mignonettes. In a large trial the kinds are most diversified in height, spreading habit, and scent, as well as color. For the open garden a kind that grows freely is more useful than the varieties that are dwarf and sturdy. These latter give enormous spikes, but do not branch much. For cutting, a free-growing, well-branched kind is the best. I have found in late autumn mignonette of the greatest value to fill vases in the house. When tall and branching, mignonette is excellent when cut in good big branches, placing them in the vases alone. In this way it is far more beautiful than when cut in small bits or used with other flowers. Miles's Hybrid Spiral has much to recommend it, and is still hard to beat. The Golden Queen types many admire, while the Machet types, of which Bismarck and others are forms, are splendid for pots.

MUNCIE, IND.—Roland Longfellow, son of the late Marcus Longfellow, died at his home Tuesday, July 18. The funeral was held July 20, and the interment at Beech Grove cemetery.

RED BANK, N. J.—The New Jersey State Horticultural Society held a meeting and exhibition in the Town hall July 26. John T. Lovett, of Little Silver, made a large exhibit of seasonable flowers.

LAELIA ELEGANS.

DENDROBIUM NOBILE WITH 1,300 FLOWERS.

ORCHID NOTES.

Orchids in August.

THE GROWING MONTH.

August may well be described as the "growing month" for orchids and the cultivator who has all his plants potted, his houses clean and in order can sit back and let them grow and feel happy that his plants are in such good trim. Not that there is nothing for the orchid grower to do in August—there is plenty of work, but the shifting around of the plants, the worry consequent on repotting delicate or rare specimens is over and there is great interest in going through the houses and noting how the plants are "making out" and to take notes for future guidance. But growth is the order of the day and everything possible to encourage it should be done.

We leave a little air at night on all the houses now but this has to be increased early in the morning before the sun has had time to raise the temperature much. Before shading we always "damp down," wetting every bit of stage, floor, wall or any other dry place, this giving the plants a chance to enjoy a certain amount of sunshine and fresh air—to give them an "up-early" feeling—before being closed up beneath the blinds for the day. Closed up is perhaps hardly a good term for they have to have plenty of air, but there is a fine buoyant feeling in the houses early in the morning if plenty of air is left in that cannot be duplicated later in the day under the shades.

DENDROBIUMS.

No orchids like an airy buoyant atmosphere with plenty of sunlight better than the dendrobiums. They grow in heavily shaded, ill-ventilated houses but to enjoy life they must have light and air and plenty of it in addition to heat and moisture. All the deciduous section, also the partly deciduous kinds and all that are grown for cut flowers like this kind of treatment. D. nobile, D. formosum, D. Phalænopsis, D. Wardianum and any or all of the many fine hybrid dendrobes now so popular, like it, reveling in the moisture and delighting in being freely and continuously sprayed, providing they are growing—as they should be—in small receptacles where the roots have to fight for room. A few weeks longer and the cylindrical stems will be finished and the ripening or consolidation of the stems must begin but just now let them grow all they want to.

CATTLEYAS.

As to the cattleyas there is not much to add to what we said in our last notes. But there has been a good deal to do since. Our water here is heavily impregnated with an alkali that is not pleasant to see. It leaves a scum on benches, pots and plants which, in addition to the green, mossy growth that is common in wet places, has to be cleaned off occasionally. A good scraping of the under benches, scrubbing the pots and a couple of days of dry treatment followed by light sprinklings of lime freshly slaked has greatly improved the appearance of the houses as well as sweetened the atmosphere. C. Trianæ is showing sheaths freely in the young growths on established plants and the newly imported stock potted in May is not far behind. C. Mossiæ and C. Percivaliana are both growing freely, while C. gigas is still flowering more or less and will, we hope, keep dormant except for root growth for some time now.

There is absolutely no time in the year when the grower has not to be on the lookout for cattleya fly. This pernicious pest has the power to so irritate the nerves of the plant that where its eggs are laid the growth at once becomes active. It may not develop—in fact it probably will not in most cases—but it will develop sufficiently to hatch out a young brood of flies strong and vigorous enough to perpetuate their race to the dismay of the grower who imagines he has killed them off. Wherever a growth is seen to be starting untimely—as for instance at the base of a newly made pseudo bulb of C. Trianæ or C. Mendelii at this time of year—it is pretty safe to infer that the fly has been at work there and the growth should be destroyed. It is out of season anyway and the plant has plenty of time to form another long before it is wanted. Regular, light fumigation should still be kept up, for with the best of care there will be some fly missed and the mischief that only a few of these insects can do to healthy orchids in a short time is incalculable.

LAELIAS.

The Mexican section of lælia, comprising such species as L. anceps, L. autumnalis, L. majalis and others have practically finished their growth for the season and must have an abundance of light. In some localities these species are better for a week or two in the open air but we would not advise it for any except the last named in very hot, dry sections of the country. L. majalis delights in

the open air treatment and never flowers so freely as when it is so treated. L. purpurata, a Brazilian species too well known to need description, is not so freely imported as formerly and if some reports we hear are true it is not likely to be at all plentiful in time to come. This is a pity for L. purpurata is a grand orchid and its bright, showy flowers should make it a useful species for cutting for commercial purposes. The treatment of this species, also of L. elegans and its varieties is practically the same as for cattleyas generally and they thrive well in the same house. H. R. R.

Growing Phalaenopsis.

ED. AMERICAN FLORIST:

I have 50 phalaenopsis in a house where the temperature drops to 50° toward morning. Is this all right or is it too cool? C. F. F.

California.

Most of the species of phalænopsis in general cultivation come from equatorial regions, where the temperature varies but little night and day or winter and summer. Consequently the temperature named (50°) is a good deal too low for the best results. Phalænopsis like a night temperature of 65°-70°, rising five or ten degrees by day according to the weather. While we do not say that, other considerations being right, these orchids cannot be grown at a lower minimum temperature, the above is best and in California the cold nights following hot days are extremely trying to these very sensitive plants. A little steam or other heat should always be used at night, summer and winter, and if this is done and other conditions kept right the climate of this state is fine for orchids of all kinds. H. R. R.

W. A. Hastings.

The delegation that leaves Boston August 13 for the convention at Baltimore will have for their leader one of the most popular salesmen of the Flower Exchange, W. A. Hastings, state vice-president of the Society of American Florists. Mr. Hastings is a young man full of life and vigor and was born in Hudson, Mass., on a farm, and is the picture of health with sinews and muscle that a life in the open air in boyhood days bestows on early manhood. For the last ten years he has been one of the most successful salesmen in the market except for a short time, when he was traveling representative for A. H. Hews & Co., his principal consignors being Nelson & Johnson of Framingham and J. J. Johnson of Bridgewater, the former being carnation specialists growing excellent stock of high quality. Mr. Hastings is rated as one of the best salesmen in the markets, his buoyant spirit, genial and gentlemanly manner have made him a host of friends who were pleased with the honor conferred upon him and hope that higher honors in the S. A. F. may be his lot. MAC.

FITCHBURG, MASS.—Joseph Fuller has moved his flower store to that formerly occupied by S. A. Newton as a news store.

BRIDGEWATER, MASS.—The new greenhouse at the State Normal school is rapidly nearing completion and will be ready at the reopening of the school in September.

WHEELING, W. VA.—Frank C. Seibert is making extensive improvements this season, among which is the erection of a modern greenhouse to conform to the rest of his plant.

THE PERENNIALS.

Native Plants.

In certain sections of the country, and perhaps one ought to say in all parts, at times we experience long periods of drouth as in the present, it seems very general from east to west, but we here in the middle west have had frequent thunder showers that have saved the situation from week to week so that crops did not get injured, and the borders and lawns were kept in fair condition. It is an old saying that all signs fail in times of drouth, and the efforts of the florist and gardener are as nothing compared to a good steady rain, even with plenty of water and labor. The past three years

W. A. Hastings.

State Vice President S. A. F. Massachusetts East.

have been dry ones. We came through the winter with a dry soil that did not freeze more than a few inches deep, and these conditions have taught us one lesson well, that it pays to put our trust in native plants for borders rather than those of exotic origin. There is an abundance of material such as no other country can boast of, ready to our hands and already acclimated for use, and more than this, they will go through a period of dry weather rejoicing.

The foremost landscape gardeners long since learned the value of the native trees and shrubs, especially the latter, and it is only within the last ten years that the native thorns have risen, Phoenix like, from their ashes to places of honor in the parks, woods and gardens and it is good that it is so. This is only one, we hope, of the signs of the times that we get back from the freak variegated, striped, or colored foliage epoch, to a rational era of quiet, soothing, straight green. Verdure would not have remained green were it not the best color to look at, even though it were so in the beginning, and if any one is inclined to want freak specimens, tell them they are diseased, for there is no better way to wean from the etiolated, anaemic subjects, planted much too often and thought correct. The same argument will apply with herbaceous plants and may be considered in the same way. We all know that at this time of year most all of us have to apologize to visitors for the appearance of things in the borders, and until the phlox comes in, there will be too few bright spots and yet last Sunday an afternoon spent in the prairie resulted in an armful of good things, a specimen of each, many of them new, all showy and included two orchids, two lilies, two liatris, a late flowering allium, pink and white with long stems, a euphorbia, several fine asclepias, two silphiums, and so one might go on with the list of about thirty fine showy plants all deserving a place in the border because of the season of bloom. All of these had struggled for a right to live from the start, and today are better than any foreign plant we have in bloom in the borders with all the care given them.

The fact is we have lived too long in the woods, beautiful as they are in early spring and summer with hepaticas, trilliums, cypripediums and podophyllums, but there are no flowers in the woods now, and we must get out into the open where there is more light, mark the things that are good and get them in the fall months, not necessarily for the wild garden as some may think, for with good treatment few that saw them in passing would recognize them after they become established. What a glorious sight a planting of Golden Rod would be if made up of the various species that are showy from this time on, yet we have never in all our travels seen one attempted but hope for one next year, some are in bloom now and we shall have a succession until frost, the same is true of the asters, and our ferns cannot be equalled except in the tropics.

Our native plants need no one to plead for them, it is only necessary for us to go about with our eyes open and see things without colored glasses, one of the happiest finds was a patch of Phlox paniculata, the parent of all our garden varieties, growing in a low moist place and over-topping all other plants with a beautiful pink color. We cultivated it years ago because it was the beginning and could be pointed out as such, but if cultivated where it can be sure of moisture it is well worth a place in any border if only to show the way it has been changed by the hand of the cultivator.

Many have trouble in getting trilliums to grow after they are taken from the woods. This is the only time to get them—just as the tops are turning yellow, and the roots will go on growing until fall and re-establish themselves before winter. They should never be moved when in flower, if it can be avoided, as they are easily found at the present time. The Dodecatheon Meadia or "Shooting Star" is also best moved now as it has died down completely, but can be easily located by the flower stems where they grow in quantity, and it is one of the best of all border plants in early summer, but must be mixed with some other low growing subject as Campanula carpatica which will cover the ground later and make a good display. Both these plants will thrive best in partial shade, and this gives them added value. They will do well, too, where ferns are happy, flowering before the ferns cover the ground.

E. O. ORPET.

WITH THE GROWERS

The Joseph Heacock Co., Wyncote, Pa.

That the flower and plant industry is growing rapidly, the volume of business increasing steadily with each recurring season, is made apparent by a visit to the large growers in the vicinity of Philadelphia, where may be seen the best of everything in palms, ferns and other foliage plants in this country. One of the most successful of these establishments is the Joseph Heacock Co. at Wyncote, Pa. Heacock's kentias are now famous the country over. Starting with a few some years ago as an experiment, the stock has been constantly increased, crowding out one house of cut flowers after another until but few roses, which were the specialty, are now left, the new establishment at Roelefs caring for this stock. One Roelef house, 55x600, is but the forerunner of another soon to be erected, and no one knows how many more. The past season's cut from this house has been even better than expectations, and the quality exceptionally fine. The kentias are, however, more particularly interesting at this time and they are to be seen at Wyncote in splendid shape, a much larger stock and in greater variety of sizes than ever. Special attention has been given to the larger sizes, of which they have never had enough to last out the season, and this year, in spite of the greater quantity, there is likely to be a shortage as more stock has been ordered and set aside at this time than last year. All palms are grown in tubs, which Mr. Heacock says is better than pots for several reasons, the two principal ones being that they do not dry out so rapidly, and the decorators say they are easier to handle and there is no breakage. Mr. Heacock says they now get the tubs from six inches up to twelve and over, in carload lots. All the stock is from seed sown on the place as in this way they are certain that the plants are healthy, as every stage of growth is closely watched and given the necessary pot room to keep them on the go while young and then grown in the tubs into combinations or single specimens. Kentia Belmoreana and K. Fosteriana are the standard sorts which are grown in quantity. Areca lutescens is also seen in good sized blocks, they find a good demand for the latter, for while not so hardy as the kentia, its decorative qualities make it a favorite with many. Phoenix Roebelenii is also seen here, a beautiful palm and very well grown, a table of cocus with the phoenix elevated in the center is very attractive. The cocus are grown in quantity mostly in 2½ to 3-inch pots, for ferneries. Many small kentias in the same sized pots are also sold for fern dishes, many preferring them for this purpose on account of their bold foliage and keeping qualities.

SPECIMEN KENTIAS AT JOSEPH HEACOCK CO'S, WYNCOTE, PA.

Ferns are also a feature here, Nephrolepis Bostoniensis and Scottii, the old reliables, being the leaders, at certain seasons the extra large Bostons are much in demand. The last few years cibotiums have been taken up and like everything else, are well done, there being many handsome specimens of saleable size here and they are all over the place. Mr. Heacock is an economist and believes that if he can make a fern grow where none grew before he has added that much to the efficiency of the establishment. The cibotiums may, in this respect, be great money gainers, as they are grown over the palms without any detriment, the small ones are strung to the rafters, where they have all the light, air and room required to make them stocky. When large enough, they are given tubs, and then stand on pedestals among and over the palms, where they are finished. As seen here, it is the ideal fern for the house or the decorator.

Orchids are also grown in large quantities, the illustration shows a house containing twelve thousand cattleyas in 6 to 7-inch pots and pans, all in splendid condition. Another house is given to cypripediums and other varieties, and there are also long lines of cattleyas seen hanging from the roof in the palm houses. The feature of the Joseph Heacock Co.'s establishment is the healthy condition of the stock and the business air that pervades the place. The office is a model, and the neat and tidy condition of the houses is bound to impress the visitor. Everything is up-to-date and every foot of table space seems at all times to be filled with saleable stock.

K.

The Robt Craig Co , Philadelphia, Pa.

The founder of this large business who, some forty years ago, first flung his business sails to the breeze, and who since that time has always been to the front in everything that pertained to the advancement of the plant and cut flower industry in this country, is still as enthusiastic as ever and full of prediction of a great future for the business. Quality is his motto. He says he never yet had too much of a good thing or enough to go around of exceptionally well grown popular plants. In speaking of Dracæna terminalis as seen in the Craig stock of last season, such a good plantsman as Jacob G. Eisele said there is not any one place in this country large enough to hold all the stock of such quality that could be sold.

Mr. Craig says that the business is constantly undergoing changes for the better. Everything is being done on a larger scale and with better results.

PHOENIX ROEBELENII AND COCOS AT JOSEPH HEACOCK CO.'S, WYNCOTE, PA.

Men, specialists in certain plants, are given charge of sections devoted entirely to their culture and the results are marked. Enough cyclamen are grown to have a specialist in charge the year through and at times considerable help is given him. The stock of cyclamen from 2½ to 7-inch pots is over 30,000 plants. Never before have they been so far advanced for the season, the flowers even now being removed from the most advanced plants. With the coming two months of growth the corms should get thoroughly ripened and throw great quantities of bloom at one time, which is the crowning virtue of a good selling plant.

Begonias are treated the same way and no such stock has ever been offered to the trade before, 100,000 young plants have been sent out and many orders had to be turned down. Twenty thousand Gloire de Lorraine and eight thousand Glory of Cincinnati are seen here in from 2½-inch pots up to 7-inch, the larger stock making a grand showing.

One man has charge of the poinsettias, a plant that has been grown remarkably well here the past few years. A stock of 50,000 plants is being worked up, many of them the double variety, which Mr. Craig says is very valuable, and while almost a novelty, though not new, will meet with a great sale when better known. A house is given over to the growth of plants set out for cutting, so as to insure stock plants for next season, as those in pots are all sold and carried away in the holiday rush.

Other flowering plants for holiday seasons are roses, 15,000 in pots and 15,000 in the field, most of the stock being the popular sorts of the ramblers. 16,000 hydrangeas and 5,000 genistas are being brought on for Easter.

Foliage plants are a feature here, crotons being more largely grown than anywhere else in the country, 30,000 plants, all of standard varieties and the best of the new ones, together with over 500 seedlings, many of which show great merit. Cuttings of these plants are all carefully selected, being made of strong shoots, which, when rooted, are in many cases ready for a 4-inch pot. This establishment can be truthfully said to be the home of the croton. Mr. Craig says the following list comprises their leaders: Fasciatum, Reedii, E. Lonsdale, Queen Victoria, Robert Craig, Craigii, B. Compte and a number of others of merit, prominent amongst them is Fred Sander, a new and very highly colored golden foliaged variety.

Much attention is given to dracænas, the canes from which the stock is grown coming from the firm's plantation in the Isle of Pines. The various houses in the dracæna section at Norwood are filled with wonderfully robust plants which should be in grand condition for the coming season's business. 20,000 salable plants of the various varieties, of which Terminalis, Lord Wolseley, Mandaiana, Bronze Beauty, Massangiana are leaders, are a grand sight. Massangiana is given great attention, many specimens being grown into large sizes. A new ficus or rubber under number, is being grown into large sizes and promises to be a popular addition to this class. Pandurata is still a leader, a stock of 3,000 large plants making a fine showing. In the palms, several houses of Areca lutescens contain splendid specimens of this old favorite, now rather scarce. Phœnix Roebelenii, a stock of 1,500 plants in from 6-inch pots to 10-inch tubs, are wonderfully symmetrical and well grown. There is surely a future for this beautiful phœnix. Ferns are grown largely, over 100,000 being in stock. The room given to the varieties of nephrolepis is a good sized establishment in itself. The leaders are good old Boston, Scottii, Whitmani, Scholzeli, Todeaoides and Harrisii. The latter is not so well known to the trade as it should be, as it is one of the best. Although raised by W. K. Harris he never sent it out as a new one, simply growing and offering the stock when ready to the local trade. It will be seen here in fine specimen plants the coming season.

SPECIMEN KENTIA AT JOSEPH HEACOCK CO'S, WYNCOTE, PA.

The Norwood branch of this establishment is to be largely augmented this fall, ground being broken now for a large Lord & Burnham Co. range to be finished before frost.

Mr. Craig has two able lieutenants in his sons, Robert, Jr., and William P., the former having charge of the Forty-ninth street place, while his brother divides his attention between Norwood and representing the company on the road, in which line he has great ability. K.

NEW BRUNSWICK, N. J.—Lord & Burnham Co. have been awarded the contract to build the new greenhouses at the New Jersey Experiment Station.

DERBY, N. Y.—John Umpleby, the gladiolus specialist, is reported in the daily press as saying "that the dry spell has made flowers smaller and later, and that indications are that they will cost more."

THE VIOLET

Violet Culture.

The middle of August is one of the busy periods for the violet grower, for with those that grow the plants outside preparations are in progress for the housing of the plants, as most growers like to get the plants under cover before the heavy dews that occur during the latter part of August and early September. Especially is this so with the double varieties more than with the single ones which do not seem to be so much injured by the dew. The plants that were grown inside and planted earlier have now obtained a good hold in the soil and as the nights begin to grow cooler will make active growth and there will appear a crop of runners which must be removed. This must be very carefully done, for the violet plant should be disturbed as little as possible after it has been planted in the house. It is much better at this time to remove all the runners with a sharp knife, cutting as close to the plant as possible. A very successful grower of violets once said that under no circumstances would he pull any runner or even a leaf, until late in the year, as he had observed that where a plant was at all shaken during the early part of its growth it seldom produced any really good flowers until spring.

The single varieties should now be making active growth, and the runners should be taken off as fast as they grow beyond the plant. These plants are better housed the last of September or early in October. They will stand a little frost and be the better for it, for if planted in rich soil too

early the plants make a strong growth of foliage and will not produce so many flowers as those which are not heavily supplied with leaves. When the plants grow so luxuriantly that the leaves crowd as soon as the short, dull days come on, much of the foliage turns yellow and during a long damp spell will often rot and mold. It is much better to keep some of the foliage picked off so that there will be a free circulation of air through the plants and thereby prevent this, rather than to wait and try to make a cure. The single varieties will grow in a much heavier and richer soil than the doubles, but with all violets the manure that is used should be well rotted, in fact that in which the lumps are all broken is to be preferred.

Watering violets is an art. While they never want to be dry, yet they will not grow in a soil that is soaked. The drainage must be good and the plants sparingly watered until the soil is full of roots. Over-watering will at once show itself by a green scum appearing upon the soil, and if this occurs, water must be withheld, a good coating of air-slaked lime spread on the soil and be well scratched in. If this scum is allowed to grow and the soil not sweetened the root action will stop and but few blooms will be produced during the winter months. A sweet soil with lots of clear air are the two requisites of violet culture during the winter months.

CIBOTIUMS AND PALMS AT JOSEPH HEACOCK CO.'S, WYNCOTE, PA.

Violets in Frames.

Violet plants intended for frame cultivation should be well prepared; for more flowers and of better quality, can be obtained from three dozen plants properly prepared than from one hundred that may be lifted from a plantation grown without any special care being bestowed upon them. Probably many inexperienced cultivators fail to obtain satisfactory returns for their labor through procrastination in planting, states a writer in the Gardeners' Magazine. I am a firm believer in getting the plants well established in their winter quarters by the end of October. It is neither necessary nor advisable to cover the plants in the frames thus early with the glass lights; but when the latter are put on the plants soon respond to frame treatment and yield an abundance of bloom.

During the summer time the plants in the garden must be kept quite free from all runners and flower buds, as it is important that the crowns be matured and very prominent, as in the case of strawberries for forcing. Furthermore, frequent applications of liquid manure and syringings with clear soot water will do a vast amount of good, and help materially to build up grand clumps for lifting.

The clumps should be planted in the frame during the latter part of August, or, at latest, the early part of September. There will not be any need for making a hotbed. I prefer a cool bed, and one composed of manure, the top portion of which should be well rotted, the lower part may be littery, but it must be made very firm. The compost should be a mixture of loam and leaf-soil, with sand or road-grit to ensure porosity; and it must be put on quite one foot deep over the manure bed, sloping from back to front, so as to be of equal distance from the frame-lights at all points. The leaves of the plants should just be free from touching the glass.

Ample space between the clumps is desirable; in the case of large-leaved varieties, such as Princess of Wales, 16 inches from center to center of the clumps will do, whereas one foot will be sufficient in the case of small-leaved sorts, such as Marie Louise. Firm planting is essential, but treading upon the soil between the plants afterwards should be avoided. Prepared clumps will not need any shading nor covering with the lights, a thorough watering and an ocasional syringing during bright weather being sufficient, but unprepared plants should have the lights put over them and light shading afforded them also for a time—ten days or so—until they are somewhat recovered from the check given.

If the soil be of good quality and resting on a bed of rotted manure, there will not be any need to give manure water; and, although the compost must be made firm, the surface should be loosened from time to time to keep all sweet and clean around the plants.

Bidens Dahlioides.

Bidens dahlioides is an entirely new plant to horticulture, introduced this year by Vilmorin-Andrieux & Co. of Paris, France, and according to the Revue Horticole seems to be a most desirable novelty for borders and also for cutting. The plant is eminently suited for edging perennial borders, being of low growth and carrying its light colored flowers on very long, graceful but strong stems. The flowers are desirable for bouquets and are especially charming associated with the Dahlia Zimapani, which has fallen into undeserved disuse.

TWELVE THOUSAND CATTLEYAS AT JOSEPH HEACOCK CO.'S, WYNCOTE, PA.

FLORISTS' PALMS.

Summer Culture.

The hot days and dewy nights of late summer provide just the conditions for rapid growth in the palm houses, and at the same time allow for plentiful ventilation in order to keep the foliage tough and the growth sturdy. It is at this period that the stock is liable to become crowded, and to need some attention toward keeping the plants from making a one-sided or spindly growth. Latanias especially are likely to suffer from overcrowding, from which the young leaves will become long-stemmed and the plants soon lose their symmetry, and at such a time the utility of some iron plant stands becomes apparent to the observant grower. These plant stands are good for many years' use with ordinary care, and some extra choice specimens suitable for a critical trade may be had by such methods of handling.

DRACÆNA TERMINALIS AT ROBERT CRAIG CO.'S, PHILADELPHIA, PA.

Referring again to latanias, it may be worth repeating that this palm can be grown to an 8-inch pot size without losing the second seed leaf if one gives it proper care, and such plants may be grown in two years if the young stock is shifted along as rapidly as it is ready, and at no time allowed to crowd out of shape.

The kentias will also respond to generous treatment in regard to space and potting, though these palms do not require the same amount of root space as the latanias and may be kept in good condition in very small pots or tubs, provided that they are given sufficient food to keep them growing. But even when a lack of space prevents the spreading out of the stock at this season it may be helped greatly by resetting occasionally, and turning the plants around where they have drawn toward the light.

Livistona rotundifolia is still in demand as a dwarf palm, when well grown, but is not quite so good a plant for the dwelling as its relative, the ordinary latania of commerce, the Livistona being more susceptible to gas poisoning, where that medium is used for artificial lighting. There is unquestionably less trouble in keeping plants in a dwelling where electric light and hot water heating are used than in a house lighted with gas and heated by hot air, and in selling palms at retail these are things worth remembering on the part of the dealer, for a satisfied customer is usually a paying advertisement.

Phoenix Roebelinii is still gaining friends, and many of the specimens of this graceful palm that are now in the market are much superior to the first specimens that were exhibited at a show in Madison Square Garden in the early 90's, or say about 20 years ago, and show much more of the capabilities of this palm than did those same imported specimens. There is but one other phoenix that is as graceful as P. Roebelinii, and that is P. rupicola, but the latter is so much larger in growth and takes longer to reach a perfect shape that it cannot take the place of its younger and dwarfer cousin. Both these phoenix are good outdoor plants in summer, especially when they can be placed in the shade, or partial shade of some trees and so located that they may readily be reached by the hose twice a day in bright weather, for an abundant water supply must always be provided for the outdoor palms.

Cocos Weddeliana is still a prime favorite for ferneries, and is rapidly finding a market when well grown in larger sizes. A good start with the seedling plants of cocos helps greatly in the production of healthy stock, and with this in view those growers who are most successful with this palm find it pays to plant the seeds singly in small pots instead of sowing them in pans or flats, from the fact that there is less disturbance of the roots by this method. The tap roots of seedling cocos are extremely brittle and are frequently broken in the operation of potting off, and the broken ones are the first to show unhealthy growth. But the small cocos have not a clear field as centre plants for ferneries at the present day, for thousands of small Kentia Belmoreana are used for the same purpose, and shapely little plants of the latter species are eminently satisfactory for such use. The kentias that are intended for ferneries should be given plenty of light and spaced out to some extent on the bench, a plant of short, stocky growth and regular shape being the aim of the grower in this case, and if specially good stock is desired, some care should be given to the selection of the plants, for all seedling kentias do not grow alike, some of them showing a long-stemmed habit from the first.

W. H. TAPLIN.

Rubber From Milkweed.

Several families of plants, including the dogbanes (Apocynaceae), the spurges (Euphorbiaceae) and the milkweeds (Asclepidaceae) pretty generally possess a milky juice called latex. In many instances this latex contains rubber, and a large share of the commercial product comes from tropical trees and vines belonging to these families, states the American Botanist. Even some of our temperate region plants produce rubber, but this is usually of such inferior quality and occurs in such minute quantities that it is never likely to appear in market. The fact that the rubber exists, however, is of interest. Recently some investigations have been carried on with the common milkweed (Asclepias syriaca) and a note in the Ohio Naturalist records that it is a rubber producer though the rubber is not of a high grade. Besides the rubber, the latex from this plant contains sugar, mineral matter and resin. About two or three per cent of rubber is yielded by the latex.

HOUSE OF CROTONS AT ROBERT CRAIG CO.'S, PHILADELPHIA, PA.

Society of American Florists.

REGISTRATION OF BEGONIA.

Public notice is hereby given that S. A. Anderson, 140 Main street, Buffalo, N. Y., offers for registration the begonia described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

NEW FICUS, NO. 4,970, AT ROBERT CRAIG CO.'S, PHILADELPHIA, PA.

DESCRIPTION.

Betty Anderson.—An improvement on the Begonia Gloire de Lorraine. The yellow center is twice the size of that of the regular Gloire de Lorraine; it is self-branching; has five petals in the flower instead of four; it throws twice as many flowers as the Lorraine.

H. B. DORNER, Sec'y.

Ladies' Society of American Florists.

The members of the Ladies' Society of American Florists will receive at Hotel Belvedere Thursday evening, August 17, from 8:30 to 11:00 o'clock. Tickets will be issued from the secretary's desk, Exhibition Hall, Tuesday, August 15. The President, Mrs. Phillips, requests all members to call there. Please wear your badge pin.

The annual business meeting of the Ladies' Society of American Florists will be held at Hotel Belvedere Wednesday morning, August 16, at 10:30 o'clock. Business of importance will come up at this time, and members are urged to be present.

MRS. CHAS. H. MAYNARD, Sec'y.

American Carnation Society.

There will be a meeting of the board of directors at the Convention hall in Baltimore at 9:00 a. m. Thursday, August 17. All members of the society who happen to be in attendance at the S. A. F. convention are invited to attend. There will be business of vital importance to come before this meeting, and a large attendance is desired.

The secretary will be in attendance at the S. A. F. convention, arriving in Baltimore on Auguth 16, ready to receive dues which have not been paid for the current year. Also contributions to the Dorner memorial fund. Considerable more funds are needed for this memorial, and every member who has not already contributed, is urged to do so at once.

A. F. J. BAUR, Secy.

Western Dahlia and Gladiolus Society.

A new trade association was organized under the above title at the Hotel Sherman, Chicago, August 5, there being six growers of gladioli or dahlias, or both, in attendance as follows: N. L. Crawford, La Grange, O.; Chas. E. Parker, Chicago; H. W. Koerner, Milwaukee, Wis.; E. S. Thompson, Benton Harbor, Mich.; E. E. Stewart, Rives Junction, Mich.; A. E. Kunderd, Goshen, Ind.

The object of the meeting was to bring the growers together for pleasure and profit and to consult as to the best methods of growing as well as the proper handling of their products. The call for the meeting is signed by E. T. Barnes, Spencer, Ind.; W. K. Fletcher, Des Moines, Ia.; H. W. Koerner, N. L. Crawford, E. S. Thompson and W. W. Woollen Indianapolis, Ind.

It is proposed to hold an exhibition about September 1, either in Chicago or Indianapolis. The officers of the new organization are: E. T. Barnes, president; H. W. Koerner, vice-president; E. S. Thompson, secretary; W. K. Fletcher, treasurer; Chas. E. Parker, E. E. Stewart and A. E. Kunderd, executive committee. The initiation fee is $1, annual dues $1.

American Rose Society at Baltimore.

A meeting of the executive committee of the American Rose Society was held at Traendly & Schenck's store, New York, with President Adolph Farenwald of Roslyn, Pa., presiding. The particular matter considered was the payment of prizes awarded at the National Flower Show in Boston. There had been a difference of opinion regarding the construction of the resolution passed at Rochester, N. Y., relative to the amount of money that was to be paid to the National Flower Show committee, and until this had been settled the prizes had been held in abeyance. Vice-president Philip Breitmeyer advised, "I am in favor of a settlement rather than have any ill-feeling, especially with the men who worked so hard to make the recent show a success. I should say pay up and forget. Let us go ahead with unity and kindliness and do better in the future." The members of the executive committee who were unable to attend sent proxies, and the sense of all was the same as that so admirably expressed by Mr. Breitmeyer.

A formal motion was passed as follows: "That the treasurer of the American Rose Society pay to the order of the National Flower Show committee the sum of $537, being the amount called for by the National Flower Show committee in full settlement of all premiums due for awards made at the spring exhibition in Boston, March, 1911." Treasurer May, upon receiving the action of the meeting, drew the check for $537 and forwarded it to E. Allan Peirce, treasurer

CROTON EDWIN LONSDALE AT ROBERT CRAIG CO.'S, PHILADELPHIA, PA.

of the National Flower Show committee, and after paying this there is left in the treasury of the American Rose Society a larger sum than has ever been there before at this time of year.

At the coming convention in Baltimore, it is planned to have a meeting of the American Rose Society, with as large an attendance as possible on Thursday, August 17, and at that time the questions of naming the date of the next annual exhibition to be held in Detroit and the holding of that show jointly with the American Carnation Society, will be brought up. The rose show in Boston was the most attractive of all the fine things placed on exhibition to the masses of people who were there, and at Detroit there would be every opportunity to exhibit to both the people of the United States and Canada and we want a good reciprocity show from everybody, and also everyone who can help to put forth their best efforts to make it a success.

BENJAMIN HAMMOND, Secy.

Baltimore.

BUSINESS DULL.

Business the last week has been exceedingly dull and during the month of July there was little demand for flowers, with exception of funeral work and some little business done in stock plant line. Stock is arriving more plentiful but moves slowly and is not up to the average. The past heavy rains have played havoc with outside stock. Roses are more regular in supply and are sold cheaply. Carnations are still to be had but the stock is very poor and but little called for, the blooms being very small. Gladioli are plentiful and some extra fine spikes are to be had. Asters are much better, some fairly good stock can be had and it sells at low prices. Cosmos has made its appearance and finds ready sale, sweet peas are a little scarce and short-stemmed, phlox is in good supply and sells fairly well. Greens of all kinds are plentiful.

CONVENTION NOTES.

Everything is now in readiness for the convention and the members of the S. A. F. will receive a hearty welcome when they arrive and during their stay. There will be a continual round of pleasure until they depart. Nothing has been left undone to make this one of the greatest conventions the S. A. F. ever held. The whole city is taking an active interest and a hearty welcome awaits all who come. Work has already started on the great convention hall and buildings are being decorated. The trip on Chesapeake bay will be enjoyed and be one of the things to remember for it is one of the finest sails to be had anywhere. For the sporting part of the convention the alleys have all been put in thorough order and the prizes are worth the effort to win. President Graham has issued the following letter to the members of the Gardeners' and Florists' Club:

"As we are now fast approaching the goal toward which we faced twelve months ago, it is the desire of your president to express to you personally the very high regard he has for the assistance you rendered in bringing the matters pertaining to the convention to such a successful condition as we find them today. Although you may not have been actively engaged on any of the committees, yet your enthusiastic interest and hearty support have rendered the work of the committee comparatively easy, and what might have been a tiresome duty has proven to be a very happy privilege, for the reason that there has been no fault-finding on the part of anyone, in fact, every member of the club, almost to a man, has striven with might and main to make this the greatest convention the S. A. F. has ever held, and from present appearances and the reports coming in from all sections of the country, no previous convention of the society will approach this one of 1911 at Baltimore. This has not been accomplished by any one individual, or even by several, but by the co-operation of a united society, which determined long ago to make this the "best ever," and I heartily congratulate you on your success.

Now for the last grand rally. On Monday next, August 7, at 8 p. m., there will be a special meeting of the club to make final arrangements for the convention at which time all information pertaining to badges, tickets of admission, etc., to the several functions of the week will be given. I hope every member of the club will be present at this meeting and that you will assist in this by being sure to be present yourself.

Hoping to see you on the above mentioned evening and also to have the pleasure of shaking hands with you, I am, Sincerely yours,

ROBERT L. GRAHAM, President.

OUTING OF THE ST. LOUIS FLORISTS' CLUB AT RAMONA PARK, JULY, 29, 1911.

OUTING OF THE OMAHA FLORISTS' CLUB AT COURTLAND BEACH, JULY 27, 1911.

NOTES.

All the local growers are somewhat short of indoor stock this season, especially of chrysanthemums and carnation plants, and it is feared that it will be impossible to procure enough stock.

One of our growers had a new house of carnations planted and the glass not being set the heavy storm of a week ago washed the entire lot away, doing great damage. J. L. T.

OBITUARY.

Walter B. May.

Walter B. May, formerly a successful gardener of Hartford, Conn., died at the Hartford hospital July 30, aged 76 years. He was born in England and was gardener for a while at the Royal Botanic Gardens, Kew. He came to Hartford 33 years ago and became gardener for James J. Goodwin and while here was a winner of many prizes at various shows. Two years ago he retired from active work. He was a member of the Masonic fraternity and the Connecticut Horticultural Society. He is survived by a widow and a brother, Theodore May, of London. The funeral was held August 1.

Edward McNally.

Edward McNally, one of the older florists connected with the trade of Louisville, Ky., died at his home, at Anchorage, August 1, from a complication of diseases, after an illness of many months, aged 64 years. He was born in Dublin, Ireland, and came to America in 1866. Forty years ago he purchased property in Anchorage and being well versed in horticulture commenced the growing of plants and vegetables, and the site which he selected has now become valuable. He is survived by a widow, two sons, S. W. and Edward L. McNally, and two daughters, Mrs. F. W. Taylor and Mrs. J. W. Coleman, all of Louisville. The funeral services were held at St. John's Church at 3 p. m., August 3.

August Sunderbruch.

Cincinnati's oldest and most respected florist, August Sunderbruch, peacefully passed away on Tuesday, August 2, at 6 p. m. in his eighty-second year. Mr. Sunderbruch was born May 26, 1830, at Marl, Hanover, Germany. At the age of 15 he started to serve his apprenticeship in the profession which he followed throughout his business career. In 1849 he forsook his native land and sought the opportunities offered within our shores, coming directly to Cincinnati after his landing in New York. His first employment here was as a teacher of botany in the old Wesleyan Female College, located then on College street but now in the heart of the business district. The following year he undertook the laying out of the estate of Reuben Resor in Clifton. One of the drives which he planned and executed is now a city thoroughfare and one of the most beautiful in that suburb. While engaged in this work his wedding with Miss Dorothy Klanke was solemnized. Of this union there were ten children, three of whom, William and Albert Sunderbruch and Mrs. Louis Helwig of Chicago, still survive. Having completed the task for the Resor's he went to work for Mr. McAvoy, who had a nursery establishment where Eden Park now stands, called The Garden of Eden. Recognizing an excellent opportunity in the florist business he purchased land in Corryville and erected greenhouses and the business he there established is still running today. In 1874 his wife died, twelve years later he married Mrs. Christina Zeidler, who survives him. In 1890 Mr. Sunderbruch retired from active business and turned over the greenhouse plant and the store on Fourth avenue to the firm of A. Sunderbruch's Sons.

August Sunderbruch, in his successful business career, has won the love and respect of all with whom he came in contact. His methods were always those that were fair and above board and won him wide friendship. His whole conduct in the profession in which he was a pioneer in Cincinnati was such as to make others engaged in it now feel that by his departure they have suffered a great loss.

O. H. H.

New York Bowlers.

The expected match between the New York and Astoria bowlers did not ignite on Friday night. It is to happen with other cannonading on the club's alleys at "Thums," Broadway and Thirty-first street, August 11. A large gathering of try-outs and rooters are sure to attend, as these will be the last maneuvers before the battle at Baltimore. Regrets were expressed that F. R. Pierson was unable to attend and present the new balls he so generously offered to those of the club whose averages were the highest for the games the past season. The balls were won by Chadwick, C. W. Scott, J. Manda, Shaw and Kakuda. They are beauties of jet black mineralite and are highly prized by the winners. Two of them were used Friday night and won the highest scores. If they do as good at Baltimore the New York club will need a trunk for prizes. Some of the boys were in good shape on this occasion until Shaw started to read Chadwick's "orange blossoms" to Kakuda. If this is repeated on some of the rivals at Baltimore it might help out in the right way. The recorded scores were:

J. Manda	188	160	176	Chadwick	216 222 171
C. Scott	132	153	146	Kakuda	154 162 184
Shaw	111	136	115	Berry	111 144 ...
J. Young	140	139	115	Nugent	117 128 ...
Holt	118	155	140	Donlan	114 120 109

Capt. Chadwick says it will be impossible to name New York's team until the lineup occurs at Baltimore. All are confident, however, and with F. R. Pierson's good luck balls to act as niggers in the wood piles on the alleys there's sure to be something doing down south. In the matter of Astoria and Flatbush, they being in New York City prohibits them from being represented by teams, as only one team from each city is permitted to compete, but there being a good number of prizes offered for individual bowlers all are given a chance for fancy calisthenics or record scores, so leave rheumatics and grounches at home and whoop her up.

The Late August Sunderbruch.

Trade Exhibitors at Baltimore.

Space for trade exhibits at the Baltimore convention of the Society of American Florists, August 15-18, was taken as follows August 5:

Advance Co., Richmond, Ind.
American Auxiliary Heating Co., 6 Beacon street, Boston, Mass.
Aphine Mfg. Co., Madison, N. J.
Chas. D. Ball, Holmesburg, Philadelphia, Pa.
Lemuel Ball, Wissinoming, Philadelphia, Pa.
Baltimore Souvenir Co., Baltimore, Md.
H. Bayersdorfer & Co., 1129 Arch street, Philadelphia, Pa.
Wm. J. Boas & Co., 1042 Ridge avenue, Philadelphia, Pa.
Bobbink & Atkins, Rutherford, N. J.
J. Bolgiano & Son, Light and Pratt streets, Baltimore, Md.
John Lewis Childs, Floral Park, N. Y.
Cleveland Florists' Exchange, 606 Huron road, Cleveland, O.
Conard & Jones Co., West Grove, Pa.
Wilmer Cope & Bro., Lincoln University, Pa.
Arthur Cowee, Meadowvale Farm, Berlin, N. Y.
Robert Craig Co., Market and 49th streets, Philadelphia, Pa.
Henry A. Dreer, Inc., 714 Chestnut street, Philadelphia, Pa.
Morton McI. Dukehart, Baltimore, Md.
Chas. Eble, 121 Baronne street, New Orleans, La.
Edwards Folding Box Co., 27 North Sixth street, Philadelphia, Pa.
Henry Eichholz, Waynesboro, Pa.
W. H. Elverson Pottery Co., New Brighton, Pa.
Foley Mfg. Co., Western avenue and 26th street, Chicago.
Geo. M. Garland Co., Des Plaines, Ill.
Giblin & Co., 105 Broad street, Utica, N. Y.
Griffith & Turner Co., 205 North Paca street, Baltimore, Md.
J. G. Harrison & Sons, Berlin, Md.
Joseph Heacock Co., Wyncote, Pa.
A. H. Hews & Co., Inc., Cambridge, Mass.
Hitchings & Co., Elizabeth, N. J.
Hubert Bulb Co., Portsmouth, Va.
J. B. Hutchinson, Haddonfield, N. J.
Jackson & Perkins Co., Newark, N. Y.
Johnston Heating Co., 131 East 26th street, New York.
Jones, the Holly Wreath Man, Milton, Del.
King Construction Co., North Tonawanda, N. Y.
Kroeschell Bros. Co., 440 West Erie street, Chicago.

CARNATION men will now pay a good stiff price for that opium antidote.

CHAIRMAN PIERSON of the National Flower Show Committee will present a report at the Baltimore convention showing a dividend of 10 per cent to the guarantors and a surplus of $1,500 in favor of the society.

IT is practically impossible to standardize such a changing quantity as the quality of flowers. The first grade Monday may be second Tuesday and the first quality stock of Podunk may find no rating in Chicago.

"O purple hills! O sunny vales!
Horizon dimmed by haze.
Orchards ripening in the sun,—
O golden August days!"

JAPANESE fern balls of elephant and monkey shapes brought high prices for a time in England, but now there is no more monkey business for them.

IMMORTELLE buyers may be surprised to hear that French reports of this crop indicate about 20 per cent of an average one and that they will be further handicapped by treasury decision which puts the United States duty on this item up to 60 per cent for the colored and 25 per cent for the natural.

American Gladiolus Society.

The following additional prize is offered for the annual exhibition of the American Gladiolus Society to be held at Baltimore, August 15-18:

Class 10.—Amateurs. For the most harmonious and beautiful arrangement of cut gladioli not less than 50 spikes, number of colors and quality to count. $10.00. Offered by Mrs. Francis King.

The judging of the competitive exhibits will begin at 9 o'clock a. m. Wednesday, August 16, and all exhibits must be staged by that time. All letters or communications after August 11 should be addressed to Fifth Regiment Armory, Baltimore, Md.

L. MERTON GAGE, Secy.

Our Convention Number Cover.

Our Baltimore Convention Number cover design is a composite plate representing several sections of Baltimore. In the foreground, situated in one of the public squares of the city, North Washington Square, is an equestrian statue of General John Eager Howard, one of the revolutionary heroes of the State, a general of the American army who commanded in several severe battles of that memorable contest for the liberty of the States, the never-to-be-forgotten troops of the "Maryland Line," distinguished throughout the struggle for their intrepid bravery and soldierly qualities and fought with spirit from Boston to the Cowpens. This statue, by one of the most eminent sculptors of France, is of heroic size, and has been much praised as a work of art. It was presented to the city by patriotic citizens to commemorate a soldier, a statesman and a patriot, General Howard, who was governor of the State, Secretary of War under Washington's administration, and an intimate friend of that great leader.

To the right is the Mansion House of Clifton Park. This building was the former home of Johns Hopkins, the eminent merchant of Baltimore who left his great fortune for the establishment of the Johns Hopkins University and the hospital which bears the same name, and both of which are considered amongst the most important and well equipped institutions in the world of their respective classes for the diffusion of learning and the investigation of science, and for the treatment of disease and the highest training of physicians and surgeons. Mr. Hopkins's home has come into the possession of the city and forms one of the chain of public pleasure grounds surrounding it—from the high hills to the water front. It is much frequented by the people of the city, who find rest and comfort in the shady groves and emerald lawns. In the lower left-hand corner are to be seen the pinacles of one of the many fine churches for which Baltimore is noted, of every faith and architecture. It is the Mount Vernon Methodist Episcopal Church, a structure of striking design and ample proportions, giving accommodations for a large congregation, and by its select site and magnificent fittings attracting and providing for one of the most wealthy ecclesiastical assemblages of the city. It is just under the monument to Washington, the first column erected to commemorate the Father of his Country, and a shaft extolled for its dignity and simplicity.

Across the waters of the harbor, which is an ample one, may be seen the restored business sections of the city which succumbed to the great fire of 1904, when the losses are said to have aggregated something like $125,000,000. These new structures are of the most modern types and represent every advance which has been made in the construction of skyscraping and fireproof buildings, and which, by their effectiveness for business purposes, fine architectural features, solidity and good taste, put Baltimore in the front rank of American cities, physically. A section of the plate conveys some idea of the immense fleet of "bay craft" which contribute to the commerce of Baltimore. These are vessels of light draft and great speed, which cover the whole area of the lovely Chesapeake, enter every inlet and sound, and bring into market the almost illimitable products of this great salt water sea, in the millions of bushels of the succulent oyster, the myriads of crabs, soft and hard, and the fruits, melons, berries, tubers, etc., which are indigenous to its tributary soils and which make up an assemblage and variety of edibles not to be surpassed or equalled, it is boasted, by any other part in the world, and the total value, commercially, of which is so great that to estimate it in figures would almost stagger belief.

Convention Notes.

John L. Parker, of Birmingham, Ala., and A. B. Lambert, of Atlanta, Ga., will join the Cincinnati delegation for Baltimore.

Five Montgomery, Ala., members of the trade will go to Baltimore from Savannah by boat.

An Up-to-Date Business.

"How much of the business of the world nowadays is done by telephoning and telegraphing! We do everything by wire."

"Yes, and there is one trade where they even use it for sending their goods!"

"What do you mean?"

"Don't florists wire their flowers?"—Baltimore American.

M. BARKER, Sec'y.

The Best Color Chart

For Florists, Seedsmen and Nurserymen.

ERFURT, GERMANY, May 9, 1911.

AMERICAN FLORIST CO., Chicago, U. S. A.,

Dear Sirs:—If you have any copies left of the comparative color plate compiled by F. Schuyler Mathews, I shall be obliged if you will send me one, my copy having somehow got mislaid and I do not like to be without this excellent little production.

Yours truly, ERNST BENARY.

Published and For Sale by the

American Florist Co., 440 S. Dearborn Street, CHICAGO.

Price One Dollar, Postpaid.

Boston.

GALAX REPORTED SCARCE.

There is yet an apparent dullness in the market, but there is no glut as there is not much coming in. Asters, since the rains, have recuperated somewhat, but they are still a shadow to what they might have been, and they are the most plentiful class of stock received. Carnations are gone and many of the growers are replanting again. Roses from young plants are coming in, Killarney, both white and pink, Mrs. Aaron Ward and Richmond, but they lack the vitality yet to make a good showing. They quickly open if left long out of the ice chest. Lily of the valley is still good. Gypsophilla can be had in quantity and lilies are very good. Galax leaves are reported as getting scarce and have advanced in price.

NOTES.

J. T. Butterworth of South Framingham has some of the finest Cattleya Harrisonii that we have yet seen. His cypripediums are good. Mr. Butterworth is the recognized orchid specialist in New England. His stock has been increasing each year. Very few shows pass that some trophy does not reach Framingham. His son, George W., is spending his vacation at Cotuit, Mass., enjoying the ocean breezes.

All interests center on the convention. Mr. Hastings says that he expects a large delegation. Unlike the New York delegation's punch, we understand that distilled water will be carried on the train by the Boston delegation. Every bottle will be sealed and plainly labeled.

And the bard of Philadelphia has again spoken in a sermon impromptu. He has to drag Aberdeen, religion and the A. P. A. into the mixup, and the sermon is about locality and cabbage. When George breaks loose he says something, sometimes a gem.

The greenhouses formerly owned by W. S. Phelps at Framingham and later leased to LeMoine Bros., have been sold at auction and are to be torn down. The land has been bought by a syndicate and is, we understand, to be cut up into house lots.

Carnation growers have commenced planting earlier than usual. The plants have not made the growth of former years, but are stockier and will start quicker and make stronger growth later on, than soft planted stock.

Henry M. Robinson & Co. report good business, especially in their supply line. H. M. Robinson has gone to his summer home in Green Harbor. Joe Margolis of this firm has gone on a fishing trip to Moosehead Lake.

Wm. R. Nicholson, Framingham, has his carnations all planted. Nelson Johnston of the same town is nearly finished and James Wheeler, Natick, has finished planting his carnations.

Welch Bros. are busy with orders and report a good business. P. Welch and Edward are at Old Orchard while David is at the store, having returned from his trip across the water.

The famous east wind has again reached Boston and Boston is the best summer resort on earth.

MAC.

Pittsburg.

BUSINESS FLAT.

The flower market is very flat at present. Business has almost entirely disappeared. There is also a decided change in the stock coming in; it is arriving by the car load. American Beauties are finding practically no sale at all, the extreme heat is greatly affecting the quality of them. The minute the lid is taken off the box they open up and away they go like balloons, so what blooms do not find sale on arrival day go by the ash man the next day.

BASEBALL GAMES.

The McCallum Co. nine played the Zeiger Co., the champions of the florists' league, and defeated them 11 to 2. The lineup was as follows: McCallum Co.—Cain, 3b; Neigh, 2b; Martin, ss; Daires, 1b; Potter, lf; McCallum, rf; Holleran, cf; Kelly, p; Spitzner, c. The Zeiger Co.—Ackerman, ss; But, 1b; Treager, cf; Aldrige, 2b; Jackson, 3b; Daschbach, p; Gerbe, c; Menke, lf; Graves, rf.

The score by innings:

Innings	1	2	3	4	5	6	R.	H.	E.
McCallum Co.	3	0	4	4	0	0	11	14	3
The Zeiger Co.	0	1	1	0	0	0	2	3	4

NOTES.

John Madden, manager of Randolph & McClements' Pennsylvania avenue store, is spending two weeks at Conneaut, sailing and fishing, and Joe Elicke is passing his vacation camping in the wilds of old Virginia.

Geo. Brennaman, formerly a Pittsburg florist, was killed in an accident while riding in his automobile last week.

Joseph Thomas, Greensburg, was a business caller today. He states business is dead up his way.

Jack Frampton, of the Zeiger Co., Highland avenue, is taking a quiet rest at his home at Clarion.

M. Kronis, Union Station florist, has gone to Mt. Clements for a two months' stay.

J.

Aphine
The Insecticide that kills plant Lice of every species.

It will destroy all plant sucking and soft bodied insects.

$2 50 per Gallon. $1.00 per Quart.

FUNGINE

A fungicide which will destroy mildew, rust, bench rot and other fungus,

$2.00 per Gallon. 75c per Quart.

The merits of these products have already been so thoroughly exploited that they require no further comment.

A Trial Will Convince You.

For Sale by Seedsmen.

SQUITO-RID

The misquito repellent which repels misquitos.

An expert experimenting on the New Jersey marshes for the extermination of the pest writes:

"This liniment I found to be excellent, so much so that I would not be without it. Previously I had been using Citronella but with poor results. It has a pleasant smell, not so sticky as Citronella and keeps the 'pests' away from you."

25c per Bottle.

For sale by druggists, or we will send postpaid to any address on receipt of remittance.

What Next? Watch!

Our representatives will be at the S. A. F. & O. H. Convention to discuss agencies with dealers.

Our exhibit will be found at the entrance to the meeting hall leading from the exhibition floor. Visit us there.

BASSETT & WASHBURN,

Office and Store: 131 N. Wabash Ave., Chicago. Greenhouses: Hinsdale, Illinois.

Chicago.

A QUIET WEEK.

The trade during the last week has been very quiet, in the opinion of many of the dealers the quietest week that they have experienced for a long period, some saying that the week's sales were the lowest they have ever had. Stock is increasing in quantity and also in quality and variety, and with the limited demand has accumulated, and the counters at the wholesale stores are well laden with better stock than could be procured all through the month of July. Roses are in much better supply, and there are American Beauties of good quality to supply all the calls. The teas and hybrid teas are being received in larger quantity and there is a great supply of short-stemmed roses, the young stock now beginning to bloom quite freely. The new crop of carnations is also beginning to come in but the stems are short, yet the flowers are much better than those that were received after the torrid spell of weather. Gladioli are in great supply and large vases of splendid spikes are to be found at all the stores. Lilies are quite plentiful, a good stock of giganteum, rubrum and auratum is to be had. Water lilies also are in good supply. Lily of the valley of good quality and orchids furnish the exotics. Chrysanthemum Golden Glow made its appearance on the market and a vase of these in one of the stores made a great show. Asters have improved wonderfully, some very beautiful large flowers being shipped in daily. There is a large assortment of summer flowers and the buyer has a great deal from which to make his selection, the following being offered: hydrangea, cosmos, swainsona, coreopsis lanceolata, rudbeckia, helianthus and gypsophilla. Of greens there is plenty of all kinds. Convention talk is heard on all sides and the outlook is now, if everyone goes that says that they are, the delegation will be of good size.

NOTES.

The following is a list of those who expect to attend the Baltimore convention: George Asmus and wife, J. C. Vaughan and wife, Chas. W. McKellar and wife, W. N. Rudd and daughter, M. Barker, H. E. Philpott, N. J. Rupp, P. J. Foley, John Zech, Mathias Mann, Peter Olsem, A. T. Pyfer, H. C. Garland, Fred Lautenschlager, James Curran, C. Turner, Wm. Wolff, Otto Kuehnel, Victor Bergmann, W. L. Palinsky, Isaac Cassidy, Sam Pearce and C. C. Pollworth and wife of Milwaukee.

Samuel J. Pearce does not believe in allowing the houses to stand empty during the summer, the benches all being full of a splendid growing stock. Lilium giganteum can be seen in all stages, benches here with the tips just showing above ground and others just in bloom and many benches with the plants between these stages. Thousands of poinsettias are in fine shape and three houses are full of plants in the best possible condition.

Tim Matchen, the popular young manager at the Peter Reinberg store, has returned from a most enjoyable visit at Portage, Wis. Mr. Matchen says that the fishing was good but it didn't compare with the long drives through picturesque Kilbourne, Baraboo and other neighboring cities. Probably these drives reminded the popular young manager of rides he used to take some years ago.

Fred Sperry says that the shipping trade has been fairly good with Vaughan & Sperry, but that local trade was very quiet. Among the large shipments that this firm is receiving was noticed a quantity of Maman Crochet roses which were in splendid condition. Mr. Sperry is greatly impressed with this variety and says that it is an ideal summer rose.

ROSES, VALLEY and CARNATIONS A Specialty.....

WHOLESALE GROWER OF CUT FLOWERS

Zech & Mann are offering a fine grade of American Beauty, Killarney and My Maryland roses as well as a good grade of asters and gladioli. This hustling firm has added a few more growers to their list and will be in better position than ever to take care of their ever increasing trade. Both John Zech and Mathias Mann will go to the convention and if the senior member of the firm is in as good health as he was when he accompanied the bowling team to Milwaukee, the local delegation can rest assured that they will have a most enjoyable time. Will somebody please see to it that he does not lose his bowling ball?

E. E. Pieser, the "Peony King," left Monday, August 7, to look over the land in the copper country in upper Michigan with the intention of purchasing several acres for peony growing purposes. From the copper country he will journey across the border to Port Arthur where his brother Arthur is located and then onward to Fort Williams and Winnipeg, Can. The genial wholesaler says if he has any loose change left when he reaches the latter city, he will visit Quebec before he returns.

The Chicago Flower Growers' Association is receiving large quantities of choice roses, carnations, gladioli, asters, sweet peas and other seasonable stock at their store on Michigan avenue. Manager Frese is busy as a bee getting things in shape and in preparation for a brisk fall trade. The new office is nearing completion and when finished will add materially to the looks of the store.

Mrs. Horton, of the Bassett & Washburn force, is enjoying her vacation at St. Joseph, Mich. She is a most valuable employe and has been with this firm for the last eighteen years. Miss Schaeffer, the efficient stenographer, also employed by this firm, has returned from a most enjoyable visit in Michigan.

Nick Kruchten has been up with the sun for many a morning and is now being well repaid for his labors. A visit to the greenhouses in Ravenswood found an exceptionally fine crop of carnations just commencing to bloom. The recent rains and cool weather having improved them wonderfully.

N. J. Wietor had the pleasure of taking a ride in J. B. Wright's flying machine last Sunday, August 6, and is now undecided whether it will be an airship or a Pierce-Arrow touring car that he will purchase to make the trip to his summer home at Clear Lake, Wis.

At Hoerber Bros. we noticed a good grade of gladioli, asters, Killarney and My Maryland roses. Will Hoerber, who looks after the greenhouses at Des Plaines, says that the stock is in fine condition and they will soon be cutting roses in large quantities.

Phil. Schupp, the capable manager at the J. A. Budlong store, says that a reaction always occurs when the prices of flowers are high, the same as after a holiday, and he figures that trade will be somewhat dull until September.

Felix Schulte, of Sioux City, Ia., has placed an order with the John C. Monnger Co. for two greenhouses 30x100 feet. He also placed an order with the Superior Machine & Boiler Works for a No. 8 boiler.

Miss Violet Nelson, daughter of the well known grower of Evanston, and Walter F. Peters were married on Sunday, August 6. The best wishes of the trade are extended the happy young couple.

Frank Johnson of the A. L. Randall Co., is particulary proud of the splendid grade of asters that his firm is receiving and takes great pleasure showing them to the customers.

Peter J. Youngquist, the popular Ravenswood grower, has returned from an extended motoring tour among "The Dells" of Wisconsin.

Max Ringer, looking the picture of health is back from his vacation and in again attending to his duties at Vaughan & Sperry's store.

August Erickson, 3437 West Foster avenue, reports a very prosperous year, and is now busily engaged transplanting his carnations.

Ralph Keefe, Vaughan & Sperry's hustling young shipping clerk, is spending his vacation with his folks at South Haven, Mich.

Miss Corbett, who performs the office duties at the Peter Reinberg store, is away on her vacation enjoying a well-earned rest.

Edward Schultz, of the E. C. Amling Co., will leave on his vacation as soon as Max H. Awizzus, the "Killarney Kid," returns.

Henry Kruchten and L. Hoeckner are planning on spending their vacation at W. H. Kidwell's resort at Eagle Lake, Mich.

Blewitt & Prickett, proprietors of the Des Plaines Floral Co., are busy as bees with building and planting this week.

A. F. Longren, E. H. Hunt's traveling representative is back from a successful Ohio and Michigan business trip.

Miss Matilda Clemensen, daughter of the well known Railroad avenue florist, has returned from her vacation.

John Starrett, florist at the La Salle Hotel, is receiving treatment for rheumatism at Mt. Clemens, Mich.

Weiland & Risch have finished planting their carnations and now have 50,000 plants in the houses.

"The Busiest House in Chicago"

WE ARE RECEIVING AN EXTRA FINE SUPPLY OF

Asters, Gladiolus, Beauties, Roses, Carnations, Sprengeri and Ferns

While we are making our growers good returns, it is done so on account of clean sales. Our prices are as low, if not lower than the majority of dealers. We want your business, and we are sure that if you give us a trial that you will be only too glad to intrust your orders with us.

J.B.Deamud Co.

160 N. Wabash Ave., Long Distance Phone Central 3155. **CHICAGO**

H. C. Garland, of Des Plaines, will have charge of the Geo. M. Garland Co.'s exhibit at the Baltimore convention. His firm will show a full size cross section of the Garland trussed iron frame construction, five different styles of the Garland cast iron gutters, cast iron eave plate, pipe bench fittings, handy truck, post forms, iron foot pieces, iron posts, pipe carriers and several other new features.

Charles Warncke, the enterprising florist of Detroit, paid this city a business and pleasure trip this week. He is planning on building several greenhouses and his mission here was mainly to get figures on the same. Mr. Warncke is a heavy buyer in the local market and says that he has bought flowers from Wietor Bros. for the past 20 years.

The cut of roses which the Poehlmann Bros. Co. are now receiving are of splendid quality and if the crop improves in the usual manner a most excellent cut of the finest quality can be looked forward to later in the season. The asters which this firm are now receiving are among the finest on the market.

F. E. Bonham, of Macomb, Ill., was in the city this week on business and pleasure combined. He says that when the present addition of 4,500 feet of glass is completed his firm will have a total of 16,000 feet of glass devoted exclusively to the growing of carnations and a general line of cut flowers.

The American Beauty roses that Wietor Bros. are cutting are of the best quality, with fine colored buds, luxuriant foliage and good stems. Their White Killarneys are also arriving in good codition and are eagerly sought for by the best trade.

Wilder Deamud has returned from a business and pleasure trip to Minneapolis. He says he was successful in both and also accompanied back the lady friend who was one of the causes of his taking such a sudden journey.

Headquarters for **ORCHIDS** and all Fancy Stock

CHAS. W. McKELLAR,

162 N. Wabash Avenue, CHICAGO.

Herman Fisher, of Kalamazoo, Mich., is visiting relatives here for a week. He says the firm of H. A. Fisher Co. will occupy their new store in the Go- will occupy their new store in the Wolverine state about September 15.

A. T. Pyfer is performing the office duties at the Chicago Carnation Co.'s store while Miss Parker is away on her vacation. One of the interesting things to the visitors at the store this week is the "house that Jack built."

Mrs. John Welsh is visiting with relatives in New York and Princeton, N. J. She is staying with her brother-in-law, David Welsh, who is interested in the florist business at the last named place.

Carl Ickas, the industrious manager of the A. Dietsch Co., says that the new orders that his firm is receiving every day are keeping the factory running at full blast and all hands are unusually busy.

H. E. Scheffler, 2852 West Chicago avenue, reports outside of a little funeral work business is dull. To keep busy he is making preparations to contend with Jack Frost this winter.

Charles Carlson, 10515 Throop street, has enjoyed an unusual good run of trade this season. He is now busy attending to minor repairs in and about his establishment.

H. W. Rogers, of the Weiland & Risch force, spent Sunday, August 6, with his wife and son who are visiting relatives in Pentwater, Mich.

Henry Wietor and C. A. Alles are enjoying a trip through Port Washington, Sheboygan and other Wisconsin cities along Lake Michigan.

Mrs. Gillam, the able manager of the Belmont Floral Co., has returned from a two-weeks' trip visiting relatives in the Gopher State.

George Reinberg has enlarged his heating system and is now offering some good boilers for sale at reasonable prices.

H. E. Philpott expects to return from Winnipeg in time to accompany the local delegation to the convention at Baltimore.

A. Vanderpoel, of the Douglas Boulevard Floral Co., is devoting his time to painting and otherwise renovating his store.

August Lange and wife and Master Lange have returned from a most enjoyable outing in the Rocky mountains.

L. W. Scherer, the accommodating young janitor of the Atlas building, was married on Saturday, August 5.

Kennicott Bros. Co., received their first shipment of Golden Glow chrysanthemums on August 5.

J. B. Deamud and wife are spending a few days at their farm in Caro, Mich.

F. G. Mueller, 329 East Thirty-fifth street, is kept busy supplying an ever increasing demand for cut flowers.

We Ship Flowers

Successfully to All Parts of the United States

And we want your order now, so we can prove to you that this is no idle boast, but the straight goods. John Kruchten,

Wholesale Cut Flowers

162 N. Wabash Ave., CHICAGO
ROSES and CARNATIONS
Our Specialties.

Miss Myrtle Walburn of the Alpha Floral Company, of Kansas City, Mo., has returned to her home after a most delightful visit with friends in Austin. Miss Walburn feels that she is very much indebted to John Poehlmann, Jr., for escorting her through the mammoth greenhouse plant at Morton Grove and entertaining her at luncheon at the Wayside Inn. The lake trip which she and a number of her friends were to take before her departure was called off at the last moment owing to the threatening weather.

D. S. Willis, secretary of the Harrisburg Southern Coal Co., with offices in Merchants' Loan & Trust Building, is now devoting his energies to securing coal contracts from the growers in this vicinity. Mr. Willis says that many of the growers are placing their orders now before there is another advance in prices, also so as to avoid possible transportation hold-ups when the season gets in full swing.

Wm. Lorman, the hustling shipping clerk at A. L. Randall's, will leave soon for Montague, Mich., on a two weeks' vacation.

Visitors: C. C. Pollworth, Milwaukee, Wis.; C. De Wever, Clayton, Mo.; H. W. Koerner, Milwaukee, Wis.; E. E. Stewart, Rives Junction, Mich.; E. S. Thompson, Benton Harbor, Mich.; A. E. Kunderd, Goshen, Ind.; N. L. Crawford, La Grange, O.; John Reardon, Ames, Ia.; W. W. Coles, Kokomo, Ind.; Mrs. T. A. Mosely, Kansas City, Kans.; Mrs. Bessie Weisinger, of the Beaumont Floral Co., Beaumont, Tex.; Chas. Warncke, Detroit, Mich.; P. V. Henry, Memphis, Tenn.; Wm. Sieger, Jr., Charles E. McGrath with Butz Bros., New Castle, Pa., and F. T. Delaney, of Mullanphy, Florist, St. Louis, Mo., enroute to the Baltimore convention.

Visitors at Western Springs.

A large party of garden superintendents and others visited Vaughan's Greenhouses and Nurseries at Western Springs, Ill., August 8, where the large collection of cannas, phlox and other seasonable plants are now in fine condition. On arrival luncheon was served, after which the party was escorted over the establishment by Carl Cropp, Leonard H. Vaughan, W. H. Waite and Albert Erickson. Returning to Chicago dinner was served at the Union restaurant and this was followed by a vaudeville entertainment at the Majestic Theater. The visitors included:

From Lake Forest—Max Zschau, Reinhold Seifert, Wm. B. Barnard, Henry Gustafson, A. Rasquist, Gustof Odolf Olsen, Joseph Slater, Frank Schreiber, Knud Lofreing, Giles Hiscot, Wm. Gawsberg, A. Gustafson, Oliver Patterson, Frank Pekarik, Gust Johnson, J. H. Francis, Julius Lehr, E. Dunn, C. Benson, Geo. Chaffer, O. Triebwasser, Albert H. Reupke, J. L. Urdahl, S. Bebb, E. O. Orpet, R. J. Southerton, Albert J. Slater, Joe Greulich, C. V. Tibbetts, John Sligh, Geo. Koppenhoper, E. Bollinger, Henry W. Illenberger and C. Geppert.

From Lake Geneva—Frank Button, Wm. Towne, Chris Sondergard, Geo. Barlow, Julius Voelz, John Agem, William Wahlstedt, Fred Miller, A. Martini and Wm. P. Longland.

From Winnetka—Robert J. Bray, Carl Niemann, Michael Smidt, F. Kinks, Edward Boulter and Hjalmar Dahlstron.

Various—Aug. Jurgens, Chicago; Peter Theisen, Rose Hill Cemetery; Frank Rose, Libertyville; Arthur Zschau, Evanston; Moritz Zschau, Evanston; Wm. J. Moeller, Glencoe; Aug. F. Kellner, Milwaukee, Wis.; P. V. Henry, Memphis, Tenn., and John Dahl, Hubbards Woods, Ill.

Chicago Florists' Club.

The regular meeting of the Chicago Florists' Club was held at the Union Restaurant, August 3, President Philpot in the chair. There was a good attendance and a large amount of business was transacted. C. C. Pollworth, of Milwaukee, Wis., who attended the meeting, was elected to membership by suspension of the rules. Allie Zech's report on the picnic showed a small balance in favor of the club, notwithstanding the disagreeable weather experienced and Mr. Zech announced that the bowling team for the Baltimore convention has been selected as follows: Geo. Asmus, John Zech, Wm. Wolff, Chas. W. McKellar and Peter Olsem.

Phil Foley, of the transportation committee, had quite a lively time in giving information with regard to the Baltimore convention trip, one member of the committee having circulated the statement that the railroads selected would not make a rate as low as the other roads for the round trip to New York via Baltimore, whereas the chosen route (the Monon and Baltimore & Ohio railways) make a rate $2.50 lower than the other roads, the round trip costing $27.50 while other roads charge $30. Rates available to Baltimore for the convention are as follows:

RATES TO BALTIMORE AND OTHER POINTS.

Chicago to Baltimore, one way, $17.50.

Chicago to Norfolk and return via Baltimore and Chesapeake Steam Ship Co., returning same way or returning via N. & W. Ry. through Virginia, $27.00.

Chicago to New York and return, via Baltimore, returning same way, $27.50.

Chicago to Asbury Park, N. J., Belmar, N. J., Ocean Grove, Long Branch, Pt. Pleasant, Spring Lake, Sea Bright or Sea Girt, N. J., returning same way, $27.50.

Chicago to Atlantic City, Cape May, Ocean City, Sea Isle City, N. J., returning same way, $28.50.

All of above are limited to 30 days and are good for 10 days' stopover in Baltimore.

Chicago to Baltimore, steamer to Norfolk, steamer to New York (meals and berth included on Atlantic steamer) and rail to Chicago via Niagara Falls or other direct lines, optional trip on Hudson River day line included, $34.40.

Chicago to Baltimore, steamer to Norfolk, steamer to Boston (meals and berth included on Atlantic steamer), returning direct lines, $37.20.

Other circle rates to New York and Boston in proportion, according to route selected.

All circle tickets good for 60 days and 10 days' stopover in Baltimore and other points.

It was announced that Elmer D. Smith, the well known chrysanthemum grower of Adrian, Mich., would present a paper on chrysanthemums at the October meeting. The members of clubs in nearby cities, such as Detroit, Milwaukee, St. Louis, Cincinnati, etc., will be invited to attend on that occasion.

M. Barker announced that he met with the Railway Gardening Association's committee on arrangements and helped to complete the programme for their annual convention which will be held at the Kaiserhof hotel, this city, August 15-18.

An exhibition of novelties in chrysanthemums, roses, carnations, etc., is proposed for the November meeting.

C. E. De Wever, of Clayton, Mo., was an interested visitor and made a brief address.

STOCK VERY PLENTIFUL.

Stock of all kinds is very plentiful. In roses Killarney is in large supply. American Beauties are increasing in number, but the keeping qualities of all roses is not of the best. Asters have become almost a glut and gladi- Sprengeri.

NOTES.

John Barnard of the Grimm & Gorly staff visited Chicago and Milwaukee on his vacation. Miss Edna Albright of this store has gone to the lakes in Michigan for a month.

George H. Augermueller has a large supply of seasonable stock as well as full line of supplies. Miss Ollie E. Fitzgibbons is now bookkeeper at this store.

F. H. Weber is busy getting things in shape before going to the convention. E. D. Westman will have charge of the store during his absence.

The Paris Floral Co. have a very attractive window display, gladiolus, lilies and other flowers being very nicely arranged.

H. G. Berning and wife will attend the Baltimore convention. During their absence the business will be cared for by Otto Bruenig.

C. A. Keuhn is receiving some very fine lily of the valley and some excellent asters and lilies.

The Metropolitan Floral Co. will soon commence alterations. W. F.

Field Grown Carnation Plants

THE LEO NIESSEN CO., 1209 Arch St., **Philadelphia, Pa.**

Pittsburgh Cut Flower Company

WHOLESALE GROWERS

121 Seventh Street, PITTSBURGH, PA

Philadelphia.

Trade is about as usual for the season with perhaps a little more activity. The supply of cut flowers is improving. The roses showing more substance now that the extremely hot weather seems over. All kinds of stock in the lower and medium grades is plentiful, while there appears an active market for what there is of the special, which are quickly sold. Choice eastern American Beauties have been arriving in good shape, shipping better than in July. There is also some new local stock which gives an assortment of this popular rose. Asters, where the growers have been favored with the rain, which, while falling heavily in some sections, has entirely missed others, are much improved and are in good demand. Hydrangea paniculata grandiflora is also now being cut freely and is a valued addition to the stock. Carnations are very poor. Easter lilies and lily of the valley, inside stock, also appears in good demand.

NOTES.

The trade generally is waking up to the great advantage there is in owning the property in which their business is conducted. S. S. Pennock-Meehan Co. has just purchased a large lot, 24x100, at 1216 H street, for the business of their Washington branch. A modern building will be erected, suitable for their purpose, with additional room, that will be rented out and add to the earnings. The shopping district is hard by, and Mr. Pennock says it will not be long before values in that neighborhood will be materially increased.

The decision to go by the Baltimore & Ohio Railroad to the convention appears to be satisfactory to everybody and the delegation from this city will be large and enthusiastic, as quite a few who were "on the fence" are now heard to say they will go. Delegations who will pass through Philadelphia en route are asked to join the Philadelphia delegation, the train leaving this city from Twenty-fourth and Chestnut at 10:17 Tuesday, August 15, arriving in Baltimore at 12:16, in time for the opening session.

The Leo Niessen Co. has a splendid investment in their Arch street property, and now that their business has outgrown their quarters, and they have to move to their handsome new building, Twelfth and Race streets, the old building remains a profitable investment, while in the new building the upper floors are being rented to good advantage.

Frank M. Ross has purchased his Sixtieth street store, No. 13 south. Values have been increasing rapidly in this neighborhood and Mr. Ross is fortunate in being able to secure himself for the future. His business is very satisfactory and he is very much pleased with the outlook.

The Floracroft gardens of Moorestown, N. J., are sending in something very fine in old-fashioned Boston ferns. They are hard to beat.

The W. K. Harris baseball team have not had much to say of their ability, but when the test came they were there with the goods and on Saturday, August 5, defeated the hitherto unbeaten H. F. Michell Co. team to the tune of 14 to 9. The line-up of the the Harris team was as follows: R. Croton Fowler, 3d b.; L. Veitchii Cooper, c.; C. Horseman Wadsworth, r.f.; N. Pandanus Jackson, l.f.; J. Scottii Jackson, 2d b.; C. Genista Crowser, s.s.; J. Elasticus Keffer, 1st b.; C. Terminalis Smith, p.; E. Harrisii Jackson, c.f.; A. Gardenia Cooper, umpire.

The game was close and exciting, and considering the wet grounds, which made the ball hard to control, was full of thrilling situations.

Remarks:

Wadsworth is some coacher.

Croton did some stunts at third.

C. Terminalis sure can kick.

L. Veitchii did some kidding behind the bat.

J. Scottii is a sprinter.

E. Harrisii covered his position well.

N. Pandanus got his base each time up.

J. Elasticus did some high stepping.

C. Genista played in great shape.

Three balls had the cover knocked off. Yet nobody won the "five spot."

K.

THOMPSONVILLE, CONN.—The Brainard Floral & Nursery Co. have moved into the new plant on Maple street, combining the greenhouses, nursery and seed departments. This increases the acreage and they have added three new greenhouses, and a large office and salesroom has been erected.

GREENLAND, N. H.—The large greenhouses of A. W. Clough, which have been used for years in cucumber culture, will be planted to carnations this year. Mr. Clough states that the carnation beds will be among the largest in New England.

BAR HARBOR, ME.—George Ed Lindeman, formerly associated with Charles Thorley, New York, and the Atlanta Floral Co., Atlanta, Ga., has assumed the position of manager of the store of the Mt. Desert Nurseries. He has associated with him as assistant Wm. McIver, formerly with J. J. Habermehl's Sons, Philadelphia, Pa., and as bookkeeper Miss Lida Hughes, a popular schoolmistress of this resort.

New York.

SUMMER TRADE POOR.

The most important news we have in this city now is that the weather is hot and the water is fine. Yes, boys and girls, you are expected to visit our city after the convention and before you go back to the happy and quiet homes in the great west, both north and south. You will not see much of interest connected with our trade here in the city. You will possibly be disappointed with our florist stores, for just now they are at their worst. Nothing to be seen but green windows with here and there a splash if bizarre outdoor flowers and the essence of lethargy inside. Many of our retail florist stores in this city are world renowned for the snobbishness of those who have drifted in here from other states. If you are unfortunate enough to meet some of these automatic cads kindly remember their brains and manners went through cigarettes when they were feeding pigs. Meet the proprietors or men in charge and courtesies will be shown. There will not be much seen in the wholesale districts unless you get out early, say from 8:30 to 10:00 a. m. Refer to the trade papers and note the addresses. Out in the country there are some places well worth visiting and if any one wishes any particular information or guidance, we will be pleased to show them around. Our city is hourly growing in architectural wonders and then there are the great seaside resorts of which Coney Island is the most famous. Of course all this is no news to those who have been here, but then we expect visits from those who have never visited us before, those who have lived inland and hunger for a whiff of salt air and a dish of fresh salt fish. I suppose it is all different now, but we ourselves remember how sick we got of lake trout while at work at the World's Fair in Chicago. We hear lobsters do go west these days but are quickly consumed there. I suppose Chesapeake Bay oysters will be pickled at Baltimore; they are not bad given from a friendly hand. The weather is hot and dry here. Vegetation in city and country shows it and yet 'tis said New York city is always breezy. Well, the great White Way will be a revelation to unaccustomed optics.

Possibly not in the history of New York has business been so poor, even in summer, as it has been the last month, and today put the climax on its doleful, dismal self. Oceans of gladioli, asters and poor roses. There was no such a thing as staple price and very little of any sort of price. The absence from the city of what is termed the sporting element through the prohibition of horse racing has virtually paralyzed a great part of the florist trade. Preaching parsons who moralize on the beauties of nature and never spend a penny in the purchase of flowers for either home, church or friend fill up their niche as paid spouters, but they have proved a florist trade killing sect. Then, again, we have such a series of investigations, government and otherwise, there is no doubt all of them justified, but they have resulted in smothering our business, which is undergoing a disastrous eclipse just now. And then, again, the millions of American money spent abroad this year on account of coronations and other junkets must be felt at home here in the sacrificial attempt to retrench. All these conditions must be considered and met in a sensible way. High expectations are like lighted paper balloons these days, and evergreen hopes must be fed and cultivated.

CONVENTION DELEGATES.

It is estimated that about one hundred and twenty-five to one hundred and fifty will comprise the New York delegation to Baltimore on Monday next. These will be joined by the Boston delegation of from thirty-five to fifty, who will arrive by the Fall River boat on Monday morning, so quite a large and very jovial family is assured from here. Many more are expected to make their minds up at the last hour. A great many men connected with the business here have been and are already on their vacations and in consequence cannot afford to be at the convention. For those who cannot decide until the last moment arrangements have been made that tickets can be had on the train. The committee have worked hard and are ready to show pleasant results. Many rumors, as usual, are afloat about those aspiring for office and places for next convention. An old friend, John Young, is being put forward for secretary and no one can handle the job better. Other good fellows are to be put forward also and it is a good omen to see hot fights for each position. It is healthy, and of all races the Irish love a fight. I only wish we were in a position to be in it. May the best men win and some live city get the next convention.

It is argued here by many solid, sensible business men that the annual convention should be held at a time of the year when a great national flower show could be held in connection with it so that it would be not only a benefit financially but would add greatly to the membership and objects of the society. They consider the summer meeting merely a picnic resultant in small benefits and tired feelings. The matter is worthy of deep consideration. It is only natural to expect that the fair at San Diego in 1915 will claim attention and it is hoped that the Pacific coast will get up—wake up and capture a full army of recruits in the meantime. It seems too lobsided and an evidence of unjustifiable indifference by the people out there that very few belong or take an interest in this great and hard working national society—missionary work is needed badly.

The following have signified their intentions of joining the New York delegation to the Baltimore convention: Mr. and Mrs. Peter Beuerlein, Elmhurst, N. Y.; Mr. and Mrs. Louis Schmutz, Brooklyn, N. Y.; Mr. and Mrs. J. A. Wollmer, Brooklyn, N. Y.; Mr. and Mrs. John Donaldson, Elmhurst, N. Y.; Mr. and Mrs. John Birnie, West Hoboken, N. J.; Mr. and Mrs. Charles H. Totty, Madison, N. J.; Mr. and Mrs. Harry A. Bunyard, New York; Mr. and Mrs. John B. Nugent, Jr., New York; Mr. and Mrs. William H. Duckman, Madison, N. J.; Mr. and Mrs. Charles Weber Lynbrook, N. Y.; Mr. and Mrs. Frank H. Traendly, Brooklyn, N. Y.; Mr. and Mrs. H. Weston, Hempstead, N. Y.; Mr. and Mrs. Robert G. Wilson, Brooklyn, N. Y.; Mr. and Mrs. J. V. Phillips, Brooklyn, N. Y.; Mr. and Mrs. John Meisem, Brooklyn, N. Y.; Mr. and Mrs. John N. May, Summit, N. J.; Mr. and Mrs. Berodsky; Joseph Manda, So. Orange, N. J.; J. Austin Shaw, Brooklyn, N. Y.; H. NOTES.

Arthur Watkins of the W. E. Marshall & Co., seedsmen, has gone on a pleasant trip up the Hudson river. This is being done on a motor boat on slow fishing stages, getting off to procure oil and take auto rides among the natives. Arthur is in for it good. On Saturday last we met him rushing off to play a cricket match at Bay Ridge, L. I. Wonder if the game is over yet? Just imagine cricket 'mong the turmoils of New York life. My! some can be calm under all conditions.

Wm. Elliott, the plant auctioneer, tells of a right good time between his bowling team and that of Hartford on the Hartford Club's grounds, the latter club winning the series. This style of bowling is on the velvet lawn, not the alleys, and pity 'tis that the trade does not take this sport up; it would mean more to them than wooden alleys and bad air.

James Coyle is back again and busy pleasing the critical trade connected with Fremont's house. Here are to be seen many old favorite roses such as Safrano, Bon Silene, etc. Here also we notice L. B. Coddington's Lady Hillington, a rose destined to win high favor from particular people during the coming season.

G. V. Nash, superintendent of the New York Botanical Gardens, has just returned from a visit through the fruit-growing sections of the northwest and reports splendid conditions in Washington state. Mr. Nash undoubtedly could give an interesting lecture on this subject for the club some night.

There will be an exhibition of August flowers, especially gladiolus, held at the Botanical Gardens on August 26-27. This will we a gala occasion and should be a record-breaking show. Schedules can be had from Secretary George V. Nash, Botanical Gardens, Bronx Park, N. Y.

Arthur Hunt is busy on the job again after being cut to pieces in operations at the hospital. He certainly is like a steel wire and looks it; he informs us that A. H. Lanjhar will move over across the way to a new store at 130 West Twenty-eighth street in September.

It is reported that W. W. Burnham, for many years in charge of the flower department at Bloomingdale's, and now superintendent of Abraham & Strause's dry goods store in Brooklyn, will leave there January 1.

At Walter F. Sheridan's the best purple asters in color and named gladiolus, at Frank Traendly's the roses Taft (?) and Radiance lent a pleasing variety to stock seen elsewhere.

Rumors are again alive about Alex Guttman coming back into the wholesale business in Twenty-eighth street. Even the store is pointed out, but then —and that's all at present.

Richard Richter of the greenhouse staff of the Botanical Gardens, is away on his vacation but will be back for the exhibition.

STOCK PLENTIFUL.

"They're here because they're here." What? Asters. There are a few, of all colors, all grades and all varieties, and at all kinds of prices. Gladioli too, are very plentiful, but the better grades and varieties have not yet arrived. Sweet peas, while not overplentiful, are still in sufficient supply to meet all demands. A few good pink and white carnations are still received. Roses of all kinds are plentiful, the crops just coming on, American Beauties and Kaiserins being of particularly good quality. Colored water lilies are in good demand but white are about through. Business for the first week in August has been a little slow, with the result that stock of all kinds is accumulating.

NOTES.

Miss Wilhelm of the Westman & Getz store, left for Detroit, from there she will take passage on a package freight steamer for Duluth, stopping at all the principal Canadian and American ports en route. She will be away for several weeks.

The Cleveland Florists' Exchange Co. will exhibit the products of their artificial flower factory at the Baltimore convention. The exhibit will consist of wistaria, poinsettias, dogwood, rambler roses, etc., using southern wild smilax for the overhead decoration. The main feature of the exhibit will be the new Christmas flower, hibiscus, which this firm believes will eventually displace the poinsettia, being entirely new and original. Incidentally they will compete for the best arranged stand. Geo. W. Smith and Miss Nettie Heideman will have charge of the exhibit throughout the week. C. F. B.

PANSIES

Vaughan's International Mixture

The World's Best

This is one of the specialties which has established and held the reputation of Vaughan's Flower Seeds, and this is one which we maintain most carefully, not alone as to quality, but in vitality and germination. You are beginning right in Pansy growing when you start with Vaughan's International Mixture. Trade pkt., 50c; ⅛ oz., $1.50; ½ oz., $5.00; oz., $10.00.

Vaughan's Cut Flower Mixture

This mixture is put up by ourselves and contains mostly light colored sorts. We have sold this mixture for several seasons to some of our Chicago cut flower growers, who have realized big returns from the sale of the flowers. Pansies are as easily grown as violets, require less care and bring better returns. Trade pkt., 50c; ⅛ oz., $1.00; ¼ oz., $2.00; oz., $8.00.

Vaughan's "Giant Pansy Mixture"

Embraces besides all the separate shades and colors, five special strains not listed elsewhere, and which can only be had in this and our International mixture. Trade pkt., 25c; ⅛ oz., 60c; oz., $4.00; ¼ lb., $14.00.

	Trade pkt.	⅛ oz.	oz.
Aurora, pure white without blotches	.10	.20	1.30
Auricula Colors, metallic shades	.10	.20	1.25
Black, large true black	.10	.20	1.20
Beaconsfield, upper petals light lavender, lower ones deep rich purple	.10	.20	1.20
Boulogne Giant. This is a special selection of a French Pansy grower; the flowers are of the largest size, of great substance and fine form, and are borne on particularly strong stems	.50	2.00	
Bugnot. Our "Bugnot" contains shades of red, bronze and reddish-brown that are not found in other mixtures	.25	.45	3.00
Cassier, 3 and 5 spotted, an A1 strain	.25	.54	3.00
Emperor Francis Joseph. Very large, pure white with a large blotch of brilliant violet blue on each petal	.25	2.00	
Emperor William, dark navy blue	.10	.25	1.25
"Fiery Faces," very rich scarlet, with a gold edge and yellow center	.15	.35	2.00
Golden Queen, clear golden-yellow	.10	.20	1.30
Mad. Perret, lovely shades of pink and rose	.10	.25	1.50

The Seed Trade.

American Seed Trade Association.

Leonard H. Vaughan, Chicago, President; Marshall H. Duryea, New York, First Vice-President; Edgar Gregory, Marblehead, Mass., Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

Next annual convention, June, 1912.

VISITED CHICAGO: C. Herbert Coy and son Howard, Valley, Neb.

BIRMINGHAM, ALA.—G. B. McVay, ong with the Amzi Godden Seed Co., s now in the produce business.

OHIO seed sweet corn prospects are reported by C. S. Clark as better than one year ago, but that rain is needed.

CHICAGO.—Prices on the Board of Trade, August 9, for grass seed, were noted as follows: Timothy, $12 to $13 per 100 pounds.

A TRADE paper noted for news items dealing in generalities says: "Certain seedsmen have omitted the disclaimer" —names and Bradstreet rating, please.

HOLLISTER, CALIF.—Onion crops in the Sacramento river section are reported injured 50 per cent by the heat. —F. B. Mills, Rose Hill, N. Y., was a recent visitor.

BLUE GRASS.—Three dollars to $3.10 for 14 pounds of new crop blue grass seed in carload lots in Kentucky and likely to go higher suggests a trust worth looking after. Henry Nungesser says Canadian blue grass makes a good lawn and few complaints are received by those who sell it. Others say it is no lawn seed.

PEAS AND BEANS.—One prominent Michigan concern reports August 3 as follows: "There is not much more to say about pea and bean crops except that the more we hear of the former the shorter they get. If we were to make a guess we would say that bean crops are going to be about two-thirds of a crop and perhaps not so good."

Puget Sound Cabbage.

We will undoubtedly have an average crop of cabbage this year, and there should be some small surplus over and above the contracts. Although the acreage planted was smaller than usual this year, yet the yield promises to be good, and the contracts are not quite as heavy as previous seasons. So far as we are able to judge at the present time, the only thing that gives signs of shortage is Danish Ballhead, most other varieties promising a good yield. L.

Michigan Seed Crops.

Beans.—The prospect is just fair. Some dry, very hot days stunted the growth at a critical time.

Sweet Corn.—Prospects are for a moderate crop only.

Cucumbers.—These suffered some from lack of moisture during the recent spell of extremely hot weather, but with more favorable weather at the present time seem to be recuperating and promise a fair crop.

Melons.—While watermelons promise unusually well, muskmelons do not seem to have endured the extreme heat so well. We cannot look for a full crop.

Radish.—A recent inspection shows much damage by heat and we estimate a shortage of at least 25 per cent from what we had previously expected.

Squash.—Those fields of squash which have not been attacked by bugs are looking well. A few farmers have reported the bugs pretty bad.

Tomato.—At present the tomato crops are very promising. They do not seem to have been damaged by the heat and are unusually healthy and vigorous.

Jackson, July 28, 1911.

Cincinnati.

THE MARKET S SUDDEN CHANGE.

The market last week changed as quickly as a fair damsel's mind. One day the buyers went into the market and paid top prices for everything they purchased. When they got back the next day they were surprised at the accumulation of stock and the prices, which had dwindled one-half and even more in some lines during the night. The "superfluity," as Sam Bernard would say, continued and still continued the early part of this week and apparently bids fair to continue for a fortnight. Combined with the increased influx of stock happened what seems to be a decrease in demand with the retailers. They are buying very carefully and not largely at a time. The shipping business, however, continues. The roses are coming in stronger and, I might add, better. American Beauties are especially fine. Asters and gladioli are easily more than sufficient to meet all requirements of the calls for them. Only the best sell readily; in fact, they are in demand. A few hardy hydrangeas come in regularly. With all the excess of flowers it would not be a bit amazing if within the next fortnight, just between the crops of early and late asters, there would be the same shortage so apparent in other years and similar to the one a short time ago. The green goods market is ample for requirements.

CLUB MEETING.

The Cincinnati Florists' Society held its regular meeting on Monday. Besides ordinary routine business a subsidy was voted the Bowling Club to aid them in paying the expense of a bowling team to Baltimore.

NOTES.

A card from Max Rudolph from aboard the liner states that he did not have the pleasure of seeing Henry Schwarz seasick on the way over to the "Old Country."

J. D. Christiansen, representing Hummel & Downing, Milwaukee, Wis., called upon the trade last week.

Miss Jennie Adrian recently returned from an extended trip through the Great Lake region.

Mrs. Albert Sunderbruch leaves shortly for an extended visit to her parents in the South.

P. J. Olinger spent a few days in Chicago upon business this week.

H.

Albany, N. Y.

CLUB MEETING.

Reports on the clam bake to be held on September 3 at Shafer's grove, Stop 34, Schenectady railroad, were a feature of the August meeting of the Albany Florists' Club held at President F. A. Danker's place. Louis F. Schaefer, chairman of the bake committee, reported that arrangements were completed and that a reduction had been secured from the proprietors of the grove for children under 12 years of age. Frederick Goldring was named treasurer of the bake committee. The park will be open at 11 a. m. and in the afternoon a contest of games will take place and prizes awarded in the several classes. The interesting feature will be a baseball game between the growers and retailers, the members of each team to choose their captains and to arrange details. The bake will be opened at 3:30 p. m. William C. Gloeckner reported that Governor Dix had vetoed the bill to appropriate $50,000 for a range of greenhouses to undertake horticultural research at Cornell university. Governor Dix has vetoed a number of bills carrying appropriations this year on the ground that the state has no money for extra expenditures. The application of Gustave Johnson of Saratoga Springs, gardener for Mrs. Charles Scribner, was presented by President Danker and following the usual course was laid over until the next meeting. The club accepted the invitation of the treasurer, Patrick Hyde, to hold the September meeting at his place, 484 Hudson avenue.

NOTES.

C. R. Pettis, state superintendent of forests, has sent out a circular letter asking for information about the chestnut bark disease which has appeared in this state in the vicinity of New York and is spreading. In the localities in which the disease has been found, many of the chestnut trees have died and it is feared that the disease will spread through the state. The circular describes the appearance of trees affected, and furnishes a list of questions to be answered.

S. Hanson, Lansingburgh, Troy, is building a carnation house 22 feet, four inches, by 50 feet, seven inches.

William Hannell, Watervliet, is building an extension 28x150 feet, to be devoted to carnations. R. D.

A WELCOME RAIN.

The abundance of rain during the past week has been cheering to all who are engaged in horticulture. Though there had previously been heavy showers, the great heat following soon dried out the soil, but there is now the satisfaction of knowing that it has been thoroughly soaked. It has made a great improvement in the landscape features of the parks and private grounds and greatly benefited the flower and market gardeners. Gladioli are now appearing on the market in considerable quantities and there is some very fair stock. There are also a few dahlias. The outdoor stock of asters is a very backward proposition. A few good blooms have appeared, but for every good one it is safe to say that there are dozens which are practically worthless, and nearly all the saleable stock that is on the market has been grown under glass. In the greenhouses, carnation planting is well under way and notwithstanding the ordeal of heat and drought through which the plants passed while in the fields they are in very fair condition. Of Enchantress, particularly the light pink, plants of large size may be seen.

CLUB MEETING.

The Florists' Club met on the lawn of W. F. Gude's residence on the night of August 1. Mr. Gude and his estimable wife, together with a score of assistants, had made elaborate preparations for the entertainment of their guests. It was a splendid reception, attended by over two hundred members, their wives, daughters and sweethearts, and a number of invited guests. The spacious and beautiful lawn was aglow with Japanese lanterns and nothing was left undone that would enhance the pleasure of the guests. Richard Vincent, Jr., delivered his most interesting lecture on Holland, profusely illustrated by stereoptican views of the bulb growing industry. There were also many other interesting views of scenes which Mr. Vincent has visited during his extensive travels. The lecture was a real treat and was very warmly received. There were also a number of very excellent and amusing recitations by local talent.

There was an abundance of good things to eat and precautions had also been taken against anybody suffering from thirst. Doubtless many who attended will take advantage of the invitations of their delightful host and hostess to "Come again."

NOTES.

F. H. Kramer, in addition to his extensive florist business, is an active promoter of the Imperial Theater, now under construction on Ninth street, near F. This structure will be equipped to stage any play that may come here. The stage will be sixty-nine feet wide and twenty-one feet deep; the seating capacity will be 1,000. The house will be open in October.

George H. Cooke has nearly completed an addition to his store, which will give him about twice the floor space he formerly occupied. This was made necessary by his greatly increased business in the season. At the baseball park he has just completed a job of 12,000 square yards of sodding.

The bowling team went to Baltimore on the night of August 5 and rolled with the Baltimore team, winning two games out of three from the Orioles. These two teams are preparing for the convention by hard work, leaving the hot air features to those who like that sort of thing.

Adolphus Gude, superintendent of greenhouses for the Gude Bros. Co., has, at their new range on the Bladensburg road, completed one new house, 60x400 feet, another 40x350, both planted with roses. Other houses will be erected.

A. B. Garden has completed his two new rose houses and is now building a large propagating house. A. F.

TROY, N. Y.—Fred L. Post is telling of a swindle perpetrated on him, but through the suspicions of his daughter was saved a larger loss. A young man ordered two large designs to be delivered for a funeral and before leaving had a spray of roses arranged which he took with him, saying he would pay for all when they were delivered. The daughter telephoned to friends residing near the address given and found that no person was dead and the name was not the party living at the street and number left by the swindler.

GIANT **PANSY** SEED

The KENILWORTH Strain

must not be compared with the flimsy Trimardeau; it is much larger and of good substance. The immense flowers of 3½ to 4 inches are of perfect form; every tint and shade is produced in striking combinations and endless variations of beautiful colors and markings; it is the result of years of selections. The stock plants are selected from many thousands of plants grown for market. It is rich with shades of brown, bronze, red, mahogany and numerous others. 1911 seed now ready, light, medium or dark mixtures. 2,000 seeds, 50c; 5 000, $1 00; ¼ oz., $1.25; oz., $5.00.

Pansies in Separate Colors

Giant Adonis beautiful light blue.
Giant Emperor William, ultramarine blue.
Giant King of the Blacks, coal black.
Giant Beaconsfield, violet, shading to white.
Giant Golden Queen, yellow.
Giant Golden, yellow, with dark center.
Giant Masterpiece, beautifully ruffled with a wide range of rich colors.
Giant Red, a fine mixture of red shades.
Giant White.
Giant White, with large violet center.
Giant Royal Purple, fine large flowers.
Giant Orchard flowering, rare shades.
Giant Bronze and copper shades.
Giant Light Blue, delicate shades of blue.
Giant Dark Blue, deep blue shade.

Trade pkt., 25c; any 5 for $1.00; any 11, $2.00.

Rainbow is a blend of over 50 of the latest introduction of Giant Pansies of the most beautiful gorgeous colors; blotched, striped, veined margined, etc. With every $1.00 worth of Pansy Seed I will send 1000 of Rainbow free, and with other amounts in like proportion.

Chas. Frost Kenilworth, N. J.

4911 Quincy Street, CHICAGO.

Montreal.

STOCK QUITE SCARCE.

Trade is not so quiet after all, taking into consideration the time of the year, and if there was a sufficient supply of good flowers business would be first class, but flowers are so poor and scarce that the retailers find it next to impossible to procure any quantity of good stock. Outdoor flowers are worse than last year. Asters are very small and much diseased; besides, the aster bug greatly enjoys the continuous hot weather. Sweet peas have grown well but produce but few good flowers, many varieties being badly sun-scalded, notably the red ones, Queen Alexander being one of the worst.

NOTES.

The picnic of the Gardeners and Florists' Club was a very enjoyable affair but was poorly attended, barely 150 being present. The sports were keenly contested and the prizes numerous and costly. Some of the prize winners were:

Bean guess—Mrs. Hazel, first; Geo. Hopton, second.

Seventy-five yards—Members over forty years—Wm. Hazel, first; Geo. Pascoe, second; J. Watts, third.

One hundred yard race—Members under forty years—J. Luck, first; G. Miles, second; T. Gillespie, third.

Members' wives—Mrs. Miles, first; Mrs. Luck, second; Mrs. Hazel, third.

Boat race—Tom Sharky, first; J. Luck, second; J. Pidduck, third.

A visit to MacDonald College, St. Anne de Bellevue, found the grounds very much dried up; in fact there was not a patch of green grass to be seen anywhere. Shrubs and perennials suffered greatly but field crops showed up remarkably well, being kept continually cultivated, and this method is just what the college people want to prove to the farmer. Our friend, Archie Walker, who is in charge of the greenhouses, was found on duty. A house of cucumbers was being grown to settle once and for all the controversy in regard to pollination which has been raging in Canadian trade papers. There are other experiments being carried on in carnations, roses, tomatoes; in fact everything done here is an experiment, not only in plants but soils, benches, water, ventilating and in the houses themselves. E. Jones, who superintends the day school gardens, has also many valuable things growing. LUCK.

HARTFORD, CONN.—A fire destroyed the barn and contents at the nursery of J. W. Scott on Blue Hill avenue July 30.

S. G. HARRIS, Tarrytown, N. Y.

Lenox Horticultural Society.

The monthly meeting of the above society was held on August 5, a large number of members being present. The first business of the evening was to cancel the annual and perennial exhibition of 1911 which should have been held August 10. This has not been one of the best seasons for garden flowers in the Berkshires. Some varieties have been good, some bad and others worse. Moreover, death has thinned out at least three of our principal exhibitors. It will mean great falling away of entries for the fall shows also.

But the most interesting feature of the meeting was the display of sweet peas staged by E. Jenkins and G. Foulsham, especially so the former. His collection of all distinct varieties included the best of the old sorts and the cream of the new. Mr. Jenkins passed on the credit of growing them to his foreman, W. Hooper, who, in a short chat, spoke of the merits or demerits, as the case may be, of the lesser known varieties. The following varieties were the pick of the basket: Countess Spencer, Princess Beatrice Spencer, Marie Corelli, Captain of the Blues, Crimson Spencer, Othello Spencer, very fine, Florence Nightingale, Ethel Roosevelt, Rose De Barri, E. J. Castle, Lovely Spencer, Doris Burt, Helen Lewis, Phenomenal, Willie Martin, Masterpiece, Helen Byatt, W. T. Hutchins, Nora Unwin, Mr. A. Watkins and Tennant Spencer, fine. Conspicuous amongst the best of the president's lot was Maud Holmes, Ethel Roosevelt, Marie Corelli, Asta Ohn Spencer and Florence Nightingale. E. Jenkins was awarded a certificate of merit and G. Foulsham a diploma of merit. The latter was also awarded a cultural certificate for garden pea Mammoth Marrowfat. The judges were A. Mac Connachie, J. J. Donohoe, J. W. Pybus and W. Jack.

Our society has a rival. The ladies of the Berkshires do not intend to be behind in things horticultural. They have formed a society of their own to be known as the garden club. The gardeners have placed the seal of fame on the Berkshires as an horticultural center, and the ladies intend to try hard to help maintain that position. It was decided to hold the annual field day on August 23.

JOSEPH W. PYBUS.

Vegetable Growers' Association of America.

B. L. Watts, State College, Pa., President; H. F. Hall, Boston, Mass., Vice-President; S. W. Severance, 508 Illinois Life Building, Louisville, Ky., Secretary; M. L. Rusteuik, Cleveland, O., Treasurer.
Annual meeting at Boston Mass., 1911.

Growing Lettuce.

Green house growers generally aim to have their first lettuce crop come in about November 1; often it is desirable to have it sooner. We would figure on October 20 to open the market as in average seasons we get enough freezing to ruin the outdoor lettuce by that time. During the warm months good plants can be produced in 30 days, that is, without transplanting; if transplanted, five weeks is more likely correct. Then we must figure another five weeks for the crop to grow; we often produce fine lettuce in 30 days from planting, but it is not the rule with most growers. Thus, August 15 would be about right to sow the seed for the early crop. It is generally conceded that outdoor grown plants are no good for forcing; this is true in regard to the average outdoor product which is too much hardened by sun, dry winds and general exposure, but the green house is a bad place, too, for lettuce in August. Therefor we start our plants under cheesecloth frames outdoors, where there is no trouble to germinate the seed, no trouble to keep them moist and growing, and no attacks of insects. We make these frames out of 1x6x16 foot lumber five feet 10 inches wide, tack the cloth on and water through the cloth with the hose. Later we block the frames up with a few bricks to admit more air.

MARKETMAN.

Companion Cropping.

The writer has never been a friend to either double cropping or companion cropping under the old or natural system, but with irrigation, especially overhead irrigation, the case is different. Early this season, when we saw the tendency of the weather we abandoned one-half of our land entirely; in fact, never plowed it, and centered all our energies on the other half, which is covered by water pipes. It does not take long for one to see that it does not pay to water vacant land and inter cropping is the result. Thus we planted every fourth row of onions to a bunching variety to be removed for green onions to be followed by celery, and every two rows one was omitted entirely and melons planted instead. Thus we are producing green onions, dry onions, melons and celery on the same ground and at this date the prospects are for success. When the early cabbage was heading we planted with a hand corn planter bush beans between every two plants, not quite to the center of the path to allow access for cutting; as we cut the cabbage we broke the remaining outside leaves to form a mulch for the beans. The result is, we have a good crop of beans worth $2.00 per bushel where we cut cabbage only a few weeks ago at 90 cents per dozen, and we expect to follow the beans with spinach.

We train our melons lengthways of the rows for easy spraying and about August 1 broadcast turnips. This is a successful combination by experience. Staked tomatoes now have a row of celery growing on the north side of each row which promises exceedingly well as the tomatoes protect the celery from the hot sun; by September 15 we will have the tomatoes out of the way as they are now all topped to prevent further growth. Scarlet Globe radishes, we inter-crop anywhere between onions, lettuce, cabbage, or beans, as they are removed so quickly no harm is done. We produce lima bean plants on sods and inter planted our head lettuce field with these limas which are now a tropical growth on their poles. We expect to remove these limas for frames in October to carry radishes and head lettuce down to Christmas. Our early spinach patches which were broad casted were plowed under in June and at once reset with cucumbers grown in 2½-inch pots. We have had better crops than our neighbors on less land, and nicer goods we never had. The prospects are we will wind up this season more successfully than any before. But to carry such a plan we must water, mulch, fertilize, manure, and produce plants to reset, and have plenty of help.

MARKETMAN.

Small Pots for Forcing Strawberries.

The usual size of pots for the forcing of strawberries is 6-inch, and for late batches some even prefer 7-inch pots, and some uncommonly fine fruit I have recollection of being grown in this latter size. Occasionally one meets with instances where a smaller pot is made to do duty, and in some cases that have come under my notice splendid results have followed this practice. For the earliest gathering this year I prepared a batch of plants in 48's, or 5-inch pots, and, compared with the plants occupying the larger size, there was a distinct advantage. There was a less number of "blind" plants, the trusses were more compact, and the fruit produced was even better than is usual with the earliest supplies in previous years. It may be said, as an argument against the smaller pot, says a writer in Garden Illustrated, that the summer and autumn of last year being so wet, maturity of leaf and crown was promoted by the smaller amount of soil; an argument that may be readily conceded by anyone disposed to think the matter out. So impressed, however, am I, apart altogether from the fact that the season was uncongenial, that in future I shall use the 48 pot, at any rate, for the two lots required for early picking. There may be need for more space for late stocks, in order that watering may be lessened somewhat, as the plants have to bear stronger sunlight and lengthened days. I can call to mind at least one instance where the practice was to grow all forced strawberries in 48 pots, and the exceptionally large, brightly-colored fruits are well remembered. It was considered that both the water and the soil in the garden referred to, being charged with iron, stimulated the plants and accentuated the brightness of the ripe berries. I do not pretend to say that exceptional size marked any of these examples grown in small pots. There is a natural pride in two ounce or larger Royal Sovereign fruits, a weight which some growers find no particular difficulty in securing, but it might be reasonably conceded that the best culture is necessary to ensure uniform crops of two ounce berries.

The Persimmon.

Of the persimmon of the eastern United States, Diospyros Virginiana, which is rarely cultivated, the Bulletin of Popular Information, published by the Arnold Arboretum, July 5, says that this, however, is a perfectly hardy, fast-growing and shapely tree. The leaves are thick and leathery, dark green and shining above and pale below. The male and female flowers are produced on different individuals and are not conspicuous. They open when the leaves are nearly fully grown and are pale yellow, those of the female tree being about three-quarters of an inch long and nearly three times as long as those of the male tree. The fruit, which ripens late in the autumn and does not become sweet and succulent until after it has been touched by the frost, remains on the branches during the winter; it is globose or oblong, about two inches in diameter, pale orange color often with a bright red cheek and is covered with pale bloom. Occasionally plants with exceptionally large or well-flavored fruits have been propagated by nurserymen, but there is still opportunity to improve this fruit, which is one of the best produced by any North American tree. In New England the persimmon grows naturally only in a few stations in southern Connecticut, but in the middle and southern states it is very common, often covering by means of its suckers barren fields, and springing up by the sides of roads and fences. As an ornamental tree and for the value of its fruit it should be more often planted. In a group of this tree at the Arboretum is a male now covered with flowers; the largest tree in the group is a female on which the young fruits are just beginning to form.

Wild Grapevines.

Many of the early travelers in the northeastern part of North America spoke of the abundance and beauty of the wild grapevines and were enthusiastic over the wine that was to be made from the great store of grapes which they found hanging over lakes and streams and along the borders of the forest. These high hopes have not been realized and the fruit of the American grapevines, with some notable exceptions, unless improved by the blood of the Old World wine grapes, is of little value. American grapevines, says the Bulletin of Popular Information, issued by the Arnold Arboretum, have played a great part in restoring the vineyards of Europe ruined by the phylloxera and among them are some of the most splendid ornamental vines of all temperate regions. No other vines are better suited to cover trellises and arbors, to climb high into old trees, to hang gracefully over walls and fences, to spread over rocks and to clothe barren slopes.

Among the little known species best worth cultivation are perhaps Vitis Doaniana and Vitis cinerea. The first is a native of the Texas Panhandle where it was discovered a few years ago. This is a fast-growing plant and appears to be perfectly at home in New England. The leaves are large, thick and firm, and rather pale bluish green in color. The fruit, which grows in small clusters, is blue covered with a pale bloom and of fair quality. Vitis cinerea is an inhabitant of the river banks of the Mississippi valley from Illinois to Kansas and Texas and sometimes grows to a great size. This species bears very large leaves which are dark green and dull on the upper surface and ashy gray on the lower surface and, like the young shoots, are clothed when they unfold with a thick, felt-like gray covering. Some of the other species in the collection which should be studied by persons interested in handsome vines are Vitis vulpina, the Frost Grape, the species which grows the furthest north; Vitis rotundifolia, the Muscadine or Southern Fox Grape, often cultivated in selected forms in the southern states as the Scuppernong Grape; Vitis monticola, Sweet Mountain Grape of the limestone hills of southwestern Texas; Vitis rubra or palmata, a slender graceful plant found from Illinois to Missouri, Louisiana and Texas; Vitis Arizonica, with small, pale gray-green leaves; Vitis aestivalis, the Summer Grape of the middle states, with large leaves dark green above and covered below through the season with rusty brown hairs, and small blue-black berries; Vitis bicolor of the northern and middle states, a magnificent plant with large deeply-lobed leaves dark green on the upper surface and pale blue-green on the lower surface; Vitis Labrusca, the common Fox Grape of New England, with leaves covered below with tawny white, tan-colored, or red-brown felt and dull green above and large berries which vary in color from dark purple to reddish brown or amber color. The Delaware, Concord, and other well known table grapes are selected varieties of this species, and this is one of the parents of most of the hybrid grapes which are now largely cultivated in the United States. Vitis cordifolia, the Frost Grape, an inhabitant of the middle states, with thin leaves light green on both surfaces and with large clusters of small blue fruit which becomes edible after frost, is one of the largest and most vigorous of the American species, often growing into the tops of the tallest trees and forming stems from one to two feet in diameter. In spite of the beauty and value as ornamental plants of the American grapevines which can be seen in the Arboretum it is impossible to obtain more than one or two of them in nurseries, as American nurserymen have not yet learned the value of these plants or that a demand for them exists or would exist if plants could be bought.

Among Old World Grapes the most interesting as ornamental plants are Vitis Coignetiae and Vitis amurensis; the first, which is an inhabitant of northern Japan, grows to a large size and produces enormous, thick, prominently veined leaves pale on the lower side which turn scarlet in the autumn. This is a very vigorous and hardy plant here, and for northern countries one of the most valuable of all the ornamental grapevines. Vitis amurensis is a native of eastern Siberia and, although less vigorous than Vitis Coignetiae, it is a hardy and valuable plant for covering walls and trellises. The Chinese Vitis Davidii is interesting because, unlike the New World grapevines, the stems are thickly covered with spines, a character which at one time caused French botanists to consider it the type of a new genus, Spinovitis. The leaves of this plant turn red in the autumn. In severe winters the stems are killed back to the ground. Equally curious, perhaps, is another Chinese grapevine, Vitis Pagnuccii, with leaves which are sometimes shaped like those of an ordinary grapevine and sometimes deeply and variously lobed much like those of the Virginia Creeper.

LILIUM HARRISII The Bermuda Easter Lily.

Let Us Supply Your Wants in Lilies This Season.

We think we can make it to your advantage to do so, as regards both quality and price.

The stock that we offer is not gathered indiscriminately from all kinds of sources, but is grown for us by a few selected growers whose stocks have been worked up from the true, original stock. In order to ensure the health of the product, the bulbs are not grown on the same field oftener than one season, other crops being grown on the field the preceding year. The ground is thoroughly manured when the previous crop is grown, leaving it in a high state of cultivation, and when the lily bulbs are planted no fresh manure is used, and this prevents disease and insures a crop of strong, healthy bulbs.

In addition to this, we do not dig our bulbs as early as they are usually dug, but leave them in the ground until they are thoroughly ripened and matured. When Harrisii is good, it leaves little to be desired. There is very little, if any, stock obtainable as good as the stock that we are offering. We are supplying only this one grade of selected stock, and when this is disposed of, we shall have no more to offer.

While the quality of the stock that we offer is of the highest, our prices are as low as, or lower than, the prices of those who offer the ordinary stock gathered from indiscriminate sources. We are sure buyers will find our stock very satisfactory, and much more so than the Japanese Longiflorum, which has badly deteriorated in recent years.

Bear in mind that we were the original introducers of Harrisii in Bermuda, and that we have exceptional facilities for obtaining our present supplies. Also take note that the smallest bulbs that we offer are 6-7 inch bulbs, not 5-7 inch, as usually offered.

6- 7 inch bulbs, 350 to the case, **$15.00** per case; full 1000 lots, **$ 40.00** per 1000.
7- 9 inch bulbs, 200 to the case, **$16.00** per case; full 1000 lots, **$ 75.00** per 1000.
9-11 inch bulbs, 100 to the case, **$18.00** per case; full 1000 lots, **$175.00** per 1000.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

THE BOOK OF GLADIOLUS

THE first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120 page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

SUMMER CONDITIONS.

In marked contrast with the extreme heat reported from the east and the middle west, the weather here has been delightful. It is true that in the sun it is warm by day but there is usually some wind blowing, the temperature has not been high and with only the shade of a tree or bush it is cool and comfortable, while the evenings and nights are exceedingly pleasant. These conditions account for the presence still of many eastern visitors and the continuance of a very fair demand for stock. We are nearing the end of July yet there has been absolutely no glut of cut stock, and the demand for roses, orchids, plants and green goods has kept up finely. There is a distinct shortage in this market for short cheap flowers that are suitable for filling in funeral pieces, such as candytuft, small asters, daisies, pyrethrums and similar stock, and there will be money in growing this for the man who can obtain an acre or two of good land cheap with suitable water. Weddings, funerals and social events continue to clean up stock and retailers say they have never known a better season so far. Good cut Lilium rubrum from outdoors is on the market, as well as plants from under glass and lath.

NOTES.

A most enjoyable picnic was given to members of the Los Angeles County Horticultural Society and other guests by Dietrich & Turner, of Montebello, at their ranch July 23. A large crowd attended and were taken from the end of the car line by motor trucks from Howard & Smith's, the Germain Seed Co., and others. A fine repast was served and a baseball game indulged in during the afternoon. George Roeding, of Fresno, was the guest of honor and made an interesting speech at lunch time, followed by Herbert Goodge. Dr. Houghton also gave a short speech in his usual humorous style, but neither of our hosts could be persuaded to say much, though J. Dietrich got out of his predicament much easier than his partner. A good deal of fun was got out of the wording on the sign on the lawn, "Heisse Luft," and "Calidaura" was suggested as a name for the ranch. We can answer for it there was plenty of "hot air" of one kind in the big lath house, and also plenty of cooling drinks, plenty of good fellowship and a general feeling of good will pervading. The response to cheers for the hosts was hearty enough to suit the most exacting, and there were pleasant side trips to Howard & Smith's nursery and other interesting points. The latter end of July is not a good time to see roses, but many were surprised to see the clean, healthy and vigorous stock in the Dietrich & Turner houses, which promises exceedingly well for the coming season. Mr. Turner evidently believes in giving his stock plenty of room and the plants are fine.

Probably the largest wedding decoration of the season was that at the Rindge-Hole wedding by Wright's Flower Shop. Both the garden and the house were beautifully decorated, many thousands of pink roses being used. The bride's table was decorated with white roses, lily of the valley and orchids, Phalænopsis amabilis being the variety used. Besides this large table there were 94 smaller ones seating from six to eight people, these being decorated with pink roses, 150 bunches of Cecil Brunner being used. The ceremony was held under a canopy of roses, this and the whole of the garden walks and fountains being lit up with pink electric lights. Garlands of pink roses and Enchantress carnations were everywhere, festooned from pillars of natural rose foliage. The bride carried a beautiful shower of white orchids, the maid of honor a shower of pink roses, while the six bridesmaids carried each a shower of maidenhair fern. Everything went without a hitch and reflected great credit on the whole of the Wright force from Manager W. Wern downward.

Among the most beautiful of the wild flowers here now is the scarlet larkspur, Delphinium cardinale. This showy delphinium grows from five to six feet high, the flowers being of the richest scarlet, and it thrives in the moister canyons. It is perennial and would probably prove hardy with the usual protection in the east. The late flowering calochortus too, C. Plummeræ, is extremely beautiful, larger than the earlier "mariposa lilies," and of a delicate, almost indescribable, lavender or purple tint, which is very pleasing, the flower centers being covered with long silky yellow hairs. People who come here rave about the beauties of the California poppy which, of course, is a lovely thing, but they seem to miss the rarer and even more lovely species that have to be looked for. Either of those named above is well worth cultivating and far and away better in every way than the trashy things planted here by the "landscape gardeners."

Wm. Haerle, of the El Reah Greenhouses, Hollywood, was first in the market with chrysanthemums, cutting fine stock of Golden Glow July 21. The flowers were of good size and depth, fine color, and borne on well-leaved stiff stems from 24 to 30 inches in length. As indicating what this variety will do when properly handled it may be noted that the stock was planted out of 2-inch pots the second week in May in old rose soil. Such blooms at this time of year are a novelty here and they sold readily at good prices.

Morris Goldenson has been taking a trick at the store in the absence of Walter Garbett, who has been sick. During his fishing trip of five weeks Morris had some remarkably good luck and it took several of his friends to punish the big 11¾-pound halibut he caught the last day. Business is good here and all hands are busy rearranging and sizing up the stock-in-trade from the Wolfskill store. Wolfskill Bros. and Morris Goldenson is now the title of the firm.

At the Redondo Floral Co's. store there is always something doing and on a recent Sunday they opened up at 6 a. m. and did not close until 8 p. m. on Monday. Pretty good that for mid-July.

Charlie Morton, of the Los Angeles Flower Market, has returned from his eastern and southern trips.

Visitor. C. B. Knickman, representing McHutchison & Co., New York.

THE HOME OF ARAUCARIAS

Araucaria Excelsa, Robusta and Compacta Our Specialty.

You will never be sorry. It will pay you well. Do it now, and lay in a stock of Araucarias. Every day is valuable to you, because they grow into money for you.

Come and inspect the home of plant production. ☞ Customers and friends visiting the Convention at Baltimore are cheerfully invited to stop off in Philadelphia and give our stock a careful inspection. See them grow at our establishment, the home of Araucarias and pot plants.

WHERE THE BEST IS FOUND

The wisest men I know in the world are those who seek the best;
The florists will go to Baltimore and this is their only quest—
To see what the workers are doing, the men who put all their thought
In the flowers they grow, they love them so, and are proud of what they wrought.

But on the way there are marvels; the perfect is easily seen
In Godfrey Aschmann's greenhouses where his Araucarias green
Are covered with azure sheen where the hue of the sky shines clear
Through perfect form, made resplendent, in beauty without a peer.

Do not miss them all, my brothers; the City of Brotherly Love
Will give you a hearty welcome, and there you will easily prove
That Aschmann's will complete your journey all that is wanted you'll see:
ask you all for a visit; spend a few hours with me.

Araucaria Excelsa Our Specialty.

Warning—Don't be deceived. Now, as well as for the last twenty-five years, we hold the ground as leaders in importing, growing and shipping of our specialty, the Araucarias.

Araucaria Excelsa, Robusta compacta, Glauca, and **Palms, etc.** Florists, you all know we are leaders for the last 25 years in importing, growing and shipping of this so well known evergreen decorative plant, the **Araucaria,** more in favor than ever, from Atlantic to Pacific Ocean. To every florist our Araucarias is interesting, therefore no argument is needed for our goods. We know what our customers need, therefore we have provided and set aside special specimen plants, Spring 1910 importation, for lawns, porches, verandas, bungalows, private summer residences, the hotels and boarding houses on the seashore and elsewhere. This plant is one of the most desirable evergreen decorative plants adopted for this above mentioned purposes. For decorative purposes, in connection with palms, they will make a fine display.

Araucaria Excelsa, raised from top cuttings, 6-7 inch pots, 4 to 5 years old 5, 6 and 7 tiers 25, 28, 30, 35, 40 in. in height, ... $1.00 $1.25, $1.50, $2.00 to $2.50 each

Notes of the Chicago Coal Trade.

He who laughs last, laughs best, and so it is today in the coal business, for after two months of demoralized business, during which time coal has been sold at less than the cost of production so as to enable the miners to keep up appearances, the market has changed from one of quiet waiting to one of activity.

The retailers, manufacturers and general consumers have begun to buy for their winter needs. This increase in orders has brought a corresponding advance in prices. This is especially true with Pocahontas, Block and West Virginia coals.

The sudden change in the situation is of no surprise to us nor to the coal dealers, as it was all a matter of how soon the public would begin to purchase their supply for the cold days, knowing that they would eventually have to buy sooner or later.

Our Smokeless **Black Gem Block Coal**

Is of particular value for **Greenhouse Use.**

IMMEDIATE OR SUMMER DELIVERIES.

Many of our readers may have noticed our weekly coal market reports during the last two months; if so they recall our advice, urging them to make early purchases, while the prices were low. Those who followed our advice can readily see by the August coal prices quoted on this page that they have saved from ten to thirty cents per ton.

Greenhousemen who are considering their own interest will do some early buying now before the prices are again advanced and before transportation becomes difficult, which is of frequent occurrence owing to the shortage of cars with many roads in the middle west.

ANSONIA, CONN.—The Intertown Dahlia Association will hold the annual exhibition of dahlias September 16. Premiums are offered for dahlias, gladioli and asters.

IT PAYS ANY FLORIST

To be up-to-date in everything. A grower of flowers can fall behind as well as a manufacturer of any other product, for flower raising is a scientific manufacturing proposition, best results being obtained by a combination of right conditions.

FIRST—THE RIGHT HOUSES TO GROW IN.
SECOND—PROPER HEATING PLANT.
THIRD—PROPER SOIL, FERTILIZER, WATER AND VENTILATING.
FOURTH—SELECTION OF RIGHT VARIETY OF PLANTS, WITH A VIEW TO THEIR POPULARITY, COLOR, SIZE AND PRODUCTIVE QUALITIES.

A 30-foot Truss House, Channel Iron Gutters, one of a Range Built for O. C. Barber, Barberton, Ohio, last year. We are now producing for him a large Palm House, and nine Iron Frame Channel Gutters. Furnished him six Vegetable Houses this year, each house 816 feet long.

If you want to know about our work ask the largest and most progressive growers of vegetables and flowers in the country. They all know of our material, most of them have it, many who have not will when they build again, as a progressive florist wants the **Best** and we have it.

It is a pleasure for us to quote you on any kind, size or number of houses.

OUR IRON FRAME HOUSES are the very best, our new **channel gutters** and **malleable iron bar fastener** cannot be beaten. **See our exhibit at the Baltimore convention.**

Next meeting at Boston, Mass., 1912. W. H. DUNN Kansas City Mo., Pres. F. L. MULFORD, Washington, D. C., Secy-Treasurer.

CHRYSANTHEMUM SOCIETY OF AMERICA

Annual convention and exhibition in conjunction with the St. Louis Horticultural Society, St. Louis, Mo. November 7-11, 1911. ELMER D. SMITH, Adrian, Mich., President; C. W. JOHNSON, Morgan Park, Ill., Secretary.

AMERICAN ROSE SOCIETY.

Next annual meeting and exhibition at Detroit, Mich., 1912. A. FARENWALD, Roslyn, Pa., President; PHILIP BREITMEYER, Detroit, Mich., Vice-President; BENJAMIN HAMMOND, Fishkill-on-Hudson, N. Y., Secretary.

THE AMERICAN CARNATION SOCIETY.

Next annual convention and exhibition at Detroit, Mich., January 24, 1912. J. A. VALENTINE Denver, Colo., President; A. F. J. BAUR, Thirty-eighth St. and Rockwood Ave., Indianapolis, nd., Secretary.

THE BALTIMORE CONVENTION

Next Convention at Chicago.

OFFICERS FOR 1912:

President, Richard Vincent, Jr., Baltimore. | **Secretary, John Young, New York,**
Vice-Pres., August Poehlmann, Chicago. | **Treasurer, W. F. Kasting, Buffalo, N. Y.**

Convention Proceedings.

The twenty-second annual meeting of the Society of American Florists opened at the Fifth Regiment Armory, Baltimore, Md., at 2 p. m., on Tuesday, August 15, with a good attendance and under most favorable auspices. Seated on the platform with President George Asmus, of Chicago, were Secretary H. B. Dorner, Treasurer W. F. Kasting, Past-Presidents James Dean, Robert Craig, F. R. Pierson, Wm. R. Smith, and W. F. Gude, John Westcott of Philadelphia, and President Graham of the local association, who introduced the various speakers.

His Honor Governor Austin L. Crothers, of Maryland, was unable to be present and was represented by his Secretary of State, Hon. N. Winslow Williams, who delivered the principal address of welcome. In introducing this speaker Mr. Graham said that the florists of Baltimore and the State of Maryland know a good thing when they see it, and they considered the Society of American Florists in that category, and feeling that no speakers were too good for them they had picked out the most prominent they could find in the persons of the Governor of Maryland and the Mayor of the City of Baltimore. Mr. Williams said that the governor greatly regretted his inability to be in attendance and tell the florists how cordially welcome they were and how much the citizens of state and city appreciated the convention and its accompanying exhibitions. He gave unstinted praise to the latter feature and declared that the services of the florist were always in demand on all occasions, whether sad or joyous, to delicately express the tenderest sympathy or to voice the happiest wishes for the welfare of our friends. They grace and adorn every occasion. We will always feel indebted to the men who assist us to cement friendships and to assuage grief. He hoped the florists would come often again.

In introducing Major Preston, Mr. Graham said that he was one of the most progressive of the executive officers from whom much was expected for the general good of the city. In closing his introduction he craved a hearing for the greatest mayor of the greatest city of the greatest state in the greatest country in this broad world. Mayor Preston told of the many good things that are to be found in Baltimore, among them as interesting to the florists its splendid natural park, Druid Hill, and its many other parks, all of which are beautified still more by the florist and the ornamental horticulturist. The mayor told of the many diversified industries of Baltimore in a manufacturing way, and its advantage of situation on a fine harbor and bay, adequate to float the finest navies of the world. He proudly referred to the city hall that had been erected without graft, and with a balance in the construction fund after completion, and invited favorable notice of its magnificent sewerage system. Mayor Preston made a fine impression upon his audience.

Robert Craig, of the executive board, responded to the addresses of welcome, and was referred to by Mr. Graham in a happy fashion as the silver-tongued orator whose singing of Annie Laurie had endeared him to all hearts. Mr. Craig said that although this was the first time that the Society of American Florists had visited Baltimore, it was not the first time that most of the florists in attendance had visited here, but that the American Carnation Society and other societies had at different times held annual meetings in Baltimore and had enjoyed that hospitable welcome of which all who come to Baltimore partake and appreciate. He himself had been coming to the city

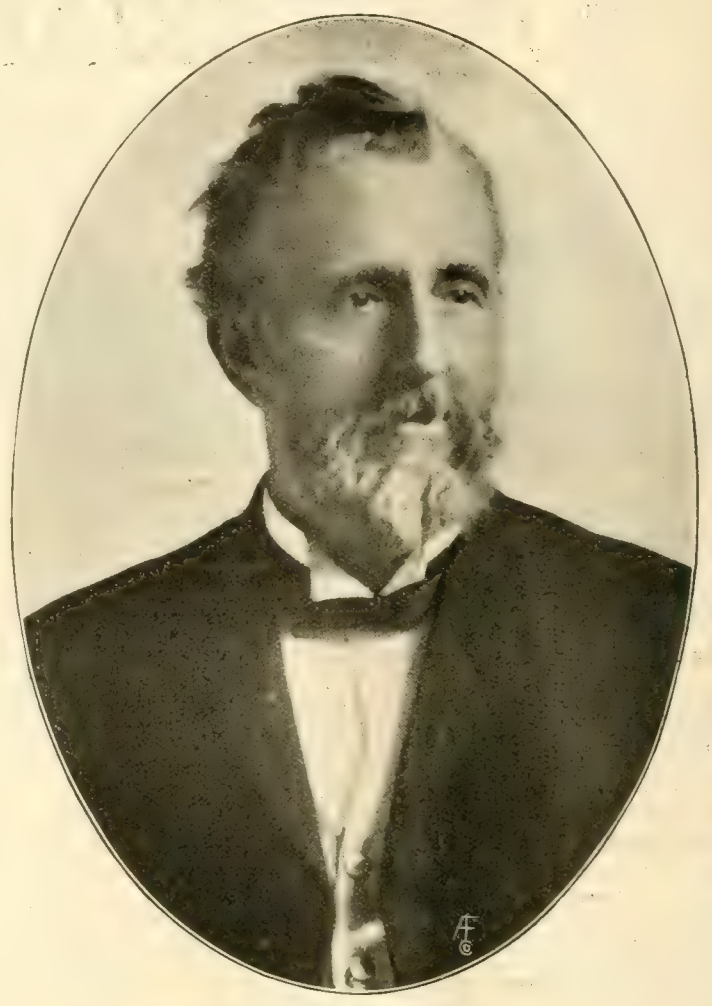
for the last quarter of a century with more or less frequency and always felt quite at home among its people, who were noted for their courtesy and consideration to the sojourner in their midst. This had made the word Baltimore a household word for hospitality all over the United States and for aught he knew the entire world. In many other cities the pursuit of the "Almighty Dollar" is the sole aim in life, but here, while they do not neglect their business interests and are live and wideawake, in fact the New York of the South, they always find time to mingle the social joys of life with its cares. They practice the finer social amenities and bid welcome to the sojourner within their gates. Baltimore has always been a notable center of interest in matters horticultural and none can forget the many names that have made it famous in this society nor can we overlook in these latter days that John Cook lives here, one of the greatest raisers of new roses in this country. Mr. Cook has produced after great efforts a wonderful rose which he had the good sense to name My Maryland. Nothing excels it in beauty, nor has any other rose awakened more enthusiastic admiration. The Society of American Florists may well congratulate John Cook upon this his greatest achievement. Yet the aroma and the fragrance of My Maryland are not one whit more to be extolled than the cordiality and warmth of welcome which the Baltimoreans send forth so freely.

In turning over the further conduct of the meeting to the society's officers, Mr. Graham said that as president of the Gardeners' and Florists' Club of Baltimore he had felt somewhat swelled up, but he knew that his authority was only brief here and that the central figure on the stage must be henceforth at this meeting, President Asmus, to whom he now surrendered the powers he had temporarily exercised in presiding. President Asmus was given an enthusiastic ovation, and the applause was so long continued that he had to beg his friends to refrain, while acknowledging the flattering character of the ovation given him.

Executive Business.

After President Asmus had delivered his address, the reports of Secretary Dorner and Treasurer Kasting followed, showing that the society was in a healthy condition financially and otherwise, and that there had been an encouraging increase of membership during the year past. The minutes of the executive board meetings were read by Secretary Dorner and were approved and ordered printed in the official reports. The action taken approving the secretary's report was moved by W. N. Rudd, and that referring to the treasurer's report by Irwin Bertermann. At the suggestion of President Asmus and on motion of Mr. Thilow, the reports of the state vice-presidents were referred to a committee to cull out the principal points of interest and report thereon.

The chairman of the Committee on Tariff and Legislative Matters, John G. Esler, asked that his report be heard tomorrow morning immediately preceding the discussion on reciprocity and his request was granted. President Asmus announced as the names of the judges of the exhibition, Otto Koenig, A. T. Pyfer and I. C. Bertermann.



RICHARD VINCENT, JR.
President-Elect Society of American Florist.

W. F. Gude, the Washington representative of the society, made an excellent report showing progress that had been made in the parcels post propaganda, and the favorable outlook for something doing of importance at almost any time in the near future. The florists are a unit in support of this progressive movement and formal resolutions will no doubt be presented and adopted later in the session taking a pronounced stand on this question. Mr. Gude's report was listened to with attention and his ability was recognized and highly complimented by the chair. Mr. Lenker, in the discussion following, urged that the great drawback to improvement at present was the fact that the government did not control the transportation facilities as in many foreign countries. In answer to an inquiry from Mr. Felch as to whether foreign countries assumed responsibility for loss of packages sent by parcels post, Mr. Lenker explained that the German government promptly liquidated such losses without undue quibbling. W. F. Kasting paid a high tribute to the work of Mr. Gude at Washington and said he was the right man in the right place. He predicted that the parcels post would have to come and it would come very much sooner if every florist in the country would insist that his congressman put proper legislation through, but congressmen could not guess the will of the people and it must be made clearly and forcibly known to them. On motion of Mr. Kasting the report was accepted and a vote of thanks tendered to Mr. Gude. The consideration of reports of other officers was postponed and the convention adjourned to 9:30 o'clock Wednesday morning.

President's Reception.

The president's reception at the Hotel Belvidere on Tuesday evening was attended by an immense throng. Most of the old lights and many of the new were in attendance. Baltimore hospitality was once more exemplified in the abundance of southern dainties, the enjoyment of which, however, was greatly affected by the sad death of John Birnie of West Hoboken, N. J., during the day. President and Mrs. George Asmus formed a most attractive picture surrounded as they were by an unusual gathering of ex-presidents of the society, among whom were noted W. R. Smith, James Dean, E. G. Hill, John Burton, J. C. Vaughan, John N. May, W. N. Rudd, Robert Craig, W. J. Stewart, W. F. Kasting, F. R. Pierson, Adam Graham, F. H. Traendly and W. F. Gude.

President Asmus' Address.

It is with great pleasure I address you on this occasion, the twenty-seventh annual meeting of our society. Although being the first time this city has been chosen for a meeting place, it is not the first time we are guests of our brethren in Baltimore, for the memory has been ever dear to us of that splendid afternoon and evening's entertainment on Friday, August 18,

JOHN YOUNG, NEW YORK.

Secretary Elect Society of American Florist.

1905, when as a fitting climax to an enjoyable and profitable meeting in the city of Washington we were welcomed here in true southern spirit and now we are here again to partially pay that debt of gratitude, even as a victorious army returns from the scene of conflict. In the six years that have passed we have to our credit many victories won by legislation and arbitration for the general good of our profession and those engaged in it. We also have a much larger sum of money in our treasury, a greatly increased membership roll and two great successful national flower shows to look back upon.

The one thing that stands out prominent in connection with the show held in Boston last March was the bringing together of the different societies for the display of their productions and the opportunity of attending the different meetings at one expense of time and travel. This has been one of my great desires for a number of years. The great growth of our business has necessitated the specializing of many of our large growers and with them it was a case of "Not that I love you less, Brutus, but that I love Cæsar more," meaning that their greater interests were in one of the special societies, but we have solved that problem and never again must we meet separately. Ours is one cause for the good of all. Our national shows have come to stay and to that end we should organize at once. The shows should be held once every two years. It is true that the first shows took a longer period of preparation, but that time was used in careful consideration of premium lists, finances and other details which gave us the experience we needed.

The national show should always be held in the spring. Fall shows are not new and are covered in nearly all large cities and in this connection I wish to state that I am pleased that many local societies and Florists' Clubs are following the example of the national society. Now if we wish to profit by the experiences in past shows we must always have as men at the head some of those who have assisted in previous shows and as briefly as possible I will outline my plan for your consideration.

PERMANENT SHOW COMMITTEE.

I would suggest a permanent National Flower Show Committee, say of six, to be appointed, two for six years, two for four years and two for two years and every other year the president to appoint the members for the six-year term. Thus there would always be on the committee four members of at least two shows' experience. These committeemen should be as representative as possible of the different societies taking part in the show. The chairman of this committee could be elected by the committee or appointed by the president after the location of the show had been decided upon, as it would be of great advantage to have the chairman close at hand. These exhibitions properly conducted show but little chance for loss and therefore I would suggest that 50 per cent guarantee be assumed by the society and 50 per cent, as in the past, by personal subscription.

Trade exhibitions and the selling of space as inaugurated at Boston proved wise and should be continued, and the checking of receipts and disbursements should be done by our officers, as we have a system that has always proved adequate for that purpose and officials that are paid for that work. The great good done by such exhibitions cannot easily be conceived. The standing it gives the trade and the general promotion of horticulture is apparent when the vast throngs that visit the shows and the newspaper publicity given them are considered. There are no doubt some of you who will differ with me and say that the shows should be conducted outside the society, but I say no. We have found the way to cement our different lines into one general interest. The meetings and the organization of this society have made this possible and we must not take this healthy young child from the mother organization. Our national charter was given us, too, for the development and advancement of floriculture and horticulture in all its branches and we are coming very near complying with that in these exhibitions.

The charter, constitution and by-laws should be printed with the proceedings every year, and it would be well to print therewith proposed amendments to the constitution and by-laws.

CONVENTIONS AND TRADE EXHIBITS.

It has been my experience that immediately after the selection of a city for the convention the coming year, inquiries are instituted as to what part of the expense the society will have to assume, and I think that a by-law should be passed that would cover this matter in a general way. The officers of our society awakened to the fact a few years ago that our membership was not developing in proportion to the expense which we incurred, and about the same time we also discovered that one of our largest assets, the trade exhibition, was being used as a big joy fund, and in several instances there was enough left, although we all had participated in considerable joy, to fatten the treasury of the local organization.

The necessity of stringent rules for the proper conducting, the charging and rating and the responsibility was apparent, and the rules to manage and maintain that part of conventions were adopted, and the results of that action are just beginning to be felt. By referring to the report of the Rochester meeting it will be found that over $1,500.00 was added to the treasury after paying all expenses. Thus, when we accept invitations from cities that as an inducement give us concessions such as hall rent, etc. free, it is of great assistance. This beautiful building has been granted to us by the Baltimore brethren on behalf of the business men of the city on those conditions. Then the three principal things for us to consider in the selection of the next place of meeting are: the offering of the hall, the advantage

to our trade exhibitors and the opportunity for increase in membership.

The society has no financial inducements to offer any city soliciting the convention. It long has asked that lavish entertainment be done away with, as there is always one enjoyment, greater than any other, that of meeting your fellow in trade and exchanging ideas. The amount of business we have to do sometimes suffers by the entertainments. I can see the day not far distant when the fourth day on the programme will have to be devoted to business sessions. Very often debates and discussions on subjects important to everyone are shortened for lack of time, and several of our important committees have complained, that after a large amount of work and the preparation of a lengthy report, that the matter is hastily rushed through and much that might be gained by discussions is lost.

I do not wish to be understood as against all entertainment. There never need be any fear of that! The danger, if any, lies in each city trying to outdo the other.

CONVENTION SHOWS.

At the convention in Cincinnati two years ago a resolution was adopted to hold a cut flower and plant exhibition in connection with the trade exhibition. This was attempted at Rochester last summer by the Rochester florists who, with the aid of exhibits by trades people, made a creditable showing. I am pleased to note that the members of the American Gladiolus Society are with us as a body, and it is just such exhibits as this that will make the exhibitions possible.

The Board of Directors has proposed as one way to promote the plant and flower exhibition at the convention, to allow the local people at certain times to admit the public at a reasonable admission, the money thus obtained to help defray the expense of music, decorations, etc.

Rules 1 and 2, as adopted by the Executive Board, should I think be added to our Constitution and By-laws and are as follows:

1. The society shall control all the features of the trade exhibition.

2. There shall be appointed annually at the winter meeting of the Executive Board a superintendent of exhibits and an advisory committee of three. Said superintendent shall have general charge of all details of the annual exhibition. He shall receive all applications for space and assign the same in the order in which they are received by him. He shall furnish the society, through the secretary thereof, a list of the exhibitors and exhibits by 1:00 p. m. on the day of opening the convention. He shall also furnish the secretary with a list of novelties and new devices submitted for awards, said list to be for the use of the judges.

He shall make no expenditure exceeding $10 in amount without the consent of the advisory committee. He shall keep full detailed records of receipts and expenditures and other matters of importance relating to the exhibition. Immediately after the close of the convention he shall make a complete report, which, after having been audited and approved by the advisory committee, shall be forwarded with the records of the exhibition to the secretary. All money collected by him shall be forwarded from time to time, without undue delay, to the secretary. All bills incurred shall be endorsed by him and submitted to the advisory committee for approval, after which they shall be sent to the secretary for payment by the treasurer of the society.

The advisory committee shall act as an advisory and audit board, subject to instructions of the Executive Board, and in case of disagreement between them and the superintendent their decision shall be final except it be reviewed by the Executive Board.

My reason for this is that it has taken years of work to bring this feature up to its present standard and a matter in which the revenue involved is so large in comparison with the total amount of dues received, should be under the control of the society proper. The details should be left as they now are, in the control of the Board, as minor changes are very often necessary.

MEMBERSHIP.

This is one of the great problems that confronts us, and in proportion to the growth of all branches of our business, it suffers by comparison. Reasons and theories have been advanced but when the benefits derived are considered it seems incredible. True, we are slowly and steadily growing. Our secretary's report will show that we made a fine gain during the national show at Boston, and the results of recent efforts with which you are familiar through the literature received will also be given you, but when our tariff and legislation committees go before bodies of whom we are asking our rights, they immediately want to know who we are, and whom we represent, and our membership of only eleven hundred does not signify that we are as strong as we should be to obtain proper recognition. By carefully examining the secretary's reports we find that our gains in membership are almost entirely at conventions or national flower shows and in some cities where we had reason to expect the largest increase we were disappointed. and for the reason, we have discovered, that the open hand of hospitality was so far reaching. The craft in general has been invited, regardless of their being attached to any organization. Just so long as they were florists they were feted and treated, and went away happy but forgot the magnitude of hospitality offered them through the members of the society and the society itself.

We have been so liberal that we thought it would be terrible if, when a florist came to the outer doors of the tabernacle and asked for admission, we would ask him if he was a member, but does not the work of you gentlemen for the past 26 years in their interests demand support? Aye, and so for several years past we have asked that in consideration for his membership we shall pin upon his bosom the highest token of honor, the leaf and emblem of our national organization, which grants the right to our festive occasions and business

WILLIAM F. KASTING.

Treasurer-Elect Society of American Florists.

meetings. Not to be severe with those that are paying for space in our trade exhibitions we have granted them the privilege, by personal recognition, of bringing into the building our brothers in the trade, and we have always hoped and trusted that before they retired they would join in our ranks—this has helped us gain some members and it will continue to do so just as long as we adhere to this policy.

A natural increase in membership also comes from the convention being held in new localities where the society has not held its meetings for several years, and in the selection of the place for the next meeting, this should be given due consideration.

THE ELECTIONS.

I am now going to voice the sentiments expressed by several of my predecessors and say that the president of our society ought to have had experience on the Executive Board to make him better fitted for the office. I am also in favor of the election of the Board of Directors by the society. I think that the selection of the men to perform the important work of the Board would be better left to the discretion of a number of men rather than to the several presidents. On the contrary with the offices of secretary and treasurer, their work has to be scrutinized by the Board, who also are the instigators of a large proportion of their work. If perchance the offices were not satisfactorily filled, and satisfactorily means judiciously, promptly, correctly and obediently, there is no immediate redemption. Their official capacity is better known to the Board to whom are entrusted the welfare of the society and the greater proportion of our serious questions, therefore why not this?

TRADE EXHIBITS AND OFFICERS.

In conducting the trade exhibit it has been the custom to hire a superintendent and as a recompense allow him 10 per cent of the gross amount derived from the rentals of space, which for several years past have amounted to from $225.00 to $250.00, and on several occasions an additional $50.00 has been allowed as expense outside of the ordinary requirements. There have always been a number of other items such as stenographer, bookkeeper and miscellaneous expenses, which approximately, from the reports of the last several years, amount to between $400.00 and $600.00.

Each year the office accounts and records are kept differently and I know of no time when any of the incidentals connected with this office were ever used for another year, which all means some outlay. Now we are all very nearly agreed that the secretary's salary is hardly enough to recompense a man such as is necessary to properly perform the important duties connected with this office for his entire time. Our membership is not increasing rapidly enough to increase this salary. Now then the same conditions exist concerning the office of superintendent of trade exhibits. We can not employ one for long enough a period at the amount usually earned, for he must have other employment at the same time and perhaps that something else is his own business or his employer's; therefore, we have two important positions partially, when we could have them wholly filled, at a reasonable increase.

Now, why not combine the duties of the two; they both are clerical in their way, and both at a certain time need the undivided attention of one man? The duties of the superintendent of trade exhibit are mostly correspondence, except for a short period before the exhibition and then the secretary should be giving his undivided time for the good of our organization and should be in the city where the convention is to be held, assisting, as a paid official, the many willing volunteers who are giving their time, without recompense, toward preparing for the grand welcomes that have greeted us in the past and in this city at this time. This is my solution of obtaining that for which we have been striving, the undivided time of a secretary and superintendent of trade exhibits.

It can easily be seen that both offices can be combined and the duties be competently and judiciously performed. The secretary has all the advantage of his office to secure new business, and the combining of the two offices does not entail any more expense than we have been under during the past two or three years, but it means better results. The amount of salary I have in view at the present time is $1,500 per year and if the work increases as it should under proper supervision, our income will increase, and the time is not far distant when $2,000 a year should be our secretary's salary. He would be the proper man for secretary of the national flower shows,—his statistics and experience would make him the natural choice—his salary and the duties of his office ought to make his presence a necessity on such occasions.

SEPARATE SECTION MEETINGS.

The adoption of this suggestion of President Valentine was one of the good things that cannot be praised too highly, and is conducive to great good both to the different societies as well as to our own. Buildings such as this in which we are meeting are particularly adapted, with the different regimental rooms available. I have always been a believer in the necessity of these societies and of their being able to better carry out their specific work than can be done in our general meetings. They do not conflict, but assist, and every organization pertaining to horticulture, whether a Florists' Club, Horticultural Society, Gardeners' Association or any other specific in its character, formed to promote its own interests, and at the same time the interests of horticulture, should have the encouragement and support of our society. Perhaps some plan could be developed whereby each one of these organizations, when they could show a certain number of their membership in our Society, would be entitled to a representation on our Board of Directors. This would help make our Board representative of all interests and be an inducement for them to get their members into the National organization, thus materially increasing our membership.

H. B. DORNER.

Secretary Society of American Florists.

THE OUTLOOK.

The last year has been one upon which we can look back with much satisfaction, for while business in a great many other lines has not been up to standard and a great feeling of unrest has prevailed among some of them, we, generally speaking, have no complaint and the outlook for a continuance is most promising. There have been fears of over-production among the conservative, but this has not developed, and these fears must have passed away, judging from the large number of buildings being erected or contracted for at present. Some of the building concerns say that this year promises to be the heaviest in their history.

GEORGE ASMUS.

President Society of American Florists.

In conclusion I wish to state that I have refrained from touching on many subjects of importance to the Society, but they are in the hands of carefully selected committees, whose familiarity with their work will give to you far better recommendations than I could, and their reports will be presented in due time at this convention.

Secretary Dorner's Report.

I have the pleasure of presenting, today, the secretary's report for the twenty-seventh annual convention of this, one of the finest national organizations in the country. It has been a pleasure to follow the work of the organization for the year. While the society has not made the progress that was really possible there are things that will help to make us more proud of our organization.

THE NATIONAL FLOWER SHOW.

Perhaps the most important event of the year has been the National Flower Show. All who were there will agree that it was the finest flower show ever held in this country. Many of the exhibitions were beyond expectation and all were worthy of the trip to see them. A full report will be given later by the committee through whose efforts such a show was made possible.

CONDITION OF THE FINANCES.

The finances of the society are gradually improving. The permanent or life membership fund has been increased since the last convention by the sum of $1,261.65. This amount was derived from the fees taken for life memberships and interests accruing during the year. The fund has now reached the sum of $9,700.15. Of this amount $7,500.00 is invested in the form of two loans secured by mortgages on properties located at Fort Wayne, Indiana. These securities bear interest at five per cent.

MEMBERSHIP.

The membership has also been steadily increasing. At the end of 1909 the membership of the society was 995. At the end of 1910 this was raised to 1,073, with the prospects that it will be much increased during the present year. The paid-up membership up to August 10 is 1,055, or just 18 less than at the end of 1910. One hundred and seventy-five of the members on last year's roll have as yet failed to pay their dues, but a number will do so before the year is over.

NEW MEMBERS.

There have already been taken in 157 new members during the year. This is more than twice the number that were added up to the same date last year. At the suggestion of the president letters were sent out to all the members making an appeal for increased membership. The appeal was in the form of a request that each member make an attempt to secure at least one new member. The names of all members sending in applications are to be included in the printed report. Up to date, 19 of the numbered application blanks, which were sent out with the letters, have been returned. The following members sent in one or more applications:

E. A. Pierce, twelve; Morris Goldenson, three; S. Wallace, Tilton, One; Peter Flanagan, one; R. Vincent, Jr., one; Wm. F. Kasting, three; R. A. Vincent, three; H. G. Berning, two; Joseph Traudt, one; L. S. Hendrickson, one; P. L. Larson, one; Robt. Halliday, ten; James D. Hooper, two; Geo. Asmus, one; John Miesem, one; Jos. Manda, three; T. P. Langhans, one; F. E. Brockman, one; Matt Thau, one; Florists' Telegraph Delivery, six.

The following vice-presidents were also active and have sent in many new names:

Connecticut—W. R. Pierson, four annuals.

Iowa—Jas. S. Wilson, one annual.

Massachusetts (East)—W. A. Hastings, fourteen annuals.

Massachusetts (West)—G. H. Sinclair, one annual.

Missouri—Fred H. Weber, six annuals.

Pennsylvania (East)—S. S. Skidelsky, one annual.

Rhode Island—L. J. Reuter, two annuals.

Wisconsin—J. E. Mathewson, two annuals.

Alberta, Canada—A. M. Terrill, one annual.

Few realize that by a little concerted effort on the part of the members, the membership can easily be doubled. It is to be hoped that the method suggested by President Asmus will be continued from year to year and that the members will make a greater effort to aid the society in this manner.

LIFE MEMBERS.

Of the new members added to our roll, five have come in as life members. In addition to these, 15 old members have also become life members, making a total of 20 for the current year. This now gives the society 272 life members.

TRANSPORTATION.

As usual, application for rates were made of all the passenger associations. This was granted by the Trunk Line Association and refused by the remainder. The Canadian, the South-eastern, the Western and the South-western Associations refused to grant rates owing to the small number attending from those districts. The Central Association stated that it has ceased to grant rates unless an attendance of 1,000 be guaranteed. Owing to the reduced fares in many of the states it is

becoming more difficult each year to secure rates.

TRADE EXHIBITION.

The trade exhibition of 1910 was by far the most successful exer held. Superintendent Vick and his associates at Rochester should be commended for the able manner in which the exhibition was handled. The total receipts for the sale of space were $2,460.43. The total expenditures were $944.52, leaving a net profit of $1,515.91. Several changes were made, this year, in the rules governing the exhibition, and it is to be hoped that they will do much to improve our exhibitions. It is hoped that the present exhibition will excel that of the past year as it did that of any previous year.

ENTOMOLOGIST AND PATHOLOGIST.

The attention of the members should be called to the excellent reports given last year by the entomologist and pathologist and which are printed in the proceedings for 1910. Reports, such as these, can only be prepared by the expenditure of much labor and money.

PLANT REGISTRATION.

Thirty-two plants have been registered during the past year.

No. 440—October 6, 1910, Coleus, Fanny Ross, by J. W. Ross Company, Centralia, Ill.

NECROLOGY.

Since the last report the following members have died:

September 19, 1910—George Wittbold.

August Poehlmann.

Vice-President-Elect Society of American Florists.

December 19, 1910—Anthony Wiegand.

March 18, 1911—George Lorenz.

April 30, 1911—George Engel.

May 18, 1911—Lloyd G. Blick.

May 24, 1911—Lemuel Ball.

May 21, 1911—Frederick Mathison.

G. O. Brown.

Chairman Press Committee Gardeners' and Florists' Club of Baltimore.

MEDALS AND OTHER AWARDS.

The following medals have been awarded during the year: Silver Medal—Patten & Co., for carnation Genevieve, offered through the American Carnation Society at their annual exhibition held at Boston, March, 1911. Bronze Medal—Patten & Co., for carnation Mrs. C. W. Barron, offered through the American Carnation Society at their annual exhibition held at Boston, March, 1911. Silver Medal—Lager & Hurrell, for Cypripedium insigne Var. Hurrellianum, offered through the Horticultural Society of New York at their exhibition, November, 1910. Silver Medal—F. R. Pierson Co., for Nephrolepis viridissima, offered through the Horticultural Society of New York at their exhibition, November, 1910. Silver Medal—F. R. Pierson Co., for a new form of Nephrolepis superbissima, offered through the Horticultural Society of New York at their exhibtiion, November, 1910. The medals and certificates awarded at Boston at the National Flower Show will be included in the report of the National Flower Show committee.

TRADE PRESS.

The members of the trade press continue to give the society their cordial support. They have always been ready to print all notices and items sent to them by the secretary. The thanks of the society is also due them for the complimentary copies of their publications sent for the use of the secretary.

SECRETARYSHIP.

Before closing this report a word or two should be said regarding the secretary's office. The work of the office is getting heavier each year and has now reached the point where the entire time of the secretary should be devoted to the interests of the society. Experience of the past two years has shown that the work cannot be efficiently done by anyone who has other duties to perform. Where such is the case it is the society's and not the man's business that suffers. The secretary should work to secure increased membership and that takes time. He should be able to give assistance to the various committees so that they will be able to carry on their work without such sacrifice of time and money as is now necessary to accomplish anything. More could be accomplished in this way. Why should we insist upon holding to the methods used in the society 25 years ago any more than we should insist upon using the methods employed by the gardeners of that period when those methods do not suit our present-day conditions? Any member who has the interests of the society at heart must see the necessity of a change. Many other duties that are neglected at the present time could be given the necessary attention.

In closing I wish to thank the members of the society for all their kind consideration and help given to the secretary during the past two years.

Treasurer Kasting's Report.

The following figures are from the report presented by Treasurer William F. Kasting at the meeting:

GENERAL FUND.

The balance on hand January 1, 1911, $6,327.81; the receipts to August 10 were $3,437.60. The disbursements were $2,348.85, leaving a balance of $7,406.56, which is invested in various banks specifically stated in the report.

PERMANENT FUND.

The receipts to the permanent fund to August 10 were $936.43, making a balance of $9,956.82 and a grand total of the two funds of $17,363.38.

Wednesday's Proceedings.

The Wednesday morning session was called to order by President Asmus, the first order of business being the report of the committee on tariff and legislation, by John G. Esler, chairman. This was followed by the papers on reciprocity with Canada, P. Welch, from the American standpoint, and E. I. Mepsted from the Canadian standpoint, the latter paper in the absence of the author being read by G. A. Robinson. Mr. Robinson explained that Mr. Mepsted on account of his arduous labors in connection with the Ottawa convention was physically unfitted to take the journey here, which he greatly regretted.

The papers were discussed by Benjamin Hammond, F. R. Pierson, J. G. Esler, and W. N. Rudd, the general tone of the discussion being optimistic and bright anticipations were expressed as to the future inter-relations between the two sister countries. On motion of F. R. Pierson, seconded by Joseph Heacock, the sense of the convention was expressed that the best interests of horticulture in this country would be subserved by reciprocal relations with Canada, and the committee on tariff and legislation was instructed to use its strongest efforts to bring this about. J. Otto Thilow suggested that the committee adopt the shortest way to bring about so desirable a result. Mr. Rudd thought the matter of details of the work might safely be left to the committee. In the course of the discussion Mr. Pierson spoke very strongly against any provision being inserted in the bill that would propose government inspection of each of the items in a large importation of nurserymen or florists' stocks as the same would be impracticable and if attempted would only operate to prohibit importations entirely. The committee was on motion of F. R. Pierson given full power to act in the matter.

Spring Meetings.

On the general subject of the advisability of spring meetings rather than the present plan of meeting in the summer, the discussion was opened by W. F. Kasting, and a full and frank expression asked for by the chair. Mr. Kasting urged that the spring meeting was desirable on all grounds of economy and of closer affiliation between the different sub-societies, as the American Carnation Society, American Gladiolus Society, American Rose Society and National Sweet Pea Society, etc. He spoke in glowing terms of the success of the National Flower Show at Boston, its large and representative attendance, and the evidence it presented that a large attendance could easily be had at a March meeting. He had conversed with different salesmen, also, and they unanimously expressed themselves as favoring the colder season of the year on all accounts. They reported that they had had more sales at Boston in March at these National flower shows than here at Baltimore. He suggested six or eight weeks before Easter as a good time to hold the annual meetings. Carnation planting is not like it used to be and the former reasons that made the carnation men vote for the summer date do not now apply. The records show an attendance at Boston of 694 florists exclusive of the local people. So far as the ladies were concerned, social pleasures could be found in abundance appropriate to the indoor winter season, and hot weather is too warm for dancing anyway. The ladies' entertainment would be well taken care of under the proposed change of date to March. The S. A. F. has now grown to be peculiarly a trade organization, and in selecting the time for annual conventions consideration must be first given to the business features of the matter exclusive of all others. In cold weather everybody feels more like buying and looking at the displays. In the summer they are not yet ready to place their orders for the fall and they will wait until the salesman comes around to see them.

W. N. Rudd spoke strongly on the advisability of consolidating all meetings and reducing the cost in time and money of attendance to its lowest minimum thereby. He heartily endorsed every word that Mr. Kasting had said in advocacy of the March date. Wallace R. Pierson of Cromwell, Conn., said he thoroughly believed in a joint convention where all the sub-organizations would come together at one time of the year. He also urged that March was a better time to get together an attractive exhibit of flowers which he valued as much if not more than the trade exhibit, although he did not mean to disparage the latter. He was a member of the executive committee of the American Rose Society and so long as he occupied that position his voice would always be raised for a joint meeting.

E. G. Hill of Richmond, Ind., said he had advocated in season and out of season a union of the various societies and the holding of a joint exhibition. Some of his friends in the Carnation Society had accused him of being in favor of anything new simply because it was an innovation, and he had replied that he was always in favor of innovation when it was an innovation backed by good sense. Some of the carnation men contended that March was too late in the season to exhibit new varieties, but he thought there was nothing in this contention at all. He hoped to see annually in March a great convention and flower show. The florists of the country want to see the new productions and the annual meetings after they have been held in March a few times will so commend themselves that no one will ever be willing to go back to the old time method of summer meetings. The March meeting will not only benefit all the members but the rose growers as well.

Mr. Kasting asked leave to again take the floor to urge a point that he had overlooked, namely, the great benefit that would accrue to the localities where the exhibitions were held in educating and stimulating interest of the general public in matters horticultural. If it was impossible to hold a national flower show every year, local exhibitions could be held in conjunction with the conventions of the S. A. F., which would greatly benefit the localities where held. These would fill in the space between the biennial or triennial national flower shows. A. Farenwald, president of the American Rose Society, said that in harmony there is strength and pleaded that harmony would be subserved and obtained by combining all interests in the closest affiliation possible. He recommended March or the latter part of February as avoiding the uncomfortable heat of summer meetings. He believed that it was not possible to handle a national flower show every year, but an exhibit of roses and carnations at a suitable time of year as in March would be a great incentive for attendance even without the bulbous plants. He urged all to vote for March.

Mr. Fulmer opposed the March dating on the ground that this was the busy season and many of the smaller florists could not get off at that time. In March they were earning the coin with which to take their enjoyment at the conventions in the summer. The winter meeting plan was not a new one but had been brought up before and voted down, and he predicted would be voted down again. Mr. Kasting thought, in reply to the arguments of Mr. Fulmer, that there was no season of the year when florists were not busy and in summer might be cleaning their benches that they might earn still more shekels in March by being better ready with their products. Mr. Fulmer thought they were not transacting much business in August and could get away better then. Mr. Kasting contended that the matter of a spring meeting had not been formerly voted down so overwhelmingly, and the results of the postal card canvass showed that many were apparently indifferent because they had not voted at all, and of the two-thirds who had voted on the postals the vote was

MAIN ENTRANCE TO R. VINCENT, JR. & SONS' GREENHOUSES AND PACKING SHED

about evenly divided. Wallace R. Pierson thought that the man who attended a March meeting would be in a position to profit as to what he would need the following Easter because his deficiencies, if any, would be then fresh in his mind. Mr. Hill told of the success that had attended spring meetings in England and France in conjunction with exhibitions. He thought that the national meetings should be made so interesting that no wide awake progressive florist could afford to absent himself from the annual meetings or let it be known that he had not attended them.

Mr. Rudd called attention to the fact that the matter last year of changing the by-laws so as to permit of a March meeting was laid on the table and he moved that it be now taken from the table. John Westcott reminded the convention that some few years ago when the convention met in Philadelphia he then offered a suggestion that a mid-Lent meeting be held so that a show could be had that would be worth seeing. The interests of the store men, who come in contact with fifty people to one that the grower meets, should be consulted. The store men go to the conventions to see something and they do not want to be disappointed. Sidney Wertheimer, representing the salesmen, spoke strongly in favor of the change of date to spring. He said the poor salesmen were compelled to sit and swelter in hot convention exhibit rooms in summer and he hoped they would be taken pity on and assisted to have the meeting at a time of the year when it was not so hot and uncomfortable. He thought that the general public would be more interested also in the exhibition held in March. The consuming public would be educated and benefited by being given an opportunity to see a better show than could be held in the summer time.

On motion of Mr. Rudd it was ordered that there be inserted in the printed election ballots to be used on Thursday a blank for vote on the question of changing the by-laws so as to permit of changing the date of the annual meetings.

Next Year's Meeting Place.

The next business before the convention was selection of place of next annual meeting. Secretary Dorner read an invitation from the Chicago Florists' Club, A. T. Pyfer, secretary, to hold the 1912 convention in the city of Chicago. H. E. Philpott, president of the Chicago Florists' Club, personally presented a like invitation and warmly emphasized it.

August R. Baumer presented an invitation from Louisville and in support of it letters from Hon. Augustus E. Willson, governor of Kentucky; Hon. John H. Buschemeyer, acting mayor of Louisville; John J. Telford, secretary and treasurer of the Louisville Merchants and Manufacturers' Association; George L. Danforth, president Louisville Board of Trade; Thos. C. Timberlake, president Louisville Commercial Club, and F. W. Keisker, president Louisville Convention and Publicity League.

J. C. Vaughan, representing the Chicago Association of Commerce, supplemented the invitation of the Chicago Florists' Club, giving many cogent reasons for the choice of Chicago as the 1912 convention city. He reminded the convention that it is some twenty-five years since the S. A. F. met in the great central west. He had himself, on two different prior occasions, done his part in extending an invitation to come to Chicago, but good and sufficient considerations had prevented its acceptance then, and now was the opportune time to finally accept the invitation which was most cordially tendered. He predicted that if accepted, the results would show a largely increased membership and that the figure of 1,500 members or more would be probably reached. He promised them great things in the floral line to see at Chicago and concluded by assuring the convention that it held a warm place in the hearts of all the Chicago brethren, all of whom would unite in extending a hearty welcome.

Past President W. R. Smith suggested as a possible compromise that the spring flower show be held in Chicago and the annual meeting at Louisville. R. W. Brown of Louisville made an eloquent speech full of southern imagery and glowing appeals to the consciences and palates of his hearers. As the convention listened they seemed to hear a dozen little niggers coming up the aisle with fragrant juleps tinkling in ice and singing sonatas in the hearts of all, and had the vote been taken at the conclusion of Mr. Brown's speech there is no telling but the price of mint would have gone up, but by the time that it had been reduced to cold paper ballots the result was a tie vote and further balloting was postponed until the afternoon session, when upon a vote that was carefully taken, each ballot being checked as to the voter's standing against the books of the secretary, the tellers, Harry A. Bunyard, C. C. Pollworth and August B. Baumer, reported the following: Total votes cast, 247; Louisville, 102; Chicago, 145. Mr. Brown moved that the vote be made unanimous, which was carried.

Nomination of Officers.

Under the head of election of officers, Robert L. Graham nominated for president Richard Vincent, Jr., of White Marsh, Md.; Robert Craig nominated for president J. K. M. L. Farquhar, of Boston, Mass. Mr. Totty seconded the nomination of Mr. Farquhar. Ed. Reineman seconded the nomination of Mr. Vincent. Mr. Rudd proposed that the selection of vice presidents be made contingent on the selection of convention city, the candidate hailing from the successful city to be considered the choice of the meeting; to this W. R. Pierson objected, on the ground that personal considerations should not hamper the choice of convention city and moved that nominations for vice president be deferred until after the election of convention city should be announced, which motion was carried. For secretary William J. Stewart nominated John Young of New York. Mr. Rudd seconded the nomination. J. Otto Thilow nominated for secretary, David Rust, of Philadelphia. Mr. Currie seconded the nomination. W. F. Sheridan seconded the nomination of Mr. Young. This closed the nominations for secretary. P. Welch nominated for treasurer Wm. F. Kasting, of Buffalo. On motion of A. T. Pyfer seconded by J. Otto Thilow, nominations for treasurer closed. The morning session adjourned at this time and the result of the ballot for convention city and taking of the second ballot as before stated took place at the opening of the afternoon session, after which President Asmus named as tellers for tomorrow's election of officers P. Welch, Walter F. Sheridan and Robert L. Graham.

PLANT BEDDING AT R. VINCENT, JR. & SONS CO., WHITE MARSH, MD.

Secretary Dorner read a communication from Daniel MacRorie of California, announcing the forwarding of a check enclosed for dues of twenty-two (22) new members, all prominent florists. The letter was received with applause. William Duckman, of Madison, N. J., then read his paper on "The Private Gardener."

Nominations for vice president were as follows: By H. B. Howard, Harry E. Philpott, of Chicago; by W. N. Rudd, August Poehlmann. E. G. Hill seconded the nomination of Mr. Philpot, and F. H. Traendly that of Mr. Poehlmann, after which nominations closed.

National Flower Show.

F. R. Pierson read the report of the National Flower Show committee, which was listened to with marked attention and accorded generous applause. On motion of Mr. Rudd a rising and unanimous vote of thanks was returned to Mr. Pierson and the gentlemen who had managed the National Flower Show and their report accepted. On motion of Mr. Craig, seconded bf Mr. May, all monies derived from the National Flower Show and unexpended were added to the permanent fund of the S. A. F. On motion of Mr. Meinhardt, the report was ordered included in the annual report of S. A. F. proceedings together with a roster of all who should be mentioned, Mr. Rudd suggesting that this include names of all committees, etc., that proper credit might be given to all who had participated in the great work.

REPORT OF COMMITTEE.

The second National Flower Show opened its doors to the public in Mechanics Building, Boston, March 25, 1911, continuing until Sunday, April 21. The formal opening took place on the evening of March 25, on which occasion we were honored by the presence of Governor Foss of Massachusetts, Mayor Fitzgerald of Boston, Congressman Samuel McCall, and others, who addressed the large and distinguished audience gathered in Paul Revere hall, contributing greatly to the interest and eclat of the opening of the exhibition. The weather was unseasonably cold at the time of the opening, but in spite of this drawback, I think I can modestly say that no previous exhibition ever held in this country approached this one in its scope and magnificence. The large attendance of the trade from all over the country, at a busy season of the year, and especially the large local attendance, was most gratifying.

You are all aware of the success of this show from a horticultural standpoint, and I am sure you will be pleased to know that it was not only a horticultural success, but a financial success as well. The number of paid admissions—38,915—amounted to $18,982.00. At the first national flower show the number of paid admissions was 29,790, amounting to $17,791.00. This by way of comparison; although at the first show 75 cents was charged for admission, while at Boston 50 cents was considered the highest fee it was practicable to charge, on account of the fact that the Massachusetts Horticultural Society had been in the habit of giving exceedingly fine shows practically free. The amount distributed for cash prizes was $8,013.10; at Chicago, $5,447.00 was paid out for premiums. The total receipts, including the amount received from the guarantors, was $39,027.87, from which amount, after deducting all expenses and refunding to the guarantors the amount paid by them, there was left a gross profit of $3,655.46.

We were most fortunate in securing the services of Chester I. Campbell as manager, who, because of his experience in carrying on large exhibitions, particularly in Boston, was able to effect many economies which otherwise would have been impossible, and who was a great aid to the efficient work of the committee. Mr. Campbell, according to the arrangement made with him, was to receive, in lieu of salary and office expenses in the preliminary work of organization, securing the trade exhibits, etc., a percentage from the rental of the floor space, and, in addition, one-third of the gross profits, if any. In view of the uncertainty as to whether this show could be made a financial success, this was considered a very safe, conservative, and advantageous arrangement, as it obviated incurring any large fixed charges, and practically made Mr. Campbell a partner in the enterprise. After paying Mr. Campbell one-third of the gross profits, according to the agreement, and returning to the guarantors a ten per cent dividend—same as was returned at the first show—there was a net profit of $1,450.97 remaining for the Society of American Florists.

The preliminary work of organization was mapped out by representatives from the Massachusetts Horticultural Society, the Gardeners' and Florists' Club, and the two Boston cut flower markets, in connection with the National Flower Show committee. After the preliminary work of organization was in hand—on account of the immense amount of work involved in the work preparatory to so large an undertaking, and the fact that the members of the National Flower Show committee were so widely separated, it was deemed wise to entrust the detail work to a small local executive committee. Accordingly, such committee was appointed, styled the board of control, consisting of John K. M. L. Farquhar, Thomas Roland, Patrick Welsh and E. Allan Peirce, with myself as chairman.

P. Welch, Essayist.

No one who has not had experience can realize the amount of work necessary to execute an undertaking of this magnitude; and I take this occasion to express my appreciation of the splendid services rendered by the gentlemen named, to whom, because of their indefatigable labor in connection with the show, from the very beginning to the end, no little credit is due for the success of the exhibition. I shall long remember my pleasant association with them in carrying on the work, which was absolutely harmonious throughout. I wish also to state that the services of the board of control and of the National Flower Show committee were given entirely gratuitously. No one received any remuneration in the way of salary, and each one paid his own traveling expenses, hotel bills, and all other expenses.

One of the most pleasing features of the show was the hearty co-operation of the various horticultural societies; and it was largely due to their co-operation that the show was the success that it proved to be. We had the united support of the American Carnation Society, the American Rose Society, the National Sweet Pea Society, the National Gladiolus Society, the National Association of Gardeners, the Massachusetts Horticultural Society, the Massachusetts State Board of Agriculture, the Gardeners' and Florists' Club of Boston, and other allied horticultural interests in the vicinity of Boston.

In preparing the premium lists, the Carnation Society, the Rose Society, the Sweet Pea Society, and the National Association of Gardeners were asked to prepare their own schedules. The care and thought with which these—as well as the general schedule—were prepared, is best evidenced by the fact that over eighty per cent of the premiums offered were won. This gave each society control practically over its own particular interest, and tended to harmony and good-fellowship. It was the carrying out to a logical sequence the idea of home rule. It proved in a practical, logical way that it is not impossible to have all the auxiliary societies united in one harmonious whole; and I think that the getting together of the different societies in making one grand show has demonstrated the fact that in horticultural, as well as other matters, "In union there is strength."

Undoubtedly, it is impracticable to repeat these flower shows annually. A work of this magnitude involves so much labor and expense that a national flower show should probably be held not oftener than once in three years, and in different parts of the country, alternating between eastern and western cities. There is no doubt but the educational benefits derived from these shows are great. The attendance at Chicago and at Boston proves that the public is interested in horticulture. Our summer conventions do not meet this need; they are more particularly intended to carry on the work of the society and to promote its social and immediate business interests; whereas, a national flower show, held in the spring, and once in about every three years, can be made of particular interest to the general public and a great educational factor in horticulture.

I am glad that the success of this second National Flower Show has demonstrated to the American Rose Society and the American Carnation Society the advantages to be derived from a combined exhibition. The success of the Boston spring show has resulted in the rose and carnation societies getting together to hold their next annual show in Detroit, and we hope that this work so well begun will be carried forward along these lines, as we believe it is a move in the right direction.

A very pleasing feature of the exhibition—I must not omit to mention—was the presence of our English friends, who made it a point to time their visit at the time of the flower show, contributing much to the pleasure of the occasion.

WILDFLOWER EXCURSION OF THE COLORADO MIDLAND RAILWAY, JULY 20, 1911.

August Lange, of Chicago a Member of the Party.

We wish to acknowledge our indebtedness to the Gardeners' and Florists' Club and to the ladies of Boston for the cordiality of the hospitality extended by them. The trade exhibit was exceedingly large and comprehensive, and added no small part to the success of the general result, and the committee believes that those represented found themselves amply repaid for the expense and labor involved. In addition to the cash prizes awarded, there was a large number of silver cups donated by many generous friends also a number of S. A. F. medals and certificates of merit. Besides these the Massachusetts Horticultural Society, through its own committee, awarded numerous gold and silver medals in recognition of superior culture and merit; and we wish to express to this society our appreciation of its liberality in this matter.

A summary of the report of the treasurer, E. Allan Peirce, follows:

TREASURER'S REPORT.

Receipts.

Guarantors' fund		$ 9,860.00
Paid admissions, 38,915		18,982.00
Space and programmes		8,624.65
From other organizations		1,526.25
Interest		34.97
		$39,027.87

Disbursements.

Returned guarantors' fund	$ 9,860.00	
Mechanics building rental	5,835.39	
Commission on space	2,267.92	
Expenses	9,396.00	
Prizes awarded	8,013.10	
		$35,372.41
Gross profit		$ 3,655.46

Division of Profits.

C. I. Campbell	$1,218.49	
Guarantors' 10% dividend	986.00	
S. A. F. net profit.	1,450.97	
		$ 3,655.46

F. R. PIERSON, Chairman.

In the absence of Mr. S. A. Forbes, S. A. F. entomologist, his report was read by Mr. D. K. MacMillan of Urbana, Ill. The report was received and ordered made a part of the proceedings. The convention now adjourned to 11 a. m., Thursday, Aug. 17.

Reciprocity With Canada.

FROM THE AMERICAN STANDPOINT.

Paper read before the Society of American Florists at Baltimore, August 16, 1911, by Patrick Welch of Boston.

You will observe, when reading the programme of the convention for this day, that E. I. Mepstead, of Ottawa, is to talk on reciprocity from the Canadian standpoint, and that I am to submit some remarks from the American standpoint. I am free to say that I have no authority from any number of horticulturists in this country to appear before this convention and give my views on this question and have them set forth as American principles and policies. What I may have to say on this subject is giving expression to my own personal views and is to be taken as such, until given full sanction by a vote of the convention.

I will take only a few minutes of your time, while I refer to a question of importance to this society, as to whether all horticultural products of the United States be admitted into Canada free of duty when imported from the United States, and, reciprocally the growth and horticultural products of Canada be admitted to this country free of duty when imported from Canada. This cannot be brought about except by the aid and support of the Canadian florists on one side and the Society of American Florists on the other.

When the commissioners appointed by the United States and Canadian governments met in the city of Washington last winter I wrote John G. Esler, chairman of legislative committee, as follows: "At present a commission appointed jointly by the Canadian and United States governments is in session at Washington, D. C., having under consideration the question of reciprocity. It seems to me that it would be a benefit to the growers of flowers to have the Canadian duty on cut flowers imported from the United States removed. This is especially true as to New England because of its proximity to Quebec and the Lower Provinces where there are no large establishments devoted to the growing of cut flowers. Climatic conditions are against them, and, therefore, no special benefit can be obtained by maintaining a tariff of 20 per cent on imports." Mr. Esler, in replying to the same, stated that there was a diversity of opinions among the members of the committee, as to the advisability of making any effort at that time to include horticultural products in the reciprocity list.

I am in favor of absolute free trade on all horticultural products between this country and Canada. I am strengthened in this view by the friendly relations that now exist, and have existed for several years, between members of our society and those of the Canadian Horticultural Association. We ought not to overlook the fact that the proximity of the two people of the same language, customs, habits and needs, having similar resources, and equal abilities for normal advancement would make them to supplement each other, in the same manner as growers in the different states of the Union. No valid reason can be given why any citizen, whether American or Canadian, engaged either in the wholesale or retail cut flower business, should be compelled to order goods to come from a distance of five hundred miles or over simply to patronize home products, from a spirit of patriotism, when similar goods can be obtained across the border much nearer home.

The perishable nature of flowers and plants would be a strong reason why they should be secured as near the source of production as possible, thereby saving expense of freight and express charges, and avoiding injury to goods while in transit, and other dangers which must be carefully guarded against if such transactions are to be profitable. One other reason why it would be good policy to abolish all duties. Any business man having experience in shipping goods into the United States from Canada or from the United States into Canada realizes the many difficulties to surmount and obstacles to conquer to avoid the delays incidental to custom regulations imposed by both governments. It must be clear to the mind of any man who may examine into the trade in cut flowers between the United States and Canada covering a period of five years ending June 30, 1910, that we have

very little to lose, by placing flowers on the free list, as the following table will show:

	Sold to Canada	Bought from Canada
1906	$ 3,496.00	$ 5,929.00
1907	2,550.00	5,128.00
1908	1,784.00	2,192.00
1909	3,568.00	3,721.00
1910	8,856.00	4,308.00
Total	$20,244.00	$21,278.00

These figures show only a very small business done in cut flowers. It is to be remembered, however, that imports and exports of nursery stock, decorative plants, orchids, etc., are much larger.

I believe there is a strong sentiment in this society in favor of closer relations. We all know this sentiment is strong throughout the land, as proved by the vote of both houses of congress at the present session. The President of the United States, in a message to congress recently stated the following: "We have reached a stage in our own development that calls for a statesmanlike and broad view of our future economic status and its requirements. Ought we not then to arrange a commercial agreement with Canada, if we can, by which we shall have direct access to her supply of natural products without an obstructing or prohibitory tariff?"

Therefore, Mr. President, I am in favor of this question being submitted to the convention for their consideration, and after a reasonable time being given to debate, would suggest that the matter be referred to the proper committee of the Society of American Florists, for them to prosecute further negotiations with the Canadian florists so that the prohibitory tariff may be removed.

I believe it will not materially change the price of any article on our list, but, instead, will open the way for a larger and more profitable intercourse between the producers of plants and flowers in this country and their brethren in Canada.

Tariff and Legislation.

REPORT OF COMMITTEE.

The attention of your committee was called to the importance of reciprocal exchange of floral products between the United States and Canada. An attempt on the part of your chairman to obtain the opinion of not only the committee, but of some of the persons who were likely to be vitally interested, brought out such a diversity of opinion that a recommendation was made to the executive committee of the S. A. F. to have the subject discussed from both sides of the boundary line, at this convention. This was acted upon by the executive committee and it is the hope of the tariff and legislative committee that after Mr. Mepsted and Mr. Welch have given their views on the subject that the matter will be thoroughly discussed and your committee fully instructed by the S. A. F. as to future procedure in the matter.

In order to intelligently view this subject we herewith give the American duty on floral imports, the Canadian duty and the concessions the Canadian Horticultural Association were willing to make last year.

Your chairman made a suggestion to the Canadian Horticultural Association that they further discuss the subject this year, and if possible notify us of a minimum rate that they would be willing to accept. Mr. Mepsted, in his address, will no doubt furnish this information upon this subject. Your committee would suggest that if both societies could agree upon the same rate, it would undoubtedly make it easier work for both committees to secure what was mutually desired.

	Am.	Can.	asked.
Cut flowers	25%	17½%	17½%
Cut smilax and asparagus	Free	17½%	17½%
Laurel roping, laurel branches, bay leaves, magnolia leaves and branches, galax leaves, leucothoe sprays, wild smilax, long needle pines, palm crowns, cut boxwood, and all natural greens	Free	20%	Free
Rose plants, outdoor or greenhouse grown	4c ea.	20%	20%
Carnation plants or cuttings	25%	20%	20%
Geraniums, coleus, salvia, petunias, heliotrope, fuchsias, Vernon begonias and all soft wooded plants for bedding	25%	20%	20%
Greenhouse plants known as stove plants	25%	20%	20%
Carnations—New varieties of greenhouse plants and Roses, rooted cuttings or large plants of carnations, roses, chrysanthemums, geraniums, ferns, violets or any new variety of plant being sent out for the first time	25%	Free	Free
Schedule A—Plants..			
Palms, azaleas, and pot grown lilacs, rhododendrons, aspidistras, Ficus Elastica, Ficus Pandurata, bay trees, box trees, aquatic plants, cacti, Dutch and French grown bulbs, caladium, tubrous begonias, etc.	25%	....	Free
Ferns, flower pots, etc.	25%	20%	20%
Orchid plants, hardy perennials	25%	20%	Free
Insecticide for fumigating purposes	25%	20%	Free
Liliums of all kinds	$5 M.	Free	Free per M.
Lily of valley pips, tulips, narcissus, begonia and gloxinia bulbs			$ 1.00
Astilbe, dielytra and lily of the valley clumps			2.50
Lily bulbs and calla bulbs			5.00
Peony, Iris Kampferi and Germanica canna, dahlia and amaryllis bulbs			10.00
Hyacinths			.50
All other bulbs cultivated for their flowers or foliage			.50

Another important subject is House Bill No. 8611 and Senate Bill No. 2870, both giving the Secretary of Agriculture large and possible dangerous discretionary power over the importation of nursery stock and some kinds of floral products. The nurserymen ask our co-operation in their effort to have the bill amended so as to have the discretionary power placed within reasonable bounds.

Your committee again asks that you give this matter earnest, not slip-shod attention and that you give specific instructions as to your wishes.

A complaint concerning the dilatory delivery of cut flowers by the U. S. Express Co. has been taken up with the company. This complaint is brought about as the result of the recent strike and its solution has not progressed far enough to make a definite report. The labor trust seems to be master of the situation. Your chairman promises to carry it to its ultimate conclusion even if it leads to the Inter-State Commerce Commission.

Another complaint concerning the routing of goods was taken up with the express companies and an admission that their officials were in error was secured. Directions were given by the express company how to secure proper service in the future.

Your committee would also suggest that any information concerning the cost of production, at home or abroad, of glass or any other product, entering into the construction of greenhouse establishments, will be gladly accepted and filed for future use, whenever the time arrives to make the information effective.

The opinion of your committee is divided as to the advisability of appearing before the Inter-State Commerce Commission against express companies. Some contending that inasmuch as concessions have been made in favor of flowering plants and generally satisfactory service rendered, that it would not be advisable to make ourselves too prominent in the matter. My own opinion is that we should have the evidence to make a good case before we carry a grievance to the commission, and that in all cases it might be well to first endeavor to rectify the matter complained of by application to the companies themselves.

JOHN G. ESLER, Chairman.

STORE GIRLS AT OMAHA FLORISTS' CLUB OUTING, JULY 27, 1911.

Thursday's Proceedings.

ELECTION OF OFFICERS.

The election of officers took place Thursday, August 17, and resulted as follows:

For president:
Richard Vincent Jr.....215
J. K. M. L. Farquhar.....170
For vice-president:
August Poehlmann 228
H. E. Philpott.....217
For secretary:
John Young 228
David Rust 155
For treasurer:
Wm. F. Kasting.....355

The vote on the amendment permitting the changing of the date of the annual meeting was 161 in favor and 196 against.

Committees on Resolutions.

The committee on final resolutions submitted the following report:

Your committee respectfully recommend the adoption of the following:

Whereas, the twenty-seventh annual convention of the S. A. F. held in Baltimore has proved in all ways a successful and satisfactory meeting, all promises and pledges by our Baltimore members having been carried out to the letter, so that we shall leave the Monumental City with the fondest recollections of our sojourn here.

Therefore, Be it Resolved, That we tender to the florists of Baltimore and its public-spirited citizens our warmest thanks for the many attentions shown us and hospitable treatment accorded. We also wish to especially mention by name the representatives of the local organization, viz., Robert L. Graham, president of the Gardeners' Club of Baltimore; N. F. Flitton, its secretary; and its various committees as represented by their chairmen, as follows: Finance, William Feast; Entertainment, Robert Halliday; Reception, George Morrison; Souvenir programme, Phillip B. Welsh; Press, G. O. Brown; Sports, Isaac H. Moss; Transportation, J. J. Perry; Advertising, William J. Johnson; Hotels, F. C. Bauer; Badges, Jas. Hamilton; Decorating, J. L. Towner; Ladies' Reception, Mrs. Isaac H. Moss.

We also tender our heartfelt thanks to State Attorney Williams, the representative of His Excellency, Governor Crothers of Maryland, and His Honor, Mayor Preston.

We further desire to place on record an appreciation of the efforts of the various supply houses who made attractive displays at the convention and sent their representatives here; also to the advertisers in the souvenir programme. Also the daily and technical press for reports of our meetings. We note with pleasure the rather unusual feature of the general display of banners and other decorations of welcome throughout the city of Baltimore.

Respectfully submitted,
J. C. VAUGHAN,
F. H. TRAENDLY,
W. J. STEWART.

The committee on resolutions on the death of John Birnie reported as follows:

Whereas, we, the Society of American Florists, assembled in the city of Baltimore on the twenty-seventh annual convention have been grievously touched by the sudden death of our fellow craftsman John Birnie,

Be it Resolved that we, the members of the S. A. F. feel keenly the loss of one so well beloved, one who has been an ardent representative of our profession in advancing all its interests.

Be it therefore further Resolved, that we present this resolution as a token of our sympathy and sincere affection for him and condole with his family in this their sudden and sad bereavement and that we submit to them a copy of these resolutions and that the society forward a suitable floral tribute.

J. OTTO THILOW,
WALTER F. SHERIDAN,
J. C. VAUGHAN,
RICHARD VINCENT JR.
Committee.

Rose and Carnation Societies.

A representative joint meeting of the American Rose Society, the American Carnation Society and the National Sweet Pea Society, was held Thursday morning, August 17, and it was the sense of those who attended that January 10 would be the best date for the opening of the joint exhibition of these societies at Detroit in 1912. At this meeting Benjamin Hammond of Fishkill-on-Hudson, N. Y., offered the National Sweet Pea Society one hundred dollars in prizes.

OMAHA AND COUNCIL BLUFF BOWLERS.

At Omaha Florists' Club Outing, July 27, 1911.

Ladies' Society of American Florists.

The annual meeting of the Ladies' Society of American Florists was held at the Hotel Belvidere, Baltimore, Md., August 16, with sixty-seven members present, President Mrs. John V. Phillips in the chair. Mrs. Richard Vincent Jr. delivered the address of welcome, to which suitable response was made by Mrs. B. Hammond Tracy of Wenham, Mass. Secretary Mrs. Chas. H. Maynard reported a membership of 273 and Treasurer Mrs. A. M. Herr's statement showed receipts $629.72, expenses $341.01. The election of officers resulted as follows: Mrs. E. V. Boone, Baltimore, Md., president; Mrs. R. Whitman, W. Hoboken, N. J., first vice-president; Mrs. Pearl Fuller, Des Moines, Ia., second vice-president; Mrs. Chas. H. Maynard, Detroit, Mich, secretary; Mrs. A. M. Herr, Lancaster, Pa., treasurer.

Florists' Hail Association.

The annual meeting of the Florists' Hail Association was held August 17 at Baltimore, Md. Officers were elected as follows:

E. G. Hill, Richmond, Ind., president.

John T. Temple, Davenport, Ia., vice-president.

Joseph Heacock, Wyncote, Pa., treasurer.

John G. Esler, Saddle River, N. J., secretary.

H. H. Ritter, Dayton, O., elected director for two years; J. A. Valentine, Denver, Colo., for three years, and Samuel Murray, Kansas City, Mo., replaces H. G. Tull of Philadelphia.

The amendment to Section 1, Article 5 to read 10 cents per square foot instead of eight cents was adopted.

Report of the Judges.

M. Rice & Co., Philadelphia, Pa., prepared cycas leaves by a new process, honorable mention.

H. Bayersdorfer & Co., Philadelphia, Pa., wheat sheaves, a new style of sheaf for displaying flowers with stems in water, honorable mention. Mirror basket novelty, for decorating vacant space on mirrors, honorable mention. Ornamental grasses of various kinds for fern dishes and wreaths, honorable mention.

Wertheimer Bros., New York, Werbo corsage shields and corsagettes, new novelties, honorable mention. Celestial funeral ribbons, holly berry chiffons and novelty Christmas ribbons, new novelty ribbons, highly commended.

Schloss Bros., New York, waterproof stem protectors, a new novelty, honorable mention. Satin rose Jacquard and satin clover leaf Jacquard ribbon, new designed ribbon, highly commended.

Fred Lapp, Rossville, Md., new seedling cannas, a nice collection containing a number of imported seedlings, honorable mention.

The Conrad & Jones Co., West Grove, Pa., new cannas, honorable mention.

Godfrey Aschmann, Philadelphia, Pa., begonias, honorable mention.

Lord's Frost Proof Plant Box Co., Minneapolis, Minn., frost proof plant shipping box, honorable mention.

Charles Ebles, New Orleans, La., southern hardy grown Phoenix Roebelenii, honorable mention.

Reed & Keller, New York, folding wire pedestal stands specially designed to meet the requirements of florists for decoration work. Highly commended.

Lion & Co., New York, featherweight pliable corsage shield, will conform to any shaped bouquet; honorable mention.

Robert Craig Co., Philadelphia, Pa., thirteen new seedling crotons each named for a state, collection of 50 seedling crotons; honorable mention.

H. F. Michell Co., Philadelphia, Pa., Mehle hand gardener.

Edward Amerpohl, Janesville, Wis., handy delivery box for plants, highly commended.

Geo. M. Garland Co., Des Plaines, Ill., improved lock joint and improved post locket and dirt conductor in greenhouse construction; honorable mention.

The judges were Irwin Bertermann, A. T. Pyfer and Fred H. Meinhardt.

The Trade Exhibitors.

M. Adler, New York, florists' pins, etc.

John B. Adt, Baltimore, Md., pipe and machinery.

The Advance Co., Richmond, Ind., ventilating apparatus.

American Auxiliary Heating Co., Boston, Mass., valves, etc.

American Blower Co., Detroit, Mich., Detroit return traps.

S. A. Anderson, Buffalo, N. Y., Begonia Lorraine and artificial flowers.

Aphine Manufacturing Co., Madison, N. J., aphine and fungine.

Godfrey Aschmann, Philadelphia, Pa., plants.

Charles D. Ball, Holmesburg, Philadelphia, Pa., palms and decorative plants.

Lemuel Ball, Wissnoming, Philadelphia, Pa., decorative plants.

Baltimore Souvenir Co., Baltimore, Md.

H. Bayersdorfer & Co., Philadelphia, Pa., flower boxes.

Bobbink & Atkins, Rutherford, N. J., evergreens, store plants, palms and bay trees.

J. Bolgiano & Son, Baltimore, Md., bulbs.

The Capital Basket Co., Washington, D. C., baskets.

The Castle Co., Boston, Mass., Castle Automatic Circulator.

John Lewis Childs, Floral Park, N. Y., gladioli.

Cleveland Cut Flower Co., Cleveland, O., Bate evaporator.

Cleveland Florists' Exchange, Cleveland, O., artificial flowers.

Conard & Jones Co., West Grove, Pa., plants.

William Cope & Bro., Lincoln University, Pa., pots.

Arthur Comer, Berlin, N. Y., gladioli.

Robert Craig & Co., Philadelphia, Pa., crotons, cyclamen, ferns, ficus, etc.

P. B. Crosby & Son, Catonsville, Md., paper pots.

Detroit Flower Pot Co., Detroit, Mich., red pots.

Henry A. Dreer, Philadelphia, Pa., auracarias, palms, ficus, small ferns and bulbs.

Charles Eble, New Orleans, La., palms.

Edwards Folding Box Co., Philadelphia, flower boxes.

Henry Eichholz, Waynesboro, Pa., carnations and cannas.

W. H. Elverson Pottery Co., New Brighton, Pa., flower pots.

Foley Mfg. Co., Chicago, greenhouse appliances.

Geo. M. Garland Co., Des Plaines, Ill., greenhouse construction, handy truck, and greenhouse appliances.

Gem City Boiler Co., Dayton, O., boilers.

Giblin & Co., Utica, N. Y., boilers.

Griffith & Turner Co., Baltimore, Md., farm and garden supplies.

J. G. Harrison & Sons, Berlin, Md., nursery stock.

Joseph Heacock Co., Wyncote, Pa., palms.

A. H. Hews & Co., Cambridge, Mass., pots, pans and vases.

Hitchings & Co., Elizabeth, N. J., boilers and greenhouses.

Hubert Bulb Co., Portsmouth, Va., bulbs.

J. B. Hutchinson, Haddonfield, N. J., gladioli.

Jackson & Perkins Co., Newark, N. Y., roses, shrubs and Dutch bulbs.

Janesville Floral Co., Janesville, Wis., ferns.

Johnston Heating Co., New York, boilers.

Jones, the Holly Wreath Man, Milton, Del., greens.

King Construction Co., No. Tonawanda, N. Y., greenhouse construction materials.

Knight & Struck, New York, heaths and acacias.

Kroeschell Bros. Co., Chicago, boilers, piping, valves and wrenches.

Lager & Hurrell, Summit, N. J., orchids.

Fred Lapp, Rossville, Md., cannas.

Lemon Oil Co., Baltimore, Md., lemon oil insecticides.

Lion & Co., New York, ribbons.

Lord & Burnham Co., New York, boilers and greenhouse material.

Lord's Frostproof Plant Box Co., Minneapolis, Minn., frost proof shipping boxes.

McFarland Publicity Service, Harrisburg, Pa., advertising literature.

Joseph Manda, West Orange, N. J., orchids.

W. A. Manda, South Orange, N. J., stove and greenhouse plants.

Means & Thatcher, Boston, Mass., paint and putty.

Henry F. Michell Co., Philadelphia, Pa., garden implements, seeds and bulbs.

William Moll, Cleveland, O., return steam traps.

John C. Moninger Co., Chicago, building material.

Morehead Mfg. Co., Detroit, Mich., condenser traps.

Isaac H. Moss, Govanstown, Baltimore, Md., evergreens.

Adolph Muller, Norristown, Pa., adjustable flower pot holder.

Joseph C. Neidinger, Philadelphia, Pa., florists' supplies.

Non-Breakable Flower Vase Co., Washington, D. C., combination vase and pedestals.

S. S. Pennock-Meehan Co., Philadelphia, Pa., and New York, roses, Killarney Queen and Double White Killarney, also ribbons and supplies.

J. A. Peterson, Westwood, Cincinnati, O., bird's nest ferns.

A. N. Pierson, Inc., Cromwell, Conn., Killarney Queen and Double White Kilnarney roses.

F. R. Pierson Co., Tarrytown-on-Hudson, N. Y., ferns.

Plant & Land Food Co., Baltimore, Md., compost wiping machines and plant food.

Quaker City Machine Co., Richmond, Ind., ventilating apparatus.

Quaker City Rubber Co., Philadelphia, Pa., hose and appliances.

Reed & Keller, New York, florists' supplies.

Revere Rubber Co., New York, rubber hose.

M. Rice & Co., Philadelphia, Pa., florists' supplies.

Julius Roehrs Co., Rutherford, N. J., palms, bay trees, store plants and orchids.

Roseville Pottery Co., Zanesville, O., pots, vases and jardinieres.

Schloss Bros., New York, ribbons and chiffons.

Shaw Fern Co., Pittsfield, Mass., cut ferns.

Storrs & Harrison Co., Painesville, O., nursery stock, palms and ferns.

Stumpp & Walter Co., New York, general line of garden implements and bulbs.

Thomsen Chemical Co., Baltimore, Md., spraying materials.

B. Hammond Tracy, Wenham, Mass., gladioli.

United States Radiator Corporation, Baltimore, Md., Furman sectional type United States boilers.

Vaughan's Seed Store, Chicago and New York, bulbs, farm and garden supplies.

R. Vincent, Jr., & Sons Co., White Marsh, Md., phlox, cannas and dahlias.

Wertheimer Bros., New York, ribbons, chiffons and tassels.

Williams Florist Supply House, Utica, N. Y., carnation ties.

O. F. Zurn Co., Philadelphia, Pa., greenhouse shading material.

Club Bowling at Baltimore.

The bowling contest was marked by the greatest enthusiasm and was a grand success, and there was much appreciation of the hospitality shown. The total results were as follows:

Washington	2598
Cleveland	2367
Philadelphia	2323
Baltimore	2315
New York	2287
Buffalo	2284
Cincinnati	2274
Chicago	2254

Washington wins the Whillden Co., the H. Bayersdorfer Co., the Kasting and Lehr prizes; Cleveland wins Pennock-Meehan Co. and Mitchell Co. prizes; Philadelphia finance committee prize; W. W. Barnard cup and F. C. Bauer cup to Olsem from Chicago; W. C. McCance Mirror and Rice Co. prizes to McLennon, Mrs. M. J. Thomas and T. H. Patterson prizes to Lines. Individual games, men—Geo. Asmus prize to Guerth; Fred. Strodtman cup to Phil. Kessler; Dreer cup to Welsh; ladies' prize to Bloy; Mrs. Christie prize to Brown; W. S. Norris prize to Boone; clock to Wilson; umbrella to H. Lehr; vase to A. Guttman; box of cigars, W. Lehr, to divide between four.

Special games:

For men fifty years or over—Case of whiskey, G. W. McClure, Buffalo; H. Michell prize, J. I. Donlan.

Ladies Bowling.

Hochschild Kohn & Co. silver cup to Mrs. F. H. Traendly; automobile scarf, Lion & Co., to Mrs. Geo. Cooke, Mrs. Klein and Mrs. McKellar. Two game class: Reinberg cup, Mrs. Geo. Cooke, 302; Boas cup, Mrs. Geo. Schaffer, 268; Bolgiano carving set, Mrs. F. H. Traendly, 254; Bayersdorfer electrolier, Mrs. Chas. McKellar, 252; Stewart & Co. glass bowl, Mrs. F. C. Bauer, 229; Hubler Bros. glass bowl, Mrs. Hugo Brodsky, 224; Pennock-Meehan Co. hand bag, Mrs. G. Asmus, 218; H. A. Dreer, silver salad spoon, Mrs. J. W. Boone, 207; Sadler, vase, Mrs. Needomski, 201; Brunswick-Balke Collender Co., bowling ball, Mrs. Simmonds, 190; M. Rice Co., Japanese bread tray, Mrs. H. Klein, 188; J. W. Putts & Co., flower holder, Mrs. A. M. Herr, 187; Brager & Co., fern dish, Mrs. W. Robertson, 185; Eisenbergs, glass vase, Mrs. Wittman, 182; vase, Mrs. I. L. Powell, 181.

PLANT NOTES.

Pansies.

The middle of August is the best time to obtain fine plants for the spring sales. Get a nice strain of seed, all the grades cost enough, but it does not pay to grow the cheaper grades unless they are to be grown by the tens of thousands and disposed of at a low price, but with a good class of trade the customers want a large flower and brilliant colors. A frame in which the soil is well forked, the lumps all broken up and the top soil made fine is the best place to sow the seed. While it takes a little longer to sow the seed in drills, yet for the handling in the future it amply repays. Take a stick an inch square the length of the frame and press it into the soil to the depth of half an inch, and in this sow the seed rather thinly, then cover lightly with fine soil. Make the drills about two inches apart. After the seed is planted water well and cover with a shaded sash that is lifted at both top and bottom. Keep the ground moist but do not go to the other extreme and keep it soaked. When the plants begin to make growth, remove the sash, and if the weather is dry keep them well watered. During an extremely dry spell they may be attached by red spider, which will quickly ruin them. A good syringing in the evening will check these insects. For those who only grow a few thousand the best place is in cold frames where they can be planted from the seed bed about five inches apart in the richest of soil. When cold weather comes on cover with sash and if frozen for months no harm will be done, but if a warm spell occurs during the winter season, and they become thawed out, raise the sash a little that they may have ventilation.

Geranium Propagating.

The summer has been exceedingly dry, plants have made but a very small growth, and with many growers it has begun to look as if the obtaining of sufficient cuttings of bedding plants might be a serious question. It is none too early to begin the propagation of geraniums, especially if it is doubtful about there being stock enough. Any plants that have become established and made a growth that will furnish a cutting will not be injured by the taking of the growing end, in fact they will be benefited, for they will break more shoots for the September propagation. Many growers in making the fall propagation, after trimming the cuttings, insert them in 2½-inch pots in soil, placing the pots on shelves near the glass. This is a very economical way of handling the cuttings after cool weather has set in, but for summer propagation the bench of sand is to be preferred. In making the cutting trim off all the foliage except the small leaves at the tip. Be sure that the sand is pounded down hard so that it will retain all the water possible. In inserting the cutting use a small round stick as a dibble, making a hole just large enough in which to place the cutting. This will disturb the bed of sand much less than drawing a knife or other tool through it. After the cutting is placed in the sand, press the sand firmly and then water heavily so that the sand will settle firmly around the cutting. The cuttings should then he shaded from the sun either by papers or by stretching cheese cloth over them. This will prevent wilting and evaporation. No further watering will be necessary until the plants begin to root. One of the greatest mistakes made by growers in the summer and fall propagation of geraniums is the continual watering which will invariably cause damp off and rot. Never mind if the surface of the sand becomes dry, if it has been properly packed there will be moisture enough below to cause them to root. If the cuttings wilt a slight syringing or placing wet papers over them will revive them. A good strike can invariably be made by following this method.

Stevia.

All stopping of stevia should cease by the middle of August and the tall-growing varieties should be potted in their blooming pots, or if to be grown in a bench, planted out. The potting of these plants should be done carefully for the plant is very brittle where the branches break from the main stem, and are easily broken. The better way is to tie a piece of raffia around the plant and if it is very large two or three pieces before moving the plant. As soon as potted or benched place a stake in the center to keep the plant erect. Pot firmly, ramming the soil down hard with a stick or other tool. After potting, water thoroughly, and place in a shady place, the plants will wilt more or less and a light syringing will help them to recover from this, but do not keep the soil soaked, yet daily waterings for those in pots will be required. As soon as the plants begin to grow remove all shade and the pots can be plunged again outside in a frame. The dwarf varieties will not require to be potted until early in September if planted outside, but if grown in pots should be shifted in their blooming pots, generally 6-inch, before becoming badly pot-bound.

Genistas.

The genistas should be potted in the pots that they are to bloom by September 1, and a few days before potting should be trimmed into shape. It is a good plan with all soft wooded plants when growing rapidly not to cut at the top the same time the roots are disturbed, so it is better to do the pinching back before the shifting is done and then not again until the plants are beginning to grow in the new soil, plainly showing that root action has again begun after being disturbed. The plants that are being grown in prescribed shapes should be kept tied to the form, and as soon as established in the new soil, pinched back. They will stand considerable hard cutting back for some time yet, for the blooming shoots do not set until well into the winter. Keep the plants in as cool quarters as possible until the first of the year when if a few plants are wanted early they can be brought into warmer locations but these plants are cool growing subjects and do not like any great amount of heat.

Winter Blooming Geraniums.

The late cuttings that were saved for plants for winter blooming should now be thrifty, well-branched plants in three or four-inch pots, and should be shifted to 5-inch pots. If they have been kept disbudded, as soon as they become well established in the 5-inch pots they will come into flower. There will be a demand for these plants as soon as the first frosts kill the outside stock and a few with flowers on them at that time will be wanted. The larger amount of the plants will not be in demand until later and by that time the pots will be full of roots and a constant blooming plant will be assured. There may be some small shapely plants in the field that will do for winter blooming; if so they should be lifted and potted, but they will not bloom as well as the pot plants grown for this purpose.

OUTING OF THE MICHIGAN CUT FLOWER EXCHANGE.

Detroit Florists and Friends on the Steamer St. Clair, July 31, 1911.

CHRYSANTHEMUMS

Taking the Buds and Mulching.

The plants in the benches being grown for commercial purposes are now at the period of their most rapid growth, needing constant attention as regards removing the side growths. It is only a very short while until the taking of the buds will be upon us and the present is the time to commence to figure on this. The very early varieties, Golden Glow and Smith's Advance, are already out of the way in this respect, being now well along in color. October Frost and Monrovia should also be well budded by this time, the next batch requiring particular close attention to have the growths in shape for setting the buds are those which need taking from August 15 to August 25, including such varieties as Roserie, Ivory, Polly Rose, Pacific Supreme, Donatello, Oroba, Clementine Touset, Gloria and others which mature from October 8 to October 20. It is very important as a commercial proposition that the foregoing varieties be timed to mature at their right period and cleared out of the way before the larger and better finished second early and mid-season varieties get on the market, and this can only be done by having the wood ripe and the buds right to take at the time they should be; any let-up in keeping the plants in hand just now will throw their blooming period several days later, lessening their commercial value greatly.

The beds of the early planted stock should now receive a mulching of well-rotted horse or cow manure, but let it be thoroughly well-rotted and not at all fresh to clog the soil and take the leaves off the plants which will surely be the case if green manure of any kind is used. Before applying the mulch go over the beds and loosen up the surface of the soil slightly to give the roots a chance to work into the mulch quickly. One of the important points to consider when putting a mulch on the beds, either chrysanthemums or any other plant, is to have the soil of the bed in the right condition, which is neither too wet nor dry so that after the mulch is put on it can be watered in. After the first watering the beds should be allowed to dry out moderately well before watering again. This keeps the soil sweet and allows the roots to work in the mulch.

Syringings of the foliage and the maintaining of a damp atmosphere during very hot weather should be continued as before, only remembering when syringing that the soil cannot dry out as quickly as before the mulch was put on, so that extra care be exercised not to get the beds too wet. Very shortly after mulching suckers will quickly begin to shoot out from the stools of the plants. These should be removed as soon as large enough to handle, using a knife for the operation, being careful not to cut the roots of the plants, but do not attempt to remove these suckers by pulling them up without cutting, because this is the wrong way to do it.

The tying up of the plants should be followed up closely. The strong, vigorous tall growers like Col. D. Appleton, Timothy Eaton, Yellow Eaton, Dr. Enguehard, these are among the varieties that need lots of work in this direction. These varieties from the last break have made very heavy canes, as is usually the case, and it takes very little to snap them off if they are not supported. The late planted and late varieties that have attained size enough should also be staked and tied up and when these late plants have not had time to get thorough root control of the soil keep the soil open by frequent scratchings of the surface, give ample syringings, but when the beds need watering water early enough in the day so that the soil has a chance to dry up a bit before night; wet feet over night will quickly bring on a bad dose of leaf spot, and many of the late varieties are particularly susceptible to this disease.

C. W. JOHNSON.

The Late John Birnie.

New Roses Awarded Medals.

The following new roses have been awarded medals in the competition trials, and at the expositions in Paris, according to the Revue Horticole.

As a result of the competition of new roses, which have been studied for an entire year (two blooming seasons), at the gardens of Bagatelle in Paris the awards were made June 14, 1911, as follows: The gold medal for the best French rose was awarded to Beaute de Lyon, originated by Pernet-Ducher, which has surprised all visitors with its new coppery-red coloring. The gold medal for a foreign rose was awarded to Jonkheer J. L. Mock, a Dutch rose resembling La France, but larger. The jury aso commended as remarkable: Viscountess Enfield, orange rose, a Lyon's seedling; May Millers, white and light rose, from E. G. Hill, Richmond, Ind.; William Speed, also a light color delicately tinted. The climbing rose Desire Bergera also received an award for its extremely abundant white and yellow flowers. Flower of Fairfield, resembling Crimson Rambler, but flowering throughout the season, received praise.

New roses shown in Paris at the exposition of Cours-la Reine by G. & A. Clark of Dover, England, were awarded a medal of honor: Juliet (Pernettiana), a very pretty cherry red coloring, reverse of petals golden, will be an excellent rose in this class. Lady Hillington (hybrid tea)—Papa Goutier X Mme. Hoste; flower large, a handsome apricot yellow passing into orange; resembles an enormous W. A. Richardson or Marquise de Sinety. Mrs. Sawyer (hybrid tea)—Fine form, long stem, handsome light rose color.

OBITUARY.

John Birnie.

On Tuesday afternoon, August 15, a black cloud of intense sorrow was suddenly cast over the joyous spirits and brightness of the convention at Baltimore by the sudden death of that most lovable of good fellows and the veteran florist John Birnie of West Hoboken, N. J. While taking his seat at dinner at the Hotel Belvidere, Mr. Birnie was stricken with an attack of apoplexy and was immediately removed to his room, where he died a few minutes later. His wife was with him at the time and was prostrated with grief.

The attendance at the convention was deeply affected by Mr. Birnie's death and the remains were escorted by a large procession of delegates at 9 o'clock a. m. Wednesday morning. All wearing crepe badges and with bared heads the mournful cortege started from the Belvidere hotel to the Baltimore & Ohio depot, where the casket was opened and the mourners passed to view the face of the grand old friend, each one placing a rose in the casket. Beautiful bunches of lilies and roses which completely covered the casket were placed there by the Baltimore Gardeners' and Florists' Club. John Donaldson and wife accompanied Mrs. Birnie and the remains to Hoboken on the sad journey.

John Birnie was 58 years old, having been born in Aberdeenshire, Scotland, in 1853. His ancestors for many generations were noted for their love for and skill in the cultivation of flowers. He came to America when a young man and settled in Canada. A few years later he moved to Buffalo, N. Y., where he remained for five years. Thirty years ago he moved to Hoboken and engaged in the florist business. He made a specialty of carnations and geraniums, and supplied a large New York trade. For many years he was known as the "Verbena King," growing them to perfection. He disposed of vast quantities on the New York market.

He was a director and stockholder of the New York Plant Growers' Association, a trustee of the New York Florists' Club, a veteran member of the Society of American Florists. In fact, was not only a charter member but a most progressive member of most of the local and national societies connected with floriculture. He was a member of Doric Lodge, F. & A. M., and the Celtic Society. He was above all a lover of Scotland and her traditions.

In 1876 he married Miss Annie Little, and besides his widow he is survived by six children, all of West Hoboken. Robt. L., John, Margery, Agnes, Annie and Jennie.

Funeral services were held by Doric Lodge of Scottish Rite Masons at his late residence, West Hoboken, N. J., on Thursday evening, and the funeral took place on Friday afternoon. J. B. Nugent, president New York Florists' Club, and Jas. Dean left Baltimore Thursday afternoon to arrange for floral tributes and convey memorial resolutions from the Society of American Florists.

SPRINGFIELD, N. J.—William Jacobson is building a new greenhouse on Springfield avenue, making a great addition to his plant.

THE AMERICAN FLORIST

1885 TWENTY SIXTH YEAR 1911

Subscription, United States and Mexico, $1.00 a year; Canada, $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from those in the trade.

When sending us change of address always send the old address at the same time.

Advertising rates on application.

From the first issue the AMERICAN FLORIST has accepted only trade advertisements.

Advertisements must reach us Tuesday (earlier if possible), as we go to press Wednesday.

We do not assume any responsibility for the opinions of our correspondents.

SOME Western commission dealers in cut flowers say the present inactivity is not due so much to dull business as to scarcity of good stock, all high grade flowers selling freely at satisfactory figures. It is claimed there is an oversupply of inferior material which will not sell at any price. Growers will do well to note these conditions.

Personal.

Benjamin Hammond, of Fishkill-on-Hudson, N. Y., was elected president of the School Board of Trustees August 1, having served in that position since 1894 and as a member of the board for twenty-three years.

Society of American Florists.

DEPARTMENT OF REGISTRATION.

As no objections have been filed, public notice is hereby given that the registration of the Begonia, Betty Anderson, by S. A. Anderson, of Buffalo, N. Y., becomes complete.

H. B. DORNER, Sec'y.

New Use of Flowers.

It was disclosed in one of the recent large smuggling frauds discovered by the government detectives, that the complacent government inspectors wore in the lapel of their coat a flower, being known as the "flower squad" and passengers were told to approach one of these and their trunks would be passed.

New Hybrid Gladiolus.

We have received from Frank Banning, Kinsman, O., some fine blooms of his new gladioli Niagara and Panama. Niagara is an exceptionally fine variety resembling America in flower and vigor but the blooms are of a most delicate, soft cream color, with the lower petals shading into canary yellow with the throat streaked with carmine. The flowers are very large and well placed on the spike, which is erect and stout. Panama is a most pleasing pink and forms a splendid spike of bloom. Both varieties will be appreciated by all commercial growers, for they are of a habit and color that will be attractive to the trade, and are bound to take a leading position among the many new varieties of this popular flower.

Encouraging Agricultural Instructions.

A bill has been introduced in Congress by Carroll S. Page, senator from Vermont, which provides that the national government co-operate with the states in encouraging instruction in agriculture; the trades and industries, and home economics in secondary schools; in maintaining instruction in these vocational subjects in state normal schools; in maintaining extension departments in state colleges of agriculture and mechanic arts; and to appropriate money and regulate its expenditure. The passage of this act would grant to the boy unable financially to now avail himself of a course in agriculture or mechanics in academy or college, to be given a training which would equip him for a life work which would make him self-sustaining and a good citizen.

The Two National Flower Shows.

The financial report submitted by the committee of the Second National Flower Show held at Boston March 25-April 1 made before the Society of American Florists shows a balance of $1,476.97 paid the society after declaring a dividend of 10 per cent to those who subscribed to the guarantee fund. The attendance at the show was probably a record mark for flower shows, there being a paid attendance of 38,915. The attendance at the first National Flower show at Chicago November 6-14, 1908, was 29,790 and at the St. Louis world's fair show November 7-12, 1904, the admissions were about 33,000.

A comparison of the receipts and expenses of the national shows is interesting. While the attendance at Boston was much larger yet the amount received was not so large in proportion, the receipts from admissions being $18,982, against $17,791 at Chicago. The show this year had, however, one great financial advantage in the trade exhibit which increased the receipts $6,803.76, while the former show received from entry fees and concessions only $2,515.54 and another source of income was the programme, netting some over $750. The premiums awarded at Boston were larger in the aggregate than those at Chicago but these included also the prizes offered by the American Rose Society, the American Carnation Society, the National Sweet Pea Society of America and National Association of Gardeners, which were paid from the funds of those societies. The expenses of the show at Boston were of course larger, for the rental was greater and the manager, who so successfully saw the show through, was a show man by profession, and his percentage amounted to more than the complete salary list of the first show.

Coming Exhibitions.

(Secretaries are requested to supply any omissions from this list and to correct any dates that may have been altered since the last advices.)

Key 484, care American Florist.

Wanted at Once

An Experienced Young Lady Designer and Decorator

Good salary will be paid to a first-class artist and saleslady, who must come well recommended. No others considered. Address

PAUL M. PALEZ
Vestals Little Rock, Ark.

WANTED

A first class grower to grow carnations, lilies, azaleas and general line of cut flowers and plants. Send reference and wages desired with application. We want a first class man, and no other need apply.

Shepard's Garden Carnation Co.,
P. O. Box 1092, LOWELL, MASS.

A BARGAIN.

A good paying florist business and truck farm in south eastern Ohio; established 30 years; seven greenhouses, just put in good repair; five houses in carnations, one in chrysanthemums, and one in general pot plants; hot water heat, cheap coal and natural gas (25c a thousand feet); one eleven-room house; hot water heat; both kinds of gas; one barn and storehouse and five-room cottage rented; six cold frames. All on plot of about one and one-quarter acres, facing 184 feet on newly paved street. Plenty of room to build greenhouses or residences. Truck farm of nine acres; good land. Town has 6,000 population and is growing; railroad center; good out-of-town business. Only reason for selling is sickness and old age. This is a square deel and a bargain if sold soon. Will divide. For further particulars address J. W. SLAUGHTER,
(Phone Normal 5671) 6531 Peoria St., Chicago.

NEW YORK SALESMEN

We need men who are familiar with the greenhouse trade in and around New York. State age, experience and salary. Address

BASSETT & WASHBURN,

Office and Store: 131 N. Wabash Ave., Chicago. Greenhouses: Hinsdale, Illinois.

Chicago.

AVIATORS ARE THE CITY'S ATTRACTION.

Trade during the last week has been very quiet, showing no perceptible improvement over that preceding it, and the stock has accumulated rapidly in some lines. The great aviation meeting is attracting the attention of the residents of the city, the lake front being lined with thousands every day watching the birdmen perform their aerial stunts and the flower business is receiving no attention on the part of the retail buyers, there not yet appearing any opening where floral decoration can be made as an adjunct of the aviation meet. The receipts of roses are increasing in both quantity and quality and some of the blooms produced on the young stock are of surprising good quality. Carnations are beginning to come in quite freely and while the stems are quite short as compared with those that will come later in the season, yet the blooms are of very fair quality, a great improvement on those which have been on the market for the last six weeks. Gladioli are being received in large quantities, far too many for the amount of business that is being done; the fancy blooms and varieties are meeting with a fairly good sale, being used by the retail stores in their window displays, but there is a large quantity of medium grade stock that does not find a market. Lilium longiflorum is in larger receipts and there is a good supply of L. rubrum and L. auratum to be had, and lily of the valley is plentiful enough to meet all demands. Dahlias are now daily arrivals and they add to the galaxy of bright colors to be seen on the market. Chrysanthemum Golden Glow is now a staple but does not meet with any great demand and with the large variety of bright flowers that are so cheap at this time, it is a question whether chrysanthemums at this season are a paying proposition. There are large quantities of other outside stock, hydrangeas in great supply and large vases of helianthus, rudbeckia, gypsophilla. Asters are in abundant supply to meet all demands, but the early crop is through and if the trade was better the good blooms would all find a ready market. Some of the stock is of extra good quality but as is usually the case there is much that is not of too good a grade. Those who are attending the convention at Baltimore left on Saturday and Sunday, and the stay-at-homes are anxiously awaiting news from the bowling team that represents the city at the convention sports.

NOTES.

Wm. Graff of Columbus, O., was in the city this week on business and pleasure combined. He admits that there are some rose growers in this vicinity but doubts if there are any carnation growers who can equal the stock that the Columbus Floral Co. is now producing. He says this firm's Enchantress are as perfect a flower as can be found at this period of the year and that he has a standing order for 500 to 1,000 daily.

Paul M. Palez, the enterprising manager at Vestals, Little Rock, Ark., was a most welcome visitor this week. He was very much interested in the aviation meet and could be seen the greater part of the time at Grant park watching the bird-men fly. Mr. Palez also looked over several different makes of autos while in the city with the intention of purchasing one for delivery purposes.

Frank Paszkiet, one of the hustling employes at Wietor Bros.' store, is engaged to be married to Miss Martha Robeakowski, the ceremony to occur some time in November. It is rumored that several others are to follow his example, the first one to be a popular young grower of Des Plaines.

Manager Pyfer of the Chicago Carnation Co. has received a very nice letter from the authorities of the St. Joseph Hospital, thanking him for interest he has taken in the sick and the many beautiful flowers that they had received.

Wm. Sgoros of the Madison Floral Co. is an ardent admirer of George Knockout Brown, and is planning to go to New York, where the undefeated middleweight is to meet Willie Lewis in the very near future.

George J. Ball, the well known grower of this vicinity, has got a new white aster which much resembles a chrysanthemum and is bound to be a winner.

Miss Nettie Parker, the Chicago Carnation Co.'s popular stenographer, is back from her vacation and is again attending to her duties at the store.

J. Fuhrmann and family have returned from a most enjoyable outing at Delevan Lake, Wis., and will leave shortly for a visit in the east.

Louis M. Leveson, of the Palace Floral Co., was unusually busy at his store on North Clark street, with funeral work, on August 12.

Samuel Slack, formerly of Montreal, Can., is now in charge of a section at the greenhouses of the Geo. Wittbold Co. at Edgebrook.

Mrs. A. Y. Ellison left August 11 for St. Louis to attend the funeral of her brother, whose death occurred the day previous.

The new ice-box that Orr & Lockett built for Canger & Gormley is a beauty and can be seen at the store this week.

Joseph Carnehl of Park Ridge is one of the many growers who has lost a large number of violet plants this year.

Adam Zender is shipping D. E. Freres a large quantity of good Killarney roses.

John Welsh is building a concrete wall around his greenhouses.

Poehlmann Bros. Co.

VAUGHAN & SPERRY

Long Distance Phone Central 2751. **161 N. Wabash Ave., CHICAGO.**

Wietor Bros. are supplying their customers with an extra fancy grade of American Beauty and White Killarney roses. N. J. Wietor is getting his arm in shape to pitch for the team representing the married men, who live west of Ridge avenue, when they cross bats with the benedicts living in the opposite direction. The latter are due for a trimming, for the husky wholesaler has got several curves and a double shoot that will make even the famous Ed. Walsh or Marty O'Toole envious.

The Geo. Wittbold Co. have some unusually fine specimens of cycas at their greenhouses in Edgebrook, where Otto Wittbold presides in person. The finest and largest stock of fern for dishes one ever had the pleasure of looking at were seen at this establishment this week. A walk through the greenhouses found the stock in good condition, especially the chrysanthemums, carnations and poinsettias.

August Lange, wife and son greatly enjoyed their trip to Denver, Colorado Springs and other Colorado points. Mr. Lange was particularly interested in the native flora of the state and was one of the party who enjoyed the wild flower excursion of the Colorado Midland Railway which we illustrate on page 191, when everybody on the trip gathered their arms full of columbine, the state flower.

Tim Matchen says that the carnation planting at the Peter Reinberg greenhouses on the farm has been completed and that he is now filling orders for surplus stock. The cut of American Beauty, Killarney and other roses that is received at the store is large and of good quality. Joe Welsh, one of the employes, is devoting his time to painting the interior of the store.

Otto W. Frese, the hustling manager of the Chicago Flower Growers' Association store, says "business has been as good as could be expected under the conditions that have prevailed the past two weeks." He is now busy filling orders for field-grown carnation plants and rose plants of which they have a large number.

John Poehlmann says his firm have commenced cutting American Beauty roses from their new range and now have plenty of short stemmed stock to fill all orders. John Poehlmann Jr. is spending the greater part of his vacation at the store where he is a general favorite with the employes.

J. B. Deamud and wife have returned from a most enjoyable visit at their farm at Caro, Mich. The genial wholesaler's many friends will miss him at the convention, but his friends can cheer up, for he is already planning to be with them next year.

Vaughan & Sperry are now handling A. A. Sawyer's celebrated asters and this enables them to supply their customers with extra choice stock. A large quantity of short stemmed American Beauty roses was also seen at this store this week.

Allie Zech received a telegram on August 15 from his father, John Zech, who is attending the convention at Baltimore, stating that the local delegation had a most enjoyable time en route and that he still had his bowling ball.

The Geo. Wittbold Co.'s force is now enjoying their vacation, Chas. Schallever, the collector, in spending his in Michigan, R. M. Uhlrich is enjoying his on the farm and Leonard J. Schmierer has left for parts unknown.

Judging from the many inquiries that the S. Wilks Manufacturing Co. is receiving in regard to their hot water boiler one might say that there will be something doing for the boiler man this fall.

H. Van Gelder of Percy Jones' underwent a serious operation this week. His many friends are pleased to hear that he is improving and sincerely hope for a speedy recovery.

N. P. Miller is attending to the interests of Kennicott Bros. Co.'s customers during the absence of Michael Fink, who is attending the convention at Baltimore.

Miss Martha Gunterberg and Miss Minnie Wattman, two popular young ladies in the trade, are enjoying a trip on the Atlantic from Boston to Nova Scotia.

George Reinberg's store man, Robert Northam, says that he never knew of a time when American Beauty roses were so plentiful as they are at present.

Henry Kruchten has been missed from the store this week and upon inquiry it was stated that he is or will be a benedict soon.

Frank Johnson modestly tells us that increasing business has caused the A. L. Randall Co. to enlarge their supply department.

The grower that is shipping lilies to John Kruchten can feel proud of his stock, for it is of exceptionally fine quality.

George Goebel, the popular representative of the Adams Express Co., is back from an outing at Big Sand Lake, Wis.

Kyle & Foerster are showing a fancy grade of asters and lilies, auratum especially is arriving in good condition.

Fred Wittbold and family have returned from a most enjoyable visit with relatives in Marinette, Wis.

The Batavia Greenhouse Co. expect to have a good crop of lily of the valley for their September trade.

Edw. Amerpohl of Janesville, Wis., accompanied the local delegation to the Baltimore convention.

H. E. Schafer of the E. F. Wintersen Co. is away on an automobile tour of the west.

There is great joy in the E. C. Amling Co.'s store for the "Killarney Kid" is back.

2,000,000 FEET OF MODERN GLASS.

Peter Reinberg,

30 E. Randolph St., CHICAGO.

The Lampert Bros. of the Lampert Floral Co. of Xenia, O., passed through the city on August 14 enroute to Star Lake, Wis. Both were so impressed with the photographs of the Wietor-Sinner fishing party, which were shown them by John Sinner, that they decided to cast their lines for finnies in that body of water.

Horace A. Deal, head gardener on the estate of Col. John Jacob Astor at Rhinebeck-on-Hudson, New York, is inspecting the parks and greenhouses of this city and vicinity. Mr. Deal is stopping with friends at 5021 Grand boulevard and would be pleased to make the acquaintance of gardeners in this vicinity.

Theodore Vogel is showing his friends E. J. Reynolds and J. Georgeault of San Francisco, Calif., around the city this week. The visitors are practical florists and are so impressed with this city that they will remain if suitable employment can be found.

As we go to press word has been received that August Poehlmann has been honored by the Society of American Florists in being elected to the vice-presidency and that Chicago has been chosen for the convention city for 1912.

H. H. Wenderoth, representing Nicholas Wapler, New York, importer of china pots and jardinieres for miniature plants, is calling on the trade this week. He has made his headquarters at the Hotel Sherman.

Henry Wietor and C. A. Alles have returned from a most enjoyable visit to Sheboygan, Port Washington and other Wisconsin cities.

H. A. Fisher of Kalamazoo, Mich., was in the city this week buying a stock of supplies for the H. A. Fisher Co.'s new store.

Miss Marie Olmert has returned from a two weeks' vacation and is again attending her duties at the Chas. W. McKellar store.

Henry Prappas, who formerly conducted a flower booth in the Fair, is back from a two months' outing in Omaha, Neb.

Bassett & Washburn's store has been redecorated and presents a very pleasing appearance in its new coat of white paint.

John Horstman, of the Bassett & Washburn force, and Miss Wolff will be married Saturday, August 19.

Henry Weis, of the J. A. Budlong force, is spending his vacation fishing in Wisconsin lakes.

L. Hoeckner and George Pandel spent a few days in Indianapolis last week.

Arthur Lloyd Vaughan and family are visiting at Corey Lake, Mich.

Visitors: James S. Wilson and wife, Des Moines, Ia.; —— Ellsperman, Evansville, Ind.; A. D. King, Mattoon, Ill.

Chicago to Baltimore.

The Presidents' Special left the Polk street station at 11:30 Sunday night, August 13, on the Monon Railroad, with a merry party bound for the convention at Baltimore. Among those on the train were W. N. Rudd, Miss Margaret Rudd, George Asmus and wife, C. W. McKellar and wife, John Zech, H. E. Philpott, A. T. Pyfer, Michael Fink, Ed Amerpohl, Janesville, Wis.; Mathias H. Mann, P. Olsem, Joliet; H. S. Garland, Des Plaines; J. C. Curran, Mrs. E. M. Bullock, and Miss Marian Bullock, Elkhart, Ind.; W. Wolf, Wm. Mailander, Morton Grove; M. Barker and Chas. Thurn. At Indianapolis the party was joined by Irwin Bertermann and wife and daughter Elizabeth, and was further augmented at Cincinnati by those who had proceeded to that city to complete the journey with the Chicago party. This delegation included C. E. Critchell, Al Heckman, Jr., William Schuman, A. J. Horning and R. C. Witterstaetter of Cincinnati, E. H. Cushman, wife and daughter, Sylvania, O.; H. B. Dorner, Theodore Dorner, Lafayette, Ind.; J. A. Evans, Richmond, Ind.; Warren G. Matthews, H. M. Altick, Dayton, O.; Jacob Schulz, August R. Baumer, Louisville, Ky., and Harry Papworth, New Orleans, La.

St. Louis.

BUSINESS DULL.

The weather has been very warm and sultry, and there is but little doing among either the wholesalers or retailers. The stock is coming in rapidly and there is but little demand, with prices at the buyer's option. Carnations are improving, some very good Enchantress being seen. American Beauty roses are plentiful. Smilax is still very scarce.

NOTES.

A delegation of 15 went from here to attend the S. A. F. convention at Baltimore. F. H. Weber, state vice-president, has worked indefatigably to obtain a good representation from this city.

M. M. Ayres Floral Co. has been making extensive alterations and improvements in the store. They have constructed an entirely new workshop and installed an ice plant.

Adolph Ahner states that his violets, of which he expects to have three houses, have been much benefited by the recent rains.

The store room and dwelling being built by C. C. Sanders collasped and fell in, killing one and injuring several of the workmen.

Robert J. Windler is having good trade; he always has a fine supply of cut flowers and floral novelties.

The Kelley Floral Co. is painting their greenhouses and getting ready for fall trade.

The Retailers' Association met Monday, August 14. W. F.

See Plant Advertisement on Page 224, This Issue.

Cincinnati.

A LARGE SUPPLY.

During this and last week the market has been long on every line. Combined with the large crop of early asters has been a continued steady supply of gladioli and a crop of splendid roses. The early aster crop is at an end, the mid-season ones have about run their course and the large Semple's Branching are coming in. The choice and good ones find little trouble in finding buyers while the poor move by the way of the ashbarrel. In gladioli, too, the large choice ones sell fairly well while the small ones, practically all of them are of good quaity, move slowly. In roses a heavy crop of Mrs. Taft, Ivory, Brides and Bridesmaid is on. American Beauties, too, are in good supply. The quality of all the roses is everything that could be desired by the most exacting buyers at this time of the year. Easter lilies are in good supply and prove good stock. Snapdragons are also among the offerings. The green goods market is generally ample. Now and then bunch Asparagus plumosus runs short but heavy strings are being used in its place.

NOTES.

The delegation which left this city for the convention at Baltimore included the local bowling team, C. E. Critchell (captain), Al. Heckman, Al. Horning, Wm. Schumann and R. C. Witterstaetter, accompanied by Harry Papsworth of New Orleans, H. B. Dorner of Urbana, Ill., John A. Evans of Richmond, Ind., and Matthews, the Dayton, O., florist. Mr. Matthews' convention card reads as follows: "After paying the taxes, street paving and sewer assessments, repairing and painting the houses, paying interest on borrowed money, partly paying the wholesale florist, and having enough money left to buy a railroad ticket, my wife said I could go to the convention. I AM HERE." The special car joined the one from Chicago at Ivorydale Junction.

T. W. Hardesty & Co.'s store, since the new ice box has been installed and the store enlarged and decorated, presents a pretty roomy appearance and at the same time gives the hustling sales force more room in which to work.

On Monday evening Mr. and Mrs. Adrian, Mrs. Wm. Murphy and daughters and Mrs. Thos. Windram left for the Snows. H.

We Can Supply You

at all times with a good grade of

Roses, Carnations, Gladiolus, Asters, Daisies, Valley, Lilies, Greens

AND EVERYTHING IN

GET BUSY!

Order Your CUT FLOWERS of Us.

We are receiving such a large supply of good roses, carnations, lilies, asters, gladiolus and other seasonable stock that we can properly fill each and every order. We are in a better position than ever with the stock from our new growers that we have just added to our list to fill the wants of both our local and out-of-town customers. If you are not one of our satisfied customers, give us a trial order and we will show you how pleasant and profitable it is to deal with the old reliable firm of

Zech & Mann,

Wholesale Florists, Long Distance Phone Central 3284. 162 NORTH WABASH AVE. **CHICAGO.**

San Francisco.

BUSINESS QUIET.

Business for the last few days has been very quiet, due largely to the great number of people who are out of town. An improvement of this condition is not looked for until about the middle part of next month. Selected flowers in the market are very scarce, as many growers are throwing out their old stock and are now replanting for the coming season. Asters are cheap and plentiful; the same also applies to sweet peas, and in fact to all outside flowers.

NOTES.

The Pacific Coast Horticultural Society held its regular monthly meeting last Saturday evening, and was largely attended by growers and local florists. Many matters of great importance were transacted. The society at this session placed itself on record as favoring the Sunday noon-time closing of all retail stores in this city. Through the efforts of this organization and several of its active officers, the closing of all flower shops will go into effect beginning Sunday, August 13.

J. A. Carbone, one of the best known orchid growers on the coast, is bringing into the market some fine specimens of the Cattleya Gaskelliana. His house of these orchids first started blooming the early part of May and only reached its height the latter part of July. From all appearances there will be an abundance of flowers obtained from this house as late as the month of October.

Dan MacRorie and a number of other enthusiastic members are working overtime these days obtaining new members for the Society of American Florists. From the looks of things, their efforts in this direction are being met with great success.

S. R. Lundy, Pacific Coast traveling man of the A. L. Randall Co. of Chicago, returned to the city a few days ago. Mr. Lundy is opening up new territory on the coast for his firm and is meeting with well deserved success.

A very enjoyable dinner party was given by Frank D. Pelicano last week to a number of his florist friends. Many interesting remarks and vocal selections were given by those attending. GOLDEN GATE.

Growers, Attention

Why not sell your own stock?
We have the finest location in the Chicago market and space enough to accommodate several growers selling their own stock.

PERCY JONES

56 East Randolph St., CHICAGO

Buffalo.

STOCK NONE TOO PLENTIFUL.

Summer quiet still prevails, with stock none too plentiful. Gladioli and lilies seem to be the only good stock from outdoors, as asters are very inferior. Roses for this season are good, but the demand is limited. Vacations are very much in evidence; many employes from all the stores are enjoying their long-looked-for pleasure.

NOTES.

The rumor of a wedding that savored of "vinegar" ended in sweetness and a reality; Miss G. J. Sauer, who less than a year ago opened a store on upper Main street for herself, not only was successful in the store but has convinced another that she can run two things, a store and a home. Miss Sauer was married to Gregor Schiebel on August 7 and after a short wedding trip will be at home at 27 East Utica street. The craft congratulate Mr. and Mrs. Schiebel.

The contingent for Baltimore is rather good considering the work the majority have laid out for the summer. The advance guard went on Sunday, namely, Ex-President and Treasurer W. F. Kasting, State Vice-President S. A. Anderson and W. J. Palmer. They were followed by L. H. Neubeck, Chas. Sandiford, Jos. Streit, David Scott and George McClure, Sr.

S. A. Anderson has taken out his old mill window with the docks and fishes which blocked Main street for two weeks, and has started in to redecorate the whole store completely, changing the color in both wood and wall decorations.

W. A. Adams, wife and daughter have returned from a trip to Port Maitland on the Canadian shore.

J. Benson Stafford's rural window was a decided up town attraction and very artistic.

W. J. Palmer & Son's two stores still have very attractive summer windows.

E. A. Stephan and wife are on a motor trip. BISON.

CLINTON, N. Y.—Kilbourn & Williams, the Elm street florists, are building a new greenhouse 30x150 feet which will be devoted to the culture of asparagus.

ROSES and CARNATIONS
Our Specialties.

Davenport, Ia.

Business the past week has been about as dull as is ever experienced, absolutely nothing doing, with the exception of an occasional funeral order. Roses are coming in more plentifully, but are still of poor quality. Carnations are finding their way to the market, but being the first cut are short of stem and small. Asters are plentiful, and some very fine ones are being shown. Gladioli and cosmos are also in, as are tuberoses, and prospects are brighter now for outdoor blooms, as we have had plenty of rain within the past two weeks, five inches having fallen the past week.

FLORISTS' ANNUAL PICNIC.

The annual picnic was held at the summer home of Wm. Knees on the banks of the Rock River, August 3, and was a day of pleasure, one of the best the club has ever held. The trip was made in autos kindly furnished by Ludwig Stapp and Otto Boehm, some 70 being in attendance. Dinner was served in the fine large dining room of Mr. Knee's bungalow, everything having been prepared by a chef hired for the purpose, thus giving the ladies a day of rest also. After dinner came the baseball game and a great game it was until the rain put a stop to what would no doubt have been a great victory. Dancing kept the crowd in good humor and a gasoline launch and two rowboats gave the ladies and children the time of their lives, and games of all kinds were indulged in. Mr. and Mrs. Knees were everywhere seeing that everyone enjoyed themselves, and they received the hearts' thanks of everyone fortunate enough to be their guests on that day.

NOTES.

Everyone at the picnic missed smiling, good-natured Uncle John Temple. Uncle John being at St. Luke's Hospital, Davenport, having undergone a serious operation August 1. Mr. Temple is resting easy, but the danger point is not over yet, but hopes are entertained for his recovery.

Ewoldt Bros. have broken ground for a modern house 28x100 feet, Moninger type, which when completed will give them the third largest cut flower establishment in Davenport. They will also build a new brick chimney.

Everything at the Davis plant at Bettendorf is on the rush, a good-sized army of men are busy on the $60,000 plant, rushing it along in great style.

R. M. C. Rohlffs, proprietor of the Alta Vista Nurseries, is sick, having been unable to attend to business for the last month.

C. O. E. Boehm, superintendent of Davenport parks, is on the sick list, having injured himself lifting at one of the parks.

Wm. Goos has finished his new house, 17x100 feet, and is busy housing carnations.

Carnation planting is at its height. Plants lifting well, owing to recent heavy rains.

STOCK INCREASING.

There is a shutdown in trade this week. People have stopped dying and the cool east wind has recuperated many of the sick who were on the verge of crossing the bar. The condition of the markets as regards supply is about the same as last week, with an increase of gladioli and asters. Gladioli are fine—about the best we have seen in any year. Some of the growers have stopped sending asters to the market, the cost of cutting, bunching, packing and express charges, and with commission taken out, leaves very little at the prevailing prices, and as the ordinary grower's time is now valuable, he cannot afford to give something for nothing, or what amounts to that. With President Taft at Beverly there ought to be a spurt in trade. Society during the heated period was in the lethargic stage and it has not fully recovered. There are no freak dinners being given at Newport this year. An elopement of a society bud once in a while stirs the 400, but a wedding of that description does not help the florist trade; an automobile with a bunch of dandelions in the flower holder is about the limit in that hasty idea. A church wedding with all the frills always brings joy to the florist, and to the bride herself, and the buds and brides to be, often take it as their cue—and do likewise.

NOTES.

Boston, in a few years, will be placed in the forefront of seaports. The state has appropriated some millions of dollars for harbor improvements, and the bill was signed by Gov. Foss. The ships that pass in the night to New York may be making Boston their principal point of entry to the New World. Steamer trade in flowers will rise to a point not dreamed of at present. Everyone to his own trade, but we think that the love for flowers should be instilled into everybody at every possible chance. Boston, for instance, instead of being Puritan is cosmopolitan. It is the immigrant to whom flowers are a luxury, and he has to be educated to the use of them. From the lands of hardtack and misery to the land of wealth and freedom is a big jump.

The party which left Boston on the Fall River Line to attend the convention at Baltimore included the following: J. K. M. L. Farquhar, George H. Pieper and wife, Wm. Cahill, C. H. Barrett, H. T. Mead, Fred Sanborn, Thomas Stork, F. C. Collamore, W. A. Hastings, R. C. Bridgham, W. J. Stewart, P. Welch, G. C. Thacher of Boston; E. Allan Peirce, Waltham; S. J. Goddard, Framingham; Hermann Bartsch and wife, Waverly; J. Fuller, Leominster; Miss Anna Chamberlain, Thomas Roland, Robert Roland, Philip Roland, Nahant; E. A. Richards, Greenfield; Eber Holmes and wife, Montrose; Prof. E. A. White, Amherst; H. W. Field, Northampton; William Sim, Allen Sim, Cliftondale; W. W. Tailby, Wellesley; J. McCormack, Malden.

In the past twenty years the flower trade of this city has changed. I once heard a gentleman remark regarding roses, "The Scotch grow them, the Irish sell them, and the Yankees buy them." At present there is a complete change from the above. The Swedes, Danes, Russians, Italians, Japanese and a complex conglomeration of nationalities grow all kinds of flowers, with the sons of Abraham doing a good stunt as salesmen, buyers and storekeepers, such is the change, and we have adapted ourselves to the new regime. The flower salesrooms have grown from a back room in a saloon to the big markets and the wholesale houses that we have at present.

We are sorry to report that the house occupied by J. M. Cohen, salesman of the Co-operative Market, was broken into Thursday night, August 10, and money, diamonds and other valuables to the amount of $11,000 stolen, besides a loaded revolver, which was probably taken for safety. When Mr. and Mrs. Cohen were awakened they discovered their loss and notified the police, but no traces of burglars or property have been found. We personally advise Jake to keep a dog.

Saturday, September 2, will be auction day at the Co-operative Flower Market. Those in search of stalls better be on hand early for we hear there is going to be a good demand. Johnson Knight, the manager, was given two weeks' vacation, but he is one of those men who look on a vacation as a nuisance, and returns once in a while to see that things are going all right. A hard worker and a pleasant man to meet, Mr. Knight makes an ideal manager.

The annual auction sale of stalls at the Co-operative Flower Market will take place Saturday, September 2.

The boys having gone to the convention, we are waiting for the stories when they return. MAC.

Pittsburgh Cut Flower Company

WHOLESALE GROWERS

121 Seventh Street, PITTSBURGH, PA

Philadelphia.

AN ABUNDANT SUPPLY.

Outside flowers are now very abundant and of good quality. Very fine gladioli are seen in quantity and Hydrangea panicolata grandiflora can be had by the wagon load. These with Rudbeckia Golden Glow are largely used for window decorating and many gay effects are seen. Roses are grading higher and becoming more plentiful. New crop American Beauties are making a better showing and these together with the imported stock seem to insure a continuous supply of this favorite. Some of the Double Killarney is offered and it appears to have quite an advantage over the original pink, the flowers many of them being quite double. My Maryland is grading higher while Kaiserin is very much improved, some choice stock coming to the market the past week. Asters both from inside and out are in much better shape but not very plentiful, good white and purple selling at sight. Easter lilies are a shade lower in price as several crops appear to be in at one time. They are in good demand, however, and like lily of the valley have established themselves as a standard flower for every season.

NOTES.

It was a merry party that gathered on Tuesday morning, August 15, at the Baltimore and Ohio Railroad station, Twenty-third and Chestnut streets, and boarded the private car for the convention. Chairman Westcott had everything ready, the commissary compartment being well stocked with everything that was right for refreshing the inner man or woman, either, and as the train was some 20 minutes late he saw that none suffered from thirst in the meantime. There were over sixty in the party, and quite a number who had gone on ahead, and with the laggards to follow it is estimated that the number from this city will not fall short of one hundred. The following ladies and gentlemen comprised the party: John Burton, George Burton, John Westcott and wife, Mrs. Wm. Westcott, Miss Marie Westcott, John Westcott 3rd, John Dodds and Miss Dodds, A. Pericat, Dr. Lane, Edward Flood, George C. Watson, Fred Hahman, J. Albrecht, wife and the Misses Albrecht, Charles F. Krueger and mother, Miss Connor, E. Kohler, Maurice Fuld, H. S. Betz, S. S. Pennock, Charles E. Meehan, E. Bernheimer, W. Robertson and wife, S. H. Gowans, George Anderson and wife, David Rust, Joseph Heacock, James Heacock, Karl Cortes, Theodore Shober, Wm. K. Harris, Mark Mills and wife, Arthur Lanser and wife, J. Otto Thilow, C. E. Lazelere. The following came to the city and joined the delegation in their private car: James and Mrs. Salmon, Akron, O.; C. C. Yost and wife, Lebanon, Pa.; W. C. Eger, Schenectady, N. Y.; Adolph Mueller, Norristown; E. J. McCallum, Pittsburg; The Misses Esler, Saddle River, N. J.; D. E. Gorman, Williamsport, and D. B. Edwards, Atlantic City. W. J. Stewart and P. Welch of Boston were also welcomed with open arms, they arriving on the train to which the Philadelphia car was attached for Baltimore. All the party were in the best of spirits and although the weather was very warm seemed to anticipate the time of their lives. The bowlers promised to make good and bring back some of the trophies for which there will be much rivalry.

Alfred Glass, with the Leo. Niessen Co. and the Pennock Meehan Co., has taken a position with M. Rice & Co., the florists' supply men, where his extended acquaintance with the trade should bring business to the house.

Martin Gannon, late with the Robert Craig Co., has joined the forces of the Leo. Niessen Co. Martin is a good salesman and will find plenty of opportunity in this market for development in this line.

Warren Eugard of the Century Shop was married last week. K.

New York.

There was an exceptionally good crowd at the New York club alleys Friday night, August 11. Astoria bowlers came up in grand style and fully tested the New York city boys. Pierson's new balls rolled the high scores on this occasion and they are also expected to do the real thing at Baltimore. We have as a substitute on the New York team Admiral Togo Kakuda. Following are the scores of the evening. Those marked with a star are members of the New York team:

Manhattan.			
*Chadwick	151	202	186
*J. Manda	149	154	182
C. W. Scott	152	126	128
Kakuda	139	126	162
Astoria.			
*Donaldson	165	151	209
Kessler	168	222	164

Tallman	131	116	129
Shaw	133	148	124

Washington to Baltimore.

The members of the Florists' Club of Washington and other florists, comprising a large delegation of members of the S. A. F., left home on Tuesday, August 15, for the convention. A special car on the Washington and Baltimore electric line had been chartered and beautifully decorated, not with paper flowers, mind you, but with roses, lilies, asters and other seasonable blooms. The work was artistically executed by Geo. Shaffer. About sixty made the trip and joy was unconfined.

Among those who were passengers were: W. R. Smith, Adolphus Gude, W. F. Gude, Geo. H. Cooke and wife, E. Mayberry and wife, Geo. Field, Albert Esch, Fred Leapley, W. Marche, F. H. Kramer and wife, A. F. Faulkner, Albert Schnell, G. Edward Schultz, Robt. McLennan, David Grillbartzer, Harry Lewis, John Barry, J. W. Phillips and wife, W. A. Bolinger, Ed. Schmidt, O. W. D'Alcorn, J. Louis Loose, Otto Bauer, Geo. Shaffer and wife, Geo. Hubbard, representing Chas. H. Totty, Madison, N. J., J. J. Bickings, Chas. S. Lee, Evergreen, Ala., N. J. Hammer, S. Simmarch, J. R. Morgan, Mrs. A. Baker, C. L. Luis and wife, Mrs. R. G. Stauff, Harry Ley and wife, M. J. McCage and wife, Louis L. Bowdler, Adolphe Bowdler, Miss Herrold, Mrs. Wall, Mrs. Whitley, Chas. S. Jenkins, Harry T. Jenkins, Erich Gebhardt, Mrs. E. Schukler, R. L. Jenkins, L. Brasts.

At the terminus of the Washington line the party was met by a committee from the Baltimore Gardeners' and Florists' Club and transferred to another line which landed it near the convention hall. During the afternoon the members of the party dispersed and went their several ways; some attended the opening meeting and others spent the time renewing old acquaintances. C. H. F.

Pittsburg.

BUSINESS QUIET.

Business is very quiet at present, stock of all kinds coming in plentifully. This about covers the wholesale market for this week.

NOTES.

Mr. and Mrs. Darnell, of the J. M. Gasser Co., Cleveland, O., stopped in Pittsburg enroute from the south.

J. Blankensop, of G. A. Dunn, Washington, is handling alligators as a side line during the dull days.

George Wehrheim, of the East End takes unto himself a wife this week. Congratulations, George.

Mrs. R. A. Mick, of Wellsville, O., has been very ill for the last few weeks.

T. Malbranc, Johnstown, is on jury duty in the U. S. Court, Pittsburg.

DeForest Ludwig, home from Cornell, is playing classy baseball.

John James, of Braddock, is going to spend two weeks in Detroit.

Geo. McCallum is back from a ten-day vacation at Atlantic City.

J. W. Glenn, Kittanning, was a busi- a strenuous one.

Wm. Falconer is spending two months in Europe.

The Florists and Gardeners' Club held their annual picnic at Keystone park, which was considered by all the best yet. The weather was of ideal picnic brand, and the grounds being handy quite a few florists closed at noon and joined the bunch. The first ball game was called at 2 p. m., the Wholesalers and Retailers vs. Growers, the latter getting the best of the argument The line up was as follows: Wholesalers and Retailers: D. F. Ludwig, p.; W. Q. Potter, 2nd b.; Friscorn, 3rd b.; E. J. McCallum, r. f.; E. Ashcroft, l. f.; L. Beckert, s. s.; Gotti, c. f.; H. Carney, 1st b.; Abe, c. Growers: Grongold, c.; Melvin, P.; Gumto, s. s.; Ludwig, 3rd b.; Lindquist, 1st b.; Shirley, c. f.; Sample, l. f.; Minsche, 2nd b.; Ray, r. f. Umpires, Geo. Marshall, Henie Pitz.

The score by innings was:

	1	2	3	4	5	6	7	R.	H.	E.
Wholes'rs & Retailers..	1	0	0	2	0	0	0	3	7	4
Growers	0	1	1	3	2	0	0	7	6	3

The second game was called at 4 p. m. between the married men and the single men, the latter winning 11 to 4. At 7 p. m. every one was tired and ready to go home, for the day had been ness caller Thursday. J.

Nassau County Horticultural Society.

The regular monthly meeting of the Nassau Horticultural Society was held in Pembroke hall August 9, President Trepess occupying the chair with a good number present. Messrs. Ashworth, McNenery and Walker were appointed judges and their decisions were as follows: Society's prize, 12 asters any color, Geo. Barton, first; 12 gladioli, Paul Reul, first; six lilies, Geo. Barton, first. J. Ingram, special for four vases of asters was won by Geo. Barton. Certificate of culture was awarded to James Emslie for a dish of peaches. The outing committee reported all arrangements satisfactory for the annual outing which will be held at Karatsonyi's Hotel, Glenwood, Thursday, August 17.

A letter was read from Stumpp & Walter Co. offering a silver cup for the fall exhibition, also from Hitchings & Co. offering a prize for the same exhibition. Mr. Holloway of the executive committee read the schedule prepared for the dahlia show September 27 and it was adopted.

The society has just received a presentation of 500 vases. The donors were Mrs. C. L. Bucknall, Mrs. Wm. Beard, Mrs. Arthur Gibbs, Mrs. H. L. Pratt and Mrs. F. S. Smithers. A list of the special prizes and their donors were read, also the preliminary schedule for the fall show. The Rev. J. W. Gammick was unanimously elected a life member of the society exempt from dues. A letter was read stating that James H. Yale wishes to lecture at the next meeting, also J. N. Hoff on the value and utility of Alphano Humus.

The society's prize in September will be for the best melon, 12 potatoes and six ears of corn. E. H. W.

Stamford Horticulturists.

The regular monthly meeting of the Westchester and Fairfield Horticultural Society was held in Royal Arcanium hall, Stamford, Conn., August 11, President Stuart occupying the chair, and there was a large attendance. One honorary and nine active members were elected. The society has received many prizes, to be competed for at our first annual exhibition to be held in Stamford, Conn., November 3-4, and our exhibition committee is busy with the final schedule, which will soon be ready. The outing committee made final report, and all who attended expressed themselves as well pleased with the good work done by the committee to make the affair a success. The judges' report on the exhibits at the meeting was as follows:

Cultural certificates to Jos. Stuart, for Amaryllis Belladona, and to Ewen MacKenzie, for bunch of grapes, Muscat of Alexandra; votes of thanks to M. J. Quirk, for sweet peas; A. Whitelow, for asters in variety; Carrillo & Baldwin, for Cattleya Dowiana; Eugene Blondin, for cucumber North Pole; A. Peterson, for tomato, Liberty; J. B. Andrews, for ornamental pomegranate; P. W. Popp, for basket of cut flowers. The exhibitors gave short and interesting talks regarding the culture of their exhibits.

NOTES.

Charles Michler of the Michler Bros. Co. has gone to British Columbia for a month or six weeks inspecting his farm in Kamloops. This firm needing a new wagon are debating whether it will be an automobile or the same old mule.

Two of the Kelley & Current force, Current and Rose, have gone on a two weeks' camping trip.

J. A. Kellar is preparing to build a palm house on Sixth street. M.

Cleveland.

A SLIGHT IMPROVEMENT.

There was a slight improvement in the trade the past week, but real summer dullness still prevails. Asters are perhaps, a little less plentiful, the big crop of the early varieties being about done. Good indoor asters are arriving. The better grades of gladioli are also coming on, and there are some very good carnations still on the market, grown from old plants; also, some fairly good outdoor stock with short stems. Sweet peas, swansona, Japanese lilies and a few water lilies, both white and colored, are about the extent as to variety. Lily of the valley of excellent quality finds a fair market. American Beauties find a ready sale, some remarkably fine blooms arriving. Easter lilies have been scarce. Greens of all kinds are very plentiful.

C. F. B.

GRAND RAPIDS, MICH.—The summer orchard meeting of the Michigan Horticultural Society and Grand River Valley Horticultural Society were held jointly at the fruit farm of Henry Smith August 12.

The Tallest Trees,

AUSTRALIA'S RECORD IN HEIGHT.

Not only does Australia dispute the claim of California to the possession of the highest trees in the world, but W. K. Harris writes an article in the "Lone Hand" with the object of showing that Australia has trees over 100 feet higher than the celebrated California "big trees."

Probably the majority of Australians are not aware (says the writer) that they can lay claim to possessing, in their eucalypti forests, not only the tallest trees, but the best hardwoods in the whole world. These eucalypti trees possess many excellent qualities. Their timber is of great durability, strength and toughness. The eucalyptus is a genus of the tree of the natural order Myrtaceæ mostly, if not all, indigenous to Australia and Tasmania. Australia has 400 species of the eucalyptus; or, as it is more popularly known, the "Gum-tree." Its value has been ascribed to its antiseptic odors, and to its rapid growth (which sometimes exceeds 10 feet per annum), and the consequent drainage of the soil through the enormous transpiration from the root surface.

The tallest species we have (E. amygdalina) is to be found principally in Victoria. This species is a tree with tall white stem, smooth as a marble column, and generally without branches for 90 to 100 feet from the ground. It is singularly beautiful when seen in groves; for these have all the appearance of lofty pillared cathedrals. The average height is a little less than 300 feet. The southeastern division of Victoria (Gippsland) has put forth the greatest claims to possessing the tallest giants. In this district a great number of trees measuring 300 feet have been found, while specimens of 400 feet are not uncommon, and individuals of over 400 feet are not rare.

Baron Mueller, formerly Government botanist of Victoria, is stated to have said that gum-trees attain a height of 500 feet, but the tallest tree even the Baron ever measured was a prostrate one on the Blacks' Spur, ten miles from Healesville, totalling 480 feet. This tree was 81 feet in girth near the root. Another, found in the same locality, was 415 feet high, with a circumference of 69 feet at the base of the stem. Mueller refers to this species as "the highest tree in the globe, surpassing the famous California sequoia and Wellington pines." In 1889 G. W. Robinson, civil engineer, of Berwick, in a journey from Gippsland to Mount Baw, measured a tree 471 feet high. The height of this specimen had previously been estimated at not less than 500 feet.—Journal of Horticulture.

The Seed Trade.

American Seed Trade Association.

Leonard H. Vaughan, Chicago, President; Marshall H Durvea, New York, First Vice-President; Edgar Gregory, Marblehead, Mass., Second Vice-President; C. E Kendel, Cleveland O., Secretary and Treasurer.

Next annual convention, June, 1912.

NORTHERN New York reports fine outlook for cucumber seed.

AN English seed house recently put in a Russian nobleman's golf links to the tune of 3,000 pounds sterling, including seeding.

HEMPSTEAD, N. Y.—The cabbage seed crop of 1911 on Long Island is reported by Francis Brill as very short, more so than ever before.

CHICAGO.—Prices on the Board of Trade, August 17, for grass seed, were noted as follows: Timothy, $12 to $14 per 100 pounds. Onion set prices have stiffened about ten cents per bushel for spot on account of many outside buyers forcing trades.

JULIUS LOEWITH, American representative of Conrad Appel, Darmstadt, Germany, states that the conditions for harvesting the German natural grass seeds is very satisfactory and the seed is of heavy weight and bright color. The prices will be lower than last season. March Brent or Florin grass, S. German and Rhode Island Bent grass, which will be harvested in August and September, was injured by the hot weather during July and August, and the stock will be small and the prices high.

A. LE COQ & Co. of Darmstadt reports that the stock of last year's crimson clover is reduced to a minimum and small quantities of low quality are taken at exorbitant prices. It looks as if this year's crop would be small for late frosts and mice did great damage and many fields had to be resowed, and the scarcity of green fodder compelled farmers to cut crimson clover for feeding. The crop of spring vetch is poor in quality, there being no first class seed, the bulk being of middling quality. Of winter vetch the crop was exceptionally light and all seeds have been bought from producers at advanced prices; low and inferior grades are offered but should be rejected on account of the large percentage of cockle they contain. Orchard-grass in New Zealand is a very short crop.

Californian Seed Crops.

The Pieters-Wheeler Seed Co., Hollister, Calif., reports conditions of California seed crops August 8 as follows:

Onion very good here, but injured by the excessive heat in some sections.

Salsify, we have a good crop.

Sweet peas, mixed about one-half crop and named varieties also short.

Radish, a little short.

Lettuce, a good crop.

Carrot and parsley, very short.

Parsnip, not over fifty per cent of normal crop.

Nebraska Seed Crops.

Valley, August 5.—The corn and vine crops in this locality are in pretty bad shape. With a good soaking rain we could hope for a fair crop of field corn and most vines. Sweet corn, early sweet corn in particular, is very poor in Nebraska and other states from which we have received reports. There is reported to be a fair crop of muskmelons in Colorado but badly in need of rain. It is hard to predict at the present time just what we can expect in crops. The corn looks good, good stand, etc., but does not seem to be able to make ears on account of the continued dry weather. C. H. C.

Waterloo, August 5.—We cannot make a close estimate on crops that stand greatly in need of rain. There are many fields that will produce little or nothing unless there are plentiful rains soon, although still in condition to return fair yields if the drought is well broken. We have crops in other districts that are in better shape, while a limited acreage in still other places is already too far gone for recovery. We seem to be in pretty good shape on cucumbers, fair on muskmelons and watermelons, but with prospects of some shortages on squash and pumpkin. C. P. C.

French Seed Crops.

Having just returned from a trip through the United States, Mr. Davy, of Arpajon, France, desires to express his thanks to the many friends whom he visited for the cordial reception accorded him and reports the conditions of vegetable seed crops as follows, July 27:

Last autumn and winter the heavy fall of rain prevented the early planting of the biennials such as carrot, leek, parsley, parsnip and onion, Consequently these were planted much too late and in much smaller quantities. The crops will, of course, be small, but are growing well, with the exception of carrot, which was injured by having too much moisture at the roots and was never so poor. Turnip, celery, chicory, curled and Batavian endive are very good.

Cabbage was very good until June, when two weeks of exceedingly dry weather reduced the crop by one-half in a few days. Radish in the west and south of France is very poor, but in the vicinity of Arpajon there is a fine crop and there will be a large quantity of choice stock.

Lettuce, beans and cucumber are all looking well at present. Beet, mangel and Swiss chard are very good, but during the last week these crops have suffered from dry weather, just as the seeds were forming.

Bulb Growing in Holland.

In a report on a visit of a deputation from the Gardeners' Company to Holland to study, apart from the purely horticultural aspect of bulb-growing, the general economic conditions of that industry, and to learn the nature of the work carried on by the Netherlands government in connection with plant disease and insect pests, it is stated that the area under bulb cultivation in Holland is about 11,000 acres, and is continually increasing, while the value of the land is rising rapidly. The land is divided into three classes, hyacinths not being cultivated on land of the second class, and tulips only being grown on land of the third class. The difference in quality is caused by the slightly greater percentage of lime in the soil. The methods of propagation are mainly dependent on chance. After the land has been cleared and leveled by machinery tufts of rye-straw are put at intervals all over the land, which is then covered with branches to hold it together. It is then heavily manured with cow dung and distillers' grains, and potatoes are sown as a first crop to clean the soil. Later hyacinths are planted in the richest soil and narcissi in the other. A regular rotation of crops is practiced by the best growers. Of the produce 40 per cent. is at present shipped to England, but trade with the United States of America and other countries is increasing.—Journal of Horticulture.

Government Seeds.

Having had occasion to look into the work of the Vacant Lot Association of Philadelphia, of which Chas. Horn is assistant superintendent, I find the association is doing wonderful work in converting idle lots of ground into beautiful and productive gardens. Over 300 such lots have been turned over temporarily to the poor of Philadelphia who are instructed how to raise thereon vegetables which become their property. Mr. Horn has informed me that one item of the expense is $600 for seeds, and that results from government seed were not satisfactory. If charitable organizations, maintained by voluntary contributions, can not afford to use government seeds, surely others can not afford to do so.

Sweet Pea Show in England.

The eleventh annual exhibition of the National Sweet Pea Society of England was held at Royal Horticultural Hall, Westminster, July 11-12, 1911. The weather was fine and the display, according to the Gardeners' Magazine, although not the largest held by the society was one of the finest, the quality all through being superb. One of the prominent points noticed was the greater variety of colors, where pink was the predominating color a few years ago, now there are good blue, orange, carmine, buff, purple, rose, cerise, mauve, lavender, maroon and other shades. The flowers were all of the highest merit, states the Journal of Horticulture, never before was the competition so even, the Irish growers, showing magnificent blooms, being awarded the coronation and two other cups. The blooms in the coronation class shown by E. Cowdy, Greenhall, Loughall, County Armagh, were marvelous; in fact, it is doubtful if ever better specimens for size and color were ever seen. They were borne on stems 20 inches and more in length and of the largest size without being coarse. The novelties, according to this journal, were not any improvement on existing varieties, two, Thomas Stevenson, a rich scarlet, and Barbara, an orange, being awarded first class certificates; awards of merit were given to F. Seymour Dans — rose-heliotrope over cream, Mauve Queen—rich mauve, Red Star—orange scarlet, Mrs. B. Gilbert—light marbled, and May Campbell—rosy flame on cream ground. The attendance at the show was very large, among the visitors being W. Atlee Burpee of Philadelphia, Pa., and A. T. De La Mare of New York.

Gladiolus Niagara and Panama

Dowagiac, Mich., July 23, 1911.
Mr. Frank Banning, Kinsman, Ohio:

My Dear Mr. Banning:—I must tell you what a treat we are having in "Panama" and "Niagara." I have some fine spikes of each in the house today. Think "Panama" the finest pink I ever saw. It is to my taste far ahead of "Amerfca" in both size and color. "Niagara" is just as fine. A perfect cream and very beautiful. Mine all have perfect and straight flower stalks.

Sincerely, GRACE RE SHORE.

Giant Orchard flowering, rare shades.
Giant Bronze and copper shades.
Giant Light Blue, delicate shades of blue.
Giant Dark Blue, deep blue shade.

Trade pkt., 25c; any 5 for $1.00; any 11, $2.00.

Rainbow is a blend of over 50 of the latest introduction of Giant Pansies of the most beautiful gorgeous colors; blotched, striped, veined margined etc. With every $1.00 worth of Pansy Seed I will send 1000 of Rainbow free, and with other amounts in like proportion.

Chas. Frost Kenilworth, N. J.

LILIUM HARRISII The Bermuda Easter Lily.

Let Us Supply Your Wants in Lilies This Season.

We think we can make it to your advantage to do so, as regards both quality and price.

The stock that we offer is not gathered indiscriminately from all kinds of sources, but is grown for us by a few selected growers whose stocks have been worked up from the true, original stock. In order to ensure the health of the product, the bulbs are not grown on the same field oftener than one season, other crops being grown on the field the preceding year. The ground is thoroughly manured when the previous crop is grown, leaving it in a high state of cultivation, and when the lily bulbs are planted no fresh manure is used, and this prevents disease and insures a crop of strong, healthy bulbs.

In addition to this, we do not dig our bulbs as early as they are usually dug, but leave them in the ground until they are thoroughly ripened and matured. When Harrisii is good, it leaves little to be desired. There is very little, if any, stock obtainable as good as the stock that we are offering. We are supplying only this one grade of selected stock, and when this is disposed of, we shall have no more to offer.

While the quality of the stock that we offer is of the highest, our prices are as low as, or lower than, the prices of those who offer the ordinary stock gathered from indiscriminate sources. We are sure buyers will find our stock very satisfactory, and much more so than the Japanese Longiflorum, which has badly deteriorated in recent years.

Bear in mind that we were the original introducers of Harrisii in Bermuda, and that we have exceptional facilities for obtaining our present supplies. Also take note that the smallest bulbs that we offer are 6-7 inch bulbs, not 5-7 inch, as usually offered.

6- 7 inch bulbs, 335 to the case, **$15.00** per case; full 1000 lots, **$ 40 00** per 1000.
7- 9 inch bulbs, 200 to the case, **$16.00** per case; full 1000 lots, **$ 75.00** per 1000.
9-11 inch bulbs, 100 to the case, **$18.00** per case; full 1000 lots, **$175.00** per 1000.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

THE BOOK OF GLADIOLUS

THE first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120 page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

Spinach.

Few growers realize the possibilities of spinach culture. We were able last season to hold the market from September 1 to July 1, uninterrupted, which is some ten months out of twelve, and for a great part of this period we received a dollar per bushel, wholesale. When we state that our spinach sales overran our sales of celery, or lettuce, or sweet corn, or, in fact, any other crop, we are putting it mildly. Thus we use spinach for a cover crop and a money crop besides. As fast as we can clear lands, commencing August 20, we broadcast spinach, harrow it in and run an even coat of coarse horse manure on with a manure spreader. This coat of manure is our salvation—it prevents drying out in the early fall, and freezing out in winter. Our entire tract is provided with a water main down the center, which has plugged tees every twenty feet. The lands are exactly alike to the right or left of the main and to water many things we simply carry a complete line of sprinkling pipe (Skinner) wherever wanted and connect to main. Thus we can move a 200-foot pipe line in five minutes and turn the water on. Our coat of manure will hold the moisture and by watering such a patch 36 hours we have enough moisture to not only sprout the seed but to grow the crop as well. That way we can use one line of pipe in a dozen places. We do not want all our spinach at one time and try to string out the fall seeding over some six weeks.

In our variable climate we are not sure of success with anything. We sometimes lose the biggest and oldest patch while a younger seeding comes along unhurt, and another time it may be the opposite. By having various ages we are pretty sure of a continuous crop.

One of the points to mind is even seeding. We must get all the stand possible, yet not crowd. Whenever our spinach crowds it gets tender and will surely freeze down. We want the plants to lay flat on the ground, which provides heat from below in severe weather. Wherever they stand erect and crowded the severe cold waves cut them down like tomato seedlings.

There is considerable difference in varieties. We do not find Norfolk or Bloomsdale as hardy as thick leaved. Our main sowings are of these two kinds. The Norfolk is earlier and its fine color and plumpness make it a great seller. It does not collapse nor settle like a smooth variety, hence preferred by market people. Like other goods, we must gradually build up a demand. In our case the heavy wholesale trade looks to us for spinach, which business we have earned by the closest application.

MARKETMAN.

An Irrigation Plant.

No doubt some growers will be interested in a description of our irrigation system. When we located here we laid out a ten-acre piece in two sections—each section 200 feet wide. A good road runs down the center and to one side is the water main, which is 1½-inch pipe. (Note the small pipe.) We are doing easily with the main what seems impossible. Right in the center of the tract we had two five-inch wells drilled and we provided a good concrete foundation for our machinery. At present we are using a five h. p. upright steam boiler and a steam pump. The wells are drilled into gravel and the bottom pipe in each one is drilled full of ⅜-inch holes. Thus there are over 300 holes in each well. The wells were driven until the gravel was entirely penetrated to prevent anything coming in from below. All water must come from the sides, through these holes. By sand pumping these wells every bit of sand and gravel smaller than these holes was removed, until the water was free of grit. This has been a great success as we never pumped a trace of sand after the steam pump was connected up. We operate both wells with one pump, but can pump each well separate in case of repairs. We are using a three-inch cylinder double acting pump, with a five-inch steam cylinder. This arrangement gives us great pressure and we can feed the boiler from the water main automatically.

As none of our lines are over 200 feet long we use one-inch pipe entirely for sprinkling. These are drilled for Skinner nozzles every three feet; some recommend four feet, but that is too slow for us. Further, we do not use anything smaller than one-inch pipe as it does not pay to do so. Our pump will handle four of these lines at a time and put up a good pressure. We often run a hundred or more strokes a minute—here is the beauty of a steam plant. Its simplicity and strength permit of severe duty and severe work is certainly ahead for an irrigation machine. We find we can send the water 25 feet each way, thus we need a line every 50 feet. We mulch our coarse crops and these are not provided with permanent pipes. We move a good many pipes every other day; simply disconnect the union on the end and carry the whole line forward bodily. We have a field of celery, mulched, that was watered so long ago we forgot when, that is now soaking wet and making a rank growth. We support the lines with three-foot wood posts for all low crops and five-foot posts for tall ones, such as sweet corn. We have been able to hold our own against this fierce season with this seemingly small plant. Another season we may add a gasoline engine to pump one of the wells for quick demands of short duration.

Clematis.

The large-flowered clematis is an invaluable plant in the garden, and is especially useful for furnishing pergolas, trellises, arches, and other garden structures with foliage studded with immense blooms of varying color, while it is also effective when grown in the center of a bed over a low wire support. One of the greatest faults of the large-flowered clematis, however, is its habit of suddenly dying off in a day without any apparent cause, but they sometimes shoot up from the roots again the next year. Many consider that their sudden collapse is due to their being grafted plants, but even when on their own roots they sometimes go off in the same manner. The action of the sun on the lower portion of the stem is often thought to account for this failure, and it is well to plant them behind some low-growing shrub to break the strength of the sun's rays, observes the gardening writer of a daily paper. The plants at the Temple Show were mostly in 12-inch pots, and were mainly grafted last season, the finest blooms being produced on these young plants. A few were trained to stakes, and these were interspersed in the group here and there for relief. At the back were older plants trained in pyramidal form. Good varieties were Nellie Moser (white with a bright pink band down the center of the petals), Grand Duchess (blush), Ville de Lyon (claret-red), Jackmanni rubra (red), Mrs. George Jackmann (white), Lady Northcliffe (lavender-blue), King Edward VII. (mauve), Mme. Van Houtte (white), Venue Victrix (double mauve), President (rich violet-purple), Lady Londesborough (lavender), Mme. Edouard Andre (deep claret), Fairy Queen (white with a faint pink bar down the center of the petals), Enchantress (double white), and Belle of Woking (double mauve).—Journal of Horticulture.

Railway Gardening Association.

ANNUAL CONVENTION.

The fifth annual meeting of the Railway Gardening Association was held at the Kaiserhof Hotel, Chicago, August 15-18. Promptly at 10 o'clock on the morning of August 15 the association convened with Patrick Foy presiding. After the preliminary exercises the following papers were read which were freely discussed: "The Uniformity in Railroad Gardening and How to Bring It About," by E. A. Richardson, Boston & Albany Railroad; "Interesting Railroads in Beautifying Their Station Grounds," by N. S. Dunlop, Canadian Pacific Railroad, and "Fences, Including Hedges, Where to Use, Material, Maintenance, etc.," by Joseph Carson, Pennsylvania Railroad. The afternoon was spent in an automobile ride around the Chicago park system which was greatly enjoyed.

The evening session opened at 8 o'clock and papers were read: "Sodding and Seeding Lawns, Comparative Value, Best Time to Do It, Material," by R. J. Rice, Michigan Central Railroad; "The Gardeners' Jurisdiction, How Far Beyond the Park Fence Should It Extend," by R. W. Hutchinson, Pennsylvania Railroad; "How Best to Protect Stock From Trespassing on Our Grounds," by C. W. Eichling, Queen & Crescent Railroad.

On Wednesday morning the convention reconvened and the members listened to the following papers: "Hardy Herbaceous Perennials in Landscape Work," by W. H. Waite of Vaughan's Nurseries, Western Springs, Ill.; "Plants for Permanent Effect, Extent of Their Use, Varieties," by George E. Kessler, St. Louis & San Francisco Railroad; "Should Railroad Companies Purchase or Grow Their Stock?" by F. W. Vail, Central of New Jersey Railroad; "Treating Cuts and Banks in Prevent Washing and Sliding," by H. S. Moulder, Illinois Central Railroad; "Fertilizers," by J. A. Byrne, Baltimore & Ohio Railroad, and "Maintaining Parks During Drought," by J. E. Smith, Pennsylvania Railroad.

The afternoon of Wednesday was spent inspecting the Burlington Railroad station and grounds and Vaughan's nurseries and greenhouses at Western Springs, Ill. In the evening session the selection of the place of meeting resulted in the association to hold the 1912 convention at Roanoke, Va. The election of officers resulted as follows: Patrick Foy, Roanoke, Va., president; J. E. Smith, Ridley Park, Pa., vice-president; J. S. Butterfield, Lee's Summit, Mo., secretary and treasurer; R. J. Rice, H. S. Moulder and R. W. Hutchinson, executive committee.

The meetings were very interesting and the papers and other matter freely discussed and a most successful convention was the verdict of all who attended.

Association of Park Superintendents.

THE KANSAS CITY MEETING.

The annual meeting of the American Association of Park Superintendents was held at the Hotel Baltimore, Kansas City, Mo., August 8-10, with about seventy delegates present. The paper read by Ernest C. Meyer, special agent of the census bureau at Washington, on "Uniform Park Accounts and Reports and the National Census Bureau," advocated a better system of segregating park statistics and supplemented the report with a pamphlet prepared by the census bureau. "Shade Trees" by J. J. Levison, forester City Parks, Brooklyn, N. Y., caused considerable discussion in regard to the best time of planting and other matters pertaining to this important feature of parks. The paper on "Architecture of Animal Buildings" by Dr. Frank Baker of Washington, D. C., detailed at length the construction of animal quarters, and deeply impressed upon his hearers the danger of handling wild animals and of preventing people from getting near carnivorous beasts. "Road Construction and Maintenance" was discussed by James H. Shea, assistant superintendent of parks of Boston, and others. Herman W. Merkel's paper on "Insects" was interesting and attentively listened to by the members. The election of officers resulted as follows:

W. H. Dunn, Kansas City, Mo., president.

Charles E. Keith, Bridgeport, Conn.; James B. Shea, Boston, Mass.; S. E. Green, Providence, R. I.; J. W. Thompton, Seattle, Wash.; W. R. Adams, Omaha, Neb., and G. Champion, Winnipeg, Can., vice-presidents.

F. L. Mulford, Washington, D. C., secretary and treasurer.

Boston was selected as the next place of meeting.

A fifty-mile automobile ride with dinner at Swope park, a dinner at the Commercial club and a trolley ride were the entertaining features of the meeting.

The following were noted as being present at the meeting:

W. R. Adams, Omaha, Neb.
Frank A. Auswald, Kansas City, Kans.
Frank Baker, Washington, D. C.
John Berry, Colorado Springs, Colo.
Herman H. Beyer, South Bend, Ind.

Heacock's Palms and Ferns

Home Grown, Strong, Clean and Well Established

Order Now for Fall Delivery

We grow all our Kentias, above 6-in. sizes, in cedar tubs made especially for us, **avoiding breakage of pots** in shipments and giving better satisfaction to our customers; and while they cost us a great deal more than pots, we sell the plants for the same money. We order these tubs by the carload. With more glass, our stock is much larger than ever before.

When in Philadelphia, call and see our stock before placing your order.

20 minutes ride by rail; 100 trains every weekday; Railway Station Jenkintown.

The Chicago Flower Growers' Association

OTTO W. FRESE, Manager. 176 N. Michigan Ave., CHICAGO

European Horticulture.

FROM THE FRENCH TRADE PAPERS

Eremurus Olgae—Rare, stems five to six feet, pale rose, blooms in July. Their culture is very simple, rich mellow soil, well manured and sandy, or at least thoroughly permeable; set the roots spread horizontally the central bud not more than four inches below the surface; it is well to set a stake when planting, for support, and to cover well with a good layer of manure. In spring a wooden protection over the young leaves to carry off a freezing rain that might harm the young flower stalk is recommended. Planted in the border or in a clump on the lawn these plants, which are perfectly hardy, soon increase and make a grand effect. They should not be moved for several years unless they become too dense. Robustus, Himalaicus and Bungei are recommend in their order for beauty and ease of culture.

Another Rose Enemy.—The Megachile tuncularis belongs to the hymenoptera, and is easily recognized by its strong thick head; the mandibles are triangular and furnished with four teeth; the feet are not constructed like those of the bee for gathering pollen, but the abdomen of the female is furnished with brushes for removing it. The nest is made upon the ground, shaped like a small thimble, which it lines with the leaves of the rose, cut as cleverly as if with scissors; in each little thimble-like cell, lined with rose leaf, is placed an egg and food for the larva, and another cell built above it, continuing to the number of ten. If roses are not available this curious insect "cutter of leaves" will resort to other plants to line her nest.

Aster umbellatus.—One of the most distinct of the North American hardy perennial asters, this variety is well worth cultivation; it is earlier than most, and its rather stiff stalks are well furnished with foliage and are single up to the base of the inflorescence, which forms a large umble-shaped corymb of fine white blossoms with yellow disc; they begin to bloom the middle of August and continue a month, the stalks being from three to four feet high and very decorative. Allowed to grow into a clump, the plant forms a mass of bloom, but if constantly divided to one or two good eyes fine strong stems are grown for cutting.

The Congress of the Society of German Rose Growers meets this year at Saverne, Alsace, and is to discuss the following questions: "Rose diseases of animal and vegetable origin; their remedies." "Use of chemical fertilizers for roses, principally that of magnesia." "Choice of the best roses for a small amateur rosary." "The best roses introduced in 1907 and 1908." "Among the 300 roses recommended by the Society of German Rose Growers, should any be withdrawn or added?" "Which are the most desirable eglantines known to the trade in regard to resistance to soil and climatic conditions."

Certificates of Merit Awarded.—Among the new plants awarded certificates of merit at the Como-la-Reine exposition in Paris recently were: Campanula longistyle parviflora, Anthemis Madame Sander, Begonia Souvenir de Republique, Gypsophila elegans carmine, Viola cornuta Excelsior, Hortensias, Souvenir de Mme. Veuve Raouli, Mme. Legoux and La Perle, Begonias A. Billiard fils, M. Gorges Bellair and Princesse Nathaniel Gortschakoff.

Rose Herzogin Marie Antoinette (Grande Duchesse), hybrid tea of vigorous growth, broad healthy foliage, dark green shaded with red; long buds of a superb orange yellow, shaded with salmon and streaked with carmine, turning to old gold and deliciously fragrant; always perfect in form and the most free blooming of tea roses, beginning to bloom a second time in July and continuing throughout the season.

Ripening Roses.—A gold medal of 100 francs value has been offered to the horticulturist who will present a really efficacious means to hasten the ripening of roses at the end of the season and consequent early dropping of the leaves, without injury to the plant; this question of great interest to all dealers in roses was discussed at the congress of the Amis des Roses at Lyons in June.

Prohibiting the Sale of Artificially Colored Flowers.—A resolution has been adopted by several French horticultural societies, addressed to the Minister of Agriculture, urging the prohibition of the sale of artificially colored flowers under a law prohibiting business frauds. The minister has instituted an inquiry into the coloring matters used as to their possible poisonous effects.

Impatiens Balfouri.—A pretty annual of recent introduction; should be sown in the greenhouse very early as it germinates slowly. If planted out early in June it blooms freely from the beginning of July throughout the summer until frost; flowers bicolor, upper petals, lip rose, very pretty and carried well above the foliage. Foliage dark green above, pale green below.

Dwarf Polyantha Rose Erna Teschendorff.—Will be introduced this fall, and is a baby rambler with color approaching Gruss an Teplitz in depth and beauty and retaining this

Dreer's Special Offer of Araucarias

4911 Quincy Street, **CHICAGO.**

color in the open. It is predicted by rose growers who have watched it that it will supersede all the scarlet dwarf polyanthas.

New Roses Awarded Certificates.—The following new roses were awarded certificates of merit at the Temple Show this spring: Portia, large flowering hybrid tea, petals broad, color white and flesh pink. Sylvia, remontant rambler, producing clusters of pure white double flowers, of very agreeable fragrance.

Zinnia Elegans Robusta Grandiora Plenissima. — A new very double zinnia, is recommended for general culture as having in some degree thrown off the stiff and formal appearance of the old double zinnia, and still retaining the varied and brilliant colors of the species.

Begonia Tapis Rose (Pink Carpet).—Messrs. V. Lemoine & Son claim for this begonia all the qualities desirable for bedding, vigorous dwarf habit, large firm flower heads, well carried, of a fine rose color with salmon center, and great resistance in the open sunshine.

Cineraria hybrida grandiflora, Etoile.—Distinguished by its curiously rolled petals and star form, this cineraria unites the divers colorings of matador, old rose and their combinations, with profusion of bloom which have obtained already this year, a gold and a silver medal.

Rose Georges Dubosc-hybrid remontant. Ample very dark green foliage, large very beautiful flowers, fragrant, of a bright carmine red color; stem long, very stiff; plant exceedingly vigorous.

Miniature Variegated Pepper.—A decorative pepper with tiny fruits less than an inch in length which vary in color from sulphur yellow to bright red and last well when cut.

Double Daisy—Rosy white color, with tubular petals, recently fixed, is a Vilmorin Andrieux & Co. novelty, calculated to be a superb bedding or pot plant.

Agricultural Bureau Clash.

That the Bureau of Soils in the Department of Agriculture is promulgating in its bulletins erroneous teachings in regard to the continued fertility of the soil is the statement of Cyril G. Hopkins, chief in agronomy, University of Illinois, in an article entitled "Saving the Soil" in the City Farmer. He maintains that the soils are becoming rapidly exhausted but the Bureau of Soils is assuring farmers that this is impossible and that the fertility of soils is automatically renewed so that "the soil is safe for untold ages to come," and quotes from the bulletins issued by the bureau that the supply of plant food in the soil is permanently maintained by natural processes without the intervention of man, and that the restoration of the fertility removed by crops is never necessary. He writes: "These erroneous teachings of the Federal Bureau of Soils are ignored, opposed or ridiculed in Europe; they have been denounced by the official agricultural chemists of the United States, and they have been rejected by every land-grant college and state agricultural experiment station in America that has been heard from, and not supported by the published teachings of any one of the older scientific bureaus at Washington." The statements are issued to the farmers "in the face of the fact that there are millions of acres of land in our eastern states already exhausted by nitrogen, phosphorus or calcium to the point of agricultural abandonment." The possible enormous and irreparable damage of such teaching lies in the fact that if the present most common agricultural practices are long continued, even our remaining supply of good land will be utterly depleted. We are facing a crisis, Dr. Hopkins thinks; our country cannot remain prosperous if its agricultural resources decline; and they will decline if our farmers are taught that they can continue to take valuable chemicals from the soil without putting them back. The soil-robbing and land-ruin of this country have been due not only to the farmer's lack of knowledge but also his lack of profit; and the influential men of America should see to it that the farmer reserves for his produce a price sufficient to enable him to make substantial investments in the improvement of his own soil in permanent systems of agriculture.

London's Window Boxes.

White marguerites are the general favorites in London for window-boxes, but zonal pelargoniums run them close, the scarlet Vesuvius being an old favorite, writes the gardening contributor of the "Morning Post." Pink and white pelargoniums are also often used, and Cytisus racemosus, calceolarias, heliotrope, fuchsias, yellow marguerites, and nasturtiums, yellow, orange, and crimson, are employed on occasion. Musk is a splendid window-box plant; it spreads and grows so vigorously, bears its yellow blossoms for a lengthened period, and has a delicious perfume. There are many pelargoniums, notably among the ivy-leaved section, that are really much to be preferred to those of the zonal type, and have the advantage of trailing over the front of the box with a rich profusion of blossom. Then there are such plants as petunias, which have now been brought to the greatest perfection, and may be obtained in beautiful colors, shading from palest pink to deepest crimson and purple with exquisite fringed blossoms. Their freedom of growth is a welcome contrast to the stiffer habit of the pelargoniums and marguerites. Verbenas are also capital bloomers in a sunny window. It is well to observe that to get the best from all these plants they should be stopped in their early stages so that the lateral growths will afford ample flower and, what is quite as important, so that the base of the plants may be clothed with foliage. Two of the best ivy-leaved pelargoniums are Madame Crousse (pale salmon) and Souvenir de Charles Turner (glowing rose-crimson). Campanulas, again, are most valuable for the window-box, one of the most charming being C. isophylla alba, a plant often grown in pots in cottage windows, which makes long, trailing growths thickly studded with large, pure white flowers. C. muralis major or Portenschlagiana is another fine campanula, very free blooming, with rich purple blossoms.—Journal of Horticulture.

Plants in Dry Air.

One instinctively reasons that in a warm climate almost any plant should be able to grow if given sufficient moisture, but according to a writer in Plant World there are other factors that may limit growth. In the warmer parts of Arizona the extremely dry air may call upon the plants for moisture faster than the roots can supply it and in consequence the leaves wilt and become "fired" at the tips. In the hottest parts of Arizona neither rhubarb nor horseradish will grow and the same is true of many of our common plants including the dandelion and plantain. Even corn, which farther north is reputed to love hot weather, fails to make a crop in Arizona, though freely irrigated, if planted late enough to be overtaken by the heated term with its dry air. Many of the plants of more northern regions which cannot survive in full sunlight grow very well in lath houses. The reason they cannot stand the full sun is because their leaves are not protected by an epidermis of sufficient thickness. One has but to recall the typical sun plants of the tropics to see that all of them have coarse heavy foliage from which moisture does not readily evaporate.—The American Botanist.

THE GEO. WITTBOLD CO., EDGEBROOK, CHICAGO, ILL.

A Chat About Gardens.

Children should never be allowed to pluck flowers, even in the field and hedges, merely to throw them aside; they should be early taught reverence for this floral beauty which is around them, and never be permitted wantonly to break down boughs or branches, or fill their laps with buttercups and daisies only to leave them withered in the sun, discarded and forgotten.

The young should cherish their flowers as wisely as, and more tenderly than, they cherish their gold or silver pieces in their money boxes. The exquisite beauty of even the humblest blossom can only be appreciated by the eyes which gaze on it with attention and affection. If the wild thyme, or the shepherd's purse, or the cuckoo's eye, or any one of the tiny blossoms of the sward and hedge-row were but as rare as sapphires are, the whole world would quarrel for them; but nature has sown these little treasures broadcast with lavish hand and scarcely any one is grateful.

The garden is a little pleasure of the soul, by whose wicket the world can be shut out from us. In the garden something of the golden age still lingers; in the warm alleys where the bees hum about the lilies and the stocks, and also where the lime leaves and the acacia flowers wave joyously as the west wind passes.

A true lover of a garden counts time and seasons by his flowers.—WILLIAM F. CURTIS JR. in The Chicago Tribune.

CLIMBING
White Maman Cochet

The most valuable acquisition to our Climbing White Roses in the past few years is Climbing White Maman Cochet. Identical with the older variety in size, form and color it has further proven to be one of the most profuse and continuous bloomers, strongest growers, of clean habit, glossy foliage and the flowers are borne on long, stiff, straight stems. These excellent points together with its freedom from mildew make it one of the most noteworthy additions to that class of Roses of which there is never a surplus—Hardy, White, Everblooming Climbers.

With practically 50 years experience and the handling of millions of Roses we are always careful in recommending new varieties, but we have no hesitancy in emphasizing everything we claim for **Climbing White Maman Cochet.**

We offer a limited stock of hardy field-grown plants that will be ready January 1, 1912, at **$1.00** each or **9.00** per dozen. Orders filled strictly in rotation.

The E. GILL NURSERY CO., WEST BERKELEY CALIF.
WHOLESALE ROSE GROWERS.

Iron Sulphate Does Not Kill Dandelion.

In spite of the beauty of their bright blossoms in early spring, dandelions are regarded with disfavor by practically every land-owner. Their rapid growth, crowding out the grass, prevents the development of an even sward; and their coarse leaves, unsightly flower-stalks and fuzzy tops serve as unseemly decorations for the ideal lawn. They have been fought, and usually with slight success, wherever they have appeared in dooryards, parks or boulevards. Digging them up is tedious and disheartening; for their abundance makes it no small task to cut them out even on a few square yards, and unless cut very deeply, new crowns form and the owner's labors result only in an increase in the numbers of plants. In tests at the New York Agricultural Experiment Station, according to Bulletin No. 335, two plants were cut off repeatedly, below the crown, before any of the new leaves were four inches long; yet one plant died only after seven cuttings, the other after eight.

In other parts of the country, spraying with iron sulphate (copperas) has been reported successful in controlling these lawn pests; so that it was with high hopes that an experiment along this line was started on the station grounds. A 10-foot strip about 100 feet long of blue-grass lawn was sprayed six times during the summer of 1909 with iron sulphate solution containing 1½ pounds of the chemical in a gallon of water, the sprayings being about four weeks apart and made, as far as possible, under conditions thought best adapted to kill the weeds. Success was not reached that year; so in 1910 the sulphate was increased to two pounds to the gallon, the applications were made two weeks apart, and in three treatments the strip was covered twice, spraying from different directions.

By the end of June, six treatments had been given and the effect on the grass of the lawn, with checking of growth by drouth, made it unsafe to spray longer. At this time 1,085 living dandelion plants still remained on the thousand square feet of sprayed lawn; few less than on the untreated lawn beside the strip. The spray blackened the dandelion foliage, so that the first impression was that the treatment was effective. It did retard or prevent blossoming; but it did not destroy the roots. The application of the copperas also made the grass foliage black and unsightly, though this effect usually disappeared before the next spraying. In no way, however, can spraying with iron sulphate be considered a success in removing dandelions from lawns in New York state.

Building Propagating Bench.

ED. AMERICAN FLORIST:

Will you kindly inform me of the best manner to build a propagating bench? Would it be advisable to build the bottom of brick? H. H. T.

Indiana.

Answering the inquiry of "H. H. T.," perhaps the best propagating bench would be some of the forms of concrete benches. Our own custom is to use a bench made of pecky cypress about six inches deep. In the bottom of this we spread about two or three inches of moderately fine crushed stone and place the sand above this. A layer of bricks in place of the crushed stone would do as well, perhaps better. The main thing being to have sufficient material below the roots which will drain well and yet hold some moisture so that the heat from the pipes underneath will not dry the roots of the cuttings too rapidly. We have found nothing better than tacking muslin around the bench to retain the heat when necessary to give bottom heat—the same being drawn up when the temperature in the sand reaches the right point.

By all means have the propagating bench detached so that the workman can approach it from every side. A five-foot bench having a walk on each side can be worked very rapidly. The advantages of the detached bench are that it is easier to control the bottom heat, more effective watering of the cuttings can be done and it is much easier to insert the cuttings. Undoubtedly in almost all cases a larger percentage of cuttings will root where the bench can be approached from both sides and where the bottom heat can be let out from underneath the bench from both sides than in a bench placed against the side of the house..

W. N. RUDD.

MILWAUKEE, WIS.—The C. C. Pollworth Co. have taken a ten year lease of the building on the corner of Oneida and Market streets. The building is being remodeled and a conservatory and show room erected in the rear.

THE HOME OF ARAUCARIAS

Araucaria Excelsa, Robusta and Compacta Our Specialty.

You will never be sorry. It will pay you well. Do it now, and lay in a stock of Araucarias. Every day is valuable to you, because they grow into money for you.

Araucaria Excelsa Our Specialty.

Warning—Don't be deceived. Now, as well as for the last twenty-five years, we hold the ground as leaders in importing, growing and shipping of our specialty, the Araucarias.

Araucaria Excelsa, Robusta compacta, Glauca, and Palms, etc. Florists, you all know we are leaders for the last 25 years in importing, growing and shipping of this so well known evergreen decorative plant, the **Araucaria,** more in favor than ever, from Atlantic to Pacific Ocean. To every florist our Araucarias is interesting, therefore no argument is needed for our goods. We know what our customers need, therefore we have provided and set aside special specimen plants, Spring 1910 importation, for lawns, porches, verandas, bungalows, private summer residences, the hotels and boarding houses on the seashore and elsewhere. This plant is one of the most desirable evergreen decorative plants adopted for this above mentioned purposes. For decorative purposes, in connection with palms, they will make a fine display.

Araucaria Excelsa, raised from top cuttings, 6-7 inch pots 4 to 5 years old 5, 6 and 7 tiers 25, 28, 30, 35, 40-in. in height, $1.00 $1.25, $1.50, $2.00 to $2.50 each

Araucaria Excelsa Glauca and **Robusta compacta,** 6-7 in. pots, fine bushy plants ....$1.25, $1.50, $2.00 each

Araucaria Excelsa, new importation, out of 5, 5½, and 6-in. pots, 2 to 3 years old, 3, 4 and 5 tiers, 10, 12, 14, 16, 18 and 20 inches high 40c 50c 75c and $1.00 each

Robusta Compacta Excelsa Glauca, 5½ and 6-in. pots ....$1.00 to $1.25 each

Kentia Belmoreana, 4 year old, 30 to 35 inches high, $1.50.

Kentia Forsteriana, 4 year old, 30 to 35 inches high, $1.50.

Kentia Forsteriana, 4 year old, 24 to 26 inches high, 75c to $1.00.

Kentia Belmoreana, 4 year old, combination or made up of 3 plants, 26 to 28 inches high, $1.00, $1.25 and $1.50

Kentia Belmoreana, combination or made up of 3 plants, 3 year old 24 to 26 inches high, 75c to $1.00

Kentia Belmoreana, 4 year old, 26 to 28 inches high $1.00 to $1.25.

Kentia Belmoreana, 4-in., 25c, 30c to 35c.

Cocos Weddeliana Palms, made up of 3 plants, 4 to 5-in. pots, 30c, 40c and 50c; 3-in., 15c, 18c and 20c.

Cycas Revoluta or Sago Palm, the genuine large and long-leaved variety, imported direct from Japan 6-7 in. pots, 5 to 15 leaves to a plant 12c per leaf

Areca Lutescens, 3-in. pots, made up, 15c, 18c and 20c; 4 in. pots made up 25c, 30c and 35c.

The above is equivalent to an insurance upon 35,663,440 square feet of glass.

The total receipts for the year ending Aug. 1, 1911, and including last year's balance, as per Treasurer's report, have been $53,378.87.

The total exenditures, as per Treasurer's report, have been $43,132.08.

The cash balance on hand is $10,246.79, of which $8,700.60 belongs to the Emergency Fund and $1,546.19 to the Reserve Fund.

The Reserve Fund now amounts to $26,046.19, of which $24,500 is invested in excellent securities and $1,546.19 cash in hands of the Treasurer.

The amount of interest collected on Reserve Fund investments for the year is $1,035.00. The amount of interest collected on bank deposits for the year has been $181.13.

Losses representing a breakage of 219.231 square feet of single thick glass and 144,395 square feet of double thick glass have been paid during the year.

1,650 losses have been adjusted since the organization of the F. H. A., involving a total expenditure of more than $217,000.00.

The number of members is 1,616.

The only liabilities of the Association are a few small losses which are unadjusted.

The following table shows losses reported to the Secretary for the past twenty-four years and number of claims paid.

STATES	No. of hail storms from June 1, 1887, to Aug. 1, 1911.	No. of losses paid from June 1, 1887, to Aug. 1, 1911.	No. of hail storms during year ending Aug. 1, 1911.	No. of losses paid during year ending Aug. 1, 1911.

The feature of the year was a gigantic hailstorm which was destructive from Webster Grove, Mo., to Edwardsville, Ill., and which damaged greenhouse structures over a space of three miles wide by forty miles long.

Baltimore, Md., and Staunton, Va., were also visited by storms of exceptional severity.

Notwithstanding the levy of two Assessments during the past year the increase in amount of glass insured is about 1,000,000 sq. ft. over last year's report.

JOHN G. ESLER, Secretary.

To balance on hand August 1, 1910	$ 1,585.45
To total receipts for year ending August 1, 1911	51,793.42
	$53,378.87
Cr.	
By losses paid August 1, 1910 to August 1, 1911	$30,661.24
By expenses	3,470.84
By investments	3,000.00
Miscellaneous	6,000.00
By balance on hand	10,246.79
	$53,378.87

Signed, JOSEPH HEACOCK, Treasurer.

I have this day compared the accounts of Secretary and Treasurer of the Florists' Hail Association and found them to be correct, and the securities belonging to the reserve fund are intact and are deposited with the Jenkintown National Bank.

ALBERT M. HERR, Auditing Director.

Destroying Rats.

Rats are sometimes very troublesome in greenhouses and they are very difficult to catch or poison after they have fed on green food during the winter. The following from a correspondent in East Africa in the Consular Trade Report describes a method pursued in Java: M. de Kruyff, of the Agricultural Bureau of the Dutch Indies at Buitenzorg, Java, has published an interesting article on the destruction of rats. The various contagious diseases recommended for this purpose have been found useless in the tropics and have not always proved effective even in the temperate zone. Hence, De Kruyff's experiments will be of general interest. After working four years with numerous viruses without succeeding in creating an epidemic or killing a single rat, De Kruyff obtained more encouraging results by employing carbon bisulphide in the following manner: All visible rat holes were first stopped with earth to ascertain which holes were inhabited, for the inhabited holes were found reopened on the following day. Half a teaspoonful of carbon bisulphide was poured in each of these holes, and after waiting a few seconds to allow the liquid to evaporate the mixture of vapor and air was ignited. The result was a small explosion, which filled the hole with poisonous gases and killed all the rats almost instantly. A were opened after the operation. The pound of bisulphide is sufficient for more than 200 rat holes; 131 dead rats were found in 43 holes which correspondent states further that he has had satisfactory results in exterminating porcupines by this method.

WORCESTER, MASS.—The Worcester County Horticultural Society held a very large and good exhibit, of annuals and perennials, August 3.

GLENVILLE, CONN.—A large extension is being built on Richard Sutro's greenhouse. When completed it will be one of the largest in this section.

ALBANY, N. Y.—Among the many appropriations passed by the New York Legislature that were vetoed July 31 by Governor Dix was that of $20,000 for the construction of new greenhouses for floricultural purposes at Cornell University.

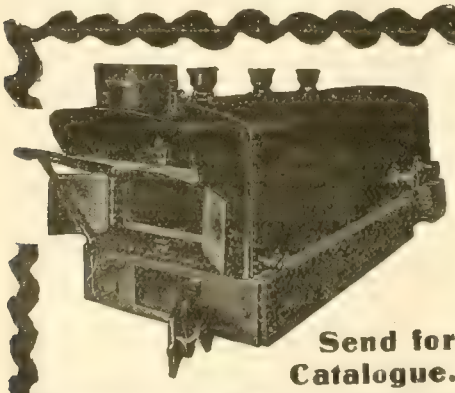
What the Users Say



KROESCHELL BOILER DURABLE.

"Have 20,000 sq. ft. of glass, Can keep 60° in coldest weather. Had one boiler 15 years, only expense one set of flues. Kroeschell boiler is so satisfactory that I do not care to try any other.

JACOB PHILLIPS, Rogers Park, Chicago.

P. S. Mr. Phillips is installing a No. 13 Kroeschell, 1910 model, for his new range.

SEEDS.

Now listen! Our bread and butter depends on the pansies we grow. We ship our blooming plants hundreds of miles to 100 cities and get double the market price everywhere. There was but one possible way to do this: we grew our own strain—our own seed. So it is that our Mastodon Pansies are unequalled. If you sow Mastodon Pansy seed you won't be wonderinge who will get your next order. 1 oz., $9; 1-12 oz., $1. Steele's Mastodon Pansy Gardens, Portland, Oregon.

Seeds, onion, peppers, early tomatoes, cauliflower, beans 97 var.; melons, celery, egg plant, Federico C. Varela, Teneriff, Canary Islands, Spain.

Seed, onions, lettuce, sweet peas, carrot, celery, leek, mustard, parsley, parsnip, radish, salsify. C. C. Morse & Co., 48-56 Jackson St., San Francisco, Calif.

TROUBLE TALKS

The Trouble Man Has Returned with Ten Brand New Ones

All of Them Good, But Some Better Than Others

RETURNED — because I said I would.

Returned — because I want to get some of these heating wrinkles out of my face and keep any more from getting into yours. It seems only day before yesterday when I said "so long" and promised to have some choice bits of Trouble Talk ready for you early in the spring.

So here I am — a little late, but with nine and maybe ten fine bundles of trouble that are just bubbling and sizzling to get busy stirring up more trouble. That is, more trouble for me—and less for you — and trouble is what I am looking for, you know. One of these trouble bundles may contain something about you. If it does, keep good natured — it's the best thing in the world for real trouble.

Here's a list of the bundles and what's marked on the outside of them. If any sound like your case, and you rather we wouldn't "tell the folks about it in print," say so, and we won't. But step lively, for next week, unless we hear from you, we will unwrap bundle Number One, and the rest will follow thick and fast.

No. 1. Tells of a certain chimney (not concrete) and the considerable bunch of money that went up it.

Life-like sketch of chimney will be shown—perhaps some of the money.

No. 2. This is the truth about a certain grower (you know him) and how he sold himself one of our boilers.

There may be a sketch of the boiler—but probably not of the grower.

No. 3. Sort of an animal talk, it being mainly about boilers—the half horse, half alligator kinds.

Sketch of alligator by the office boy. The boiler done with a quill pen by the Trouble Man himself.

No. 4. It has to do with the difference between grate surface and fire surface and how some get fooled.

This does not mean you; therefore the sketch will show up some facts plainly and pointedly.

No. 5. Principally concerning boiler dampers—why so many are fooled by them and occasionally damn them.

Sketch will show two kinds of dampers. The damns will be left to your imagination.

No. 6. It being the sad case of Tom, a man you all know, and whom some of you have employed.

Sketch will show Tom in his present job. Two or three that have seen the sketch say it looks like themselves—and maybe it is. Perhaps it may even look like you.

No. 7. A swing talk — it shows the difference between "Running Under" and "letting the old cat die."

The sketch will have nothing to do with cats. The swing will be the one up in the orchard.

No 8. On backing up, or the man who starts wrong.

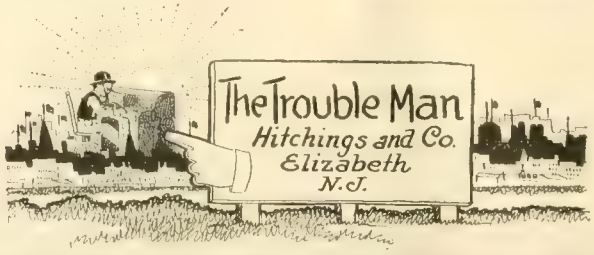
Sketch of wrong start — also right one.

No. 9. It's about camping out—and what it taught me about a boiler.

Sketch will show the camp and the camp lesson.

No. 10. The difference between $4,500 and $5,206. Or what the difference really is.

Sketch of some close figuring done with a piece of chalk.



SAVE LABOR AND EXPENSE BY THE USE OF

Berwind Smokeless

COAL

From Pocahontas and New River Mines of

Berwind-White Coal Mining Co.

Offices: 1805 Peoples Gas Building, CHICAGO.

Telephone Randolph 3901

Chicago Coal Market.

The local coal dealers report a very brisk market for the last few weeks, due chiefly to the cool weather which we have had lately. This drop in temperature seems to have reminded many that winter with snow and frost is soon to follow. Many retailers, manufacturers and general consumers are therefore now making it their business to stock up for the cold days. The increased demand upon the coal market by the various consumers has brought a temporary shortage in coal, caused by the shutting down of many mines during the dull season. Not expecting an early demand for coal the dealers were caught with but a small supply to meet a large demand. From general indications all the mines will be running at their maximum in a few weeks, when the miners and dealers will be able to meet all orders promptly. This increase in demand has caused an advance in prices both at the mines and in Chicago, from information received there will be an advance September 1. Those greenhousemen with economy as a password will order their coal before this date and avoid the increase which is soon due.

Notes of the Chicago Coal Trade.

The Black Gem Coal and Coke Company, with offices in the Old Colony Building, report an increased demand for their high grade block coal. For the benefit of those who have not used their coal they will, upon request, furnish full data and particulars of same.

D. R. White of the Berwind-White Coal Mining Co., Chicago, Ill., is advising his many greenhouse coal buyers that, owing to the expected advance in the price of smokeless coal within the next thirty days, it would be to their advantage to do some early purchasing. To those who have not had the pleasure of trying the Berwind Smokeless coal, from the famous Pocahontas and New River mines, he would be pleased to furnish full particulars and prices, concerning his high grade florists' coal.

R. C. Whitsett, president of the R. C. Whitsett Coal and Mining Company, with offices in the Ellsworth building, Chicago, reports that his company, which has made a specialty of catering to the greenhouse trade for many years, is keeping astride with the pace set by the growers; up to date their business shows a gain of more than 40 per cent over that of last year.

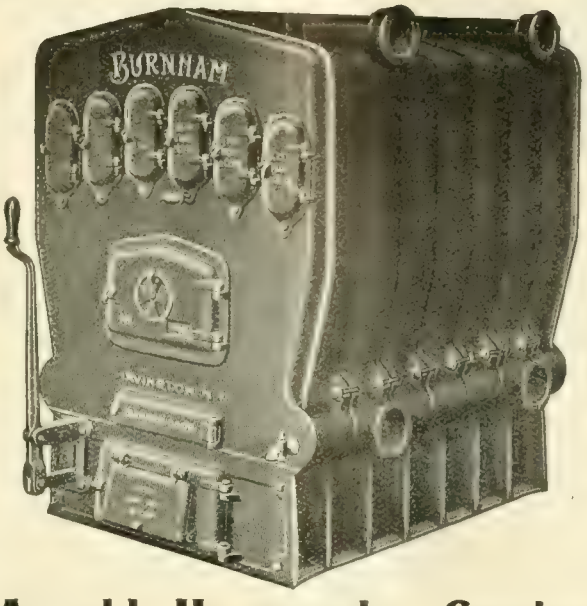
SADDLE RIVER, N. J.



What Arnold Hammerle, Gardener for F. W. Senff, Newburg, N. Y., Says of

The Burnham

Mr. Senff has an unusual but practical arrangement in his greenhouse. The house is curved eave, 50 ft. long and 33 ft. wide. Seven feet from each side is a partition running the length of the house, leaving a general greenhouse in the center, 18 x 50.

"At first didn't like the boiler—it cooled off too quickly and started up too slowly—couldn't seem to heat the houses—told the boss the houses needed more pipes. Had to come down and fire up twice during the night. Then I did some hard thinking and began to experiment. Soon I found out the boiler was all right and I had been all wrong. Now I have found out how to work it—coal up at six at night, fix the drafts just right and never do a thing to it again till the next morning.

"When the boss came back from the south I told him piping was all right—boiler all right—Lord & Burnham all right."

A Greenhouse Group with a Sequel

This is the U-Bar the bar that make U-Bar Greenhouse the Famous Greenhouses They Are.

This little glimpse gives you only a suggestion of the beautiful setting of this unusual range. The photo was taken directly from the residence terrace, looking down the sunken grass plot towards the rose gardens. On the terrace is a choice U-Bar palm house of classic design which is connected to the residence conservatory by a loggia that is glass enclosed in the winter. The palm house leads directly into the greenhouses themselves. A very unusual grouping you see—one that, because of its close association with the residence, demanded a construction combining both simplicity and ornamentalness. The U-Bar is strictly that kind. That's why it won out. **And thats the sequel.** The catalog shows numerous views of the entire layout. Send for it.

PAINT-

What Do You Know About It?

CAN you tell by the way it "mixes up" if it's pure lead?
Can you tell by the way it lays if it's pure linseed oil?
Can you detect marble dust or iron pyrites in the mixed paint you buy?
Can you tell whether it's part fish oil or all linseed oil?
Can you tell by the way it doesn't wear what the matter is?
That's right, own up—of course you can't tell.
All you know is that your paint peels, cracks, chalks off, or—just plain—doesn't wear.
Let's get down to plain everyday facts.
—Pure white lead today costs 8 cents a pound.
—Pure linseed oil today costs $1.15 a gallon.
—It takes 68 pounds of lead and 3 gallons of pure oil to make 5 gallons of pure mixed paint, or $1.60 a gallon.
To this must be added the cost of mixing it and a fair profit, which makes it cost $1.75 a gallon.
$1.75 is our price for more than 10 gallons.
$1.80 for less than 10 gallons.
So, you see, it is self-evident that any greenhouse paint that is offered to you for less than $1.75 is open to suspicion. There is certainly something crooked somewhere.
But there is more to paint than what it is made of—there is the very important point of **how** it is made. The **how** has a good bit to do with its laying easy and how far it will go.
We have just printed a little circular on this paint question. It tells some most convincing facts right hot off the griddle. Send for it.
Take time to find out what kind of paint you are spending your good money for.

THE BALTIMORE CONVENTION

Continued From Issue of August 19.

Thursday's Proceedings.

The fourth session of the convention was called to order promptly on schedule time as provided for in the constitution governing election of officers, and balloting for officers to serve for the ensuing year was at once begun. At 1:00 p. m. the ballot not being completed an adjournment was taken until 6:00 p. m., at which time President Asmus resumed the session, and called for report of committee on state vice-presidents, which was read and on motion approved and a vote of thanks extended to the different state vice-presidents.

President Asmus referred to the sad occurrence of the taking away by death of one of the oldest and most beloved members, John Birnie, and announced that he had named a suitable committee to prepare resolutions appropriate to the occasion which he now desired the secretary to read, requesting all to remain standing meanwhile as a token of respect to the departed brother.

The convention rose while the report of the committee was read in a feeling manner by Secretary Dorner. The report was unanimously adopted by rising vote, the convention at the suggestion of President Asmus remaining standing for an interval of time in silence.

F. R. Pierson was recognized by the chair to present the following resolution which he stated was to give further effect to the good work done by our Washington representative, W. F. Gude:

Whereas, It is a well known fact that for years the various express companies now operating over the railway lines of the United States have been declaring high dividends on watered stock, necessitating their charging the public extortionate rates on the small package business carried by them; and

Whereas, The mail service of this country if developed as it should be would act as a regulator of express rates and reduce them to a reasonable figure; and

Whereas, The express companies, seeing the handwriting on the wall and realizing that the intelligent merchants and others of the country have become enlightened to the true state of the conditions existing have been through their lobby for years fomenting opposition to the establishment of a parcels post such as other countries who compete with us now enjoy; and have enlisted in such opposition various retail trades and others who think that a parcels post would help the mail order houses and department stores, whereas in fact it would stimulate the entire commerce of the country, and the loss to retailers would be offset a thousand times in the general increased prosperity; and

Whereas, The express companies and others have scattered broadcast the idea that the postoffice department would be run at a loss were the postoffice business increased through the establishment of a parcels post, whereas on the contrary its revenues would be greatly increased provided proper rates of charge for the railway service were enforced; and

Whereas, In every foreign country communication by mail is so much appreciated that the people of Germany and other countries have advantages in a parcels post such as we have never had here; therefore, be it

Resolved, That our representatives in congress be personally written to or communicated with by each and every one of our membership throughout this United States, and urged to enact a parcels post at the earliest possible moment that shall place our citizens on a footing with foreigners, and that shall furnish an effective regulator of express rates in this country to the end that the entire manufacturing and commercial business of the country may be stimulated and our domestic commerce increased beyond present conception of its volume. The need for a parcels post is urgent and pressing and congress can serve the country in no more effective way at this time.

On motion of F. R. Pierson the foregoing were unanimously adopted.

In the absence of H. H. Whetzel, plant pathologist, his report was read by title and on motion ordered printed in full in the proceedings of the so-

SOCIETY OF AMERICAN FLORISTS AT BALTIMORE, MD., AUGUST 15-18, 1911.

ciety. Through Secretary Dorner, the superintendent of trade exhibit, Mack Richmond reported that the amount received from sale of space amounted to $3,796.00, which statement was greeted with applause. It was then ordered that the committee on tariff and legislation be instructed to draft a letter pertaining to the resolution adopted with regard to the parcels post, a copy of the same to be sent to each member of the S. A. F.

The secretary read the report of the judges of trade exhibit, which on motion of F. R. Pierson was adopted and ordered made a part of the printed records of the meeting.

President Asmus announced that he had named J. C. Vaughan, F. H. Traendly and W. J. Stewart a committee on final resolutions of thanks for courtesies, the report of which committee would be made at the close of the session. The chair then invited any member desiring to do so to introduce any new business. None responding, the amendment to the constitution proposed with reference to annual dues, initiation fees and life membership was considered, and the proposed amendment was lost by a rising vote. The report of the auditing committee of the National Flower Show was then read by W. N. Rudd and was adopted.

Election of Officers.

P. Welch read the report of the tellers of election, as follows: Your committee appointed to receive, sort and count ballots for officers of the association for the year 1911-1912 beg leave to make the following report:

For president:

Total number of votes cast	385
Richard Vincent, Jr.	215
J. K. M. L. Farquhar	170

For vice-president:

Total number of votes cast	384
August Poehlmann	217
H. E. Philpott	167

For secretary:

Total number of votes cast	383
John Young	228
David Rust	155

For treasurer:

Total number of votes cast	355
W. F. Kasting	355

On constitutional amendment as to change of time and date of holding annual meetings:

Total number of votes cast	350
Against the amendment	196
In favor of the amendment	161

Mr. Farquhar immediately moved that the vote for Mr. Vincent for president for the ensuing year be made unanimous, Mr. Farquhar returning his acknowledgments to the friends who had voted for him and for the interest manifested in the election, but rejoicing in the success of the winning candidate. Similar action was taken regarding the election of Mr. Poehlmann as vice-president, on the part of Mr. Philpott. The various candidates who had received the majority of all votes cast as reported by the tellers were then duly declared elected to the respective offices named for the ensuing year by President Asmus, amid applause. Also that the amendment referring to change of date of annual meetings had been voted down.

Benjamin Hammond presented the report of the committee on school gardens and requested that it be read by title and ordered printed in the proceedings, which was on motion duly authorized, and so ordered.

Life Membership Badge.

The following report, submitted by Mr. Farquhar, was read and on motion referred to the discretion of the executive committee with power to act, viz.:

Your committee has given much thought to the subject of a badge that would be emblematic, artistic and convenient to represent life membership in the S. A. F.

Your committee recommend that the badge be round in form, that the present leaf emblem of the society appear in relief on the surface, with the letters S. A. F. placed obliquely across the leaf, and the words "Life Member" on the ground, around the upper side, that is over the leaf.

A sketch of the proposed badge accompanied the report, which in a general way showed the design recommended by the committee.

President Asmus announced that he had appointed as committee on recommendations in president's address the following: P. Welch, F. R. Pierson, W. N. Rudd, W. F. Kasting, F. H. Traendly. The report of this committee was presented verbally by Mr. Rudd, and on motion of Mr. Hill, seconded by H. E. Bunyard, was adopted by rising and unanimous vote.

The report of the committee on final resolutions was then read, and on motion unanimously adopted, and with three cheers and a tiger, which were enthusiastically given for Baltimore, the convention adjourned sine die.

New and Good Things at the Convention.

FOR THE RETAIL DEALER.

There has been so far but one perfect exhibition hall for the convention display, and that is the Armory in Baltimore. On entering this immense building the magnitude of the display made every one pause and wonder at the vast expanse, and as they gazed about the exclamation was always one of surprise and approval of the whole arrangement. It was by far the best staged exhibition the society has ever had.

There was much to interest the retail florist; in fact, fully two-thirds of the space was filled with goods solely for their inspection. Ribbons which are so necessary to the stock of every flower shop were seen in great variety, many new weaves, patterns and color effects being shown for the first time. New gauzes in figured patterns, waterproof and otherwise, showed from the numerous offerings the popularity of these filmy goods.

Lion & Co., New York, had a large variety of patterns of chiffons and gauze ribbons; a lace trimmed chiffon handkerchief for bouquets and corsages was very pretty.

Wertheimer Bros., of New York, displayed an endless variety of corsage ties which were very attractive. A feature was a corsage shield called the Werbro. This is to protect the dress from stain from the stems of the flowers and looked useful and effective.

Schloss Bros., of New York, offered ribbons of all qualities and colors stamped with gilt and silver script letters with any inscription, which looked like standard goods for the flower shop. A rubberized piece of silk with a button and piece of thread attached was to be used to cover the stems of corsages; when the stems were wrapped the thread was wound round the button, which kept the covering in place.

The Pennock-Meehan Co., Philadelphia, Pa., and New York, were strong in high-class tinted or chameleon colored ribbons, in shades to harmonize or contrast with any colored flower. Almost the entire stock is dyed and woven to their order. Many corsage ties with beautiful shadings were seen in quantity. Special corsage pins were also a feature. A Double White Kil-

SOCIETY OF AMERICAN FLORISTS AT BALTIMORE, MD., AUGUST 15-18, 1911.

larney rose of great substance for this time of season was also exhibited by this firm, who are introducing it for J. A. Budlong & Sons Co., of Providence, R. I. It appears to be the best thing yet in white roses.

Reed & Keller, of New York, had an expanding lattice pot cover which looked like a good thing. A new wicker vase with zinc lining on the order of the horn wicker floor vase, except that it was shorter and wider, looked very practical.

The display of H. Bayersdorfer & Co., Philadelphia, Pa., was enormous and comprised a full line of all standard goods. A wicker lamp stand and shade for table use had a basket foundation intended for cut flowers, which, when filled and illuminated by the electric light of the lamp, should make a very pretty ornament. The ammobium-statice wreath was a striking novelty and should have a great sale. A half basket to fit against a mirror is shown for the decorators.

J. G. Neidinger, Philadelphia, presented a novelty in the ivory toned wicker baskets, of which he had a fine variety, many of them made up with varied colored artificial flowers to show that they seemed to harmonize with all colors. They look like good sellers. Prepared magnolia leaves made up into wreaths and decorated with flowers were also a feature. Japanese chenille looks almost like red immortelles when made up and as the immortelles have skied from 50 to 75 per cent this will be a welcome addition for Christmas work.

Several fine displays of fancy pottery were seen. S. A. Weller had a new figured clay pot that looked almost as good as a fancy jardiniere. A line of hanging baskets in clay were very pretty and looked as if they would move quickly. The Roseville Pottery Co., Zanesville, O., presented distinct novelties in wall pockets, new jardinieres and stands and brass open holders for jardinieres that will make great show pieces.

In choice plant stock there were many fine exhibits. The Julius Roehrs Co., Rutherford, N. J., showed ardisias that were wonderfully filled with green berries which should show splendidly when colored up. Well budded camellias was another of the choice things on their tables.

The palm displays of the Lemuel Ball Estate, Wissinoming, Philadelphia, Pa., Charles D. Ball, Holmesburg, Philadelphia, Pa., and the Joseph Heacock Co., Wyncote, Pa., while not large, show the plants of their stocks to be in the very best possible condition. Philadelphia is certainly the center of the palm industry. Charles Eble of New Orleans, La., exhibited Phoenix Roebelenii outdoor stock, which, if it can be brought to such perfection by this culture, should make it saleable at a popular price.

J. A. Peterson, Cincinnati, O., showed Adiantum Farleyense and Asplenium nidus avis, which were very well grown and should be great for basket work.

The Robert Craig Co., Philadelphia, Pa., were very strong on crotons, highly colored stock, also Ficus pandurata, exceptionally well grown. Dracænas and arecas were seen in great shape, as were various sizes of very promising cyclamen.

The F. R. Pierson Co., Tarrytown, N. Y., had a collection of Nephrolepis ferns which was magnificent, prominent amongst them being fine specimens of the N. Harrissii, one of the very best.

Knight & Struck, New York, with promising heather, and Lager & Harrell, Summit, N. J., made interesting displays that will call them to mind later on.

The display of Henry F. Michell Co., Philadelphia, Pa., was complete, tools and requisites being very noticeable, particularly a new hand cultivator or hoe.

New varieties of gladioli offered by Arthur Cowee, Berlin, N. Y., was an ideal white, pure as snow with a large flower called Rochester White. When offered in quantity it will undoubtedly be in the hands of every grower. Cowee's Peace is also a fine white with a pink throat. La Luna is also a striking novelty.

Jones, the Holly Wreath Man from Milton, Del., showed holly wreaths and outside greens, such as magnolia leaves, boxwood and green moss, which were well displayed and very interesting to the city man.

Lord's frostproof plant box shown by the Lord's Frostproof Plant Box Co., Minneapolis, Minn., looks very good, and the folding boxes of the Edwards Folding Box Co., Philadelphia, Pa., and W. J. Boas & Co., Philadelphia, Pa., presented many features to interest the store men. There were many other matters of interest for the visitor, but the retail florist could spend a day very profitably among these exhibits which were so invitingly arranged for his inspection and see almost at a glance the very best and latest the markets of the world afford. K.

American Gladiolus Society.

The American Gladiolus Society held meetings at the convention hall, Baltimore, August 16-17. There was great enthusiasm displayed at the meeting and every one was much encouraged and considered the prospects very bright for the future of the gladiolus. The society adopted the scale of points recommended at the Boston meeting and will also arrange a color chart. The society will also offer its medal for competition at exhibitions of other societies.

ANNUAL MEETING.

The meeting was opened by President Hendrickson at 4 p. m., August 16, and President Asmus of the S. A. F. addressed the members in a speech of welcome, and predicted a grand future for the society, speaking from his experience as a florist, having had the opportunity to observe the great progress made by the gladiolus within the past few years. In mentioning the relationship of the A. G. S. and S. A. F., he said: "We want you equally as well as you want us."

Secretary Gage's report of the minutes of the March meeting was read and ordered to be placed on record.

President Hendrickson then addressed the meeting, and, on motion by J. C. Vaughan, his address was referred to a committee of three, to make suggestions from recommendations therein, and J. C. Vaughan, M. Crawford and A. Cowee were appointed by the president, and presented the following report:

"Your committee for consideration of your president's address recommends the appointment of the following gentlemen to act as a board of registry for examination and naming of varieties of gladioli offered for that purpose: I. S. Hendrickson, Arthur Cowee and Carl Cropp, to serve until their successors shall be appointed or elected. They shall formulate and put into use such rules for this purpose as they may deem best. Trials shall be made at such place or places as said committee shall deem best. The secretary of the society shall be ex-officio member of said board. All the work of the board shall be subjected to the approval of the executive committee of the said society.

"Your committee further recommends that the executive committee of this society be authorized to expend not to exceed $50 for the die for a suitable medal for the society.

J. C. VAUGHAN,
ARTHUR COWEE,
M. CRAWFORD

Treasurer Fuld read his report, which showed a balance on hand of $230.37. Financial Secretary Youell's report showed that there was still on the books to be collected for advertisements in the bulletins, and membership dues, $345.00, all of which he believed could be collected within a month.

The nominating committee reported a list of candidates for the several offices.

The bulletin committee's report was read by H. Youell and accepted, and it was voted that delinquent members be dropped from membership. After a discussion regarding the grading of sizes of bulbs for the trade, it was voted on motion of J. C. Vaughan that the American Gladiolus Society adopt the following as a general standard: First size bulbs, 1½ inches and up; second size bulbs, 1¼ inches to 1½ inches. Mr. Joslin recommended that the society adopt a chart to be used for describing the flowers of gladioli, and that this chart be printed for distribution. Prof. Beal said that such a chart was used at their trial grounds and that the society could have some of them. It was also recommended that a color chart be made for universal use. Motion that this question be laid over until Thursday's meeting was carried.

Mrs F. H. Traendly.

Winner of the Hochschild, Kohn & Co.'s Silver Cup at the Ladies' Bowling Contest at Baltimore, Md.

THURSDAY'S SESSION.

The meeting was called to order at 10 a. m., August 17, the first business being a lecture and report of investigation of gladiolus diseases by Mr. Fitzpatrick of Cornell university.

The election of officers resulted as follows:

Isaac S. Hendrickson, president.
E. H. Cushman, vice-president.
L. Merton Gage, corresponding secretary.
H. Youell, financial secretary.
Wm. Sperling, treasurer.
Arthur Cowee, A. T. Boddington, E. W. Fengar, executive committee.
Arthur Cowee, Leonard Joerg, Prof. A. C. Beal, nomenclature committee.

The report of exhibition committee read and adopted and it was moved that the awards committee be instructed to award prize for articles in bulletins without further action by society. Prof. Beal, in reporting the trials at Cornell, said that Prof. Craig was not able to be present at this meeting. It was voted that the complete report of the nomenclature committee be printed in bulletin No. 4. The nomenclature committee recommended that a committee be appointed to secure or have printed a suitable color chart for the society, and which shall, if deemed necessary, be copyrighted and sold, and also recommended that upon the reverse side of this chart there be printed such descriptions and details as would assist in deciding as to the value of a variety, aside from the color, which was adopted.

It was voted that the recommendations for certificating varieties and score card presented at the Boston meeting be adopted by the society. Prof. Beal was given a rising vote of thanks.

The following committees were announced by President Hendrickson: Membership: I. B. Hutchinson, Ralph Cushman, Geo. W. Parsons. Exhibition: H. Youell, B. Hammond Tracy, L. Merton Gage, J. B. McArdle. Press and bulletin: L. Merton Gage, H. Youell, Montague Chamberlain, J. C. Vaughan, M. Crawford.

Arthur Cowee announced that, through his efforts, the state of New York had given the society the sum of $1,000, to be used in the work at our trial grounds at Ithaca. Mr. Cowee was given a rousing vote of thanks. A vote of thanks was also extended to Mr. Fitzpatrick, and the authorities at Cornell, which was pleasingly responded to by Mr. Fitzpatrick. A vote of thanks was extended to the trade press, for the publicity given our society, and also to the S. A. F. for the use of our meeting and exhibition room. The meeting then adjourned.

L. MERTON GAGE, Sec'y.

PRESIDENT HENDRICKSON'S ADDRESS.

The first year of the American Gladiolus Society is past and gone to make history, either good, poor or indifferent, which, I will not attempt to pass judgment on. However, one year is hardly long enough to really accomplish much in what seems to me to be the two most important lines of work, namely: thorough trials of all varieties on the market and creating interest in and love for our favorite flower. While millions of bulbs are sold each year, it is surprising to find how many people there are in the country who are not familiar or acquainted with gladioli at all, and only comparatively few people have any idea of the splendor and glory of the finer varieties that have been brought out and introduced during the past ten years, but a beginning has been made, as the reports of the different committees will show. From a membership of 137 a year ago we have increased it to 172. This increase, we think, is remarkable, considering the number of horticultural societies scattered all over the country.

Our special meeting held in Boston at the time of the National Flower Show was well attended and much interest was manifested in the discussions. The attempt for an exhibit of cut blooms was a failure, as it was found to be about four weeks too early. The present exhibit will speak for itself. We are indebted to the officers and directors of the S. A. F. for the free use of the room in which the competitive exhibits are staged. We have issued three bulletins during the year, which have been a little more than self supporting. Personal observation during the present summer convinces me more than ever that there is work for this society to do, as there seems to be a craze at the present time for applying names to varieties. This is to be commended when the variety named has some merit, but when names are applied to varieties that are inferior to those varieties that have been in existence for years it seems time to call a halt. Then again there is no doubt whatever that a lot of varieties are being renamed by growers who are not familiar with existing varieties. It seems to me that a great deal of this confusion could be avoided if our society could establish a bureau of registration where

all new varieties could be submitted and passed upon before they are recognized as new varieties by the trade.

I think it would also be interesting if we could establish a list of 100 best varieties, and it might be well to establish a discard list to eliminate some of the kinds that have been superseded by later seedlings. I believe we can create a great deal of interest among local horticultural societies if the American Gladiolus Society would adopt some medal to be offered through the local societies for best exhibits of gladiolus blooms. A uniform medal could be made without a great deal of cost to our society, and I think it would accomplish much in the spread of interest.

In conclusion, I wish to express my appreciation of the honor in being the first president of the American Gladiolus Society and bespeak the same loyal support of the membership to my successor in office and predict a very useful and successful future for this society.

The awards for the premiums were as follows:

OPEN CLASSES.

Best 25 spikes of Gladiolus Kunderd's Glory H. F. Michell Co's. silver cup, John W. Pepper, Jenkintown, Pa.

Best six spikes Gladiolus of any white variety, M. Crawford's prize, J. Thomann & Son, Rochester, N. Y.

Best 10 varieties not on the market, three spikes of each, Peter Henderson & Co's. prize, H. W. Koerner, Milwaukee, Wis.

Best collection 10 varieties six spikes each, W. Atlee Burpee's prize, John Lewis Childs, Floral Park, N. Y.

Best 12 spikes Gladiolus Golden Queen, E. E. Stewart's prize, B. Hammond Tracy, Wenham, Mass.

Best vase of new seedlings not less than 25 varieties, B. F. White's prize, H. W. Koerner.

Best 25 spikes of any white variety, E. H. Cushman's prize, J. Thomann & Son.

Best vase of any named yellow variety, A. T. Boddington's prize, John Lewis Childs.

Best exhibit of standard named varieties, Gardeners' Chronicle cup, John Lewis Childs.

Best collection of 15 varieties, Stumpp & Walters' prize, John Lewis Childs.

Best center piece for dining room, W. L. Crawford's prize, Mrs. B. Hammond Tracy, Wenham, Mass.

Best vase of Gladiolus Niagara, Frank Banning's prize, B. Hammond Tracy.

Best exhibit of gladiolus in white and light dark blue and yellow hybrids, three spikes of each, H. H. Groff's prize, H. W. Koerner.

Best 100 spikes Gladiolus Augusta, Rowehl & Granz's prize, B. Hammond Tracy.

Best display of Gladiolus Kunderd's Glory, A. E. Kunderd's prize, J. W. Pepper.

Best 20 spikes Gladiolus Kunderd's Glory, A. E. Kunderd's prize, Vaughan's Seed Store, New York and Chicago.

An exhibition of gladiolus diseases was made by Plant Pathology Department of Cornell University, in charge of H. M. Fitzpatrick, instructor in the department, consisting of diseased bulbs, fungi in culture, charts, microscopes, etc.

AMATEUR CLASSES.

Best six named varieties, one spike each, Montague Chamberlain's cup, T. A. Havemeyer, Glennead, Long Island, N. Y.

Best vase Gladiolus America, John Lewis Childs' prize, T. A. Havemeyer.

Best collection of Primulas, type and hybrids, J. M. Thorburn & Co's. prize, T. A. Havemeyer.

Best collection of yellow named varieties, A. T. Boddington's prize, T. A. Havemeyer.

Best six spikes Kunderd's Glory, A. E. Kunderd's prize, T. A. Havemeyer.

Best 10 spikes each of a red, white and pink variety, Arthur Cowee's prize, T. A. Havemeyer.

For new variety Mrs. Frank Pendleton, Jr., L. Merton Gage, Orange, Mass., was awarded a first class certificate.

Work and Rest.

I ask not
When shall the day be done and rest come on;
I pray not
That soon from me the "curse of toil" be gone;
I seek not
A sluggard's couch with drowsy curtains drawn.
But give me
Time to fight the battle out as best I may;
And give me
Strength and place to labor still at evening's gray;
Then let me
Rest as one who toiled afield through all the day.

AUGUST F. POEHLMANN.

Vice-President-Elect Society of American Florists.

August F. Poehlmann.

It is not often, in these days when men are striving not only for wealth, but also for all the honors, that the selection of any of the prominent officers of the large associations is bestowed upon one who has made no effort for the position, but in the election of August F. Poehlmann of Chicago to the vice-presidency of the Society of American Florists the honor was entirely unsought and was as much a surprise to the recipient as to those of his city who remained at home, not being able to attend the convention at Baltimore. But it was none the less appreciated both by himself and the many friends of his home city, and they all feel that in this selection the society has obtained, as the one on whose shoulders will fall a great share of the arrangements for the coming convention, one of the ablest florists of this section of the country, and one who has shown by the accomplishment of what he has undertaken to have been endowed with wonderful executive ability.

August F. Poehlmann, although known to the florists throughout the land, is still in early manhood, having been born in Milwaukee, Wis., in 1869, and is therefore in his forty-second year. He early evinced a love for the culture of flowers and became interested in the flower business through the influence of his uncle, Fred Kuske of Boston, who later established a business at Niles Center, Ill. He afterwards sold flowers for Schiller & Mailander, peddling them around the city three times a week. In 1890 he entered into partnership with his two brothers, Adolph and John, having a capital of $90, and started the present plant at Morton Grove, Ill. This has grown so rapidly that it seems almost beyond comprehension, for today the plant covers over 2,000,000 square feet and has a valuation of more than $1,000,000. The plant is divided into two sections, the larger one, Plant A, in which is also located the offices of the concern, being under his closest supervision. The firm was early incorporated and he was chosen and has filled the office of secretary.

Mr. Poehlmann is no stranger to office, having served on the executive board of the American Rose Society for a number of years and as president of the society during the year 1908, and has also served the Chicago Florists' Club as trustee. He has a most beautiful home beside the administration building of the corporation, where he can almost always be found when not in the office or houses, unless with his family enjoying an automobile ride, of which he is very fond and an accomplished driver of the tonneau he owns, for he is a thorough family man, enjoying the company of his wife and three children, two boys and a girl, of which he is even more proud than the great greenhouse plant and beautiful flowers which they produce. The stock grown in this great establishment

is always of the first quality and there has not been an exhibition in the western country for the last decade that the Poehlmann Bros. Co. has not been a large winner and they have also won many premiums in the east.

Canadian Horticultural Association.

The annual convention of the Canadian Horticultural Association was held at Ottawa on August 8-10 and placed another bright feather in the tail of that young and ambitious body. Under the direction of President J. Connon, the close attention of Secretary Wm. C. Hall and the general supervision of that champion of reciprocity, E. I. Mepsted, speech and action worked such harmonious effect that everyone could have wished a continuance of the exhilarating experiences in which they were hourly participating.

At the opening meeting at St. John's hall on Wednesday afternoon, August 8, Mayor Hopewell welcomed the delegates on behalf of the capital city of the Dominion, and in most aptly chosen phrases put the entire convention in most excellent mood with themselves and their surroundings.

President Connon's address showed more clearly than ever how much has been done, and how very much more there is to do, to secure the advancement and well-being of the industry from whose development the whole country benefits.

The question of a parcel post system and the matter of varying duties on floral products, particularly potted plants and palms, which is causing more or less inconvenience to the trade, was discussed and it was decided to submit the matter to the authorities at Ottawa, so that once and for all a settlement may be effected which will render impossible the anomaly that compels a western importer to pay 30 per cent on the same kind of plant which can be brought into an eastern city at a 17½ per cent duty.

The fumigation of plants and their consequent spoilation made matter for somewhat vehement discussion and why Toronto and Winnipeg florists should suffer and the Montreal trade go free in this regard is a point which it was resolved the officials at the capital must also decide.

The duty on insecticides and other pest-fighters evoked a lively interchange of opinions, and it is to be hoped that before long something practical will be done towards removing this obnoxious imposition under which horticulture suffers so keenly in this country.

A very practical paper on "What Inducement Does the Future of Horticulture Hold Out for Young Men," was read, and the writer, A. W. Ewing (absent through illness), was voted the sincere thanks of the convention for his entertaining and instructive effort. Wm. C. Hall of Montreal read a paper on "The Use of Accessories in the Retail Florist's Store," and A. C. Wilshire contributed "A Retailer's Opinion of Recent Introductions in Flowers and Plants," both papers being well received.

The trade exhibits, a new feature at these annual conventions, were then reported on, the collection of ferns shown by J. Gammage & Son, London, Ont., securing special mention.

After two or three delegates had enunciated the claims of their respective towns for the next convention, it was finally decided that Montreal should have the honor and glory of welcoming the convention next year.

The election of officers resulted as follows:

A. C. Wilshire

Pres.-Elect Canadian Horticultural Association.

A. C. Wilshire, president.
W. Muston, first vice-president.
H. B. Cowan, second vice-president.
C. H. Janzen, treasurer.
J. Luck, secretary.

Julius Luck.

Secretary Canadian Horticultural Association.

HOSPITALITIES.

Thursday afternoon was given up to a jolly good time in the shape of an outing to Aylmer, eight miles up the Ottawa river. Sports were held there, and R. H. Wright's greenhouses were made the rendezvous for a large party of ladies and gentlemen who were regaled with the best of good things by Mrs. Wright and the entire staff of his establishment. Mr. Wright raises nearly all his stock without benches, and his labor-saving devices formed the source of much interesting and argumentative conjecture. Water is not a problem with him, and every grower throughout the continent must envy a man who has no coal bill to pay, and can by reason of his geographical position get all the wood he needs at first cost.

There is a fair supply of natural gas in the vicinity, but nothing in comparison to what was given away gratis when the delegates and their ladies returned to the banquet at one of the best hotels, in the evening. The Mayor made a speech over three-quarters of an hour in duration without mentioning two words about flowers, but extolling the beauties of Ottawa. The capital of the Dominion did itself very well for the delectation of its guests, mainly owing to the foresight and attention given to details by E. I. Mepsted, C. Scrim and John Graham.

A long drive on Friday afternoon and a visit to the Government Experimental Farm, followed by supper at the home Mrs. C. Scrim, completed the most successful convention that has yet come to pass.

PRESIDENT CONNON'S ADDRESS.

The pleasure is great to me of addressing you today at the fourteenth meeting of this association, and I am glad to see quite a few faces of those who have given it unstinted support from its earlier years, and while the association has not made the growth they naturally expected, they cannot help but feel satisfied at the many services rendered by the association for the benefit of horticulturists.

To those who have come for the first time to join us in our efforts to improve our common lot, I heartily welcome and sincerely trust that they will "boost" the association, doing all they can to help and improve it so that its influence for good will be felt from the Atlantic to the Pacific.

Much thought has been given to making an attractive trade exhibit and a strong effort should be made from year to year to continually improve it, the better the exhibit grows the more stimulating will be its effect in bringing more members into the association, as well as in its educative value.

The Canadian trade paper, "The Canadian Florist," has not shown much improvement since last year, though I am glad to note that the last issue was nearer what we expect it to be. This association has taken a deep interest in its welfare and would like to see it grow in size more rapidly than it has done. Let us urge the trade to use its advertising pages as freely as possible and we then will have more of a right to expect it to be looked after in an editorial way more fully than in the past.

The newspapers quite recently mentioned that the Post Office Department was considering the advisability of establishing Parcels Post. This association should support this much needed reform and memoralize the government to this effect.

I do not care to introduce matters that savor of politics, but reciprocity is a matter that we should discuss solely from the point of whether reciprocity in floral products would be beneficial to the trade in Canada, as a whole, or not. Let us forget when discussing this matter whatever political leanings we may have.

The growth made in the last few years of the different branches of the

trade has been large and it can be confidently expected that it will be proportionally greater in the next decade. Is it not then about time that the growing importance of floricultural interests were recognized, and strong effort made to get substantial appropriations from the different provincial governments for the establishment of florists' departments in connection with Provincial Experimental Farms, and at these departments there should also be taught commercial floriculture in addition to carrying out experiments in the growth of plants, uses of fertilizers and soils, insecticides, fuel and the many other subjects that a florist should know about.

Article four of the constitution of the association provides for Provincial vice-presidents and I consider that it would be to the interests of the association to have these officers elected at this meeting. Provincial vice-presidents should be able to secure members for the association in their respective provinces, keep in touch with Provincial legislation affecting horticultural trade interests, and generally to broaden the scope and influence of the association.

The time is not far distant when it will be advisable for this association to consider the establishing of sections, for instance such as the retailers, private gardeners, cut flower growers and plant growers. We should have a general meeting to discuss matters of general interest, different meetings would be held at the same time by the different sections to discuss matters pertaining to their particular branch of work. At these section meetings there would be more expressions of opinion than can be had at a larger meeting, and the more diffident of our members would feel more at his ease in asking or answering questions of interest to him. It is somewhat difficult to arrange a programme at a convention like this and hold the attention of the members all the time, especially when some subject comes up for discussion that does not affect his branch of the trade.

Let us make a strong effort to bring into our membership many more members of the trade. This is worth the establishing of a small, but strong committee that could do effective work with little outlay.

Our Ottawa brethren have a splendid programme of social events prepared for us that I know you will enjoy and appreciate, but do not let this make us forget that we have important business to which we should first give our undivided attention.

CONVENTION NOTES.

Two or three supply houses in the States sent representatives to the trade exhibit.

One of the aldermen lapsed into dreamland and interrupted the mayor's address with an occasional snore.

The Dale Estate of Brampton, Ont., had five representatives at the trade exhibit who made the trip of 400 miles in a motor car and showed a complete line of florists' supplies.

The claims for the next year's convention which were advanced by the speakers for their several cities and towns varied from a description of the village and cemetery to the promising of plenty of cheap lager for the visitors.

The mayor seemed to forget that his hearers at the banquet were florists, or perhaps his knowledge of the subject was limited, for he never mentioned flowers in his long address and the forty-five minutes spent in extolling the beauties of Ottawa in the sweltering heat became uninteresting to many of the guests.

A. C. Wilshire, the president-elect of the association, was born in Beaconsfield, Bucks, England, and with three brothers came to Montreal 30 years ago, establishing themselves in the florist business. He is an ex-president of the Montreal Gardeners' and Florists' Club, having held that office two years, and has been a member of the C. H. A. ever since its organization 14 years ago. Julius Luck, the secretary, is a private gardener, coming to Canada from Germany 15 years ago.

W. G. P.

THE CARNATION.

English Carnation Specialists.

The firm of Allwood Bros., Hayward's Heath, Sussex, England, are making a specialty of carnations. Montagu C. Allwood, who has acquired a reputation as a writer on this flower and for the last seven years has been the carnation specialist at Stuart Low & Co.'s, has entered into partnership with his brother, George W. Allwood, who spent several years in America studying carnation culture.

Carnation Lady Alington.

A new English carnation that seems to have great promise, having received an award of merit of the Royal Horticultural Society and a first class certificate from the Perpetual Flowering Carnation Society, is Lady Alington. It was raised by Stuart Low & Co., Bush Hill Park, Enfield, Middlesex, and is described in The Garden as being of an old rose salmon color. The flowers are large, of good substance, with sound calyces, and are borne on long, stout stems, and in addition have a delightful fragrance. It is a very free and continuous bloomer, the second crop of flowers coming very quickly after the first have been cut, the raisers the present year having but 200 plants, and they have been able to exhibit blooms at every fortnightly show of the Royal Horticultural Society from October to June.

Culture After Planting.

The plants that were planted in from the field ten days or more ago will be well rooted in the soil and should be given every encouragement from now on. The first thing to figure on is to give them more light by removing some of the shade from the glass. After planting in the plants require to be well shaded until root action commences freely again, which takes about a week, then a little of the shade

MEMBERS OF THE CANADIAN HORTICULTURAL ASSOCIATION AT THE CONVENTION AT OTTAWA, AUGUST 8-10.

RAILWAY GARDENING ASSOCIATION AT VAUGHAN'S NURSERIES, WESTERN SPRINGS, ILL., AUGUST 16, 1911.

should be cleaned off, then about another week or ten days be allowed to pass by, when some more can be removed. The plants have gotten a good root hold by this time and could get along without any shade at all, but while the weather remains so hot we leave a little scum on the glass and find the plants greatly benefited by it. It cannot be considered a shade, but a thin scum that remains from the mud after the water has been played on to the glass from the hose a couple of times, being just sufficient to break the hot glare of the sun.

It does not take very long for the weeds to push up in the new soil; do not let them get ahead, but get after them as soon as large enough to handle. After the beds are thoroughly clear of weeds and the plants have a good root-hold, it is necessary to go over the beds and level them off, pressing down with the hands or a small pounder any places that are not firm enough. Carnations require a firm porous soil to bring them to their highest perfection as regards both quality and quantity of bloom, and while a stiff, cold clay is not advisable the compost as advised in previous articles should be well firmed down.

This is the time for stem rot to be troublesome, particularly when the soil contains an overabundance of fresh manure. To guard against this dread disease particular care should be exercised with the syringing and watering. The soil should be allowed to dry out well between each watering, and when necessary water thoroughly. Daily watering as if by clockwork, wetting the surface only or a little below, is one of the surest ways to bring on stem rot. Ample syringings are necessary to cool the atmosphere and keep down red spider, but this work can be done without wetting the soil too much if a little judgment is used.

Topping back the growths is one of the very important items under consideration just at this time, and has to be governed to a great extent according to what time the heaviest cut of blooms is desired. If it is the aim (and it usually is) to have a big crop of flowers for the Christmas holidays, then very little topping can be done after this date. If some of the plants are extra small they can be pinched back with the idea of making a larger plant for a later crop of blooms, but if the plants are large and bushy with a good foundation to work on then allow them to come up to bloom, pinching out such as are making very short stems, but if extra heavy crops of blooms are desired for later use then the topping back can still be carried on.

C. W. JOHNSON.

Dutch Bulb Growers' Society.

The following awards were made at the recent meeting of the floral committee of the Dutch Bulb Growers' Society to the several named exhibitors:

Awards of Merit to Leucanthum maximum excelsum, with pure white flowers of an extraordinary size, raised from seeds, G. Zeestraten & Son, at Oegstgeest; Gladiolus Electra, new variety raised from seeds with brilliant vermilion flowers, size, form and color are extra, P. Hopman & Son, at Hillegom; Gladiolus Hohenzollern, new variety raised from seeds, flowers rosy salmon spotted reddish brown, J. Barth Bos, at Overveen; Gladiolus nanceianus, Willy Wigman, new variety, flowers rosy white spotted purple, G. Zeestraten, at Oegstgeest; Gladiolus Meteor, new variety raised from seeds, flowers scarlet shaded brownish red, form and color extra, J. Barth Bos, at Overveen; Gladiolus nanceanus, Golden West, new variety originally from California, raised from seeds, flowers orange brilliant spotted carmine, N. Dames, at Lisse; Gladiolus gandavensis, Ivorine, flowers creamy yellow, G. Zeestraten & Sons, at Oegstgeest; Phlox decussata. Asia, new variety raised from seeds with flowers orange shaded carmine, the truss is of an extraordinary size, C. G. van Tubergen Jr., Haarlem.

VICTORIA, B. C.—F. Francis is giving up his position as manager of the Fairview Esquimalt Greenhouses and will probably locate near San Diego, Calif.

COLUMBUS, O.—The Columbus Florists' Association enjoyed an outing at Hymendale park, August 12. The trip was made in automobiles decorated with flowers, which paraded through the principal streets before starting on the journey.

THE ROSE.

Tying and Thinning.

The work in the rose houses at this time consists chiefly in keeping the beds free of weeds and cultivating regularly. Of course there is always the tying to look after and at this particular time the disbudding. Rose plants benched as early as the first of June that have made a normal growth, should now be far enough advanced to allow a few flowers to bloom here and there, where there may be several strong buds to the plant, the stems as a rule will be rather short as there should be no attempt made to cut back too far on the first flowers. At the same time a few flowers taken judiciously at this time will result in a better growth breaking from the young stock, and from all the market reports a few fresh flowers would be very acceptable now if only to freshen up the funeral work, after using the parched-up, stale looking stock that seems to be the only kind available this summer. However, with cooler nights and shorter days the conditions will gradually improve and we will see some fairly good blooms after September 1.

But there is plenty or work around the rose houses. The American Beauties will require careful watching from now on, also the plants of Richmond. These two varieties being subject to black spot should not be allowed to receive a check of any kind and do not be afraid to water these varieties freely. We have seen a bad dose of black spot brought on by running the soil too dry at the first appearance of the spot, and as the cause of black spot is generally attributed to damp, close atmosphere and surroundings, the remedy should be plenty of fresh air and absolutely clean surroundings.

By keeping the walks dry and the spaces under the tables liberally sprinkled with air-slaked lime, also syringing early so that the foliage has ample time to dry, and the beds watered so that they will dry out from day to day instead of keeping them in a soggy condition, much of the spot trouble can be avoided. We would also suggest at

this time a little thinning out of the young Richmond plants when they are found to be carrying a compact mass of short, twiggy growth at the center of the plants, which excludes light and air, and furthermore furnishes a harbor for red spider. It will be readily seen that there is a certain amount of growth that is practically useless on the Richmond as on all such growth there will be found no indication of further development.

The Killarneys make a much cleaner growth and will require little attention as regards pruning with the exception perhaps of a few tufts of growth here and there. The tops of the old growth which was formed in the pots this year can be removed, as like that on the Richmond it has served its purpose and is now useless. When cultivating keep a sharp lookout for the little feeding roots that are about due to appear on or near the surface of the beds. These must not be disturbed. E.

Soil Renovation.

The renewal of the soil as practised by nearly all florists is a large factor in the conducting of greenhouse establishments. The storing, carting, composting, as well as the clearing out the old soil and the replenishing with new are large items in the expense account for both the soil and manure, and the labor expended. We hear and read of growers who have been successful in carrying over the soil and obtaining a good crop, but also of many failures, the most successful experiments having been with the rose growers in beds.

In the growing of vegetables under glass the conditions are very similar to those which confront the grower of flowers and this very expensive work many of the market gardeners have nearly dispensed with. For a number of years it was the custom to dessicate, or dry out the soil but it was found that certain fungous growths when the soil was dry were greatly accelerated in activity when the soil was again wet, which resulted in some cases in almost total loss of the crop. The Ohio Experiment Station some few years ago began an experiment to see what effect the use of strawy manure would have on the soil when used as a mulch during that part of the summer when crops are not growing in the greenhouses. This manure was applied as soon as the crops were removed from the houses about August 1, being put on to the depth of from five to six inches spread evenly over the entire surface of the beds, and as soon as put on water was applied in the form of a spray until the manure and soil were thoroughly wet. The object of this wetting was first to leach the fertility of the manure into the soil and second to wet the soil sufficiently so that with the strawy mulch it would remain moist for several days; the watering was repeated as often as needed—two or three times a week in bright weather. Frequent sprinkling of the manure on the beds is very essential, for failure is sure to follow the lack of application of sufficient water to properly leach the fertility of the manure in the soil and to keep it moist. When it came time to plant, the coarse part of the manure was removed and the finer portion spaded in, or if the soil is in need of humus the entire mulch can be spaded in, but most greenhouse soils do not need the addition of so much coarse material. It was noticeable that the soil which had been treated with the mulch was in excellent mechanical condition when it was worked up, there being no lumps, and was also darker in color than unmulched soil. The result of the experiments have been very satisfactory, the crops making rapid growth.

These experiments were carried on with what greenhouse men term solid beds, and what the result would be with benches is problematical, but it certainly seems worth trying upon a small portion. The benches would need frequent watering especially on the edges to keep the soil moist which seems to be a necessary condition. In the experiments carried on the mulch was allowed to remain upon the soil about six weeks, which is longer than the florist can ordinarily allow the benches to remain without a crop, still the carnation grower could well afford to clean out his old plants by July 1, and plant again August 1, which would allow of four weeks' rest for the soil and the leaching of the manure.

The Late Joseph R. Freeman.

Burbank Slaps his Rivals.

Charges that experts in the United States department of agriculture, through ignorance or worse, are sending out tons of "just as good as Burbank" spineless cactus, which in reality is "ancient trash such as the builders of the pyramids in Egypt might have cultivated," are made by Luther Burbank in a pamphlet he has just published.

Burbank fires a whole broadside of sarcasm and scorn at the government experts and speaks of his own achievements as "the most valuable improvements in vegetable life during the centuries, fully equal in importance to the discovery of a new continent."

Experts in the government service at Washington are called "low browed, narrow gauged, and pinheaded employes, who have to keep shouting to hold their places and who are largely responsible for the trash free seed and the trash so-called spineless cactus distribution."

"The existence of the United States department of agriculture has been rightly supposed to be, among other things, for the purpose of fostering and encouraging improved methods," writes the plant wizard.

"That the cause of agriculture and horticulture would receive a lasting benefit by the prompt dismissal of some of the low browed, narrow gauged, pinheaded employes is too well known to need further comment."

After telling how he developed seedless and spineless cactus, Burbank says the department experts at Washington at last became ludicrously earnest in their interest in his experiments.—Daily Press.

OBITUARY.

Joseph R. Freeman.

Joseph R. Freeman, a prominent florist of Washington, D. C., died August 22, 1911, of Bright's disease after a long illness, aged 62 years.

Mr. Freeman was a native of England where he served nearly five years' apprenticeship under the celebrated Michael Saul, fruit specialist and horticultural writer of London, England. On July 28, 1868, he arrived in America and at once took charge as greenhouse foreman at the establishment of John Saul at Washington, D. C. Here he remained until 1882, when he went to the United States Agricultural Department under W. H. Saunders, where he remained two years and then became superintendent of Oak Hill cemetery and later of Bonnie Brae cemetery, Baltimore Co., Md. In 1880, he left this position and established himself in the flower business at Washington. This venture was successful and he enlarged his business until he had quite an extensive plant of greenhouses and a retail store at 612 Thirteenth street, N. W.

Of a jovial disposition Mr. Freeman was very popular and made many friends. Well informed in all branches of the business he was always willing to impart his knowledge to those who sought it. He was ready to do his utmost to help the trade and was an active member of the trade organizations. While naturally averse to holding office he served the Florists' Club of Washington as president for two years and was vice-president of the Society of American Florists in 1905. A Catholic in religion he also belonged to many societies connected with that church.

Fred C. Chapman.

Fred C. Chapman, a pioneer florist and one of the oldest residents of Grand Rapids, Mich., died at his home August 17, 1911, aged 75 years.

Mr. Chapman was born in Stamford, England, coming to America in 1880, and settled in Grand Rapids. He built the first greenhouse in the city and in 1882 removed to his present home again building and at the same time opening a retail store in the city on Monroe street, where he conducted business until eight years ago when he retired. He is survived by a widow and one son. The funeral services were held at the family residence, Saturday, August 19.

PITTSFIELD, MASS.—T. R. Dellert, of Great Barrington, will shortly move here, having taken a position at Council Grove.

THE AMERICAN FLORIST

1885 TWENTY SIXTH YEAR 1911

Subscription, United States and Mexico, $1.00 a year; Canada, $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from those in the trade.

When sending us change of address always send the old address at the same time.

Advertising rates on application.

From the first issue the AMERICAN FLORIST has accepted only trade advertisements.

Advertisements must reach us Tuesday (earlier if possible), as we go to press Wednesday.

RENEW subscriptions promptly so that no copies of the papers may be missed.

"CONSTANT READER" should repeat queries, with full name and address, in order to secure replies.

MOST city flower stores are on the ground floor, but there are many in basements and sub-basements. A considerable number of flower stands are located in hotels, office buildings, railway stations and such places, and some ocean liners have had flower stands. So far as we know, however, the first important flower store to be located above the first floor on an important business street is that of Chas. Schneider at 32 West Washington street, near Dearborn street, Chicago. A short stairway leads to commodious quarters and a glass case containing flowers at the entrance on the street indicates the nature of the business carried on above. The outcome of Mr. Schneider's new venture will be watched with interest.

Now it is the cactus cineraria, of which there is a fine colored plate in the Garden (London) of May 27, showing good blue flowers of the stellata type.

THE Tarrytown Horticultural Society has issued the schedule of prizes for the annual exhibition which will be held this year in Music Hall, Tarrytown, Oct. 31 to Nov. 2. A generous list of special premiums besides the society's prizes are offered.

THE report of the Board of Park Commissioners of Kansas City for 1910 is published with folder of parks and boulevard statistics to April, 1911, and is a finely printed statement of the work already done and the plans of future work outlined, and contains fine half-tone illustrations of the beauty spots. The park and boulevard system contains 2,342 acres of parks and 49 miles of improved boulevard and park drives, and the cost of the system has been $10,372,876.67 from its inauguration to April 17, 1911.

Cement Benches.

It has been called to our attention that the length of the completed bench in the figures given by Otto Wittbold in the article on "Cement Benches," in THE AMERICAN FLORIST, issue of June 3, page 992, is not furnished. The figures given represent the cost of a bench 100 feet long and 55 inches wide and the expense of the wooden bench was compared for the same length and width.

Canadian Insect Act.

The Destructive Insect and Pest Act passed by the Canadian parliament provides for fumigation of all nursery stock and stated periods and ports of entry through which such stock can be imported. Greenhouse plants, including roses grown in pots up to three inches in diameter if accompanied by grower's certificate to growth under glass, herbaceous perennials, herbaceous bedding plants, bulbs and tubers, and cottonwood grown in Dakota or Minnesota are exempt from fumigation.

Tulips Coming Blind.

ED. AMERICAN FLORIST:

I hear many conflicting reports on the "coming blind" of tulips both forced and grown outdoors. Growers seem inclined to blame the Hollanders while some of the latter say the bulbs are kept dry too long before potting, and are not well treated in subsequent care. What light can you give me on the subject? VERITAS.

As regards tulips coming blind there are some reasons that could be given for this but nothing definite or certain, but I believe the packing and shipping is more often the cause than anything else. They are as a rule put in bags long before shipping and might not be quite ripe. They are then put in cases very tightly and closely to save room, they might get a little overheated on board the steamer, there not being enough ventilation in the holds, and in August and September it is very warm in the engine room on such large steamers and a little sweating will do the act. So far nobody is able to tell for certain and we will have to be more careful of all these "maybes" until we get at the real cause. Of course, if anybody keeps bulbs lying around exposed to all sorts of conditions before planting he cannot expect good results. WM. H. SIEBRECHT.

The Modern Culture of Sweet Peas.

A complete treatise of the culture of sweet peas by one of the noted growers of this flower in England is the book entitled, "The Modern Culture of Sweet Peas," by Thomas Stevenson. The book is of 86 pages and contains six beautiful colored plates of the newer varieties and 12 illustrations bound in board. The growing and handling of this popular flower is thoroughly described from the preparation of the soil until the flowers are ready for the judges at the exhibition, and is a valuable hand book for the sweet pea enthusiast.

Sweet Peas.

"Sweet Peas," by Horace J. Wright, is a splendid book of 116 pages containing 12 beautiful colored plates of sweet peas, nicely bound and printed on the finest of paper. The history of the sweet pea is fully covered and a thorough work on the culture of this flower by Thomas Stevenson, one of England's best growers, is a guide to the best manner of growing this very popular flower.

Coming Exhibitions.

(Secretaries are requested to supply any omissions from this list and to correct any dates that may have been altered since the last advices.)

Chicago, September, 1911.—Exhibitions of annuals, perennials and vegetables. Horticultural Society of Chicago, Art Institute. J. H. Burdett, secretary, 1620 West 104th Place, Chicago.

Cincinnati, O., November 13-18, 1911.—Fall exhibition, Cincinnati Florists' Society, Horticultural Hall-Music Hall. George S. Bartlett, secretary, 131 East Third street, Cincinnati.

Hartford, Conn., November 8-9, 1911.—Chrysanthemum show, Connecticut Horticultural Society, Putnam Phalanx Armory. Geo. W. Smith, secretary, Melrose, Conn.

Hartford, Conn., September 19-20, 1911.—Annual flower show, Connecticut Horticultural Society, Unity Hall. Geo. W. Smith, secretary, Melrose, Conn.

Lenox, Mass., October 25-26, 1911.—Grand fall exhibition, Lenox Horticultural Society, Town Hall. Geo. H. Instone, secretary, Lenox.

New Bedford, Mass., September 14-16, 1911.—Ninth annual fall exhibition, New Bedford Horticultural Society, Odd Fellows Hall. Jeremiah M. Tabor, secretary, 117 Sycamore street, New Bedford.

New Haven, Conn., September 13-14, 1911.—First annual dahlia exhibition, New Haven County Horticultural Society, Harmonie Hall. F. H. Wirtz, secretary, 86 Nicoll street, New Haven, Conn.

New York, September 19-21, 1911.—Dahlia, fruit and vegetable show, American Institute of the City of New York, 19-21 West Forty-fourth street. Wm. A. Eagleson, secretary.

New York, November 3-7, 1911.—Fall exhibition, Horticultural Society of New York, American Museum of Natural History, Central Park West and Seventy-seventh street. Geo. V. Nash, secretary, New York Botanical Garden, Bronx Park, New York.

New York, November 1-3, 1911.—Chrysanthemum Show, American Institute of the City of New York, 19-21 West Forty-fourth street. Wm. A. Eagleson, secretary.

New York, November 3-12, 1911.—American Land and Irrigation Exposition, Madison Square Garden. Gilbert McClurg, general manager, Singer building, New York.

Milwaukee, Wis., November 13-19, 1911.—Fall Flower Show, Milwaukee Florists' Club, Auditorium. Gustav C. Mueller, secretary, 926 Ninth street, Milwaukee.

Springfield, Ill., September 29-October 7, 1911.—Illinois State Fair. J. K. Dickirson, secretary, Springfield.

St. Louis, Mo., November 7-11, 1911.—Fifth fall floral exhibition and pomological display, St. Louis Horticultural Society, Coliseum, Jefferson and Washington avenues. Otto G. Koenig, secretary, 6473 Florissant avenue, St. Louis.

St. Louis, Mo., November 7-11, 1911.—Annual exhibition, Chrysanthemum Society of America, in connection with the St. Louis Horticultural Society.

Stamford, Conn., November 3-4, 1911.—First annual exhibition, Westchester and Fairfield Horticultural Society, Casino. J. B. McArdle, secretary, Merritt building, Greenwich.

Tarrytown, N. Y., October 31-November 2, 1911.—Thirteenth annual exhibition, Tarrytown Horticultural Society, Music hall. E. W. Neubrand, secretary, Tarrytown, N. Y.

Winnipeg, Man., September 1-4, 1911.—Provincial Horticultural Exhibition, Winnipeg Horticultural Society, Horse Show Amphitheatre. W. J. Brattston, secretary, 369 Maryland street, Winnipeg.

Worcester, Mass., November 9, 1911.—Chrysanthemum exhibition, Worcester County Horticultural Society, Horticultural hall, 18 Front street. Leonard C. Midgley, secretary, Worcester, Mass.

Meetings Next Week.

Baltimore, Md., August 28, 8 p. m.—Gardeners' and Florists' Club of Baltimore, Florists' Exchange hall, St. Paul and Franklin streets.

Cleveland, O., August 28, 7:30 p. m.—Cleveland Florists' Club, Progress hall, 2610 Detroit avenue.

Lake Forest, Ill., August 30, 8 p. m.—Horticultural Society of Lake Forest, Council Chamber, City hall.

Lake Geneva, Wis., September 2, 8 p. m.—Lake Geneva Gardeners' and Foremen's Association, News building.

Lenox, Mass., September 2.—Lenox Horticultural Society.

Pasadena, Calif., September 1, 8 p. m.—Pasadena Gardeners' Association, Board of Trade rooms, West Colorado street.

San Francisco, Calif., September 2.—Pacific Coast Horticultural Society.

Situation Wanted—Experienced all around store man desires position in Chicago. Is in city at present. Address
Key 486, care American Florist

Situation Wanted—Young lady of several years' experience in wholesale and retail flower store desires position in Detroit about Oct. 1st; first-class references; state salary.
Key 478, care American Florist.

Situation Wanted—German gardener and florist married age 33 wishes position as foreman on first-class private or commercial place after Sept. 15th. JULIUS BAUER,
Chichester, Ulster County, N. Y.

Situation Wanted—Young man, 22 years old, ambitious and capable, 6 years' practical experience, 3 years on nursery, 3 years with florist; will take work with either, but prefer latter. Situation in or around New York City preferred. Address Key 487, care American Florist.

Situation Wanted—Good sober, steady and industrious party wishes to secure a situation as salesman or decorator in retail florist store or as gardener or grower on private or commercial place. Sixteen years of experience in all branches of the florist trade. Can furnish the best of references fom past employers. State wages when writing. Key 480, American Florist.

Situation Wanted—By German, 40 years old, married, childless; seedsman, seedgrower; strictly competent in all its branches with life practical experience; also equally qualified as gardener, florist, nurseryman or agriculturist. Well known in Europe with all renowned firms. Correspondent in German and Russian, having much traveled; well bred, commercial intelligent, laborious, able to work, clever, energetic, and a thorough man of business. Wishes situation of importance or capitalist partner for purpose of undertaking new or reorganization. Address
W. M., 143 46th Street, Brooklyn, N. Y.

Help Wanted—Gardener, steady position, must have cemetery gardening experience; apply
WALDHEIM CEMETERY CO., Forest Park, Ill.

Help Wanted—First class man for mail order department by largest seed house in the south; give experience and state where employed.
Key 482, care American Florist.

Help Wanted—At once, a first class gardener and florist for a good sized private place which is in good condition at this time. Address, giving particulars to
JOHN DUPEE Oconomowoc Wis.

Help Wanted—German vegetable gardener wanted; some one who has experience in winter raising; must be single; state wages; will give board. Address
Key 483, care American Florist.

Help Wanted—Grower to take charge of greenhouse. Must understand growing of carnations, chrysanthemums and bedding stock. Sober single German preferred. State wages per month with board. D. S. SEVINGSTON,
1657 Crawford Road, Cleveland, Ohio.

Help Wanted—In an outdoor nursery a young man as budder; must be experienced, quick and thorough, of good habits and character. A young man who can fill the above requirements, and who is willing to make himself generally useful and is not afraid of work, will find a good future here for him. In answering, state full particulars of experience, age, married or single, wages expected and if can come immediately.
GEORGE H. PETERSON,
Rose Specialist, Fair Lawn, N. J.

For Sale—Two houses, 18x100, located in Irving Park; ill health cause for selling; a snap.
HENRY SCHUFFERT
4337 Ballard St., Chicago.

For Sale—Florist business, established eight years; good business location; will sell on account of sickness.
Key 477, care American Florist.

For Sale—Florist business in Toledo, Ohio; established 11 years; good business location; for particulars address HELEN F. PATTEN,
907 Madison Ave., Toledo, Ohio.

For Sale—2 greenhouses 54x24, new three years ago; well stocked; good trade; hot water heat; 7 room house, all modern conveniences; on lot 82x196; good reason for selling.
M. E., 59 Corwin St., Norwalk, O.

For Sale—Florist's business; about 15,000 feet of glass; steam heated, stocked and in full running order; good chance for good all around greenhouseman, with $2,000 capital. For particulars address
FLORIST, Box 113, Oakville, Ontario.

For Sale—At a bargain, property 26x112, including old established florist's business; good income property; owner moving to California; will make a big sacrifice for a quick sale. For particulars address F. C. STRUVY,
1515 Clybourn Ave., Chicago.

For Sale—Two greenhouses, well stocked with Boston ferns and pot plants, one 20x125 feet and the other 16x20 feet; also a hot water boiler, three years old, and a large boiler in shed 20x24 feet; office 16x20 feet in connection; good location for retail trade; for further particulars call on or write. AUG. KOEBLE
4228 N. 40th Ave., Chicago, Ill.

For Sale or Rent—An old established retail florist store in Chicago located on Wrightwood, Sheffield and Lincoln Aves. Greenhouse in connection. For further particulars call on or write J. T. HELBOK, 941 Wrightwood Ave.,
Chicago, Ill.

For Rent—On five year lease 12,000 feet of glass, house and barn; long established business; might sell on installments or terms. Address
J. L., 36 W. 73rd St., Chicago.

For Lease—At once, the Staton Greenhouse, Columbus, Kan.; 2,700 feet glass, 10-room dwelling, large new barn, 20 acres garden land, lettuce and plants, with good market; new and in good repair. Write to
S. E. STATON, Lawrence, Kan.

Wanted—To buy or rent a floral establishment, with 5 or 10 acres of land near some city in the New England States. Will invest about $6,000—$1,000 down. Address
Key 485 care American Florist.

FOR SALE

One Wilks Greenhouse Boiler, A1 condition. Address

J. B. DUNLOP,
3511 Shields Ave., CHICAGO

WANTED.

Two experienced rose and carnation growers to take charge of sections; permanent positions to right party; state experience, wages expected and references.

J. F. WILCOX & SONS, Council Bluffs, Iowa.

Stop! Read This!

Are you a **live** salesman with a little better than ordinary ability? Are you thoroughly acquainted with the florist and nursery trade. **There is a position on our sales force for you.** State your qualifications in first letter.

Key 484, care American Florist.

Wanted at Once

An Experienced Young Lady Designer and Decorator

Good salary will be paid to a first-class artist and saleslady, who must come well recommended. No others considered. Address

PAUL M. PALEZ
Vestals Little Rock, Ark.

A BARGAIN.

A good paying florist business and truck farm in southeastern Ohio; established 30 years; seven greenhouses just put in good repair; five houses in carnations, one in chrysanthemums, and one in general pot plants; hot water heat, cheap coal and natural gas (25c a thousand feet); one eleven room house; hot water heat; both kinds of gas; one barn and storehouse and five-room cottage rented; six cold frames. All on plot of about one and one-quarter acres facing 184 feet on newly paved street. Plenty of room to build greenhouses or residences. Truck farm of nine acres; good land. Town has 6,000 population and is growing; railroad center; good out-of-town business. Only reason for selling is sickness and old age. This is a square deal and a bargain if sold soon. Will divide. For further particulars address J. W. SLAUGHTER
(Phone Normal 5671) 6331 Peoria St., Chicago.

NEW YORK SALESMEN

We need men who are familiar with the greenhouse trade in and around New York. State age, experience and salary. Address

Boilers, care of American Florist

The Best Color Chart

For Florists, Seedsmen and Nurserymen.

ERFURT, GERMANY, May 9, 1911.

AMERICAN FLORIST CO., Chicago, U. S. A.,

Dear Sirs:—If you have any copies left of the comparative color plate compiled by F. Schuyler Mathews, I shall be obliged if you will send me one, my copy having somehow got mislaid and I do not like to be without this excellent little production.

Yours truly, ERNST BENARY.

Published and For Sale by the

American Florist Co., 440 S. Dearborn Street, CHICAGO.

Price One Dollar, Postpaid.

New Beauties

Fine Crop Just Coming On. Also Good Crop of PINK KILLARNEY.

BASSETT & WASHBURN,

Office and Store: 131 N. Wabash Ave., Chicago. Greenhouses: Hinsdale, Illinois.

Chicago.

BUSINESS SLOTHFUL.

There is but little change in the conditions of the flower market. Trade is very quiet. "Nothing doing" is the greeting word, and stock is accumulating rapidly. Asters are in splendid shape, large bunches of fine Semple's Branching in white and all the colors being obtainable, but the quantity received is far in excess of the demand. Gladioli are also in great oversupply, and the quality is still good. Roses are improving every day, both in color, foliage and stem, although a majority of them now being received are short-stemmed. American Beauty, for the season, are of extra good quality and some very fine long-stemmed ones are to be had and the prices are low. Killarney is of good color, and of this and White Killarney there is some choice stock, and a great supply. Richmond also is received in large quantities and the quality is improving. Carnations are growing better every day, some very good Enchantress being seen and also some very fine White Enchantress. Mrs. Lawson is still, however, very short-stemmed. Lilium longiflorum is in supply enough to meet all the calls, but the Japanese varieties are shortening up a little and are not seen in such large quantities. Lily of the valley is quite plentiful, there appearing a little more upon the market than there is call for. Chrysanthemum Golden Glow is still to be had, but there are no great receipts and the demand is not yet very large. Outside stock is very plentiful and in great variety; hydrangea is in large quantities; Rudbeckia Golden Glow and the single varieties; cosmos, both pink and white; gaillardias, helianthus of all sizes from the big sunflowers down, phloxes of different shades and everything the garden supplies are in great quantities. The early arrivals from the convention have begun to come home and the balance are straggling along, visiting other cities and stopping off on the way; those that have returned all report a good time, and are full of enthusiasm for the convention of 1912, which is to be held in this city.

NOTES.

The additional 13 houses erected this summer at Poehlmann Bros. Co. at Morton Grove are nearly completed and planted and another 13, 250 feet in length, are already planned and will be erected next summer, which will make this range 1,000 feet in length. The crops in all the older houses are in fine condition, with a good move on already. The roses in Plant B are a sight to behold, the picture of health and full of good strong breaks, and the prospects for an excellent crop are of the best, with the houses so perfectly timed in starting as to have a continuous supply and it looks as if John Poehlmann and the store force would have their hands full to dispose of the immense cut that is promised this season.

The Fleischman Floral Co. had a large wedding decoration at Warsaw, Wis., the last week. Manager George Wienhoeber with three assistants spent three days decorating the house and church. Two thousand lilies, three hundred strings of asparagus and quantities of roses and other flowers were used in preparing for the wedding ceremony.

The illustration of the Omaha store girls in the AMERICAN FLORIST, issue of August 19, attracted considerable attention. Some of the young men and also some that are not so young, wanted to know if the young ladies could not be induced to accept positions in the "Windy City."

Miss Paradise and Ralph Keefe, two of Vaughan & Sperry's employes, are back from their vacations and are again attending to their duties at the store. Both were in Michigan, Miss Paradise at Marquette and Ralph at South Haven.

USE Budlong's Blue Ribbon Valley.

Miss May McAdams, daughter of the well-known florist, Andrew McAdams, is enjoying her vacation in Michigan. Her brother, James, and a friend made a bicycle trip to Green Bay, Wis., recently.

Mrs. A. L. Glaser and son, Leo, of Dubuque, Ia., were welcome visitors this week. Mrs. Glaser is under the care of physicians and has been on the sick list for some time.

C. M. Dickinson, the hustling manager at E. H. Hunt's, has returned from a most enjoyable Wisconsin fishing trip and is ready for a brisk fall trade.

John Steinmetz, the popular North Halsted street florist, is back from a fishing trip with a story of 68 of mixed varieties.

O. Johnson points with pride to the splendid grade of asters that his firm, the Batavia Greenhouse Co., is cutting.

J. A. Budlong is receiving some fine white asters from George Ball, the well-known grower of this vicinity.

Henry Dunn is filling a salesman's position at the Chicago Flower Growers' Association's store.

P. N. Oberfine and wife of Kenosha, Wis., were in the city on special business this week.

Wedding bells will soon be ringing in Des Plaines.

VAUGHAN & SPERRY

Long Distance Phone Central 2751. **161 N. Wabash Ave., CHICAGO.**

N. J. Wietor is looking forward to a busy season, and says his firm will be in better position than ever to look after the wants of their old and new customers. The American Beauties, White Killarneys, Killarneys, Richmonds and other rose plants are growing finely and the cut that is received at the store speaks for itself in regard to quality. The chrysanthemums, one of this firm's specialties, are far ahead of other years and the cut that is promised will be the largest ever. The carnations which they are supplying to their trade at present are of unsurpassed quality.

Andrew Benson, Poehlmann Bros. Co.'s orchid collector, returned recently from a most successful journey to South America. He brought back with him 210 cases of fine cattleya plants, which are now being established. Mr. Benson is also pretty good at picking out a winning baseball team and the loose change that he has won from the employes at Morton Grove will be large enough to buy trinkets for the amazons when he visits them again next season, on his second collecting trip.

I. Erikson of the Atlanta Floral Co., Atlanta, Ga., was in the city this week on business and pleasure combined. He says his firm has enjoyed exceptionally good business and up to July 12, showed an increase of 35 per cent over that of last year. Borg & Erikson, the enterprising proprietors, evidently believe in keeping pace with the times for they will remodel their store and attempt to make it one of the handsomest in the south.

Otto Wittbold, the hustling superintendent of the Geo. Wittbold Co.'s greenhouses at Edgebrook, is a little under the weather suffering from a bad cold. Riding to the city behind a favorite horse after sun down is dangerous in such weather as this, but then think of the pleasure driving such a handsome animal as his.

Edw. Amerpohl of Janesville, Wis., and Michael Fink were among the first ones to return from the convention. Both gentlemen spent considerable time in Washington, where Mr. Amerpohl had the pleasure of hearing his friend, Robert M. LaFollette, Wisconsin's well-known senator and our "future president," speak. Ed. wears the party button, "I am for Bob."

Sidney Buchbinder, of Buchbinder Bros., 518 Milwaukee avenue, is having a busy time filling orders and answering the many inquiries from florists who are in need of up-to-date ice boxes and fixtures. His firm is now issuing a very attractive catalogue containing illustrations and prices of their refrigerators, which they would be pleased to mail upon request.

H. Rowoldt has returned from a most enjoyable visit with friends and relatives at Little Rock, Ark., and St. Louis, Mo. He says that the young ladies employed in the southern florists' stores are very attractive and entertaining, especially the one at Vestal's, in Little Rock.

Bassett & Washburn are again receiving a large quantity of long stemmed American Beauty roses, which are of their usual good quality. Easter lilies are also seen at the store in quantity and the quality is equal to that of the American Beauties.

V. Bezdek of the Northwestern Floral Co. is in the Evanston Hospital receiving treatment for injuries sustained from being kicked by a horse. The tibia, commonly called shin bone, was severely fractured.

Miss Corbett, Peter Reinberg's efficient bookkeeper, has returned from a most enjoyable visit at Round Lake, Mich. John Loeser, the accommodating young salesman, is now away on his vacation.

USE Budlong's Blue Ribbon Valley.

Mention the American Florist when writing

Herman Klotz, an employe of the West Park board, died at St. Elizabeth's hospital last week, from the result of injuries received July 27, when he fell from a tree in Humboldt park.

Mrs. N. C. Moore informs us that her firm lost 10,000 Mrs. Lawson carnation plants, when their place at Morton Grove was destroyed by fire last month.

H. Van Gelder has recovered sufficiently from his recent illness to be about and a permanent recovery is hoped for.

Frank Ayres, Chas. W. McKellar's store man, writes that he is having a most enjoyable time at Hot Springs, Ark.

Weiland & Risch are cutting some Killarney roses of fine color, and an extra fancy grade of carnations.

Robert Newcomb, the hustling salesman for Vaughan's Seed Store, is calling on the trade in Michigan.

Miss Amy Forest, who keeps the J. B. Deamud Co.'s books, is enjoying a two weeks' vacation.

Emil Jehlik expects to leave this week for Muscoda, Wis., to enjoy a few weeks' fishing.

Frank Felke of Wilmette is building a new show house, 14x50 feet, of Moninger material.

Chas. Kirsch has accepted a position with E. Kitzinger, the Fullerton avenue florist.

Peter Reinberg,

30 E. Randolph St., CHICAGO.

W. W. Coles, the well known florist of Kokomo, Ind., passed through the city this week en route to Oden, Mich., to join his wife at their summer home. Mr. Coles is a general favorite with the trade and his visits here are always anxiously looked forward to by his many friends.

John Canger is devoting his spare moments to putting the finishing touches on the Canger & Gormley store in anticipation of a brisk fall trade. Miss Rumman, the latest addition to the force, is now performing the bookkeeper's duties.

The stock that George Reinberg is cutting is of good quality, especially the American Beauty roses which are arriving in large quantities. Edward Simpson's many friends are pleased to hear that he is meeting with such success as foreman.

Mrs. Arnold, wife of the well known florist of Omaha, Neb., visited the Geo. Wittbold Co.'s establishment at Edgebrook this week.

Mrs. Horton, Bassett & Washburn's industrious bookkeeper, has returned from a most enjoyable visit at South Haven, Mich.

The Mesdames J. A. Budlong, Philip Schupp and A. J. Budlong are having a most enjoyable time at their cottage at Lake Geneva, Wis. They intend to break camp about September 1 and in company with A. J. Budlong make an auto tour through Wisconsin as far north as Green Bay. Upon their return they will make another trip through the sunny south, principally in Kentucky, where the party will be joined by Phil. Schupp, the capable manager at the J. A. Budlong store. The journey is being made in A. J. Budlong's Stoddard-Dayton touring car which has proved to be the machine for long distance trips.

George Hedtler, 52 years old, 1419 Wrightwood avenue, died at Alexian Brothers' Hospital on August 22, as the result of being overcome by heat while at work in the greenhouses of August Lange, Melrose and North Leavitt streets, on August 14.

The Chicago Flower Growers' Association is receiving some especially fine asters and carnations, the latter being equal to winter grown stock. The store is now completed and presents a most business-like appearance.

Vistors: Edw. Amerpohl, Janesville, Wis.; I. Erikson, of the Atlanta Floral Co., Atlanta, Ga.; W. W. Coles, Kokomo, Ind.

VERY LITTLE BUSINESS.

The weather has been hot and sultry, but is somewhat cooler, and as to business there is very little. There are all kinds of stock in the market but with little demand. American Beauty roses are quite plentiful, outside shippers sending in heavy consignments. The schools will soon open and with cooler weather it is to be hoped fall trade will start.

NOTES.

The Florists' Club met last Thursday, August 17, with 25 present, and Frank Weber presiding. The following officers were elected:

John J. Windler, president.
Frank Venneman, vice-president.
Wm. C. Smith, treasurer.
J. J. Beneke, secretary.

Frank Weber, trustee for three years, and W. C. Young, trustee for one year.

The Retailers' Association met August 14. The early closing hours have been approved by the majority of retailers, but seven out of about 50 would not agree to the proposition, but as the majority in favor is so large it is hoped that the others will fall in line, which they will be asked to do by the association.

AN OPTIMISTIC OUTLOOK.

This has been a dull week, with the exception of the last two days, during which trade has been a little steadier. Roses of the better grades are having a good call, but the short grades move slowly; in fact, some of them would be better thrown away. It seems poor policy to rob a plant for the sake of a few cents. "Penny-wise and pound-foolish" is about the maxim. Asters have little call, especially the colored varieties. Gladioli are still very good. Golden Glow chrysanthemums have appeared in small quantities and are a novelty. There is a feeling that trade will pick up about the latter part of August. The review of trade, by Bradstreet and R. G. Dun, gave a hopeful feeling. While trade continues very conservative there is no lack of confidence regarding the future, the corn crop is always a great factor as a business headlight. From the above we think there is a reasonably good year ahead for the florist. If one could only see into the future—but then, what's the use; we have troubles enough already without adding a known weight of what is to come.

NOTES.

It was with regret that we read of the death of John Birnie, a wholesouled, upright man of sterling qualities. The last time we met Mr. Birnie was at the national show in Boston. We feel that the trade has suffered a great loss. Those who didn't know him personally knew him through his writings in the trade press. His letters were always to the point and his keen sense of humor made friends of those who read his writings and didn't know him personally. He was a close friend of the late Alex. Wallace, and like most successful men of the old type learned the business in all the various branches and brought himself to success through hard work and perseverance. The old guard is passing.

The florists of the city were disappointed that J. K. M. L. Farquhar was not elected president of the S. A. F. We all had high hopes, but he did not get the necessary number of votes. He is a good loser and will dig right in and help the victor upbuild the S. A. F. We cannot all be presidents. A sorry mess some of us would make of it. A good leader is the first essential of any organization, and we feel that Richard Vincent, Jr., will keep the society on the upward swing.

Mr. Freystedt, Main street, Somerville, for many years with Welch Bros., in charge of the supply department, has resigned that position on account of his health. Mr. Freystedt, in his many year's connection with the firm, has made a host of friends on his travels all over the country. He has started business making immortelle letters, of which he was one of the first manufacturers. We wish him success and good health.

The rose Cardinal was seen in one of the stores the other day. The color is not at all pleasing, but the perfume is good, something of the Richmond type. We saw it at S. J. Reuter & Son's, Westerly, R. I., some years ago, and think John Cook was the originator. Mr. Reuter only had a few plants then and was trying it out. This is the first time we have seen it offered for sale.

USE Budlong's Blue Ribbon Valley.

This city had the press humorists in convention. They represented many papers from all over the country. It would be a dreary, cold world without those fun-giving gentlemen. They may give out some chestnuts, sometimes, but we can forgive them, for we sometimes hand out stale flowers.

A thunderstorm, accompanied with rain, of unusual severity struck here August 18. While no reports of damage to glass have been received, there have been trees blown down all over New England.

Niel Bros., Dorchester, have leased the Lassmann greenhouses at Watertown.

Weather cool. MAC.

NEW YORK.—Articles of incorporation have been filed by Leikens, Manhattan, florists and nurserymen, landscape gardeners and floral decorators, with a capital stock of $15,000. The incorporators are Jerome C. Leikens, Nathan Schwab, John B. Coppola, all of New York city.

Field Grown Carnation Plants

Bought from us are Guaranteed. The plants we are offering are all in splendid condition. Order them now, even if you are not yet ready to buy—we will reserve them for you. It is by offering **better** plants—not cheaper—that we are able to hold and constantly increase our plant business. We have all good commercial varieties.

MARKET FIRMER.

The market seems in a better condition now than at the last writing. The receipts are not quite so heavy and a firmer tone is apparent. The great glut of early asters is about over and the later large branching asters are coming in. These latter realize very satisfactory prices and many very fine ones are being cut in this immediate vicinity. The large gladioli have shortened in supply and as a result the receipts each day clean up quickly; some good America, too, are offered, and the smaller ones sell last. The features of the rose market are the continued good quality of the Mrs. Taft and American Beauties. The former has demonstrated again and again that it is the best pink rose for summer blooming. The bud is large, full of substance and when open is as pretty as the half-blown flowers. The development, too, is very slow. The blooms do not pop open like other varieties at this season of the year. The American Beauties are good, clean and in fair supply; other roses are good; in fact, they are improving right along. Some very good carnations from old plants are proving good stock, while short-stemmed ones from the young plants, too, are in the market. A goodly supply of lilies is on hand and at prevailing prices are a good bait for the buyers to nibble. The green goods market is ample.

NOTES.

On Thursday, August 17, T. Ben George made a clean sweep of all firsts at the floral exhibition at Carthage fair Fred Backmeier took all the seconds. Chas. H. Hoffmeister of Chas. Hoffmeister Floral Co. and Chas. McCrea of T. W. Hardesty & Co. were the judges.

B. P. Critchell has been troubled considerably during this summer with the heat and rheumatism.

H.

Pittsburg.

BUSINESS IMPROVING.

Business shows some improvement over the last report, but at that it is not what it should be. The market is pretty well loaded with stock of all kinds. Gladioli are a glut of the worst type, good, bad and indifferent, and all varieties known. American Beauties are holding their own. Lily of the valley is about the only flower that is really scarce. Asters are still coming in at a good rate. Greens of all kinds are plentiful.

NOTES.

P. Maier, Woodville, was taken suddenly sick and was removed to the hospital August 19. His condition is reported as serious.

The McCallum Co. have added a new clerk to their force, G. D. Potter, born August 13, 1911.

Jacob Elecker, Homestead, is spending two weeks in Detroit.

J.

Cleveland.

BUSINESS IMPROVING.

There was a noticeable increase in the amount of business done during the last week over the previous week's sales. Stock is shortening up somewhat, good asters are scarce, but a few good blooms from indoor stock are arriving daily, while the small flowers with short stems are much too plentiful and fill the counters, but are not much in demand. Gladioli are very abundant of all colors and varieties, and selling at low prices. Some very good carnations still appear on the market. Roses of all kinds are plentiful. Sweet peas are not much in demand. Lily of the valley is moving slowly. Greens of all kinds are plentiful. A few white and colored water lilies are still coming in.

ANDOVER, MASS.—The Andover Horticultural Society will hold its annual exhibition September 2-3. Premiums are offered for annuals, perennials, fruits and vegetables.

New York.

The city during the last week has had as visitors many of the delegates who attended the convention at Baltimore, and who grasped the opportunity while in this section of the country to call upon friends and inspect the stocks of the merchants of the metropolis. Among those noted were the following: J. E. Carey and wife of Mount Clemens, Mich., buying stock for a new store at Detroit; U. J. Virgin, Charles Eble and C. W. Eichling, New Orleans, La.; C. C. Pollworth and wife, Milwaukee, Wis.; George Asmus and wife, Miss Margaret Rudd, Horace Cheeseman, J. C. Vaughan and M. Barker, Chicago; Fred Meinhardt and wife, St. Louis, Mo., and E. Corley, Dallas, Texas.

Early Flowering Lilies.

Among the lilies that flower during the early part of the season, those that belong to the upright-flowered section are very freely illustrated. The Siberian Lilium Dauricum or Davuricum, and its numerous garden forms—often classed under the head of Lilium umbellatum—are very showy, but, unfortunately, under the influence of a burning sun, such as that experienced this year, they soon lose their brightness, anl their orange-red petals assume a somewhat dingy hue. These lilies will thrive in an ordinary herbaceous border, while, what is more, they differ from many other lilies, inasmuch as they will flower the first season after planting. This feature is always most pronounced in the case of those lilies that produce a great number of roots from the base of the stem, as these serve to support the foliage and flowers, whereas the different kinds in which the stem roots are wanting, or but sparingly produced, have to depend upon the roots from the bottom of the bulb, which frequently take two or three seasons to become thoroughly established after removal.

These remarks apply to other members of the same section as L. Dauricum—namely, the small-growing L. elegans or Thunbergianum, which is represented by a great number of varieties. Some of these commence to bloom as early, or nearly so, as the Dauricum forms, while others are a good deal later, states a writer in Garden Illustrated. In the color of the flower and other particulars these varieties of L. elegans also vary to a considerable extent. After L. Dauricum has lost its freshness come other members of this section, including Lilium bulbiferum, the true form of which is not often met with. As implied by the specific name, one of its ditinguishing features is the presence of small bulbils in the axils of the leaves. The flower-heads are of a more open nature than those of L. Dauricum, while the individual blossoms are of a brighter tint. They also last fresh for a longer period than the others. Lilium croceum, another of the upright-flowered race, is the old orange lily, a favorite with cottagers in many parts of the country. In color the flowers are of a warm reddish-orange, and, from their firm texture, they last well. Lilium Szovitzianum, also one of the earliest of lilies, differs markedly from the preceding, inasmuch as it is not seen at its best till it has become thoroughly established—say, two or three years from the time of planting. Once established in a good loamy soil, L. Szovitzianum is a noble lily, that will reach a height of four feet to six feet, or even more. The flowers, usually disposed in a narrow pyramidal-shaped head, are each about four inches across, the segments of a thick wax-like nature, and regularly recurved. Like the Martagons, to which it belongs, the flowers are drooping. Others of the Martagon class that may be included with early-flowering lilies are L. pyrenaicum, which has been with me for some years, the earliest of all to unfold its blossoms. Known sometimes as the yellow Turk's cap lily, it grows about two feet high, the stem being densely clothed with narrow leaves. The blossoms, which are freely produced, are small, regularly reflexed, and in color yellow, dotted with brown. The flowers have a heavy, unpleasant smell, which prevents their use in a room. This same feature also prevails, but to a less extent, in L. pomponium, usually listed in catalogues as L. pomponium verum. It grows from three feet to four feet in height, and bears deep scarlet, regularly reflexed blossoms. The exceedingly graceful, slender-growing L. tenuifolium, with deep scarlet flowers, is also entitled to rank with early-flowering lilies, and so, I should say, is the comparatively new Golden Gleam, which was given an award of merit at the Temple Show. Lilium carniolicum is somewhat in the way of L. pomponium, but it is a much inferior plant, the flowers being of a comparatively dull red color.

As the flowering seasons of the different lilies overlap each other, it is difficult to draw any hard-and-fast line, but as a rule the above may be taken as among the earliest to bloom.

Wisconsin State Horticultural Society.

The summer meeting of the Wisconsin State Horticultural Society was held at Oshkosh, Aug. 16-17, and was attended by over one hundred members and visitors. The first day's session was devoted entirely to floriculture. Wm. Toole, of Baraboo, read a paper on "Amateur Floral Decorations." He spoke of the necessity of having harmony of color in grouping flowers for decorative purposes. Pansies and many other flowers may nestle in the foliage without loss of effect, but asters, zinnias, dahlias, etc., are most effective when kept above the foliage. H. Sampson, gardener at Ceylon Court, Lake Geneva, read a paper on "Hardy Bulbs and Their Culture," treating especially of the different varieties of liliums and their characteristics and adaptability for amateur cultivation.

A. Martini, another gardener, gave some helpful hints on the planting of roses, recommending planting dormant stock in the spring, and pruning back to four or five eyes. Protect during the winter by pegging down canes after the ground is frozen and covering about one foot deep with dry leaves or stable litter and uncover gradually in spring. Mrs. Marcia A. Howlet spoke on "Flowers for Farmers," recommending the planting of the common shrubs and trees found in our everyday landscapes for the embellishment of our gardens. Dr. Victor Kutchin, of Green Lake, made a plea for conservation of the birds, as they do more good in destroying insects than harm in purloining fruit. Mrs. Irving Smith, of Ashland, contributed a paper on "Canning," and the work of the University of Wisconsin along horticultural lines was outlined by Professors Moore, Landers and Jones. Sidney Teller, of Chicago, spoke on "Play and Playgrounds in Chicago."

There was an excellent display of fruits, flowers and vegetables, J. B. Roe, of Oshkosh, carrying off the greatest number of premiums in the floral display. The society was entertained by a trolley excursion and picnic supper at the farm of N. A. Rasmussen. E. J.

Massachusetts Horticultural Society.

The midsummer exhibiton of the Massachusetts Horticultural society was held in the hall of the society August 19. The display of gladiolus was fine, and R. & J. Farquhar & Co. made a large display of lilies and herbaceous flowers. Following are the awards:

Perennial phloxes.—Twelve named varieties: T. C. Thurlow Sons, first; Wm. Whitman, second. General display: T. C. Thurlow Sons first; F. J. Rea, second; J. K. Alexander, third.

Gladioli.—Twelve named varieties: Montague Chamberlain, first; Montague Chamberlain, second; J. K. Alexander, third. Display of named and unnamed varieties: Montague Chamberlain, first; J. K. Alexander, second.

China asters: Wm. Whitman, first.

Annuals: Mrs. J. L. Gardiner, first.

Silver medal.—Montague Chamberlain for Gladiolus Rajah.

Honorable mention.—R. & J. Farquhar & Co., for collection of lilies.

First class certificate.—Montague Chamberlain for Gladiolus Niagara; Geo. Page for Gladiolus Kunderd's "Glory;" W. P. Lothrop, for seedling decorative dahlia, "Lothrop seedling;" R. & J. Farquhar & Co., for Viola cornuta pururera.

Gratuities.—Mrs. E. M. Gill, for display of cut flowers; W. P. Lothrop, for display of cut dahlias; Geo. Page, for display of foliage plants; R. & J. Farquhar, for display of Lilium leucanthemum, and for display of herbaceous flowers and phloxes; Wm. Whitman, for display of annuals and perennials, and for display of herbaceous phloxes.

Fruits.—Apples—Chenango: Ed. Parker, first; E. E. Cole, second; J. Corey & Son, third. —Duchess of Oldenburg: H. A. Clark, first; J. Corey & Son, third.—Sweet Bough: Geo. V. Fletcher, first; Charles B. Travis, second; Elliott & H. Ward Moore, third.—Williams: Geo. V. Fletcher, first; H. A. Clark, second; Elliott & H. Ward Moore, third.—Any other variety: Elliott & H. Ward Moore, first; J. Corey & Son, second; M. Calahan, third.

Melons.—James Garthy, first; James Garthy, second; Geo. D. Moore, third.

Pears.—Clapp's favorite: F. W. Dahl, first; W. G. Kendall, second; Frederick Mason, third. —Any other variety: F. W. Dahl, first; Edward B. Wilder, second.

Peaches.—Three varieties, twelve specimens each: J. Corey & Son, first.—Greensboro: Wilfrid Wheeler, first; J. S. Chase, second.—Any other variety: W. G. Kendall, first; H. S. Spring, second; H. A. Clark, third.

Plums.—Japanese Abundance: Frederick Mason, first; W. G. Kendall, second.—Burbank: W. G. Kendall, first; J. Corey & Son, second; Frederick Mason, third.—Any other variety: G. V. Fletcher, first; H. A. Clark, second; G. V. Fletcher, third.

Vegetables.—Beans: David L. Fiske, first.

Celery.—Frederick Mason, first.

Peppers.—Bull nose: Frederick Mason, first.—Any other variety, twelve specimens: Frederick Mason, first; Frederick Mason, second; Oliver Ames, third.

Squash.—Marrow: Frederick Mason, first; Waban Garden, second; Waban Garden, third.

Sweet corn.—Crosby: Elliott & H. Ward Moore, first; Alice A. Warburton, second; Frederick Mason, third.—Any other variety: Elliott & H. Ward Moore, first; Frederick Mason, second; Frederick Mason, third.

Gratuities.—William Whitman, for collection of vegetables; Frederick Mason, for collection of vegetables; Waban Garden, for egg plants; H. A. Clark, for collection of tomatoes; Geo. Page, for tomatoes and cucumbers; Alice Warburton, for cucumbers; Elliott & H. Ward Moore, for tomatoes.

POSTPAID TO Any ADDRESS

SAVES MANY TIMES ITS PRICE

THE AMERICAN FLORIST COMPANY'S DIRECTORY saves many times its price to every one who catalogues or circularizes the trade. Fully revised to date of publication, it puts the mail only to live names, avoiding waste of postage and printed matter, time and labor.

Contains 590 pages, lists of Florists, Seedsmen and Nurserymen of the United States and Canada by states and towns, also alphabetically; firms that issue catalogues, foreign merchants, horticultural societies and much other up-to-date information which makes it a reference book of daily utility wherever a wholesale trade is done.

Published annually by the

American Florist Co.
440 S. Dearborn St. CHICAGO.

Grand Rapids, Mich.

Freyling and Mendels, proprietors of the Wealthy Avenue Floral Co., are completing a beautiful salesroom in connection with their greenhouse establishment. A novel feature of this addition is its location, being about in the middle of the range, with the idea of later building an artistic conservatory or showhouse along the front parallel with the street. Under the new salesroom is a large cemented basement. The handsome interior finish of the salesroom is of mission oak, which, together with the lighting, heating, etc., makes this a most desirable addition.

Fred C. Chapman, a pioneer florist of this city, died August 16, 1911, at the age of 75 years. In 1880 he established the first greenhouses in this city on the site now occupied by the greenhouses of Crabb & Hunter. In 1882 he opened a retail store and removed to Madison avenue and Crawford street, where he continued his business until eight years ago, when he retired. The funeral was held on Saturday, August 19. IOWAY.

Louisville, Ky.

August has been somewhat duller than usual, but business during this week has improved greatly. Roses retail at fair prices. Carnations are very poor and scarce and asters are of very poor quality. Gladioli are plentiful but sell slowly. Customers have been calling for peony roots and making inquiries concerning fall bulbs. Owing to the exceeding hot, dry weather this summer there has been considerable complaint about young nursery stock which was planted last spring dying; in some cases the loss is as much as 50 per cent. Window boxes, vases and flower beds have not done this season, as well as usual.

NOTES.

Beutel & Frederick have moved to a new location near the place they formerly leased and have built a model establishment including greenhouses to meet the requirements of their retail trade.

The florists here were greatly disappointed when they heard the S. A. F. had voted to hold the 1912 convention in Chicago instead of this city, as they had hoped.

A. Rasmussen will build in the place of the new greenhouse destroyed by the wind storm, two houses, 35x400 feet each.

L. Gibson has been very sick, but is much improved and feeling pretty well again.

The C. H. Kunzman Floral Co. keeps this market suppiled with lily of the valley.

Frank Gottwald is cutting some very good carnations and asters.

H. C. W.

WORCESTER, MASS.—The High Street Greenhouses are erecting a new greenhouse 30x70 feet, to be devoted to the cultivation of carnations.

SPRINGFIELD, ILL.—The premiums at the Illinois State Fair to be held the first week in October aggregate $3,432 for floriculture and $1,664 for horticulture.

The Seed Trade.

American Seed Trade Association.

Leonard H. Vaughan, Chicago, President; Marshall H. Duryea, New York, First Vice-President; Edgar Gregory, Marblehead, Mass., Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

Next annual convention, June, 1912.

VISITED NEW YORK: J. C. Vaughan, Chicago; W. Nichols, of the St. Louis Seed Co., St. Louis, Mo.

BLUE GRASS seed, in growers' hands, is now quoted at $3.10, a new high record for car lots.

VISITED PHILADELPHIA: Wm. Currie, Milwaukee, Wis.; D. Carmichael, of J. M. McCullough's Sons Co., Cincinnati, O.

REPORTS from the tuberose growing districts are that the growing crops of these and caladiums are considerably handicapped by dry weather.

GLADIOLUS growers are hopeful that recent rains will plump up the bulbs of saleable sizes. Localities affected by drought have not been promising for this crop.

TIMOTHY and medium red clover seed have both stiffened in price this week, the latter making a new high record on this movement. White clover seed seems scarce all around.

POTATO prospects and prices continue to be of great interest to seedsmen as well as truckers. The late crops which were depended upon to bring prices down to normal, are still uncertain.

THE protests entered by Schlegel & Fottler Co., Boston; F. B. Vandergreft & Co., New York, and Jackson & Perkins Co., Rochester, N. Y., in regard to hyacinth bulbs, have been sustained by the general appraisers.

CHICAGO.—Prices on the Board of Trade, August 23, for grass seed, were noted as follows: Timothy, $12.50 to $14.50 per 100 pounds.—Vaughan's Seed Store received two carloads of French bulbs this week, making three in all.

NEW YORK.—The S. S. Venezia, from Marseilles, was detained three days at quarantine. She carried quite a quantity of French bulbs. The Santanna, soon due, is also liable to detention.—Canary seed, Turkish and Plate, is firm at $2.75 per 100 pounds. Pea beans are quoted at $4.10 per 100 pounds, rather a high figure.

Peas and Beans.

FUTURE COST, SUPPLY AND DEMAND.

Paper read by C. N. Keeney, of Le Roy, N. Y., at the convention of the American Seed Trade Association at Marblehead, Mass., June 20, 1911.

In the good old times, when seedsmen listed only three or four varieties of beans and when peas were either Marrowfats or Champion of Englands, it was not a difficult proposition for a seedsman to estimate his requirements, for in those days, beans were beans and peas were peas and most any variety would answer the requirements of the consumer; but in later years, when a seedsman is required to carry 20 or 30 varieties of beans and fully as many varieties of peas, it is a difficult and expensive proposition to secure a sufficient quantity of each variety to supply the demand and at the same time avoid the risk of carrying stock until its germination is impaired. It, therefore, becomes necessary for the seedsman and the grower to be well posted as to the varieties in demand and to be able to furnish the people the kinds they want. Consumers are becoming more and more critical every year and the old Mohawk bean and the Marrowfat pea are gradually disappearing. New varieties of peas are appearing every year, some of which are exceptionally desirable, while others, which do well in England and which are used there as exhibition peas, are not sufficiently hardy to give a satisfactory crop in this country. Nearly all the work of originating new varieties of peas seems to be done in England, while almost the only good work done on peas in this country is done by selecting and re-selecting for purity of strain and for productiveness. This work of selection and re-selection requires a great deal of careful and painstaking work, as well as remarkable patience and perseverance and one of the hardest things for a man engaged in this line of work to do, is to throw away the plants that are good and retain and use only the very small percentage that are exceptionally fine. When this has been continued for five or ten years, real progress will have been made, unless some of these prolific plants are prolific because of unintentional cross-fertilization by means of which the plants are lead away from the original true type of the variety. When this occurs, these plants, even though prolific, must be rejected and a fresh start made with the true type.

Within the last few years, several Agricultural Colleges and many Experiment Stations have been taking up the work of plant-breeding and are attempting, by cross-fertilization, to produce new and better sorts of both beans and peas. Their progress is much more rapid in beans than in peas and one of the hard lessons to learn is to discard and destroy a hundred varieties of good, new beans for every half dozen kinds of exceptionally desirable ones. Then again, a new variety may do well in the locality in which it originated, but may not thrive in other sections. A bean to become popular, must produce good crops in nearly all bean growing sections and this can be determined only by careful tests in many localities, made during a series of years.

As to the probable cost of beans and peas hereafter, I would say: much depends upon the yield of the crop. A fair average yield of beans such as we had in 1910, tends to hold the market steady but a light yield discourages the farmer and he refuses to grow garden varieties unless at an advanced rate. When we have half a dozen short crops in succession without even one good crop during that time, as has been the case with peas during the past six years, the cost runs up quite high. The seedsman naturally thinks his cost is higher than it need be but most pea growers know to their sorrow that their crops during the past two years have cost them much more than they realized out of them. It costs all the way from 15 cents to $1.00 a bushel to pay the freight out on the seed sown in the spring. This seed, of course, has been handpicked and screened at considerable expense, but when the crop comes back, this work has to be done all over again and the return freight on the crop to the picking room varies all the way from 15 to 75 cents per bushel, and where a thousand bushels of seed sent out produce only 1,250 bushels of hand picked crop, leaving only 250 bushels for the grower to deliver to his customers, it can be readily recognized as a losing operation. Where a grower can fill only 25 per cent of his contracts he is certain to be a heavy loser; where he can deliver only 50 per cent of his contracts he is fortunate if he breaks even and his only chance for profit is in a crop which enables him to deliver from 75 to 100 per cent on his contract orders.

Some seedmen have the impression that if we ever get one good crop of peas, prices are likely to go back to their old low levels, but this is not at all probable, for no grower can afford to do business unless he has a sufficient margin to insure him against loss, based as the insurance companies say "on past experience" and if the seed grower gets only one good crop in six years, he cannot hold his own even though the prices may seem to be abnormally high.

Now, as to demand. No doubt, the demand for peas is somewhat lessened by extremely high prices. Then again, the seedsman's trade in peas is somewhat curtailed by the fact that canners are putting up more and better canned peas every year and canned peas which are picked and packed the same day are often better than green peas which cannot reach the ultimate consumer until two or three days after having been picked. Any man, however, who has eaten Gradus, Thos. Laxton and Stratagem Peas fresh from the vines, when at the best stage for table use, can readily understand why there is and always will be a good demand for desirable varieties of peas.

LILIUM HARRISII The Bermuda Easter Lily.

Let Us Supply Your Wants in Lilies This Season.

We think we can make it to your advantage to do so, as regards both quality and price.

The stock that we offer is not gathered indiscriminately from all kinds of sources, but is grown for us by a few selected growers whose stocks have been worked up from the true, original stock. In order to ensure the health of the product, the bulbs are not grown on the same field oftener than one season, other crops being grown on the field the preceding year. The ground is thoroughly manured when the previous crop is grown, leaving it in a high state of cultivation, and when the lily bulbs are planted no fresh manure is used, and this prevents disease and insures a crop of strong, healthy bulbs.

In addition to this, we do not dig our bulbs as early as they are usually dug, but leave them in the ground until they are thoroughly ripened and matured. When Harrisii is good, it leaves little to be desired. There is very little, if any, stock obtainable as good as the stock that we are offering. We are supplying only this one grade of selected stock, and when this is disposed of, we shall have no more to offer.

While the quality of the stock that we offer is of the highest, our prices are as low as, or lower than, the prices of those who offer the ordinary stock gathered from indiscriminate sources. We are sure buyers will find our stock very satisfactory, and much more so than the Japanese Longiflorum, which has badly deteriorated in recent years.

Bear in mind that we were the original introducers of Harrisii in Bermuda, and that we have exceptional facilities for obtaining our present supplies. Also take note that the smallest bulbs that we offer are 6-7 inch bulbs, not 5-7 inch, as usually offered.

6- 7 inch bulbs, 335 to the case, **$15.00** per case; full 1000 lots, **$ 40.00** per 1000.
7- 9 inch bulbs, 200 to the case, **$16.00** per case; full 1000 lots, **$ 75.00** per 1000.
9-11 inch bulbs, 100 to the case, **$18.00** per case; full 1000 lots, **$175.00** per 1000.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

THE BOOK OF GLADIOLUS

THE first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120-page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

Winter Crops.

August marks a change in season for greenhouse men as preparations for the winter crops must begin. Some growers make a great mistake by allowing cucumber and tomato crops to continue too long at this time of the year. This invites insect pests to get a foothold. They see every dollar coming in from the sale of such crops but cannot see the delays and damage to winter work. In many cases it would pay well in the long run to tear up any remaining crops and disinfect the houses by burning sulphur. Where spacious ground beds are used and a horse can be put, there is nothing better than a one-horse cultivator to give the ground a good turning up. We have used such a tool, say six or eight rounds, applying some air-slaked lime and thus worked the soil into nice shape. Next apply three or four inches of coarse fresh manure and turn the water on; repeat the watering every two or three days—enough to keep the earth nicely moist but not soggy. In two or three weeks the manurial strength will be washed into the beds and moisture will be deep and uniform. When we are ready to plant, rake off the coarse manure, spade the finer part under, and we are sure of a good start. Where disease has been troublesome it is best to remove five or six inches of soil and replace with new ground that has been previously well prepared.

MARKETMAN.

Watering Vegetables.

It is of course only in smaller cultures that the vegetable garden can be sprinkled at need, and it is a well-known fact that a strong soil, kept well pulverized by frequent hoeings, produces plants which require less watering than will silicious or humus soils which are excessively porous. The state of the plant and its foliage also determine the need of moisture; plants just starting or approaching maturity assimilate and evaporate much more water than those reaching the limit of growth.

Watering, except in case of young seedlings and plants having a very shallow root system, should be rather plentiful than frequent; otherwise the plants have a deceiving air of freshness while the soil at the roots is dry and fails to sustain them in time of need. In warm weather, morning or evening watering is suitable for beets, chicory, endive, cucumbers or spinach; strawberries should be watered in the early morning, or in the evening of picking days. Evening waterings when the berries are ripe invite the attacks of snails and slugs. Beans, lettuce and melons should have water before the sun gets to them; garlic, shallots and onions only in case of prolonged drought and especially dry location. Parsley, peas, scorzonera and salsify should be assiduously sprinkled in their youth to insure germination and regular growth. Egg plants, tomatoes and peppers should be supplied with needed water in the morning, for fear that too low a night temperature will induce disease. Carrots, cabbages, turnips, leeks and radishes may be watered at any time, but late sowings of any vegetable should have their waterings in the morning. Plants spaced well apart are generally better for a straw mulch in warm weather.—Revue Horticole.

Heating Problem.

ED. AMERICAN FLORIST:

We have a greenhouse 17x50 feet and will add a new house 10x32 feet to be used for propagating, and both are built as low as possible. They are to be heated by a return flue steel boiler with a grate surface 2x4½ feet and 44-1¾-inch flues which burn steam coal. We enclose diagram of the houses and piping, and will you kindly answer the following questions: Will this boiler heat both houses at a temperature of 45° to 60°? How much pipe would it take? What size pipe should be used? What would be the best arrangement?

New York. N. C.

There should be no difficulty in maintaining a temperature as high as 60° with a boiler having nine square feet of grate area. There is nothing to indicate whether the houses are to be heated by steam or hot water, but, as the latter is generally preferred for small houses, the answer will apply to that mode of heating.

In order to maintain 60° in the larger house, two 2½-inch flow pipes could be carried on the plates and with each of them five 2-inch returns could be supplied. The return could be on the walls or under the side benches. If a coil is desired under the middle bench, it would be better to use three 2-inch flows, one of which could be under the ridge and this could supply three 2-inch returns, with the same number on each of the walls, each coil to be supplied by a 2-inch flow. If 50° will suffice, use the same number of flow pipes but reduce the number of the return pipes in the house to six.

For the propagating house, 10x32 feet, use one 2½-inch flow pipe at the ridge and either three or four 2-inch returns under each of the side benches according to the temperature desired.

The highest part of the flow pipes should be at the boiler end of the houses, where the expansion pipe should be connected, and they should be given just enough fall to free them of air. The return pipes should be kept as high as possible and should have only a slight fall. L. R. T.

The Nursery Trade

American Association of Nurserymen

J. H. Dayton, Painesville, O., President; W. H. Wyman, North Abington, Mass., Vice-President; John Hall, Rochester, N.Y., Sec'y. Thirty-seventh annual convention to be held at Boston, Mass., 1912.

WATERVILLE, ME.—The state inspection of the Mitchell & Co. nurseries found the 90,000 fruit trees in excellent condition.

JOHN H. BEATTY, superintendent of parks for Manhattan and Richmond, is back at work after a forced vacation which began June 1. Commissioner Stover has nothing to say.

JACKSONVILLE, FLA.—C. L. Bragg purchased from C. D. Mills the landscape department of the business of which he has had charge for the last two years, besides acting as vice president of the company.

LA PARK, PA.—George W. Park was the loser of many letters containing money and orders by the peculations of a mail wagon driver. Many letters containing money orders which had been discarded were found in three different sections of the city.

Hardy Hydrangeas.

Among the shrubs in early bloom the most showy are perhaps the hydrangeas, and of the species cultivated Hydrangea paniculata is now the most conspicuous. The most generally planted of the forms of this plant is the one in which all the flowers are sterile, known as Hydrangea paniculata grandiflora. This plant produces large conical clusters of white flowers which turn rose color in fading, but will not be in bloom until August. There are two other forms in which only a few of the flowers are sterile and are called ray flowers because they surround the clusters of small fertile flowers. These are the wild plants from which the form grandiflora, with all the flowers neutral, has been developed, states the Bulletin of Popular Information, issued by the Arnold Arboretum, July 5, probably by long cultivation and selection in Chinese and Japanese gardens. There are two forms of this hydrangea with perfect and ray flowers and one of these, variety praecox, is just coming into flower and the other, variety tardiva, will not be in flower for several weeks. There are three plants of the variety praecox in the collection, differing in the size of the flower-clusters and in the size of the ray flowers. The handsomest and the earliest of these was raised from seeds collected by Professor Sargent in Hokkaido where it grows into a small tree sometimes 20 or 30 feet tall. Individuals of two of the American species of hydrangea have been found with sterile flowers only. The handsomest of these is the variety of Hydrangea arborescens, known as grandiflora. This plant was found a few years ago growing wild in one of the western states and has been largely distributed in this country and in Europe. It is a handsome hardy plant, of good habit, and it produces its large clusters of white flowers in great profusion. It is just coming into flower a few days before Hydrangea arborescens growing next to it. Of Hydrangea cinerea of the southern states there is also a form with all sterile flowers, the variety sterilis. This is also a good garden plant, blooming rather later than Hydrangea arborescens grandiflora.

Ornamental Fruits in Arnold Arboretum.

From July until April of next year the Arboretum will be interesting from the fruits which are to be seen here. Nothing so surprises and delights European visitors who come to the Arboretum in summer and autumn as the profusion of showy fruits which are produced here by many trees and shrubs. The Arboretum has done a useful service in bringing together all the wild forms of the plants which bear showy fruits, and in making known their value as ornaments of American gardens; and among the crabapples, plums, cherries, roses, currants, cornels, privets, buckthorns, barberries, elders, hawthorns, elæagnus, celastrus, evonymous, panax and other plants with fleshy fruits the student and the gardener in search of useful plants will find here now and for several months much to investigate.

The Bush Honeysuckles are now the handsomest plants with ripe fruits. They produce fruit in great quantities and it remains in good condition for several weeks. On different species there are blue, black, orange, yellow, crimson and scarlet fruits; and the fruit of some of the hybrids is more beautiful than that of their parents. The orange-yellow translucent fruit of Lonicera minutiflora is perhaps now the most beautiful in the collection. This plant is a hybrid between one of the Tartarian Honeysuckles (Lonicera tartarica) from central Asia and Lonicera Morrowii from eastern Siberia. Another handsome plant now is Lonicera muscaviensis, with large and translucent scarlet fruit. This is a hybrid between two species of eastern Siberia, Lonicera Ruprechtiana and Lonicera Morrowii. Other plants now covered with ripe fruit are the Tartarian Honeysuckle and its yellow-fruited variety; Lonicera bella and Lonicera notha with crimson fruit; Lonicera Morrowii with dull crimson fruit; Lonicera xylosteum with large, dark crimson, lustrous fruit, and Lonicera xylostyoides with large red fruits. On other species the fruit is not yet half grown, so that for a long time there will be much of interest to see in this collection which is one of the most complete in the Arboretum.

The fruits of some of the chokecherries in the group at the entrance of the shrub collection close to the Forest Hills gate are beginning to ripen. The most unusual is the yellow-fruited form (var. leucocarpa) of the eastern chokecherry, Prunus virginiana. This yellow-fruited cherry is common in some parts of the Province of Quebec and occasionally reaches the Canadian markets. The fruit is large, light yellow, translucent and of a better flavor than that of the common chokecherry.

The fruit of Elaeagnus longipes still remains on the branches, although it has been ripe for several weeks. This hardy Japanese shrub flowers and fruits here profusely. The fruit hangs gracefully on long slender stems and is oblong, scarlet, lustrous and covered with small, white dots. It has a tart and rather agreeable flavor. This plant can be seen on the left-hand side of the Bussey Hill Road above the lilacs in the elæagnus group.

The white fruits of Cornus stolonifera, the Red Osier Dogwood or Cornel of eastern North America and its yellow-fruited variety (var. flavoramea), and Cornus Baileyi are now ripe, while the flowers on the other species of the group have not yet faded. Handsomer even than the fruit of these species are the pale blue fruits of Cornus rugosa or circinata which, although now nearly full grown, will not ripen for a few weeks. This is one of the most ornamental of the native dogwoods, with large, round, oval leaves pale on their lower surface and large flat clusters of pale yellow flowers.

The abundant fruits of Viburnum Americanum, the so-called High-bush Cranberry of the northeastern part of the country, are now more than half grown and light yellow; later they will become scarlet and very lustrous and continue to ornament the plants until spring.

NORTH ABINGTON, MASS.—Littlefield & Wyman are building a 100-foot addition to their greenhouse.

GLENCOE, ILL.—A. Satchel has established a nursery and florist business on Greenwood avenue carrying a full line of nursery stock, seeds and garden supplies.

NEW YORK.—Articles of incorporation have been filed by the Royal Fern Company with a capital stock of $25,000, to deal in plants, shrubs, etc. The incorporators are T. B. Hoy, C. D. Haines, M. Zagat, of New York city.

Cutlery Corroded by Tomatoes.—Addressing the members of the Iron and Steel Institute in London on May 11, on the corrosion of metals, P. Longmuir said that some four years ago he had to examine a parcel of table knives which had been rejected owing to the development, within a few months of actual service, of deep pits and grooves. The surfaces of the knives were deeply corroded, and the blades were therefore declared by the users to be faulty steel. A detailed examination of the manufacture of the knives, and of the steel employed, conclusively proved freedom from fault in these directions. The steel was highest quality double shear, containing nothing but carbon and iron, and the manufacture was that which was usual in producing the highest grade of Sheffield cutlery. The net result of the examination led to the revelation that the corrosion had all occurred within one week, that this particular week was race week, and that for the time being ordinary kitchen services were disorganized. Very interesting corrosion effects might be obtained by leaving steel knives in contact with fruit or vegetable juices for periods of two or three days, and in this respect tomato juice was specially effective.

Phytopathological Inspection of Horticultural Products in France.—A recent law has been passed in France creating in the agricultural department an inspection service for diseases of horticultural products. It will be divided into two sections: one entomological and the other devoted to fungous or cryptogamic diseases. The expenses of this inspection will be met by an annual tax of five dollars on each horticultural establishment, and the surplus met by assessing the products examined in proportion to their money value.

Deaths from Potato Gas.—The cause of the deaths of three men of the battleship Superb—ship's steward assistant Jones, cooper Newnham, and seaman E. Coll—was a remarkable one. It was at first stated that they had been killed by an explosion of coal gas, but it appears that they were asphyxiated by noxious gas from a quantity of potatoes that had been stored in the bottom flats, and which had gone bad, says a daily journal. The flats had been closed for a considerable period. The men had been lying dead some time before they were found. Their bodies were landed and taken to the naval hospital mortuary, as the Superb was ordered out again for manœuvres.

Getting Furnace Results.

In connection with its investigations bearing upon the improvement of furnace conditions, and on efficiency in the use of fuel, the Bureau of Mines has just issued a bulletin describing the apparatus and methods in use by the bureau for the sampling and the analysis of furnace gases. The authors, J. C. W. Frazer and E. J. Hoffman, say in their foreword:

"The furnace conditions prevailing both in small plants and in large industrial establishments in this country are frequently far from satisfactory. If such conditions are to be improved, they must be more thoroughly understood, and means must be found to insure complete combustion of the fuel, and yet to permit operation with such an excess of air as will result in the greatest efficiency. In this work the services of a chemist are indispensable. A very important problem is the determination of the small percentage of unburned combustible matter that escapes from the furnace in the fuel gases. Under ordinary circumstances so little as 0.1 per cent of unburned combustible matter in a furnace gas is equivalent to about one per cent of the fuel used, and for the determination of such small percentage of gas more accurate and refined methods are required than have ordinarily been available before."

This bulletin, which is No. 12, may be obtained by those interested by writing to the Director of the Bureau of Mines, Washington, D. C.

THE HOME OF ARAUCARIAS

Araucaria Excelsa, Robusta and Compacta Our Specialty.

You will never be sorry. It will pay you well. Do it now, and lay in a stock of Araucarias. Every day is valuable to you, because they grow into money for you.

Araucaria Excelsa Our Specialty.

Warning—Don't be deceived. Now, as well as for the last twenty-five years, we hold the ground as leaders in importing, growing and shipping of our specialty, the Araucarias.

Araucaria Excelsa, Robusta compacta, Glauca, and Palms, etc. Florists, you all know we are leaders for the last 25 years in importing, growing and shipping of this so well known evergreen decorative plant, the **Araucaria,** more in favor than ever, from Atlantic to Pacific Ocean. To every florist our Araucarias is interesting, therefore no argument is needed for our goods. We know what our customers need, therefore we have provided and set aside special specimen plants, Spring 1910 importation, for lawns, porches, verandas, bungalows, private summer residences, the hotels and boarding houses on the seashore and elsewhere. This plant is one of the most desirable evergreen decorative plants adopted for this above mentioned purposes. For decorative purposes, in connection with palms, they will make a fine display.

Araucaria Excelsa, raised from top cuttings, 6-7 inch pots, 4 to 5 years old 5, 6 and 7 tiers 25, 28, 30, 35, 40-in. in height... $1.00 $1.25, $1.50, $2.00 to $2.50 each
Araucaria Excelsa Glauca and **Robusta compacta,** 6-7 in. pots, fine bushy plants ..... $1.25, $1.50, $2.00 each
Araucaria Excelsa, new importation, out of 5, 5½, and 6-in. pots, 2 to 3 years old, 3, 4 and 5 tiers, 10 12, 14, 16, 18 and 20 inches high . 40c, 50c 75c and $1.00 each

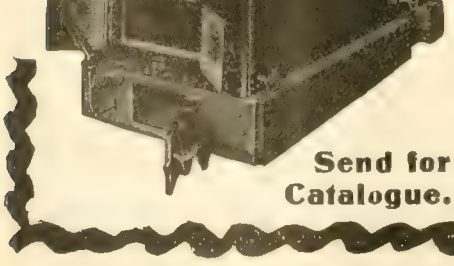
What the Users say



Send for Catalogue.

Cast Iron Boilers Break Twice in Four Years. Moral: Use Kroeschell Boilers, They are Safe.

"I bought a No. 2 boiler in 1902. Takes care of 7000 sq. ft. of glass; would take care of 2000 more. I have **had a cast iron boiler,** but it **broke down twice in four years,** always in the coldest weather. It broke down Dec. 29th, 1904, and **I lost all my stock in consequence.** I have now two No. 2 Kroeschell Boilers, and do not worry about their breaking down.

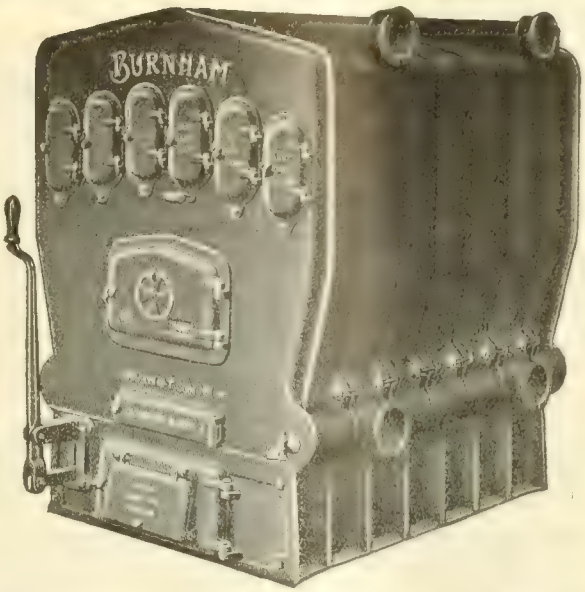
Chicago Coal Notes.

After experiencing a few weeks of heavy business the local coal market has taken a decided slump. At the same time it was announced that the price war among the retailers had again been renewed. Most of the prices are yet quite steady with the exception of smokeless mine run, which has dropped from five to ten cents per ton. The increased demand for coal the last few weeks caused many of the mines to ship domestic coal to Chicago unconsigned, with the hopes that they would be taken up upon arrival. This has proven a disastrous move, for a large number of cars are now in this vicinity, being held for demurrage. These cars consist mainly of smokeless coal and are being sold at remarkably low prices, so as to get them off their hands. This is an opportunity for many florists who want high-grade coal.

R. C. Whitsett, of the R. C. Whitsett Coal & Mining Co., reports very favorably upon his greenhouse business. He has renewed many of last year's contracts and expects a decided increase over last year's business. Mr. Whitsett has compiled a large list of satisfied greenhouse coal consumers which he would be pleased to mail to others upon request.

D. S. Willis, secretary and general manager of the Harrisburg Southern Coal Co., with offices at the Merchants Loan & Trust building, reports a very busy season among the greenhousemen and an exceptionally heavy demand for six-inch Carterville coal. He will soon leave on an extended tour through the east, having in view the purchasing of another mine, so as to enable his company to keep abreast of the increased demand.

The American Collieries Co., with offices at the Fisher Building, are offering a high grade Pocahontas coal to the trade, known as Keystone Pocahontas coal. This coal is warranted to meet all the requirements of the greenhouseman and they advise those who haven't tried the famous Keystone Pocahontas coal to write them for descriptive matter and prices, which will be gladly furnished.



Frank Knapper, a Yonkers Nurseryman, Says This About
The Burnham

"The first winter in fifteen years that I have been able to sleep through the night without getting up and tending the greenhouse boiler. The Burnham Hub, 846 Sectional, I bought last fall is the reason. I fix it for the night at six o'clock and never have to touch it till seven the next morning. One boiler I had before lasted only four years—and cost nearly as much in repairs as the price of the boiler. This year I have had no repairs, as you know. One man came here and saw your boiler at work; he sent **you** his order for **two.**" Yours truly,

Frank Knapper

Trouble Talk No 2
Second Series

Tells of a certain chimney (not concrete), and the considerable bunch of money that went up it.

SPEAKING of chimneys. I am first going to tell you something about boilers. One kind—which is one of many kinds

Last September a Long Island grower called us up on the 'phone first thing one Monday morning and asked the price on one of our 30-inch, 9-section greenhouse boilers. We named him the same price we would you. He went right up in the air and said we were "a bunch of robbers" and several other soothing, flattering things. We refused to cut the price. The boiler was and is worth it. He refused to buy unless we did cut.

"All right then," he said, "I buy a So-and-So boiler." And he did.

Along in January we got a wire from him, saying "Send Trouble Man. Will be home Monday and Tuesday."

Tuesday I went down, and on going unexpectedly around the corner of the workroom, came upon him looking up at his chimney in a most perplexed, worried way.

"What's the matter?" said I.

"If I knew—what in thunder do you suppose I'd send for you for?"

"Let's go in and take a look at your boiler," said I.

The drafts were on full tilt and the chimney sissing hot.

It was easy enough to see where the trouble laid.

That "So-and-So" boiler turned out to be one of those "skimp" kinds made to sell at a low price. It had plenty of grate surface (and that's what fooled this grower), but **shy** on heating surface and **short** on fire travel. Of course he was burning coal to beat the band, but half the heat was going out the chimney. **And heat out is money out.** But that isn't all.

He was staying up nights firing the blasted thing. And that isn't all.

He was saying things he ought not to say (most of them hotter than his fire) while he watched the temperature in his houses dropping near the danger point. After sympathizing with him I said something like this:

If you want a man to grow roses, you don't hire an orchid man, do you? If you want a greenhouse ventilating apparatus, you don't go to a house hardware concern and get a window lifter. Then why under heavens did you stub your toe when it came to buying a greenhouse boiler? Why didn't you go to greenhouse people and buy a greenhouse boiler and pay the price of a greenhouse boiler? Don't you know that there are very few concerns making a cast iron greenhouse boiler especially for greenhouse work, and that we are one of the few?

He didn't answer any of my questions till a week after.

This was his answer: "Ship one of your genuine greenhouse boilers at once. Leave it to you the size to send."

All of which gives me a chance to say once more, that if you are in trouble or want to keep out, write to me. Address your letter

The Trouble Man
Hitchings and Co., Elizabeth, N. J.

Next week's talk will be about a certain grower (you know him) and how he sold himself one of our boilers.

There may be a sketch of the boiler, but probably not of the grower.

OFFICERS-ELECT—RICHARD VINCENT, JR., Baltimore, Md., Pres.; AUGUST POEHLMANN, Chicago, Vice Pres.; JOHN YOUNG, New York, Sec'y; W. F. KASTING, Buffalo, N. Y., Treas. Next meeting at Chicago, August, 1912.

AMERICAN GLADIOLUS SOCIETY.

Next meeting and exhibition, August, 1912, I. S. HENDRICKSON, Floral Park, N.Y., President; L. MERTON GAGE, Orange, Mass., Secretary.

RAILWAY GARDENING ASSOCIATION.

Next meeting at Roanoke, Va., 1912. PATRICK FOY, Roanoke, Va., President; J. E. BUTTERFIELD, Lee's Summit, Mo., Secretary and Treasurer.

AMERICAN ASSOCIATION OF PARK SUPERINTENDENTS.

Next meeting at Boston, Mass., 1912. W. H. DUNN, Kansas City, Mo., Pres. F. L. MULFORD, Washington, D. C., Secy-Treasurer.

CHRYSANTHEMUM SOCIETY OF AMERICA

Annual convention and exhibition in conjunction with the St. Louis Horticultural Society, St. Louis, Mo., November 7-11, 1911. ELMER D. SMITH, Adrian, Mich., President; C. W. JOHNSON, Morgan Park, Ill., Secretary.

AMERICAN ROSE SOCIETY.

Next annual meeting and exhibition at Detroit, Mich., 1912. A. FARENWALD, Roslyn, Pa., President; PHILIP BREITMEYER, Detroit, Mich., Vice-President; BENJAMIN HAMMOND, Fishkill-on-Hudson, N. Y., Secretary.

THE AMERICAN CARNATION SOCIETY.

Next annual convention and exhibition at Detroit, Mich., January 24, 1912. J. A. VALENTINE, Denver, Colo., President; A. F. J. BAUR, Thirty-eighth St. and Rockwood Ave., Indianapolis, Ind., Secretary.

SUGGESTIONS FOR PLANT GROWERS.

Heaths.

During the hot weather the ericas will demand considerable attention. The plants should be plunged in the coolest location possible, yet where they will get the full sunlight. The pots are now full of the very fine roots and if these once get dry the tender roots will burn. There is no plant the florist grows that demands closer watching and more careful watering than the heaths. They are so hard wooded that they do not show neglect as quickly as the softer wooded plants, but if they get once fully dried it means absolute disaster with no flowers the succeeding year. The grower well posted in the culture of these plants can tell at a glance when these plants should be watered and never neglect them. If the plants are growing unshapely they should be pinched back so that the form will be kept. The plants that are in small pots will need repotting in September; a fine loam with but little fibre and with no manure is to be preferred for these plants, for their fine roots do not like a coarse soil and manure of all kinds should be omitted from the soil in which they are grown.

Mignonette.

The plants of mignonette from seed sown in July will soon have to be placed in their winter quarters in the bench. If extra large and long spikes, that are always so much admired, are wanted, the soil will have to be very rich. To ordinary compost (that is, two-thirds loam and one-third manure), add about as much manure again, making the soil about half and half. The plants should be set about 12 inches apart. Water only around the plant until the roots begin to spread in the soil. Keep the soil free from weeds, well scratched over and loose, that it may not become sour. The tops should be pinched off until six or eight branches have been formed. The cabbage-worm will soon make its appearance unless this has been guarded against, and if a leaf is found eaten hunt for them at once. When they first make their appearance they are only about a quarter of an inch long. They are green, just the color of the foliage, but have a velvety appearance and are generally found on the midrib of the leaf or on the stem. Hand-picking is the only remedy and it takes sharp eyes to find them, but they must be got rid of or they will soon ruin the plants.

Violets.

It is fast approaching the time to house the plants of the double varieties of violets that are grown in the field, the more successful growers being of the opinion that the plants should be under glass before the season of heavy dews. In preparing the beds have plenty of old leaves; it is not necessary that they be rotted; in fact, leaves gathered last fall are to be preferred, for they will generate a little heat in the soil and the violet plants seem to grow and push their roots into half-rotted leaves better than in leaf-mold that is finely decomposed. A layer of three inches of leaves in the bottom of the bed will prove of great advantage in violet culture. Whatever manure is used should be thoroughly rotted, the violet will not root into fresh manure at all. An old gardener, who was very successful in violet culture, once told us how he prepared his frames. They were made in a similar manner to hotbeds, only instead of manure a foot of leaves was placed at the bottom and eight or ten inches of soil placed on them. The leaves will furnish a mild heat nearly all winter and greatly assist in keeping the frames warm. We tried that method the following fall and thinking that the leaves would not furnish nutriment enough we incorporated a good quantity of half-rotted manure in the soil, the manure still being more or less lumpy. The violets grew finely and produced an excellent crop of large flowers. In the spring when we lifted the plants we found the roots had all gone into the leaves, there being no feeding roots in the soil, and in making their way through the loam had avoided all the manure, this still being in the lumps that it was placed in the soil. In lifting the plants avoid allowing the roots to become dry;

lift with a good clump of soil and do not keep the plants too long in the air, only lifting what can be handled expeditiously. Plant firmly, but avoid walking on the beds, water as soon as planted and water well so that the soil will be firmed around the plants. Shade for a few days until growth starts and then give all the air and light possible.

Alternantheras.

The propagating bed will not be full at this season and it is one of the best times to procure a stock of that splendid carpet bedding plant, the Alternanthera paronychioides major. This plant simply refuses to grow during the winter and it is almost impossible to procure cuttings until late, with the result that the plants are necessarily small. Any amount of cuttings can be procured now and they can be easily rooted either in flats of soil or in the propagating bed. When the cuttings are inserted give them a good watering and keep them shady for two or three weeks and they will all root. They can then be placed in flats about one inch apart and placed in a frame outside or in the greenhouse. They can be wintered in a warm dry house on a shelf near the glass, and potted in April, and will make fine plants. The other varieties are much more vigorous and will thrive in a lower temperature. A few old plants can be lifted and propagated in the spring in the usual manner.

Hollyhocks.

During August and early September is the right time to sow hollyhock seed for the next season's flowering. Seed sown in the spring will not produce a plant that will flower to any great extent that year, and they will have to be carried over the winter to make good, large plants, but seed sown now will make fine plants for next year. For the last few years the fungus that has attacked hollyhocks has made it difficult to carry the old plants over with any degree of certainty, but with late summer sowing much of this trouble is obviated. Be sure and purchase a good strain of double seed, and sow in a shaded frame, and as soon as large enough pot up in 2-inch pots. Grow them in a frame until November 1 and then pot in 3-inch or 4-inch pots. These can be carried over the winter in a cold greenhouse or in well protected frames, and started in the greenhouse in March and nice plants for summer blooming be assured.

Discolored Poinsettias.

ED. AMERICAN FLORIST:

I forward you leaves of Poinsettia pulcherrima which appear to be diseased. Can you inform me what is the trouble and give me a remedy?

V. C.

There were no insects, bacteria or fungi on the leaves forwarded, and the discolorations appear to be a scald, either caused by sun burn or some trouble with the root action. Any extra strong nitrogenous matter in the soil would cause the leaves to scald in a similar manner. W.

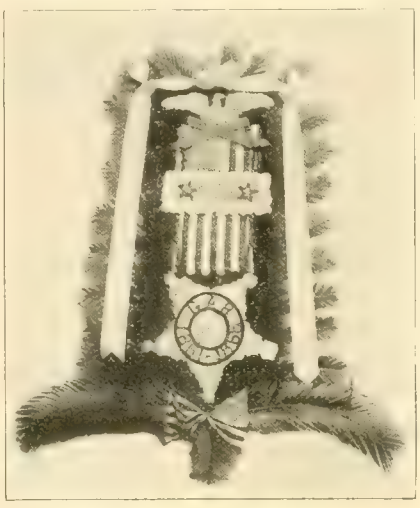
ONEONTA, N. Y.—A grand floral parade and battle of flowers will be held at the Central New York fair September 20-21. Large premiums are offered for this feature.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Floral Grand Army Badge.

The floral design of the badge of the Grand Army of the Republic which we illustrate was arranged by Chas. P. Mueller, Wichita, Kans., and shows what can be done by practicing a little ingenuity. The florist in the larger cities who can run into or 'phone the wire workers little knows the perplexities of the florist in the distant towns when a rush order is received for a certain design. This arrangement was made upon a 24x48 inch panel, the background being of green and cycas leaves. The ribbon of the badge was an American silk flag, the rank strap was made of purple asters with a white border, the star was yellow, using a white rosebud to represent the diamond. The large star was of light



A Floral Grand Army Badge.

lavender asters. The combination was very pleasing and the design did not have the heavy, close effect so often seen with this class of work.

Novel Summer Decorations.

AEROPLANE IN FLOWERS.

No design could be more appropriate at this time than the aeroplane. However, care should be taken in selecting a model. The Wright Bros.' model makes an artistic design for floral arrangement.

Now that asters are plentiful the Wright aeroplane, modeled upon a wire frame, can be nicely arranged of pink China asters. Cover the top and lower tier with small pink asters, using rose foliage as a foundation. Do not mass them too closely, but allow a little of the rose foliage to show. The front steering gear can be covered with a pink chenille or better, a pink satin ribbon of the shade of the asters. If this ribbon is rolled a bit before covering the wire it gives a richer effect. The wheels can be treated in the same way, a small aster being effectively placed in the center of each wheel. The back section of the aeroplane can be arranged in the same manner. All wires not covered with flowers should be covered with ribbon.

The aeroplane should be suspended by a wide pink sash ribbon, the color of the asters. Underneath a square of real grass or moss can be placed to advantage, using two poles on either end. These poles should be covered with pink satin ribbon and on top of each base a large pink China aster ball to represent lights. Finish the other end of pole on table with a hedge of maiden hair fern. Between the poles tiny garlands of very small pink asters can be effectively arranged.

Pink aster colonial bouquets arranged with maiden hair for the outer edge can be used as favors, tied with pink satin ribbon.

WATER MELON AND COXCOMBS.

As the water melon season is with us this suggestion offers itself. Take a good sized melon, cut it down the center so the pink shows up well; open partly. Cover the outer green rind with the garden coxcomb, taking care to cover it evenly. Do not use any foliage with it, but make a hedge of maiden hair around it and also a flat mat of maiden hair on which to place it. Small flat round baskets of maiden hair with a thick triangular piece of watermelon in the center can be used as favors. The water melon in the favors should be candied, or the coxcomb could be used instead of the candied melon.

NEW ENGLAND DINNER.

In the center of a large flat basket, well mounded, place a pretty curly head of cabbage. The basket should be built up about ten inches. Around this arrange the old fashioned garden marigold and again around this the fine, shaggy green of the carrot. At intervals place small bunches of small carrots in the foliage. Small china vases in the shape of a cabbage, filled with candy of the kind to imitate vegetables and placed in the center of a flat basket covered with yellow marigolds will make an odd favor.

THE YACHT DINNER.

Use a wire model of a sail boat and make the foundation of purple asters and the sail of white open roses, covering all wires with white satin ribbon. Use a suitable pennant of silk ribbon for the top. Place the boat on two props made of purple asters; these in turn should rest on a mat of green moss around which arrange in circular form a loose garland of white roses and asters, using maiden hair as a finish.

Small row boats or canoes filled with tiny white rose buds with their foliage and tied with yellow gauze ribbons will complete the color tone.

RED DAHLIA DECORATIONS.

The deep rich red dahlia can attractively be used for a center piece by placing in the center of a flat basket a tall vase filled with choice sprays of these deep red flowers. Around this in graduated rows arrange red dahlias with their foliage, and use dahlia foliage only in the basket arrangement. The old fashioned garden grass can be effectively made into a mat extending about six inches from the basket. Around this make a broken fence of tiny wood staves painted white, on which arrange the red dahlia along the top and at intervals place small bunches of these flowers to produce the effect of the plants growing there. For corsages make small bunches of the red dahlia and tie with satin ribbon the same shade as the flowers. A. E. KLUNDER.

The Royal Gardens at Windsor.

The coronation ceremonies held in London during June, when King George V and Queen Mary were crowned, has directed the attention of the world to these noble personages and accounts of their lives and homes are at this time especially interesting. The gardens at Windsor are world famous not only from a historical interest, but for their brilliant horticultural record. Horticulture in general owes a deep debt of gratitude to the support it has received from royal hands. The Prince Consort was much interested in the gardens and in 1858 was elected president of the Royal Horticultural Society. The late King Edward VII remodeled and wonderfully improved the Royal Gardens at Windsor, and the present King and Queen are much interested in horticulture, honoring the show of the Royal Horticultural Society held in the Temple Gardens last spring with their presence and patronage.

Windsor Castle, the home of England's kings and queens, is situated on the right bank of the Thames, surrounded by the most beautiful natural scenery in its more than 13,000 acres, in which are beautiful gardens and some of the finest specimens of trees, including the oldest oaks in the kingdom.

THE ROUND TOWER GARDEN.

The Garden says of these beautiful surroundings of the castle, no longer a fortress but a home, that the first thing to draw the attention is the steep bank which partly surrounds the Norman tower, better known as the Round Tower, which occupies a formidable position, but the steep bank, obviously a source of defense in past years, has been turned into the most charming and peaceful garden. Here may be found a collection of Alpine plants as rich in species as it is in floral beauty. An expanse of grass-covered bank is given up to daffodils naturalized in colonies, and these are beautiful early in the year. At the foot of this bank where one could well picture a moat in olden times may be seen bog and moisture-loving plants fed by a little stream which trickles down the rocks. Arches of roses, bowers of clematis, and beautiful borders of herbaceous plants all find a home in this charming garden. Here also is an old sun-dial, the column and carved stonework of which are over 800 years old, the dial having the quaint inscription:

"Amyddst ye Fflowers
I tell ye houres."

This garden also possesses a Poets' Corner, where in a rustic summer house one may read quotations from the poets. The east terrace is laid out in a formal style as an Italian garden, which is in keeping with its position immediately adjacent to the castle windows.

ADELAIDE COTTAGE.

East from the castle is the Adelaide Cottage in Home park, which is used by their Majesties for tea-rooms during the summer months. Close to the cottage is a famous beech tree, raised from a cutting, brought to England by William IV, from Luther's beech near Altenstein in the Duchy of Saxe-Meiningen. Dr. Luther was arrested under the original tree in 1521 and it has since been destroyed by lightning. Roses are here grown in a delightful manner, the variety Tea Rambler making luxuriant growth and flowering freely. Frogmore House is the most imposing residence in Home Park and is surrounded by some remarkably fine trees. A tall specimen of Libocedrus decurrens is undoubtedly one of the best of its kind, a veteran tree of the false acacia (Robinia Pseudacacia) upon which were many large bunches of mistletoe growing luxuriantly, and also a good specimen of the maidenhair tree (Salisburia adiantifolia). Not far distant are the royal mausoleums with memorial trees planted in close vicinity.

ERICA CAVENDISHIANA.

See Page 293.

THE FROGMORE GARDENS

Still beyond are the Royal Gardens which have in recent years been entirely remodeled and brought up-to-date. The primary object of these gardens is to produce the finest fruits and vegetables for the royal tables and flowers for decorative purposes, consequently no pretense has been made at being artistic in their design. A most commodious house for the head-gardener occupies the central position, and to the right and left are immense blocks of glass houses, and at right angles to the latter is a hip-spanned fruit range not less than 1,000 feet in length. Both blocks of houses are connected at one end by a glass corridor allowing one to pass from one house to another without facing inclement weather or extremes of temperature. Running parallel to this range is another of equal length and likewise devoted to fruit on the south side of the head-gardener's house. All the houses have been constructed with one great object in view and only one, viz., that of production.

FRUIT UNDER GLASS.

The cultivation of indoor fruit has always been a leading feature at Frogmore, and is of necessity carried out on a very large scale. No less than eighteen houses are devoted to the culture of vines. In most cases each variety is grown in a separate house,

but this is not an invariable rule. From these houses a supply of ripe fruit is kept up for eight months of the year, which is maintained by careful management in bringing on a succession of crops and by storing in the grape room when thoroughly matured in December. There are two well equipped grape rooms for storing the fruit with the stems in bottles when ripe which accommodate 3,000 bunches of grapes. Muscat of Alexandria meets with great favor, six houses being devoted to this variety. The early supply is furnished by Black Hamburg, Foster's Seedling, and Madresfield Court, while for late supply Lady Downe's and Alicante are largely grown. Peaches and nectarines form a leading feature; the trees are a picture of health, all trained fan shape. The fig also is extensively grown in special houses and along the glass corridors. Cucumbers and melons are grown on a large scale, as well as tomatoes, and strawberries are forced by the thousands and are grown with remarkable success.

THE PLANT HOUSES

There are many houses devoted to carnations, orchids, begonias and greenhouse plants in general and there is a large palm house 150 feet in length filled with specimen palms such as kentias, arecas and other ornamental foliage plants of all sizes useful in furnishing decorations in the castle. At the north end of the palm house is a conservatory filled with flowering plants and palms in ornamental tubs. All these houses are paved with Italian mosaic flooring in marble. Orchids are remarkably well grown and although the collection is not rich botanically, yet for floral effect is all that could be desired. The calanthes are especially vigorous and only the decorative varieties of cattleyas, odontoglossums, oncidiums, dendrobiums, and cypripediums are grown. The corridor is furnished with beautiful climbing subjects comprising Passiflora atrocœrulea, Rhodochiton volubile, Solanum jasminiodes, Cassia corymbosa, Plumbago capensis, bougainvilleas, heliotropium, abutilons, fuchsias, and many others.

Carnations, both malmaison and perpetual-flowering, are favorite flowers at Windsor. Many houses are devoted to them and a supply of flowers is kept up all the year through. Prominent among the Souvenir de la Malmaison carnations are Princess of Wales and Duchess of Westminster, two varieties of special merit, and the newer variety Marmion is well grown. The perpetual-flowering varieties are grown in great numbers and include all the best sorts. Mrs. T. W. Lawson, and its numerous sports, also Mrs. Burnett, Brittania, Harlowarden, white and pink Enchantress are grown in great numbers. Thousands of Begonia Gloire de Lorraine are grown for winter display and a special house is devoted to them.

ROSE GARDENS.

A model home for the young gardeners is equipped with every comfort in the way of reading-room, bathrooms, and each gardener has a separate bedroom. On either side of this building are long borders filled with China roses. Many rambler roses are grown, in the walks between the houses and the kitchen garden as well as bush grown varieties for cutting and garden decorations, the varieties especially noted being Caroline Testout, Mme. Abel Chatenay, Frau Karl Druschki, Mrs. J. Laing, Ulrich Brunner and Gustave Grunerwald. Of the climbing roses Tea Rambler deserves special note and others that are grown include Blush Rambler, Queen Alexandra, Dorothy Perkins, Mme. Plantier, and Reine Olga de Wurtemburg. An herbaceous border about 1,000 feet in length provides a magnificent sight in summer and is gay with tulips in the spring. A kitchen garden of 60 acres in which are grown apples, pears, peaches and apricots and crops of vegetables is kept up to a high standard.

The able head-gardener is Archibald MacKellar, who was appointed to this position from Sandringham in 1901 and it is due to his keen devotion to his work that the famous and historic gardens at Windsor have attained the high state of excellence that prevails.

Narcissus Poeticus Albus Plenus Odoratus.

ED. AMERICAN FLORIST:

I have a bed of Narcissus Poeticus Albus Plenus Odoratus, known as the double Poet's narcissus, that did not develop the last half or more of its buds. Is this the nature of this variety or what was the cause?

Illinois. A. L. G.

The blooms of the double Poeticus narcissus frequently blast if the season is dry. During very dry springs it is well to keep the beds of this narcissus well watered. W.

THE ROSE.

Rose Lady Hillingdon.

Through the courtesy of Alexander Montgomery of the Waban Rose Conservatories, Natick, Mass., to the readers of THE AMERICAN FLORIST we present an illustration of the new rose, Lady Hillingdon, the first that has ever been published in America, and also an illustration of this variety in a section of a house, showing the habit and growth. On the front border may be seen Mrs. Aaron Ward, the growth being so different that it may be easily distinguished, both varieties having been planted at the same time. The growth which the plants have made is remarkable, and is what one would expect to find in April rather than in August.

This variety is a gem and in our opinion is the peer of any yellow rose ever disseminated. Every grower has his pets and believes they are the best, but let them be placed in the care of a disinterested party who views them only from a business standpoint, (dollars and cents), and there is apt to be something to which he has kept his eyes closed and has not been able to see. In the culture of this rose there is no pinching to be done, for the growth is rampant, and shoots 30 inches long can be seen all over the house. It has a long pointed bud of a pleasing shade of yellow with a delicious tea perfume. The

ROSE LADY HILLINGDON AT THE WABAN ROSE CONSERVATORIES, NATICK, MASS.

color is even deeper after being in the refrigerator and this remarkable shade is retained after the flower is wide open.. It is a tea rose and resembles the Bride in habit, but the Bride in its best days never made the growth of this latest acquisition.

Unlike most yellow roses it grows well grafted on the Manetti (the section shown being on that stock). Mr. Montgomery has tried it on the Banksia stock and many others, one special stock being received from Europe, but the Manetti has proved to be the best. It does splendidly on its own roots, though not so strong as on the grafted stocks. In our opinion it can be placed above all others of the yellow shade yet introduced. Some years ago a certain New Jersey gentleman said that if he could find a yellow Bride he would mortgage all he possessed, even his shirt, to obtain possession of it, but here is something that the Bride even in its best days could never touch.

We advise our readers to go and see this latest production and can assure them that they will be well repaid for any expense they may incur for the journey. They will linger longer looking at it than at any rose they ever went to see, and come away satisfied that the acme of perfection has been reached in this new rose. MAC.

ROSE LADY HILLINGDON.

Roses Not Growing.

ED. AMERICAN FLORIST:

We planted our roses in June and July in solid beds over a light porous soil. The soil in the beds was clean garden loam with one-third cow manure. They started growth as soon as planted, but as soon as one or two growths were made the roots died back to the stock, and the plants remained dormant. They did not die but started again only to repeat the same performance. We have used no liquid manure and the plants have been kept free from insects and mildew. The roses we had in pots acted in a similar manner. Could it have been caused by the soil being sour? Can you inform us what was the cause of the trouble and how to remedy it?

Iowa. O. F. W.

O. F. W. does not furnish enough information in reference to his treatment of the roses that went back on him, for us to state a definite cause for the failure. In order to suggest a remedy for roses that fail to grow properly, we must first know whether the stocks were grafted or own root, the nature of fertilizer and the quality, whether the soil was composed of a sod compost or only partly renewed, also if it is the first, second or third season for the plants. Whether grown on benches or solid beds, heavy or light soil, depth of soil on benches, and the texture of the subsoil under the beds, whether drainage is used and all the information possible must be given in order to get anywhere near the treatment to prescribe. O. F. W.'s plants may have become too dry at the roots having a very porous soil for a subsoil. The garden loam, if it contained no fibre (sod), was hardly suitable to plant in, and unless it was cultivated every week it would have become baked on the surface, which would in turn result in having the top too dry and the bottom too wet, or vice versa.

However, if O. F. W. will use grafted stocks in his light soil, and make the compost up with good sod soil from an old pasture, mixed in proportion to, not less than one-third cow manure, to which has been added some good ground bone (a four-inch potful to about nine square feet of surface on the layers), as it is being composted, and then turn his compost pile over several times by cutting it up finely, he will then have something good to put in the beds. The soil should not be very wet when placing it in the houses, just moist so it will pack firmly, but not form a solid mass. The rose roots should have a certain amount of air, therefore it is most important to use sod in composting, which will leave the soil porous, even when packed firmly. When planting, have a depression, a kind of saucer around each plant, so the plants can be watered individually, as there are usually a number of plants that require more water than others. After the plants have taken hold, or in about three or four weeks after planting the beds can be leveled. Keep clean of weeds, cultivate every week until established, and be sure to water thoroughly when it is being done, and do not be in too great a hurry to cut from the plants, let them become nicely established, also ventilate with great care always. E.

The Florists' Convention.

In our meeting,
Loveliness they've brought us.
With fair nature's treasures
Laden down, have sought us;
So a happy welcome
Friendly we extend them.
Wishing nature's bounty
Always to attend them.

Life is not all dreary
Seeks not hearts to harden,
But has fruits and blooming
Growing in its garden;
This exhibit gorgeous
Blaze of light and color
Is a lovely proving
Life is not all dolor.

Gazing at the glory
Now we see surround us,
Why not learn the lesson
Writ in charm around us?
Why not see a pleasure
'Tis, and also duty
To bring into being
All this living beauty?

—Josh Wink, in the Baltimore American.

THE SWEET PEA.

Sweet Peas for Winter Blooming.

William Sim, of Cliftondale, Mass., the well known and successful grower of sweet peas, whose exhibit at the Second National Flower Show at Boston attracted so much attention and favorable comment, and who is an authority upon the culture of sweet peas under glass, states that the best varieties of early flowering winter sweet peas are Watchung, early white; Christmas Pink, pink and white; Greenbrook, white marked lavender, one of the best; Earliest of All, pink and white; Florence Denzer, white; Mrs. C. H. Totty, light lavender; Wallacæ, dark lavender; Mrs. Sim, salmon; Gov. Fort, pink; Mrs. Smalley, satin pink, a re-selected Earliest of All; Mrs. F. J. Dolansky, light pink; Helen Kellar, striped pink and white, and Mrs. Geo. W. Lewis, white wavy.

Growing Sweet Peas Under Glass.

Paper read by William Sim on Cliftondale, Mass., before the National Sweet Pea Society of America at Boston, Mass.

It is very gratifying, indeed, to see such a gathering here today. I am sure we have not had such a gathering since the inception of our society. I feel somewhat disappointed considering our generous schedule that competition has been so limited. I had expected, considering the large money prizes offered, that more growers would have exhibited in this great educational exhibit. I feel, however, very glad that the most of the exhibits have been up to the standard, and I have no doubt but that the public in general are not disappointed in what we have shown them. I believe this is the first sweet pea exhibition ever undertaken at this season of the year, and I think we have learned in a general way what can be done with sweet peas in winter.

I believe there is a great field for work for our society towards improving conditions now existing among those interested in the culture of sweet peas. Many of the varieties of today are not what we can call ideal, but when we come to consider the short space of time it is since there were no winter flowering sweet peas, it is little short of marvelous that they are so good as they are. The call for new colors has been the means of varieties being put on the market that are inferior in shape of flower, and the only reason they find sale is that they are of good colors. The next few years will see a great uplift in this line. A new race, thanks to our Mr. Zvolanek, is now in sight which makes the finest of our present day varieties look insignificant. This new race is what you would call Spencers with the early flowering habit. There is now a great field for those who would undertake the improving of the sweet pea. New varieties are eagerly sought and the public is always ready to buy the pleasing shades. The sweet pea not being an expensive flower is within the reach of all, so that the chances of overdoing are very remote. Sweet peas are now in about the same stage as carnations were twenty years ago. We are just commencing to see the great future in store for them.

Taking up the matter of sweet pea growing under glass, I might say that the longer we grow them it seems the harder they are to grow. I believe, however, that is more of a belief than an actuality. It is like setting a pace and keeping it up and at the same time increasing that pace. We sometimes do not know enough to let good enough alone, at least I do not. My aim has always been to do them better this time than I did last, and in trying to do that one is very apt to overdo. Sweet peas are just like ourselves we can stand a certain amount of high living only and keep healthy. In the growing of sweet peas under glass we are still following the same methods as we did a few years ago except that we are now following the summer flowering varieties closer. That is having them come into flower about the time summer flowering sorts are through, so that there is no let up in sweet pea flowers at any time. The early crops are trained up strings, and the plants are grown about six inches apart in the beds. Later crops are planted in rows and violets grown between them until they show buds. This we find the best method to practice where the crop is not needed until the end of January, so you are getting a violet crop while you are waiting for the peas. The vines and flowers are always best when they have been grown at a violet temperature, during the early stages of their growth. The best greenhouses are none too good for sweet peas. They must be high enough at the lowest part of the house to give headroom without having to pull the vines down. In regards to soil we are still using the same soil we did nine years ago. After the crop is over no time is lost between crops. Tomatoes are planted any time up to the middle of May, after that date we plant cucumbers, so that rotation of crops may have something to do with the soil not running out. Of course the soil is well manured after each crop and liquid manure is also used very freely. Lime, sheep manure, wood ashes and bone meal are also applied quite generously at all times.

SWEET PEA CHRISTMAS PINK AT WM. SIM'S, CLIFTONDALE, MASS.

SWEET PEAS AT WILLIAM SIM'S, CLIFTONDALE, MASS.
Greenbrook on the Left, Earliest of All on the Right.

Diseases and insects are our worst enemies, and it is a continual battle with them. The disease problem, I believe, is more in the seed than in the soil. Our seed is all grown in California where we cannot see the crops growing, but those who are in the seed growing business should make it a point to discard all unhealthy vines as they show themselves in the seed fields. I am sure that all growers would gladly pay the extra cost for the seed, for unless we get good seed it is absolutely impossible to grow good vines. I think this would be a good thing for our society to look into if it had the means. Insects are about as troublesome as diseases unless kept in check from the very start. The houses should be regularly fumigated whether they need it or not because prevention is better than cure. I have no doubt but that the experiment stations could help us out a great deal in finding out the causes of diseases.

One more thing might be done and I do not see why you seedsmen should object, and that is get together and give the sweet pea seed you are selling the names that rightfully belong to them, at any rate the winter flowering varieties. Nothing is more aggravating to a grower than to see an advertisement announcing some new and very fine variety. The grower to be up to the times plants this variety quite extensively, his hopes run high till the flowering period, then the variety so much heralded turns out to be something he has enough of, or worse, some discarded variety. In conclusion, I would say that great credit is due those who have so generously given their time and money to make this show a success. Our society is not in the best condition financially, owing to the fact that all money given the society has been in the nature of prizes, and the annual dues have not been enough to pay the running expenses. I ask you all to help us along in our great work by joining the National Sweet Pea Society of America.

ST. LOUIS, MO.—William Wundrack, of 3226 Dakota avenue, in stepping off his wagon placed his hand on an iron pole and received an electric shock. He was removed to the City hospital.

Mulching and Watering Sweet Peas.

The continuance of dry weather naturally tends to make the sweet pea grower contemplate mulching, and on light dry soils it may be advantageous to get it done at once—at least a light mulching of leaf-soil or leaf-soil and well-rotted horse manure may be given. This should be prepared some little time beforehand, and before it is applied the ground between the rows should be well hoed, and, if necessary, the rows should be hand weeded. Work the leaves or manure well between the plants, and for at least a foot on each side of the rows; this should suffice for a time. Although the plants at this stage should not require any manure, it is not wise to waste anything, so the mulching should be well watered in, as by this means its manurial properties are washed in also, while the mulch itself will lay closer to the plants, and so prevent evaporation. A little later on should the weather continue warm and dry, a heavier mulching should be given to all the sweet peas, but this should be delayed until actually needed, as this heavy mulch, with plenty of water, will do much to rejuvenate the plants after they have flowered for a few weeks.

As may be inferred, I am not in favor of much water until the plants are well in bloom, when, of course, they will quickly suffer if allowed to become dry, states a correspondent of the Gardeners' Magazine, but as we have had so little rain in many parts of the country since planting out time, where plants are failing to grow properly the grower will be well advised to make quite sure that they are not suffering from drought.

At the time of writing, May 30, many varieties (autumn-sown) are opening flowers nicely, Elsie Herbert, Sunproof Crimson, Earl Spencer, Evelyn Hemus, Scarlet Monarch, and Doris Burt being among the most forward, though perhaps the earliest of all is Bertha Massey, every plant of this variety having well-expanded flowers on it. This is a variety that was shown under the name of Mrs. Ryle last season, and is of a very pleasing shade of rosy-lilac, quite distinct from anything else, and if the whole stock is as true as the few plants I have it will be much sought after.

After what we saw at the great Temple Show we shall all be looking forward to those varieties Dobbie and Co. exhibited; several of them appear to be real acquisitions, notably Melba, Mrs. Cuthbertson, May Campbell, and Dobbie's Scarlet.

SWEET PEA FLORENCE DENZER, AT WM. SIM'S. CLIFTONDALE, MASS.

SWEET PEA MRS. C. H. TOTTY, AT WM. SIM'S, CLIFTONDALE, MASS.

CHRYSANTHEMUMS

Taking the Buds.

Taking the buds, or in other words selecting the bud to form the flower, which bud from this date on should be the center one; allowing this to remain, removing the side buds which cluster around it, also any other growths that shoot out anywhere down the stem of the plant. This work will keep the grower busy for the next two or three weeks. The earlier and mid-season varieties are budding fast and should be taken as soon as they can be safely handled, also if any of the imported exhibition varieties are not

already attended to, it is time to get after them, as most of these will show an open center unless the buds are taken by September 1. Timothy Eaton and Yellow Eaton are about due to show buds for the best results. September 5 to 10 are the dates for Col. D. Appleton, Golden Eagle, Dr. Enguehard, Mayor Weaver and the other varieties that are at their best November 1 to 15 and after September 15 any of the later varieties can be taken. It is well to bear in mind that it generally takes from six to eight weeks for the bloom to mature from the time of taking the buds. Of course the blooms can be held longer after being fully matured but they are at their best in time mentioned.

We must bear in mind that after the bud is taken most of the strength of the plant is concentrated in expanding this same bud and any adverse conditions applied to the plant will also act on the bud. Considerable moisture is necessary at this early date to insure the proper development of the bud and to keep the red spider and thrips in check, but it is necessary to use a little extra caution in syringing and watering from this time on. Most varieties have attained such a degree of growth with dense foliage that it is impossible for them to dry out before night unless the syringing is done by noon. Plenty of ventilation should be continued at all times as long as the weather conditions are favorable, but guard against any rains coming through the open ventilators and wetting the beds too much. Heavy dews are a nightly occurrence in most parts of the country and this must also be taken into consideration in regard to late syringing, it being so much more moisture for the plants to take care of that together with a wet foliage from late syringing an attack of brown spotted foliage and mildew is liable to result therefrom.

C. W. JOHNSON.

Insects on Chrysanthemums.

ED. AMERICAN FLORIST:

There are some very small greenish flies on my chrysanthemums which are planted in a frame house covered with cloth when they begin to flower. Are these insects thrips, and if not, what are they? We cannot fumigate, for the plants are not enclosed.

Mississippi. K. L.

In all probability the green insects on the chrysanthemums are aphides or green fly and can be killed by spraying either with aphine or one of the tobacco extracts, full directions for which are printed in the circulars or on the bottles by the manufacturers. Thrips are a very small insect almost miscroscopic and generally of a whitish color and can be kept in check in the same manner, but fumigation for these small insects is more effective. W.

Formula for Killing Dandelions.

ED. AMERICAN FLORIST:

Will you kindly furnish us with the formula for the solution of sulphate of iron used in killing dandelions?

P. R. D. & S.

The formula which has been reported as successful is one and a half pounds of sulphate of iron to one gallon of water, but in some cases this has not killed the weed and a stronger solution injures the grass. W.

The Private Gardener.

Paper read before the Society of American Florists at Baltimore, August 16, 1911, by William H. Duckham of Madison, N. J.

I was much surprised and pleased to receive from your secretary an invitation to read a paper on the subject of the "Gardener." I am also glad to note that your society has honored my profession—the first time I believe, in the history of your organization that it has been directly and distinctly recognized. This may partly account for the lack of interest of the gardener in your society and his failure to become a member in large numbers. Not to my knowledge has there been a general appeal to the gardeners to join the S. A. F. For some reason or other only a few gardeners hold membership in the S. A. F., although the idea prevailing in the minds of some, that they are not wanted, is erroneous. Fundamentally, our society is a trade organization, and the mere addition of "Ornamental Horticulturists" to the society's title has added very little and few members. The national flower shows held in the past have been well supported by the gardener and these exhibits have been much appreciated by your society. These exhibitions should be well supported by every one in the allied trades and profession in which we are so much interested, and I trust that many such exhibitions will be held in the future.

The relation between the private gardener and the florist is of the very nearest, and easily traced, for you have only to look in any direction and you will find some of the most successful florists of this country who have graduated from the ranks of the private gardener. It is not my intention to enumerate or name all of them, any more than it is to omit any names, but a few come to my mind who started their career as private gardeners and such training as they then received is admitted by them to have always been a help to them in their business. Their names, as they come to me now, are J. N. May, E. G. Hill, J. K. M. L. Farquhar, Thomas Roland, Peter Fisher, F. L. Atkins, A. T. Boddington, C. H. Totty, and unless I am mistaken, the late Peter Henderson started his career as a private gardener and perhaps gave more and better advice to young men than any one else, and many today, whether florist or gardener, owe to him a large measure of their success and all over this broad land his influence is still felt.

The private gardener has done his part in the development and advancement of this country by his work, both directly and indirectly, for on any estate over which he has charge his

MIGNONETTE.

See Page 293.

work comes directly to his employer's credit, and the majority of them take keen delight in having their place well kept, growing and producing flowers, vegetables and fruits, and to have all this a little better than their neighbor. Then again where there are such places of this kind the community in general and the trade benefits by it. I have never yet heard any one say that he did not love the flowers, no matter how much he might dislike some other things, and while those who cannot have a large garden do try, and do have, and imitate those of larger proportions, therefore, I claim the work of the gardener has a most refining and broadening influence in every locality, and has done much toward making this a better land and a better world.

As much as the private gardener has done for horticulture there remains much he could do, and I refer to the most interesting branch of hybridizing. Some has been done, I admit, but in my opinion he has neglected his opportunities. The cause of all this I am unable to explain, but it occurs to me the most of it can be laid to lack of interest or indifference, for surely a number of gardeners have the time and convenience, for it cannot be said he doesn't know how. There might have been some excuse for this twenty or thirty years ago, but conditions then and now are very much changed. I don't mean by this that gardeners are any better today, but there are very many more large estates where opportunity presents itself that were not in evidence at that time, and I urge the gardeners to give this more consideration and do your part toward the advancement of horticulture.

One has not to look far to see what can be done. For example, the roses raised by M. H. Walsh in the past few years have startled the world. I am unable to say how much time and thought Mr. Walsh devoted to this work, but if he spent his whole life he would feel well repaid in giving the world varieties of roses that otherwise might never have been born, and all honor to the man who raised Excelsa, Delight, Lady Gay and Hiawatha, etc., and who at this time I believe to be in the ranks of the private gardener. Then let us take courage and set our minds to doing something that will be a joy and pleasure to others as well as to ourselves. Novelties or something new always attract the gardener and you will find him among the first to try or test these, no matter whether flower, vegetable, or plant, he is ever eager to secure them, and when one stops to consider, it seems inexplicable, the lack of interest or utter indifference, that it appears almost criminal. Then let us create or at least try and improve some flower or plant over what we found it.

Since the gardener has become better known and more generally appreciated by his employer, a mutual feeling has sprung up between the two. This is true in a great many ways, and is as it should be, and comes as the first aid to our social and moral status. In our profession let the man who has the opportunity show by precept and example to the less informed, and particularly to the young man under his charge, that moral influence, so necessary for the upbuilding of our honored calling. For they are the men who will be called upon to carry on the work where we are compelled to lay it down. Whether he be florist or gardener let us beware that we grasp more of our opportunities and take our stand where we rightfully belong.

The need of the times seems to be a scheme or scope of operation in which all interests should unite for horticultural advancement. A national society, such as we have, enlarged to the extent of founding and maintaining a garden after the manner of the Royal Horticultural Society of England at Wisley, and previously at Chiswick, gardens that for over fifty years have done excellent work such as we need to have in this country.

Instead of pleading with state legislatures for appropriations and greenhouses at state experiment stations, could not more and better work of this kind be done in a garden belonging to our society with a staff of practical men, and consider what a training school for young men such a garden would be and the beneficial results that would follow as efficient, well-trained men became available for positions in private or commercial places. Our ranks are being constantly recruited by importations from Europe because of the degree of efficiency these recruits possess. We lack the facilities to give our young men practical training in a manner that appeals to them with the assurance of an endorsement upon proved competency; this would also be a substantial aid to material advancement.

The working staff of of the Royal Horticultural Society's garden is largely composed of students, who, for a small remuneration, work and study with facilities not to be had in the ordinary private and commercial place. Perhaps the best testimony of the efficiency of the Royal Horticultural Society's work along these lines is that it has been continuous for over fifty years, that the trials of fruits, vegetables and flowers conducted therein have been most beneficial to horticulture and a large number of the R. H. S. men hold positions of prominence in all parts of the world, and one of them is a director of the S. A. F. at this time and another prominently mentioned for your presidency. This, it seems to me, at some future time could be started in some good and practical way by the members of this splendid organization and men would be willing to finance such a project, and there are plenty of them in the S. A. F., and it would greatly help the florist and gardener in the ever increasing and perplexing question of securing efficient help. Some may say, while there are plenty of men coming from the other side what is the use of all this, but it must be remembered that a good deal of chaff gets in with the wheat.

I have failed to know the reason so few gardeners are members of the S. A. F., whether because each locality has its own local society that they think by being a member it is all that

ERICA MELANTHERA,
See Page 293.

is necessary and feel content with local conditions, but its effects are soon evident, and instead of broadening his usefulness, narrows it and soon becomes dormant. If it were possible for all the societies to amalgamate with the S. A. F., and I see no reason for not doing so, then, I believe, our local societies would also be incorporated with the above and then perhaps the gardeners would become a part of the S. A. F., as, in my opinion, they should be.

Several attempts have already been made, I believe, to form a gardeners' society, and one has been organized, but with what degree of success I do not know, more than that I believe the time to be opportune for such a consolidation of florists and gardeners for the mutual and best interests of all, and one that would make of our S. A. F. such a national organization that would easily become the greatest of its kind in the world.

In conclusion I might say that I shall do all in my power to advance the interests of your society, and will also endeavor to interest as many of my profession as possible and explain to them the broadness and scope of your organization and the good work it is carrying on.

Grapes Under Glass.

ED. AMERICAN FLORIST:—

Will you kindly inform us as to the culture of grapes under glass? We desire to know what kind of soil to use, the temperature in which they should be grown and how to train the vines.

SUBSCRIBER.

State of Washington.

The house we have found the most suitable for growing grapes is an even span, facing east and west—that is to say, one end to stand north and the other due south, an arrangement which exposes the vines on each side to an equal share of sunlight. The whole being glass, an abundance of air and light, so essential to the maturing of the wood and fruit, can at all times be obtained. In regard to the dimensions of the house, much depends on what quantity is required. We recommend houses 22 feet wide with a center walk of about three feet with top and bottom ventilation. In the arrangements of hot water pipes the engineer must, of course, be guided by local conditions. As heated air naturally ascends, it is advisable to avoid too close proximity to the stems of the vines, to place the tiers of pipes near the ground line and in the coldest part of the house. For early graperies more piping is required than in late ones, but to insure an abundance of heat in severe weather and to avoid overheating at all times the shrewd man will furnish the house with ample piping. The trellis on which the vines are to be trained is an important part of the structure. This should not be less than 12 inches away from the glass, the mode of supporting the wires being a matter of detail.

In the formation of the border it is usual to make it the width of the house, but instead of making it all at once, it is advisable to make half the border in the first year and add each year as the roots may require until completed. It may vary in depth from two feet to two feet six inches, and there should not be less than from one to two feet of drainage to carry off the water and keep the border dry and warm. It will thus be seen the surface line of the border having been decided on, that a depth of four feet will be needed to allow for a layer of concrete and 18 inches of broken brick or stone. If the question were asked of successful growers all would admit that good drainage is of the first importance. With regard to the best material for making the border we would recommend fresh virgin loam, which includes any kind of old turf from the side of a road. Chop this into rough squares with a spade, add 10 per cent of coarse bone with a liberal supply of charcoal and a dusting of air slacked lime. If any wire worm is in the soil a dusting of soot would be beneficial. No animal manure need be added, as young vines will grow freely in any fresh, well drained soil, but it may be used as mulching to keep the roots near the surface and prevent them from striking down into the cold drainage. It is better to guard against all hidden dangers at the outset than to have the trouble and expense of doing the work over again. In regard to outside borders, we do not consider them practical or necessary in our climate.

Assuming that one-year-old vines are planted at this time there is danger in cutting them back to the fifth or sixth eye, as is generally practiced when planting dormant vines. A better plan would be to rub out each bud to the above distance from the base of the vine, taking the strongest bud for the leader, when the old part can be cut out when they become quite dormant. The latter part of December or early in January is the safest time, as there is no danger then of bleeding. With regard to the distance the canes should be planted, I have found four feet very convenient; some plant wider, using supernumeraries to crop until the permanent vines get established, when they can be cut out. Varieties which will do together in one house are Black Hamburgh, Bowood Muscat, Muscat of Alexandria, Madresfield Court, Gros. Maroc and Melton Constable. There are many other varieties which could be grown together, but the above mentioned will make a very choice collection. As to the treatment of vines the first year, they should be started in a temperature of 50 to 55 degrees at night and 10 to 15 degrees higher by day, but no rule can be laid down for forcing. Early growth progress must be made under the influence of sun and light and rest allowed when the days are dark and cold. When a period extending over ten days has passed, raise the temperature to 60 degrees at night, giving air in the morning when the mercury reaches 70 degrees, gradually increasing until 80 degrees. Spray every bright morning and keep the floors regularly sprinkled through the day, closing down early in the afternoon until the weather gets too hot. Firing may be discontinued after June 1. Toward the fall, when the vines will have finished their growth, watering must be done carefully and sparingly and all the air possible left on to insure the wood ripening. A word regarding the making of borders which we omitted is that they should be made good and firm, and when planting vines out of pots into the border we do not believe in the practice of shaking and spreading out the roots. This we consider a bygone fad. Simply make the hole, put in the plant, using a rammer to firm the soil as firm around it as it was in the pot, so that when watering there is no danger of the old ball getting dry at any time. M.

White Partridge Berries.

There is one thing that may be presaged of all species of plants bearing red fruits: if we search long enough we are reasonably certain of finding white and yellow forms. The yellow forms are due to a diminution of the anthocyan that gives the red color; in fact, even black fruits are often caused by an overload of this substance, states the American Botanist. It will thus be seen that there is an easy transition from black fruits to red ones as in the choke-berry (Pyrus) or from the red fruits and yellow ones as frequently occur in the holly and mountain ash. White berried forms are albinos such as may also be found in the animal kingdom and are due to a lack of pigment. They may thus be expected to occur in any part of the plant having colors other than green. White forms of the partridge berry (Mitchella repens) have been frequently reported, possibly because they are so widely distributed. The form has been known for thirty years or more but in Rhodora for February C. H. Bissell gives the name of leucocarpa to it and describes it as a "new form." Bissel's specimens are from Connecticut but others are known from Massachusetts, New Hampshire, New York and Pennsylvania. We would be glad to hear of other stations.

BASE BALL PLAYERS AT PITTSBURG FLORISTS AND GARDENERS' CLUB OUTING.

OUTING OF THE PITTSBURG FLORISTS' AND GARDENERS' CLUB, AUGUST 8, 1911.

Philadelphia.

BUSINESS IS VERY QUIET.

Business has been very quiet the past week. It is the height of the vacation season and there is nothing doing except getting ready and laying plans for the trade later on. Flowers are plentiful, especially asters, which are seen in a great variety of form and color. The good stock sells up pretty clean. Roses are a shade better and more plentiful. Some very fair local American Beauties from the new plants are coming in. Gladioli are in demand, that is, the good varieties, and carnations are appearing and show up well for the season. Easter lilies and lily of the valley are moving well for the time of the year.

NOTES.

The coming season will see the stores well stocked with ferns, as nearly all the plant men have a great variety in different sizes of the most popular sorts. The nephrolepsis sports or varieties lead and some splendid plants are seen. Scholzelii in the smaller sizes up to a six-inch pot is a great favorite, while the parent Scottii is a leader everywhere. Harris' crinkle-leaved, a sport of the Boston, makes a magnificent specimen in a large-sized plant and was a good seller last season. Cybotiums will also be in demand, as it has been found to be just as hardy in the house as the Boston fern and as a decorative plant it has no equal. Cyrtomium falcatum is also seen in pans, its broad glossy leaves making it a general favorite.

Joseph Kift, at Westchester, is cutting some fine white and pink Maman Cochet roses from the field that show well in competition with the best of the indoor varieties at this season. The white variety is of good size and is well adapted for funeral work, and can be had with stems twelve to eighteen inches in length.

Many of the delegates to the convention spent a few days at Atlantic City and Cape May and before going home took in many of the commercial places around the city, leaving quite a few orders. The supply houses also came in for their share, as the buyers like to see the things in the factory whenever possible.

Alterations to the new stores are going forward. At the Sign of the Rose Mr. Fox will have in his new store a thoroughly up-to-date flower shop, with much more room than he has had before. When finished it will be an ideal establishment.

The Kugler Restaurant are opening up a flower store and are making the necessary alterations. The display window and handsome interior fixtures will make this a very attractive place. The location is ideal, as it is the very center of the city.

Charles Grey, who last season held the position of buyer for J. J. Habermehl's Sons, has gone back to his old love and joined the Leo Niessen Co. force, where he will be sure of a welcome from his old friends of this busy market. K.

Albany, N. Y.

NOTES.

Ground will be broken in October for two greenhouses for F. A. Danker, 744 Central avenue, to be completed for use next spring. The contract has been awarded to Lord & Burnham Co., New York. They will be 31½ feet by 150 feet each, detached and equipped for steam heat. Mr. Danker will devote them mainly to roses.

H. G. Eyres has two houses 20 feet by 100 feet well under way at his place, Knox and Morris streets. They will be devoted to general stock. R. D.

BARABOO, WIS.—William Peck of the city greenhouse was killed August 26 in a railway accident.

WOBURN, MASS.—J. F. Marion is building a large addition to his greenhouse on Cambridge street.

NEW HAVEN, CONN.—A permit has been granted L. Vorgares to erect a greenhouse on Ramsdell street.

BERLIN, CONN. — Frederick Pauloz, father of Victor Pauloz, the florist on Meriden road, died at the home of his son August 17, after a long illness.

ST. PAUL, MINN.—Tracey Bolles of Valley Creek, Wis., employed by Holm & Olsen, was killed August 18 by being run over by a train at Oak Park, on the Chicago and Northwestern railroad.

BATTLE CREEK, MICH.—The largest exhibition of flowers ever attempted by the Horticultural Society of the Grand Trunk shops was held August 22-23. This is an annual affair, but was conducted on a larger scale this year than ever before.

OMAHA, NEB.—At the Hess & Swoboda store early Sunday morning, August 13, the passers-by were attracted by two rats that were destroying the flowers in the window of the store. They completely damaged the stock in the window display, covering the bottom of the enclosure with leaves, petals and stems of the fragrant flowers.

OBITUARY.

J. F. Flood.

The trade of Boston received a severe shock on Thursday, August 24, when it learned of the death of J. F. Flood, which occurred at his home at Montvale, Mass., after a short illness. He was stricken with an attack of la grippe which culminated in a complication of diseases that resulted in his death.

Mr. Flood was 42 years of age, and came to America from London, England, where he had been employed by James Veitch & Son, securing a position with Peter Henderson & Co. He came to Boston at the instance of Robert Farquhar, and for three years was on the Goodyear estate at Dedham, and then went to Buffalo, N. Y., accepting a position as private gardener. He returned to Boston and entered a partnership with James Wheeler at Dedham under the firm name of J. F. Flood Co., and the stock produced here was of the highest quality. A year ago he bought the Mrs. David Fisher place at Montvale, where he made a specialty of asparagus. He was an active member of the Gardeners' and Florists' Club of Boston, and was well liked and respected by his associates and the trade. He was a man of great promise and the profession has lost one of its bright lights. The funeral was held at St. Joseph's church, Montvale, Saturday, August 26, and was attended by many of the craft. The floral pieces were many and beautiful, the markets sending two fine pieces. MAC.

T. J. Gorman.

T. J. Gorman, a florist and market gardener of Montreal, Que., Can., was killed in an automobile accident at Ste. Rose, Que., Thursday night, August 17. Mr. Gorman had taken a party of friends to ride in his automobile, which he had owned but a short while, and it is supposed that he, not being well acquainted with the road, ran off of an embankment at a sharp turn, the automobile turning somersault and pinning him and the young lady accompanying in the river below, the other two of the party being thrown out, but not seriously injured.

Mr. Gorman had conducted a florist business on Mount Royal avenue for many years, disposing of his property a year ago, but had not yet vacated it. He was unmarried and is survived by two sisters.

THE AMERICAN FLORIST

1885 TWENTY SIXTH YEAR 1911

Subscription, United States and Mexico, $1.00 a year; Canada, $2.00; Europe and Countries in Postal Union, $2.50. Subscriptions accepted only from those in the trade.

When sending us change of address always send the old address at the same time.

Advertising rates on application.

From the first issue the AMERICAN FLORIST has accepted only trade advertisements.

Advertisements must reach us Tuesday (earlier if possible), as we go to press Wednesday.

NARCISSUS VON SION, double nose, is reported a scarce item now in Holland.

THE annual exhibition of the Pennsylvania Horticultural Society will be held November 7-10, 1911.

THE Kankakee District Fair will be held at Kankakee, Ill., September 4-8. Premiums are offered for plants and cut flowers for the commercial growers and amateurs.

Personal.

The many friends of John T. Temple of Davenport, Ia., will be pleased to hear that he is recovering from the operation performed at St. Luke's hospital some time ago. For a time his condition was grave but he has so far recovered that he will probably return to his home by the first week in September.

COMPLAIN not because thy neighbor is rich enough to have a flower garden when thou hast none, but thank thy gods that thou canst smell the flowers thy neighbor's riches provide.—Persian Proverb.

WITH an increase of 227 per cent in the total enrollment of students at the Missouri College of Agriculture, it has been found necessary to enlarge the teaching force of the institution and fifteen new men have been added to the college and experiment station staff.

SECRETARY FLITTON of the Gardeners' and Florists' Club of Baltimore states that the club is desirous that every member of the Society of American Florists should have a copy of the Baltimore Souvenir Programme and any member not having one can obtain the same by writing to Philip B. Welsh, Glen Morris, Md., requesting that a copy be sent.

SUPERINTENDENT ROBERT O'DWYER, head of the flower and plant department of the Illinois State Fair, writes that the coming exhibition at the state fair will be the handsomest flower show ever staged in the United States, except the two recent ones in the two largest cities. Over $3,500 has been offered in premiums and the great dome building will be filled with plants and flowers.

Card of Thanks From Mrs. Birnie.

Mrs. John Birnie and family wish to extend their heartfelt thanks to all their friends and to the members of the New York Florists' Club, members of the Gardeners' and Florists' Club of Baltimore, members of the Florists' Club of Washington and the Society of American Florists for their kind words of sympathy, and also for their beautiful floral offerings, upon the death of the beloved husband and father, in their sad bereavement.

MRS. JOHN BIRNIE AND FAMILY.

A Surfeit of Autumn Shows.

FLOWER SHOWS TO BE HELD IN THE SPRING IN CHICAGO.

Flower lovers will approve the decision of the Horticultural Society of Chicago to hold its annual show hereafter in the spring instead of the autumn, even though the change means no show this year. The springtime is the natural season for public interest in flowers and plants. Then even confirmed flat dwellers have a longing for contact with freshly turned, moist, warm soil and the sowing of seeds. Those who have gardens will study the spring exhibit more carefully, in the hope of discovering among the novelties new treasures that can soon be enjoyed.

To those whose chief interest in flowers is not the growing but merely the enjoying of them, spring displays probably will prove more attractive than autumn shows. We have a surfeit of Nature's products in autumn; in spring we have seen ice and snow or bare ground and muddy streets for months, and fine flowers then possess an exquisite charm. The popularity of the park greenhouses is greatest in spring, and in Boston the flower show at that season has been found very successful. A spring show in Chicago should be the finest in the country and a great aid to spreading the love of flowers.—Chicago Record-Herald.

Flowers Affected by Personal Contact.

That some ladies can wear a bunch of flowers throughout the evening, while with others the same flowers will be in a wilted condition in a short time after being placed upon the dress, causes a New York florist to state, according to the public press, that "Florists are often blamed unjustly by women who complain that they have been made the recipient of inferior or stale roses. Right there is one of the mysteries connected with the flower business. It is a fact that roses of equal value and condition will fade more quickly on some women than on others. Pin a bunch of roses on one woman and they will look as fresh at the end of a long evening as when put on, while the same flowers on another will in a couple of hours begin to droop." The same thing will be noted in carrying flowers in the hand. One person can carry a flower for hours without its wilting, while with another the head will begin to droop a very short time after being placed in the hand.

Coming Exhibitions.

(Secretaries are requested to supply any omissions from this list and to correct any dates that may have been altered since the last advices.)

Chicago, September, 1911.—Exhibitions of annuals, perennials and vegetables. Horticultural Society of Chicago, Art Institute. J. H. Burdett, secretary, 1620 West 104th Place, Chicago.

Chicago.

A SLIGHT IMPROVEMENT.

There has been a slight improvement in the business the past week but it is still in a state of lethargy and all hands could do considerable more if the demand would only increase. The retail stores are doing but very little, therefore the local demand on the market is very small, and in only a few flowers is the call from all sources equal to the receipts. There has been a very good demand for American Beauty roses, especially the short-stemmed grade, and they clean up very well daily. Good carnations are also very good property and notwithstanding the large amount of small asters that there are in the market sell very well. Roses other than American Beauty are quite plentiful, and although a large proportion of the receipts are short-stemmed, there is some excellent stock being received of fine color and good stem, but there has been a good demand all the week for the colored roses, especially pink and at times they have sold up very clean. There is, however, a large oversupply of white. Carnations are improving rapidly, but are not yet being received in very large quantities, and as before stated, find ready sale if of good quality. Lilies are quite plentiful, especially longiflorums, there being some large shipments received from the east to add to the local supply. There is still a goodly number of Japanese lilies, L. rubrum, being received, and those on long stems are very effective in the windows or on the counters. Asters are very plentiful, especially the cheaper grades, but the branching asters of good quality are selling well and at quite good prices. There is a marked falling off in the receipts of gladioli, and of those that do come in many are of a grade much inferior to the stock that has been upon the market for the last month. Dahlias are beginning to be more plentiful and there are some flowers of a very good grade now making their appearance. Lily of the valley is of very fine quality but the demand is small, and there are also a few orchids to be seen. Of outdoor stock there is still a great quantity and large amount of hydrangea is to be had with a great supply of rudbeckia, helianthus, marigolds, feverfew and other seasonable stock. Water lilies are still shown in the retail windows and the colored varieties are very beautiful and make up in fine work. Of greens, the supply is ample and of good quality, and the shortage of smilax that has existed is now over, there being plenty to meet the demand. The trade is now anxiously looking forward to the early frosts when the mass of cheaper flowers will be cut off and trade will be more brisk. The outlook is quite optimistic notwithstanding the dull month of August, and all are looking forward to a banner year. The population of the city shows an increase of 78,000 according to the publishers of the city directory, and all indications point to an unequalled season. The only cloud on the horizon is the threatened railroad strike, which would not only cause trouble in the shipment of stock but would also have an effect upon the business outlook. At present it looks as if this would be speedily arbitrated and as soon as cooler weather comes in business will make rapid strides toward improvement and assume normal conditions.

NOTES.

Fisher Bros. of Evanston finished their planting this week when the last of the carnations were placed in the new range. The chrysanthemums and pot plants in the old houses are doing nicely and are looking fine. A large sign on the firm's newly decorated store attracts the attention of the public and denotes that the proprietors are prepared for a brisk fall trade.

A. T. Pyfer stopped off at Detroit on his way home from the convention to see Albert Stahlein's new range of greenhouses that is built on wheels. He thinks it is a practical idea and it should meet with much success. The material for this range was furnished by the Geo. M. Garland Co. of Des Plaines.

T. L. Metcalfe, the proprietor of half a dozen stores and laundries in Kentucky and Tennessee, passed through the city on August 24, enroute from the laundrymen's convention at Minneapolis to his home in Hopkinsville, Ky.

A. C. Schafer is back from an auto trip through the southern part of the state and is again attending to his duties at the E. F. Winterson Co.'s store. The journey of 500 miles was made without mishap in his Buick touring car.

Robert Northam is supplying George Reinberg's customers with a new crop of Richmond roses. These were good property during the shortage of short-stemmed American Beauty roses.

Mrs. J. A. Schmidt will leave soon to visit relatives at Detroit, Mich.

VAUGHAN & SPERRY

Long Distance Phone Central 2751. **161 N. Wabash Ave., CHICAGO.**

H. B. Hirsch has opened his floral establishment in the New Willard Theatre building at Fifty-first street and Calumet avenue, and reports a very busy time, considering the dull season. He expects his business to pick up considerably as soon as the schools in this vicinity open, and will then install another large ice box.

S. Lanski of the Illinois Pipe & Mfg. Co. reports that his company is being kept on the jump filling many greenhouse orders, and states that as a special inducement he is offering some very fine and thoroughly overhauled pipes, flues, casings and greenhouse fittings at greatly reduced fall prices.

Arthur Lloyd Vaughan has returned, with a fine coat of tan, from a most enjoyable outing at Corey Lake, Mich. Much pleasure was derived from fishing and teaching the natives how to swim. Fred Sperry says trade at the store has picked up considerably, and thinks it will continue good during September.

Samuel Markovits of Markovits Bros., manufacturers of artificial flowers at 954 Milwaukee avenue, is now in New York City in search of suitable premises in which to establish an eastern office and factory. The rapidly increasing business in this section of the country requires this addition.

The many friends of Duncan A. Robertson, the expert designer at the E. Wienhoeber Floral Co., will be pleased to know that his wife is rapidly recovering from the severe illness through which she has passed at the German American hospital for the last few weeks.

Clifford Pruner is seen with both hands encased with bandages, having been recently poisoned with Rhus Toxicodendron, commonly known as poison ivy. The malady is, however, improving rapidly and he hopes soon to be able to remove the bandages.

Charles Hengesch, 7360 Murphy avenue, tells us the baths at Mudlavia, Ind., and Mt. Clemens, Mich., were of no benefit to him or his rheumatism, and if any of his fellow greenhousemen can suggest any other place he would be pleased to give it a trial.

Fred Liebermann pitched a good game of ball for the Nappertandy team on August 27, when they played a twelve-innings tie with the crack White Sox Cubs. The game was called on account of darkness, with the score 2 to 2.

L. Hoeckner is figuring on making some easy money from the sale of his poodles at many of the county fairs this fall. "Stogie" is an old-timer at the concession game and knows how to gather in the coin.

C. Scheiff, 5655 East Ravenswood avenue, has successfully and profitably grown some very fine mushrooms for the last two winters and is now making preparations to enter this business on a larger scale.

James Salach purchased the store at 1810 South Halsted street from F. C. Strury about a month ago and reports that with the help of his able wife business is progressing along very nicely.

Peter Olsem, superintendent of the Chicago Carnation Co.'s greenhouses at Joliet, is one of the many well-known florists whose likeness appears in Lord & Burnham's new catalog.

Mrs. Anna Tonner, 1751 North Sixty-third avenue, has some greenhouse glass and several sets of rafters that she would like to dispose of at a very reasonable price.

The Geo. Wittbold Co.'s advertisements in the street cars are very attractive and continue to attract the attention of thousands of people.

F. C. Thom, 1639 Milwaukee avenue, reports a very successful season and has spent the last few weeks preparing for the cold weather.

USE Budlong's Blue Ribbon Valley.

J. F. Czarnik, of the company bearing his name, is contemplating opening a floral establishment in the loop district this winter.

John Kruchten is receiving such a large quantity of lilies that he has found it necessary to make use of his neighbor's ice-box.

Mrs. John Welsh has returned from a most enjoyable visit with relatives in New York, New Jersey and other eastern states.

F. J. Krauss, E. F. Winterson's popular employe, has given up the florist business and is now farming at Dowagiac, Mich.

County Commissioner J. A. Mendel and family have returned from a pleasant outing at their cottage at Fox Lake.

Henry C. Dunn and wife left Sunday, August 27, to visit his old home in Boston, where his mother is seriously ill.

At Hoerber Bros.' store the shipping trade is more active and from present indications promises to continue so.

Kyle & Foerster are receiving a fancy grade of dahlias in their large shipments of high grade cut flowers.

R. A. McPheron, the successful manager of the Cottage Greenhouses at Litchfield, was in the city August 26.

WE HAVE THE VERY

BEST BEAUTIES

IN THE MARKET.

WITHOUT question the finest and cleanest crop one has ever seen. The stems are perfect, substance is fine and the large colored buds are of unsurpassed quality. The quantity is so large that we can fill all orders, so let them come. Out-of-town as well as local florists who appreciate good stock should give us their orders for we have the most perfect flowers that can possibly be grown. Absolutely the best, none in the market can compare with them. Order now and you will agree with us when you receive your shipment.

Killarneys, Richmonds, Jardines, Uncle John

and our other varieties of roses are also of the first quality,

Peter Reinberg,

30 E. Randolph St., CHICAGO.

John Zech greatly enjoyed the trip to the convention at Baltimore and especially the visit to Washington, where he had the pleasure of visiting the government buildings and above all the view of the city and surrounding country from the top of Washington monument. Mr. Zech says that when he was at the top of the monument he had reached the highest point in his life, but from what was said to him at the convention by a certain Chicago member he has already reached as high a point in the esteem of the many friends of his home city.

Miss Minnie Wattman, E. C. Amling Co.'s bookkeeper, has returned from a most enjoyable outing in eastern states and Nova Scotia. The ocean trip was most delightful, although at one time it nearly proved fatal, for the steamer Massachusetts, on which they had taken passage, caught afire and it was several hours before the crew finally had the flames under control. Miss Gunterberg, who accompanied her upon the journey and remained in New York a few days longer, is expected home August 31.

Poehlmann Bros. Co. are busy preparing for the large fall trade which they feel assured will soon be here. Supplies are being stored ready for a moment's call. The large amount of stock now being received is of excellent quality and a sample of what is sure to be on hand when the busy season opens. The roses are of splendid quality and substance already, and the other stock is fully up to the high standard for which this house is noted.

Allie Zech stole a march not only on his parents but all of his many friends when he was quietly married on Saturday, August 26, to Miss Emma Pagels. Although his friends feel disappointed that they were not let in on the secret and were unable to enjoy witnessing the ceremony, the happy couple is forgiven and the best wishes of all are extended to the popular young man and his happy bride.

H. Van Gelder of Percy Jones' left August 27 for Texas, on a trip both for business and the benefit of his health. Mrs. Jones is in charge at the store and one can but say that the young wholesaler is indeed fortunate in having such an enterprising and industrious mother who has so successfully managed the business during his recent illness.

Headquarters for **ORCHIDS** and all Fancy Stock

CHAS. W. McKELLAR,

162 N. Wabash Avenue, CHICAGO.

The Chicago Carnation Co.'s crack baseball team lost for the third time this season when they were defeated at Joliet in an eleven-innings game. The club has made a very creditable showing and has defeated some of the best teams in this vicinity. This is probably due to excellent twirling of the pitcher and the gilt-edged support of the team.

Emil A. Danz, 1611 Lake street, has spent a busy month putting in a new store front and a large display electric sign and is soon to leave for a long needed rest. Mr. Danz believes in killing two birds with one stone. He therefore will spend his vacation at Mt. Clemens, where he will try a cure for his rheumatism.

The Chicago Pump Co. has received many testimonials expressing satisfaction for the manner in which their pumps clear the condensation in heating systems. Their new illustrated catalogue, which they will gladly mail to anyone interested, fully describes the working of these pumps.

John C. Enders, Jr., was awarded the prize for the handsomest baby, two to three years old, at the North Shore Ladies' Club baby show, held at Arcade hall. The proud and happy father has been the recipient of many congratulations at the Poehlmann Bros. store.

William E. Eschrich, of the Eschrich Nursery and Floral Co., of Milwaukee, visited the Poehlmann Bros. Co.'s, Frank Oechslin's and George Wittbold Co.'s greenhouses this week. His firm will have a large exhibit at the Wisconsin state fair this month.

Mrs. J. Simpson returned August 27 from a most enjoyable visit with relatives at Rockford, Ill. The new garage that is being erected in the rear of the Simpson store on Ogden avenue will soon be occupied by a new automobile.

USE Budlong's Blue Ribbon Valley.

Frank Johnson of the A. L. Randall Co. left August 28 with a good line of samples for parts unknown. Mr. Johnson has something fine in the ribbon line to show his customers that is sure to bring in many orders.

Bassett & Washburn's Mrs. Aaron Ward roses are selling like hot cakes and many of the florists are using them in their window displays. Some very fine ones were seen at John Mangel's, the Wabash avenue florist.

The J. B. Deamud Co. is very fortunate in having growers who are supplying a fine grade of gladioli. The flowers seen at the store this week are as good as have been shipped in throughout the summer.

A new American Beauty rose grower arrived at the home of Ernest Amling in Maywood on Friday, August 25. Mrs. Amling and son, Ernest Jr., are both doing nicely.

E. J. Reynolds, formerly with the Art Floral Co. of San Francisco, Calif., has accepted a position with the Alpha Floral Co. of this city.

Arthur Weatherwax, better known as "Sag," is back from his vacation and is again doing the buying for William J. Smyth.

A. F. Longren, the hustling traveling representative for E. H. Hunt, started out on his fall trip this week.

L. Stapp and wife of Rock Island were welcome visitors this week.

Edw. Schultz, of the E. C. Amling force, is back from his vacation.

The Chicago Flower Growers' Association

Phone Randolph 5449

176 N. Michigan Ave., CHICAGO

See Plant Advertisement on Page 331, This Issue.

Mrs. W. E. Englehardt and two children and her mother returned to her home in Memphis, Tenn., after a few weeks' visit in this city. Tim Matchen, the popular young manager at the Peter Reinberg store, and wife treated the visitors to an automobile ride on the boulevards and through the parks which was greatly appreciated. Mrs. Englehardt's husband is well known to the trade here, for he is connected with the Idlewild greenhouses, one of the largest buyers on the local market.

John Kruchten, D. E. Freres, E. H. Hunt, Vaughan & Sperry and John Sinner are giving their stores a new coat of paint this week. The latter, an expert fisherman, was so interested in the fish that Henry Weis brought back this week that before he realized what he was doing his paint brush had transformed a black bass into a speckled trout.

A. Duplan, of Mobile, Ala., has placed an order with the S. Wilks Manufacturing Co. for one of their self-feeding hot-water boilers. The boiler that this southern grower bought from this concern seven years ago has given such good service that he is installing a second one for heating the addition that was built this year.

Manager Frese, of the Chicago Flower Growers' Association store, says that business is picking up, especially the shipping trade, which was very good the past week. He is at present corresponding with some eastern violet growers and expects to have a few as members of the association soon.

Wietor Bros. are cutting an extra large quantity of American Beautys, Killarney, White Killarney and Mrs. Jardine roses of the first quality. If the cut continues to increase in quantity as it has the past week they will either have to enlarge the store or move the office on the second floor.

Robert J. Windler, the popular florist of St. Louis and president of the St. Louis Florists' Club, and Miss Amy Zender, daughter of Adam Zender, the well-known grower of this city, will be married at the home of the bride's parents, at 6038 Ridge avenue, on September 6.

Charles W. McKellar expects to receive a good cut of Dendrobium formosum, for one of his orchid growers will soon be in full crop. The genial wholesaler and his wife were present at the auto races at Elgin on August 26.

Henry Weis, of the J. A. Budlong force, is again attending to his duties at the store, after enjoying a two weeks' vacation at Tomahawk Lake, Wis. He brought back a mess of good-sized fish, mostly bass and pike.

Sol. Garland finished his planting this week and now has a fine stock of plants which should produce some good blooms this season. Enchantress is his favorite variety and four houses of these are in the pink of condition.

Victor Young, formerly in the employ of J. Schoepfle, left August 28 for Palatka, Fla., with the intention of making his home there if a suitable tract of land can be purchased.

J. T. Kidwell says that in his many years of experience in the florist business he has never experienced such a dullness in trade as has prevailed the past month.

J. A. Budlong's store is beginning to take on a fall appearance and large quantities of roses, carnations, asters and other choice stock are daily arrivals.

Charles Shaffer, of the Des Plaines Violet Co., has his Marie Louise violet plants in fine condition and expects to have a large cut this season.

The annual Schobermesse of the Luxemberger Bruderbund will be held at Karthauser Grove, September 3-4.

J. C. Bruckner will open another store at St. Lawrence and Sixty-seventh street in the very near future.

USE Budlong's Blue Ribbon Valley.

Miss H. V. Tonner has returned from a most enjoyable visit with relatives at Russell, Kan.

Emil Jehlik has returned from his fishing trip with a string of good-sized bass and pike.

Mrs. Frank Garland expects to leave soon to visit her daughter Rennie, who is at Albuquerque, N. M.

Visitors:—William E. Eschrich, of the Eschrich Nursery and Floral Co., North Milwaukee, Wis.; Frank Washburn, of A. Washburn & Sons, Bloomington; C. E. Schaefer, and Henry Salzer, La Crosse, Wis., and A. A. McPheron, of the Cottage greenhouses, Litchfield.

Bassett & Washburn Employes' Outing.

The picnic given by the employes and members of the firm of Bassett & Washburn was held on Thursday, August 17, in the woods east of the greenhouses. A platform for dancing was erected and Bohlander's orchestra of four pieces played from 2 o'clock in the afternoon until 8 o'clock in the evening. The various events were in good shape. The first event was the tug of war; this was participated in by four teams of five men each; a team of which Fred Herman was the captain was one winner and a team of which John Linn was the captain was the other winner. Boxes of cigars were the prizes. The shoe race was very hotly contested; at least a dozen men entered. It resulted in a

We are receiving such a large quantity of exceptionally fine **Asters, Gladioli, Roses, Carnations, Sweet Peas, Lilies, Lily of the Valley,** and other choice stock, that we can properly fill each and every order.

J. B. DEAMUD CO.
160 N. Wabash Ave , CHICAGO

tie, the winners being George Schumann and John Johnson. The sausage-eating contest was participated in by over 30; this was won by Mr. Larsloo Johns. A 100-yard race was won by Alex. Linn and a 75-yard race for men 35 years old and over had to be run in heats, as there were so many contestants. It finally resulted in a tie race, the winners being Emil O'Berg and David Craigmile. The balancing contest was won by Nick Den, a one-legged race was won by Paul Kohout and a race for boys 10 and 12 years old by Walter Anderson. The contests for ladies and little girls was just as warmly contested, the girls' race being won by Lillian Kohout, the needle-threading contest by Miss Johnson, the bean race by Mrs. O'Berg, the cookie-eating contest by Mrs. Carlson and the ball-throwing contest by Miss Carlson, a second prize being won by Margaret Lenhough. After the contests were over the crowd enjoyed themselves dancing and playing ball. The attendance was very large; there were 120 grown-ups and 55 children. A delicious supper was served at 6 o'clock, while liquid refreshments were served all the time. Ice cream, lemonade and large quantities of ginger ale and pop were enjoyed by the children as well as by the grown-up people. The management of the picnic, in charge of a committee which was appointed by the men themselves, was very ably handled. The prizes were as follows: Fifty-yard dash, men under 35, neckties and scarf pin; ball-throwing, open to ladies, purse and gloves; race for boys, baseball and bat; bean-carrying contest, for ladies and girls, parasol; balancing contest, for men and boys, shirt; race for girls under 10, hair ribbon and sash; cookie-eating contest, for ladies, comb; hopping race, for boys, baseball glove; sausage contest, for men and boys, knife; needle-threading contest, for ladies and girls, jabot and veil; fifty-yard dash, for men over 35, safety razor; tug of war, box of cigars.

Columbus Florists' Association.

The Columbus Florists' Association had their first outing August 12, which no doubt will be remembered for a long time by those who participated in it. The automobile parade through the city previous to going to the picnic grounds was the talk of the town, the mayor of the city honoring the association by leading it, and to show their appreciation of this the association presented him with a beautiful basket of flowers. All the cars in the parade were decorated with flowers and plants, the most attractive being those of Schiller park and the band wagon, this being an auto truck.

On the way to the picnic grounds the parade passed through Schiller park and Superintendent Sherman, as well as his able assistant, F. Heil, received many favorable comments on the fine work. This park is a credit to any city and is particularly the pride of the Germans, the name of the park having a great deal to do with this. It was at Schiller park that photographs of the entire parade and individual machines were taken.

About noon the party reached Hermandale Grove, a fine spot for picnics, and it was not long before everybody was having a good time. Frank Heil gave ample proof that he was an excellent cook and provider, there being 80 in all to feed, but he had plenty for everyone. A brass band consisting of 12 pieces furnished the music; notable speakers gave toasts and recitations, among whom were politicians, and a jolly good time prevailed until dark.

There were so many florists present from various points of the state that the Columbus Floral Co., whose place adjoins the picnic grounds, extended an invitation to the entire party to inspect their houses, which cover about 70,000 square feet of ground, devoted to carnations and chrysanthemums exclusively. Only words of praise could be heard of what the party saw, and Frank Miller, the president of the company, and Paul Hallbrooks, the superintendent, should feel convinced that they are leaders in their respective lines.

The association is indeed indebted to the chairman of the outing committee, Joe Hellenthal, who displayed such wonderful ability and everlasting patience. We all take our hats off to good old Joe. The Association being young, was satisfied with the attendance, although they would like to have seen the few remaining members of the Florists' Club present. They were all invited. However, it is gratifying to know that they admit the affair was a success inasmuch as it was reported in another trade paper that the outing was given by the Florists' Club. The association wishes to thank the Florists' Club for the courtesy extended.

F. C. V.

PORT CHESTER, N. Y.—Fred Dettmer, formerly of Belle Haven, has purchased the floral business known as the Rosary.

COPENHAGEN, N. Y.—John M. Lewis officiated as judge at the floral festival held at Carthage by the Deer River Agricultural Club.

Cleveland.

STOCK EQUALS DEMAND.

Business is about the same as during last week. Asters are barely equal to the demand and good indoor asters are few and bring a good price. Carnations have a good call, some very good stock from old plants, inside stock, are arriving daily. Outdoor stock is rather poor and not much in demand. Sweet peas still keep on coming in, but the demand is only fair. Easter lilies have a good call and the quality is exceptionally fine. Gladioli are very plentiful, America and May being most in demand. Coreopsis, Virginia heather and larkspur is part of the daily stock. Greens of all kinds are plentiful with the exception of smilax. Roses of all grades and varieties are in good supply and the stock is very fine for this season of the year. American Beauties are large blooms and long stems and the color is just right. My Maryland and Killarney are keeping up both as to color and quality. Dahlias are making their appearance but so far are short in stem. Swainsona is plentiful. Lily of the valley is a little scarce, but there is little demand for it.

NOTES.

Knoble Bros. will have an exhibit at the West Side Industrial Exposition. They intend to exhibit cut flowers, funeral designs, wedding decorations, corsages, table decorations, etc., in fact, about everything in the floral art.

The Cleveland Florists' Exchange is receiving daily a fine cut of the new yellow rose, Mrs. Aaron Ward, also some excellent My Maryland roses, while their American Beauties are the best summer rose on the market.

Harry P. Jones of the Jones-Russell Co. went east this week on an extended business trip. Chas. Russell of the same firm will leave next week and meet Mr. Jones, and together they will do their fall buying.

Chas. A. Woodman of the Cleveland Florists' Exchange is spending a week in Detroit, but will return in time for the big Industrial Exposition on the West Side.

Labor Day, September 4, will again see our annual horse parade. All florists who wish to enter their horses and delivery wagons can do so by applying to the secretary. C. F. B.

St. Louis.

TRADE STILL QUIET.

The weather is somewhat cooler but trade is still very quiet. Flowers of all kinds are plentiful, with the exception of carnations. American Beauty and all other roses are in great supply. Next week the schools and theatres will open and it is expected that trade will improve.

NOTES.

The flower show to be held at the Coliseum promises to be a record breaker. The meeting of the Chrysanthemum Sociey of America will greatly help the show and it is expected that a fine display will be made by local and outside florists.

F. H. Weber was unable to attend the S. A. F. convention on account of his wife's illness. We are glad to announce that Mrs. Weber is much improved.

J. F. Windt will be succeeded by his son, R. T. Windt, and J. H. Heitman. They will make extensive alterations and will push trade at the old stand on Bayard avenue.

Chas. Kuehn is receiving some extra fine lily of the valley and a good supply of fancy asters and American Beauty roses.

The Bentzen Floral Co. has painted its store and in the greenhouse adjoining there is a fine stock of palms and other plants.

J. F. Wilcox, of Council Bluffs, Ia., is shipping some good colored American Beauty roses to this market.

On and after September 1 the wholesalers will remain open to 6 p. m. daily and 12 noon on Sundays.

Fred Alves, of Geo. H. Angermueller's, will start on his vacation in September.

"IT IS DULL."

Every grower or salesman that we meet looks as if he had lost some dear friend or had been the victim of a gold brick scheme; the market is the cause. Trade is as flat as a flounder. The asters are with us yet and better than ever, and chrysanthemums are also with us and will be for some months. Money and high hopes have been left behind in European travel and at the beaches and those who attempted to keep up style have spent all their available cash. The florist who upon opening his mail finds this, "Please find enclosed check," regards it as the sweetest phrase he ever heard. But, then, we shall probably live through it, and forget it when the orders for the September and October brides begin to come in and the quarterly dividends from the gilt-edged stocks come due—then society will splurge. "It is dull," these words fit the situation, and there is enough agony in them to satisfy all. But there are some bright spots on the horizon.

NOTES.

The Gardeners' and Florists' Club held a field day at the gladioli grounds of B. Hammond Tracy, Wenham, Saturday, August 26. The day was an ideal one for the flowers. A light rain had fallen which gave the flowers a fresher look. There were about 50 in the party and they went out in a special car and were met by Mr. Tracy with autos and carriages. Mr. Tracy should be given great credit for the appearance of the place. There are ten acres under cultivation and include all of the best varieties. Starting four years ago in the bulb business for his health, Mr. Tracy has built up a trade and though not having had special training, can produce stock of a quality that would put many a trained gardener to blush. Everything is clean and the stock shows a master hand in charge. From an abandoned farm to a thriving business in a few years shows what can be done if you have the grit and proper business sense. His good wife is his able helper, and a love for flowers seems to be imbued in her. The different kinds, their habits, etc., are like A. B. C. to her. Everything is packed under her direction. A better partnership could not exist. The soil is like a gravel pit and it surprised many of the wise ones how such stock could be grown. A caterer was hired for the occasion and an elegant repast was partaken of and enjoyed. Speeches by Peter M. Millar, W. N. Craig and others followed. Mr. Craig spoke on the wonderful showing made from such soil. He had no idea that such results could be obtained upon such a place. A vote of thanks was accorded Mr. Tracy and his wife for the outing and the added pleasure of becoming acquainted with such a lady and helpmeet as Mrs. Tracy.

T. F. Galvin reports the best summer trade they have had in years, and orders ahead make things look promising. They have one big wedding for early September, that of the daughter of G. L. Stone, the banker, at Marion, Mass., and two other weddings the week after at Magnolia. We were shown here a vase of Mrs. Taft grown by J. A. Budlong & Son Co., Auburn, R. I.; they were very fine and we were told that this was the best rose this summer. We were also shown two seedlings which were supplied by the Waban Rose Conservatories; they are unnamed as yet: one is of the Wellesley type, good stems and foliage; the other is a beautiful pink, stems strong and foliage vigorous; these will probably receive further mention later on. Mr. Slattery, of the Galvin force, has returned from a vacation spent in Nova Scotia, traveling all over that country; he feels rested and ready for the season's rush, but he hasn't any fish stories. Mr. McManus has just gone on his vacation.

At Penn the Florist Mr. Rogers informs us that J. Eiseman, head designer, is going to New York next week, to meet Mr. Penn, who went ahead in his auto this week on a business trip. From New York they will go through New York, New Jersey and Philadelphia, visiting all the principal wholesalers, retailers, growers and markets and getting stock for their new connecting

stores. By the way, there is a Bible House sandwiched in between their two stores; any nice points on Bible history can be easily settled.

We met William Molloy the other day. Billy, as he is called, is Boston's veteran salesman, starting at Waban Rose Conservatories a boy. He is now with the J. A. Budlong & Son Co. and knows selling in all its phases. He is one of the most even-tempered men in the business, but Cupid has never been able to pierce his armor plate, but some day we hope to mention that Billy has surrendered to Cupid, along with our friend George C. Watson.

It is aviation week in this city. Many of the boys are to be seen wearing their caps backward. Moses Leidman is interested in the Bleriot type. Some day we may see Moses whirling over the state house and landing at the market for his supply of flowers. Between wine crops in Jerusalem and flying machines here his spare time is pretty well taken up.

Like Thomas F. Galvin and Sidney Hoffman, Welch Bros. are to give up poor dobbin and use an automobile delivery wagon which is to be delivered to them this week. We noticed some nice President Carnot and Radiance roses and a shipment of water lilies from W. B. Shaw, Washington, D. C. P. Welch is still at his summer home at Old Orchard.

At H. M. Robinson & Co.'s we saw some nice Killarney roses and lily of the valley; they are hopeful of a good season's trade. MAC.

Pittsburg

BUSINESS QUIET.

The last week of August still finds us awaiting the appearance of the fall trade. Business now is just marking time, with an occasional forward movement. The fine big late asters are now with us, and although they do not clean up, they sell well; but gladioli, no matter how fine, move more slowly than they have any previous summer. Roses keep up their quality finely, all varieties of pink and Kaiserin doing very well. American Beauties clean up nicely, owing to the limited number coming in. The same can be said regarding lily of the valley. Very few water lilies are seen, but, of course, they are not missed.

NOTES.

The store of George Wehrheim was robbed while he was away on his wedding trip. Fortunately, George took all the cash with him, and about all the robbers got was a revolver which was kept to entertain such gentlemen.

Some of the Evergreen growers are supplying the Allegheny market with a strain of white and pink asters that are exceptionally good.

All the S. A. F. members are outspoken about the royal treatment afforded them in Baltimore.

Harry Hamm and C. H. Puhlman are both figuring on putting in a truck.

P. Maier, who is in the hospital, is reported in a serious condition.

Roy Dashbough has returned from his trip through Ohio. J.

Cincinnati.

NOT A HEAVY SUPPLY.

It is rather difficult to analyze the condition of the market. The early part of the present week the aggregate of stock on hand at all times was large, but heavy buying in any one line causes a temporary shortage in that article. This was very noticeable in roses, which are not in over-large supply, and lilies. Choice asters were, until this week, more or less short of the demand. Many of those arriving are bruised, and, of course, move slowly. The good ones find a waiting market. Gladioli are in an over-supply. Only the larger choice ones and America take the buyer's eye with any degree of regularity. Carantions cut from the young stock are beginning to arrive. The green goods supply is adequate.

NOTES.

The J. M. McCullough's Sons Co. have had installed in their wholesale cut flower department a large ice box. The box is built in two parts, each one of which can be iced separately. Thus they will have the greatest refrigerating service, with an economy of ice.

H. J. Moorman, formerly with Julius Baer, has opened up a store at 807 State avenue, at the foot of Vine Hill, under the name of H. J. Moorman Co. Mr. Moorman is well known in that vicinity and, with his large personal following, should be successful. H.

BUSINESS AT LOW EBB.

Business is at a very low ebb and excepting the inevitable funeral work, there is but little doing. There is a surplus of stock, particularly asters. The heavy rain of a fortnight ago brought in the large flowering kinds literally by the wagon load; but now, very few people seem to want them. Such is a frequently recurring feature of the business. Of the new crop of roses some very fair stock is seen, but it moves very slowly. Dahlias and other stocks are in a similar condition. About all the carnations that are seen are short stemmed field stock. Carnations that were planted in the houses a month ago, are as a rule doing well, notwithstanding the hot and humid weather of August.

THE LATE JOSEPH R. FREEMAN.

The following resolutions were adopted at a called meeting of the Florists' Club of Washington held August 23:

"Whereas, death has robbed the Florists' Club of one of its charter members, who has for years been an active and loyal supporter of our body, a man of integrity, a citizen of standing and probity, one of the former presidents of the organization and a friend ever ready in time of need,

"Therefore be it resolved by the Florists' Club of Washington, D. C., in special session assembled that we mourn the loss of Joseph R. Freeman and tender to his bereaved family our sincere sympathy in their days of affliction.

"Be it further resolved that these resolutions be inscribed upon our minutes, a copy furnished the family of our late member and that our organization attend the funeral ceremonies in a body.

WM. F. GUDE,
GEO. FIELD,
GEO. H. COOKE,
F. H. KRAMER,
N. L. HAMMER,
Committee."

In presenting the resolutions Wm. F. Gude spoke in part as follows: "Joseph R. Freeman was well known to you as a citizen and a man. The general public which knew him in his chosen line of endeavor may well know our appreciation of him as a fellow member of our organization and profession. He achieved success in our work which we maintain, in itself, does much to uplift humanity and make life's path nobler and better. As a member he has been an earnest and faithful worker, both as a private in the ranks and in the office to which he was called by our vote, a post he filled with dignity and honor. Knowing him as we did the lines of the great Scotch poet seem especially applicable to our departed friend:

"'Tis such as these which make our country's name,
Well loved at home, revered abroad.
Princes and earls are but the breath of kings.
An honest man's the noblest work of God."

The funeral of Mr. Freeman was held at Holy Trinity Roman Catholic church on the morning of August 24, with solemn high mass and the impressive ceremonies of that church. There were large delegations in attendance from the Elks, Knights of Columbus, Florists' Club of Washington and other organizations, and many business men and neighbors to pay the last sad tribute to one who for years had been a well known and honored figure among them. There were many beautiful floral tributes, that of the Florists' Club of Washington being of American Beauty roses. Many designs were also sent by individual florists. The pall bearers were chosen from among his former business associates and fellow members of various organizations, W. F. Gude, representing the Society of American Florists and the Florists' Club. Mr. Freeman is survived by a wife, who will be well remembered by all who enjoyed the large hearted hospitality dispensed at the family home on the occasion of the last meeting of the Society of American Florists in this city. There are also three sons and one daughter. Two of the sons, Joseph and Louis, have from boyhood been connected with their father in business; the third holds a responsible position in a bank.

NOTES.

Florists, seedsmen and nurserymen are both directly and indirectly interested in the Department of Agriculture and doubtless some of them have a friendly feeling toward that department of the government. It has been thought that if it did not accomplish all it claimed, its intentions were good, and Secretary Wilson was looked upon as an upright man. The condition disclosed in the bureau of chemistry by the Moss investigating committee has not been reassuring and Secretary Wilson's evidence, given a few days before the adjournment of congress, did not strengthen his case. Leaving out the merits of Dr. Wiley and his work, here it was found that in Solicitor McCabe—who was never heard of by most of the people until this investigation came on—there was a little czar, changing court decisions and making himself a cheap busybody, obnoxious to all who would not kow tow to him. The secretary should wake up and return McCabe to the obscurity from which he sprung.

Arthur Ward of J. H. Small & Sons' staff has just returned from a sojourn of six weeks in Merrie England and Scotland. He enjoyed his trip very much but had quite an experience in weather. On leaving New York going over the temperature was 106, but when the steamer reached the Grand Banks of Newfoundland, the icebergs sent it down to 46. Over in England there had been no rain for eight weeks and the temperature trotted along for day after day at 96 and 98. Mr. Ward, who has long been a resident of this country, is pretty well seasoned to hot weather and did not mind it. The majority of that "nation of shopkeepers," as the great Napoleon curiously termed them, liked it not. "Too beastly 'ot, doncherknow."

The Washington delegation to the Baltimore convention is feeling pretty well, thank you! In the men's bowling team there is a feeling of general satisfaction, while the prizes brought home by Mrs. Cooke and daughter and Mrs. Schaffer caused much pleasure among their many friends. Eicker of Geo. Shaffer's stall is receiving many congratulations over his high score, but takes them all very modestly.

On September 1 the Avenue Floral Co.'s store at 1734 Pennsylvania avenue will reopen under new management.

A. F. F.

Buffalo.

USUAL SUMMER CONDITIONS.

Trade conditions are about as usual, there being nothing startling in any line. Stock is equal to all the demands and of varied qualities. Gladiolii are good, while some asters are of unusual size, considering the weather, and have found ready sale. My Maryland roses for August are very fine.. Some very nice yellow chrysanthemums have been on sale at S. A. Anderson's.

NOTES.

The contingent from Baltimore has returned, but not as a party, several having business in other cities, but all reporting a successful meeting. The Buffalo florists are again honored by the election of W. F. Kasting as treasurer and we can only repeat the words of one of our nation's brilliant men when he was elected to office. He said, "I wish to congratulate the people on the wise manner in which they voted."

FLORISTS' CLUB PICNIC.

Local interest during the convention was centered on the following week when the Buffalo Florists' Club's annual outing was to take place. Erie Beach was the place selected by the committee, of which E. C. Brucker, E. A. Stephan and Joseph Sangster were the ones who did their work so faithfully. Erie Beach is Buffalo's latest summer grounds and very accessible to the city by boat. A slight rain stopped the ball game and one or two other sports, but as a whole it was most successful. There was a special race arranged for Anderson's Slivers, called a shadow race, between Henry Krauss and Harry Ast of one hundred yards, but as the day was cloudy and both would have to stand twice to make a shadow, it was omitted. Young Stemacher was to have rolled a game of ten pins with Edward Stephan, but Stemacher had his finger badly scalded only two days before the picnic. The winners in the several contests were as follows:

One hundred-yard dash—J. Sangster, first; Walter, second; Reichert, third.

Men's race (over 40)—Allard, first; Streit, second.

Ladies' flag race—Mrs. Buechil, first; Mrs. Gearing, second; Mrs. Dittman, third.

High jump—Tobin, first; L. Neubeck, second.

Put the shot—Kreamer, first; P. Galley, second, Streit, third.

Boys' race—E. Hegle, first; R. Glaser, second; H. Moutz, third; Zimmerman, fourth.

Three-legged race—Tobin and Walter, first; Zimmerman and Kepp, second.

Tug of war—Won by the growers.

Girls' race—Lilly Rosengrantz, first; Ester Rosengrantz, second; Flora Rosengrantz, third; Irene Ritkle, fourth.

Relay race—J. Sangster, Walter, Tobin.

The arrangements were different this year as to the luncheon, a basket picnic being the order of the day, and every young lady with a basket had as many admirers as a barrel of sugar has flies. The ladies' hobble race, which was a new one, but not to North Tonawanda, Miss Christy distancing all contestants. The flag race for ladies' also was interesting and very evenly contested. The evening was also very enjoyable. Many who had been unable to be there in the afternoon were present in the evening. One thing very noticeable was the new faces seen, which plainly shows that a new generation is fast replacing the others who by no means think themselves has-beens, and among those unavoidably absent this year were W. F. Kasting, S. A. Anderson, W. J. Palmer, E. A. Slattery, W. A. Adams and the Scotts. We had an able spokesman in L. H. Neubeck, who is only sixteen—the number of times not mentioned. It is agreed that all had a glorious time and welcome another year. BISON.

Baltimore.

TRADE NOT TOO BRISK.

Business during the past week has not been any too brisk, but all are looking forward to September, when a change for better conditions is expected. The dull trade is not however confined to the florists, for all kinds of business are very quiet. Stock is coming in much heavier with but little demand and good quality can be had at reasonable prices. Roses are in fair supply but not overabundant, and sell well. The outside stock is good, Maman Cochets being in demand. Carnations are scarce, good stock being almost impossible to obtain. Gladioli are still to be had and many are used for decorative purposes. Lilies are arriving in small quantities, funeral work using nearly all the cut blooms. Greens of all kinds are in good supply. Potted plants occupy a prominent place in the retail florists' windows and show to good advantage. The demand for ferns is good. The suburban buyers are using many for the decoration of their porches.

NOTES.

Chairman J. L. Towner desires to express his appreciation of the reference to the decorations made by the committee on final resolutions at the convention. The committee worked hard and is pleased that their successful labors were appreciated. The members of the committee who assisted the chairman were G. Strickland, C. Gregorius, E. Kress, R. Vincent and O. Gureth. Many business houses had signs of welcome and the mayor ordered all public buildings to display their flags during convention week. Bernheimer's display was fine and Hutzler Bros.' decorations were very attractive.

The Maryland Horticultural Society held its annual summer meeting Thursday, August 24 at the J. G. Harrison & Son's nursery at Berlin, Md., as the guests of Orlando Harrison, whom the attendants at the convention will remember as the one who supplied such large quantities of peaches. From the nursery the guests went to Ocean City, a seaside resort of great natural beauty.

The executive committee is still at work straightening out and closing up all affairs connected with the convention and everything is working out satisfactorily.

The trees which were used in decorating the Armory were placed on the street and somehow caught fire and a blaze which lit up the city was the result.

The past week the city has experienced heavy storms and many washouts.

Leonard H. Vaughan Chicago President; Marshall H Duryea New York First Vice-President; Edgar Gregory Marblehead, Mass., Second Vice President; C. E Kendel, Cleveland O., Secretary and Treasurer.

Next annual convention, June, 1912.

NARCISSUS VON SION, double nose, is reported a scarce item now in Holland.

NEW YORK.—Patrick O'Mara is expected home from Europe September 1.

BLUE GRASS seems to keep moving up; $3.25 is the latest quotation in carload lots.

BIRMINGHAM, ALA.—The Amzi Godden Seed Co. will add gold fish and canaries to its stock in trade September 1.

CHICAGO.—Prices on the Board of Trade, August 30, for grass seed, were noted as follows: Timothy, $13 to $14.50 per 100 pounds.

VISITED CHICAGO.—Henry Salzer, of the John A. Salzer Seed Co., La Crosse, Wis.; Frank L. Washburn, of A. Washburn & Sons, Bloomington, Ill.; T. Lee Adams, Kansas City, Mo.

W. ATLEE BURPEE and son, who have been attending the exhibition of the National Sweet Pea Society of England, visited the cultures of Hjalmar Hartmann & Co., Copenhagen, the last of July.

H. A. BARNARD, representative of Stuart Low & Co., Enfield, England, will shortly visit the United States, expecting to arrive in New York early in September, where he will be found at the Hotel Albert, Eleventh street and University Place.

The Seed Trade Reporting Bureau has issued a list containing the seed law restrictions for weed seeds and for purity and germination with the percentage set by each state. It is printed on heavy board arranged in convenient form for reference.

HOLLISTER, CALIF.—This has now become the leading seed growing section of the state. Within a radius of seven miles about 4,000 acres will be devoted to the production of garden seeds in 1912. It is the county seat of San Benito county, 90 miles south of San Francisco, and the home of the Pieters-Wheeler Seed Co., the first firm to locate here.—L. W. W.

Origin of Darwin Tulips.

It is a matter of common knowledge to those who are interested in bulbous plants that the Darwin tulips were introduced to cultivation by E. H. Krelage and Son, of Haarlem, but the origin of this extremely beautiful section has hitherto been somewhat obscure. It is, therefore, of much interest to find in the sketch of the history of the firm during the past 100 years a reference to these tulips, in which their origin is given. Ernst Krelage, the present head of the firm, by whom the historical sketch has been compiled, writes: "The origin of this strain was a small collection of amateur tulips from the north of France, where in the eighteenth century the tulip had been a favorite flower. This strain, after having been improved and propagated, was quite distinct from everything known before as self breeder and mother tulips. Mr. Krelage at once realized the exquisite beauty of the dazzling colors for garden decoration and market purposes, and asked and obtained the permission to dedicate the strain to the memory of Darwin, these tulips having been improved by continuous hybridizing, and so being a splendid example of the variability of plants which has been one of the important parts of Darwin's life work. Prof. Francis Darwin replied: 'If my father had been alive, I am sure he would willingly have consented to your proposal, and I think I may safely answer for the other members of the family, who, I am sure, will feel pleased, as I do, at the spirit and manner in which you propose to name your new strain.'"—Gardeners' Magazine.

Los Angeles, Calif.

A GOOD AUGUST.

While it cannot be denied that trade has been somewhat dull, the business during August has been far and away better than any in the history of the trade here, and now, with school commencements in the near future and the rush of eastern visitors not so far away, there is a prospect of even better things to come. Outdoor stock has again been over-plentiful, perhaps the worst gluts being in rubrum lilies and asters. The outdoor lilies are poor, not so much in the size of flower as in the looks of the foliage. The hot sun of California is too much for this class of lilies and growers should either plant them under lath or provide some shade. The difference in this outdoor stock and superior flowers grown under glass or lath is so marked that there is no difficulty in obtaining a much better price for the latter, but the immense stock from outside has had—for a couple of weeks—a most depressing effect upon prices generally. Roses are in similar straits. Some growers have prime stock, clean and good in every way, but the deluge of rubbish coming from other growers checks business here, too. If these growers could only see that it would be to their advantage to dump this rubbish at the greenhouses instead of loading up the market with it they would get a better price for their good stock. The better class stores do not handle much of it, but to see it marked up by the doorway florists (?) at ridiculously low prices cheapens the business and does harm all around. Golden Glow chrysanthemums are arriving a little more freely, but the quality is not as good as at first. Lotus and water lilies are becoming plentiful and they are shown in several of the best stores. But there is room for considerable improvement in the way they are shown, and here our retailers may well take a hint from their eastern confreres, whose windows at this season—as described in THE AMERICAN FLORIST—are cool and delightful-looking, owing to the natural grouping of water lilies in artificial ponds and in other ways. There are only a few local grown orchids now, but some fine Cattleya Gaskelliana and a few early labiatas are coming in from the north.

NOTES.

O. C. Saakes is in San Francisco attending the convention of the Eagles.

Thee Florists are planning considerable additions and alterations to their store at 328 West Fifth street.

Market Gardeners

Vegetable Growers' Association of America.

B. L. Watts, State College, Pa., President; H. F. Hall, Boston Mass., Vice-President; S. W. Severance, 508 Illinois Life Building, Louisville, Ky., Secretary; M. L. Rustenik, Cleveland, O., Treasurer.
Annual meeting at Boston Mass., 1911.

New England Market Gardeners' Ass'n.

The annual outing and dinner of the New England Market Gardeners' Association was held at Point of Pines, Revere, Mass., Saturday, August 19. Sports of all kinds were enjoyed, including a bowling tournament and a baseball game between the married and single men which was won by the latter. The affair was ably managed by the following committee: President H. F. Hall, Vice-President W. J. Lovell, Secretary J. P. Esty, Richard Hittinger, J. B. Shurtleff, Jr., E. F. Skahan and Anson Wheeler. At the dinner President Hall reminded the members of the exhibition and convention of the Vegetable Growers' Association to be held in Boston this fall.

Planting the Crops.

Most vegetable growers are seriously concerned with the question what to plant for fall crops. It used to be all right to plant the whole area to lettuce, but those days are about gone. There is not the demand for lettuce in November and December as in the spring, and by reason we should avoid a disastrous glut by planting something else. Some growers plant chrysanthemums, but this is not advisable for many reasons. Few have the experience, skill, and labor to produce first class flowers, and in the end they lose out by following something out of their line. We find an unsatisfied demand for green onions, radishes, parsley, bunched beets, green beans and head lettuce, all of which can be grown very well and cheaply and will do better than an over-stock of leaf lettuce. We have called attention to these things before and repetition is in order as there is a wide field for diversified forcing and not much of a field for leaf lettuce. However, growers must be careful with anything new. They must learn what to plant, when the market will be favorable, and develop a market. Our experience is that a market can be built up for anything we grow in good shape, provided we are constant with the supply. It may not pay at first, but it will surely come and such a trade is worth more than a one-sided specialty, like leaf lettuce, that may not pay for the coal, part of the season.

MARKETMAN.

Muskmelons Under Glass.

ED. AMERICAN FLORIST:

I am desirous of growing muskmelons under glass. Will you kindly inform me the way to proceed in order to obtain the best results? L. T.

Alaska.

The culture of muskmelons does not differ from that of cucumbers to any extent; whatever applies to the latter will also apply to the former. While cucumbers are forced in the early fall and winter, we would advise no one to try melons at that season. The more natural and easy way would be to start the seeds in late winter, as the returning sun is a great help. By the time the vines get into fruiting age it will be spring and then success is more certain. If desired to have very early melons, they must be benched like roses, while for early summer fruiting solid beds are best. We have never tried the single stem method on melons under glass, as any extensive pruning or pinching outdoors has always proven disastrous. We provide a trellis of wire for the melons and let them grow at will. At one time we tested out a number of English varieties, but failed to like either their style or flavor and discarded them. We would plant American seeds of Jenny Lind, Fordhook or Hoodoo. These are small melons of excellent quality and the vines are productive and not too rank.

As regards cultural detail, the main thing is temperature. They must be warm from start to finish, which means never less than 65 degrees at night and the nearer 70 degrees the better. Plants should be started in pots and planted out as soon as ready, avoiding any check. Provision must be made for pollination, either by hand or bees. Fruit must be supported in nets, as they often break the vine when suspended on their own stems. The succulent growth of all vine crops requires an open soil, plenty of food, plenty of water and a high temperature. In the measure that these elements are supplied will our success be. We have before us the finest outdoor crop of melons we ever grew. They were planted in rows ten feet apart and intercropped. The fillers were mostly radish, lettuce, green onions and celery, and to keep these up great amounts of water were used—in fact, the tract had to be soaked twice a week. This treatment, together with the rich black land, ample root room and the warm summer, produced a heavy crop of excellent melons, pronounced by our customers the best melons they ever tasted. MARKETMAN.

Montreal.

NOTES.

The delegation that went from Montreal to attend the annual convention of the Canadian Horticultural Association at Ottawa numbered twenty-six and had a very enjoyable time from start to finish. The Ottawa people are experts at entertaining and everything went off like clockwork, being in charge of E. I. Mepsted, and Montreal's contingent will never feel out of debt until after the convention in Montreal next year. The entertainments provided by the Ottawa florists were numerous and greatly enjoyed. A car ride to Aylmer park, where the sports were held, will long be remembered by all. Wright Bros.' large establishment was visited, where refreshments were served. The banquet was a great success, with the mayor and Alderman Lapointe in attendance. The parliament buildings, government grounds and Governor General's place were visited, also a carriage drive to the Experimental Farm where Prof. Macoun kindly showed everything of interest. Graham Bros.' and Scrim's places were inspected. Refreshments were served at the former and supper at the latter place. Everybody went home happy, having spent a few of the best days of their lives.

T. J. Gorman, while driving an automobile at Ste. Rose the night of August 17, ran off the embankment and was killed, the auto turning somersault and pinning him and a young lady accompanying him underneath. When the auto was overturned both were found dead, the other two occupants of the car were throuwn out, but not seriously injured. LUCK.

The Nursery Trade

American Association of Nurserymen

J. H. Dayton, Painesville, O., President; W. H. Wyman, North Abington, Mass., Vice-President; John Hall, Rochester, N. Y., Sec'y. Thirty seventh annual convention to be held at Boston, Mass., 1912.

BEDFORD, MASS.—The storehouse and packing building of the New England Nurseries were destroyed by fire August 26, causing a loss of $10,000, more than half of which was on growing plants and stock in storage. The adjoining buildings were saved by the the work of the firemen.

NEWARK, N. J.—Jackson & Perkins Co. are just completing an immense new frostproof building for the storage of nursery stock, 60x160 feet. The walls are of cement blocks laid in three separate courses, thus giving two air spaces in the walls, thoroughly insulating the building against both heat and cold. The structure is a model of its kind and the additional room which it provides has been made absolutely necessary by the company's increasing business.—John Watson, of the Jackson & Perkins Co., sailed from Liverpool August 24 on his return from a two months' European trip. He has visited the leading horticultural centres of Great Britain and the continent, and reports extremely dry weather prevailing throughout Europe, many kinds of stock suffering severely. G. C. P.

Southern Nurserymen's Association.

The thirteenth annual convention of the Southern Nurserymen's Association was held at Greensboro, N. C., August 23-25, 1911. The meetings were full of interest, there being about 50 in attendance and the papers were carefully discussed. The convention opened on the morning of August 23 with an address of welcome by Thomas J. Murphy, mayor of Greensboro, which was ably responded to by Charles T. Smith of Concord, Ga. Papers were read as follows: "The Pecan and Its Possibilities," C. F. Barber, MacClenny, Fla.; "Fraternity Among Nurserymen," Charles T. Smith, Concord, Ga.; "How May Southern Nurserymen Increase the Demand for Ornamental Stock of All Kinds," R. C. Berckmans, Augusta, Ga.; an address by Prof. W. N. Hutt, State Horticulturist, Raleigh, N. C.; "Need of Uniform Prices on the Same Kinds and Grades of Trees," Harry Nicholson, Winchester, Tenn.; address by Prof. E. R. Lake, Washington, D. C.; "Preparation and Fertilization of Our Soils," John A. Young, Greensboro, N. C.; "Better Prices for Our Trees," J. C. Miller, Rome, Ga.; "Packing," W. T. Hood, Richmond, Va.; "Apple Growing in the Mountains." O. Joe Howard, Pomona, N. C.; "Revising Plate Books to Suit Territory," J. Marvin Miller, Winchester, Tenn.; "Nursery Problems of the Future," Robert C. Chase, Huntsville, Ala. The election of officers resulted as follows:

E. W. Chatlin, Winchester, Tenn., president.

O. J. Howard, Pomona, N. C., vice-president.

A. I. Smith, Knoxville, Tenn., secretary and treasurer.

The next meeting will be held at Augusta, Ga.

On Thursday afternoon a very pleasant feature was the automobile ride to the nursery of John A. Young and the J. Van Lindlay Nurseries, and the hospitalities furnished were much enjoyed. J. C. C.

SAN FRANCISCO, CALIF.—George K. Uno, formerly with the California Floral Co. and later with Domoto Bros., has assumed the management of the California Floral Supply Co. at 1725 O'Farrell street, who are engaged exclusively in the wholesale cut flower business and the sale of florists' greens.

Heacock's Palms and Ferns

Home Grown, Strong, Clean and Well Established Describes our palms. No more words are necessary. "Our satisfied customers are our best advertisement." One customer who has been dealing with us for years sent us an order for $1,500 worth of palms without seeing them. Another whose order last year amounted to $700, gave us an order this year amounting to $1600. Send for our new booklet and give us a **trial order.** Lay in your stock of palms in **September** while you can have them shipped by **freight.** Our facilities for shipping are of the best. We ship by freight to every state in the **Union.** We have 40 per cent more glass this year; most of our glass is devoted to palms. We are particularly strong in the **larger sizes,** (7, 9 and 12-in.) We grow all our Kentias, above 6-in. sizes, in **cedar tubs** made especially for us, **avoiding breakage of pots** in shipments and **giving better satisfaction to our customers;** and while they cost us several times what pots would cost, we sell them for the same money; they are the neatest, lightest and best tub ever introduced painted green, with three electric welded wire hoops. We order these tubs by the carload.

Order Now for Fall Delivery. **When in Philadelphia, call and see our stock before placing your order. 20 minutes ride by rail; 50 trains each way every week day; Railway Station Jenkintown.**

THE HOME OF ARAUCARIAS

Araucaria Excelsa, Robusta and Compacta Our Specialty.

Every successful business man has an anniversary. To us this is the twenty-fifth anniversary since we took up the importing, growing and shipping of our specialty, the Araucarias. Commencing twenty-five years ago with 100 plants, we have now (1911) imported from Belgium 10,000 plants. More are coming this fall with the azaleas. What caused such an immense growth? Advertising did not do it alone. First—We deal honestly and squarely with every one. Second—Cash sales to every one; our customers don't pay for deadheads. Third—We give full value for the money; we sell cheap. Fourth—Prompt delivery.

Araucaria Excelsa Our Specialty.

Warning — Don't be deceived. Now, as well as for the last twenty-five years, we hold the ground as leaders in importing, growing and shipping of our specialty, the Araucarias.

Araucaria Excelsa, Robusta compacta, Glauca, and Palms, etc. Florists, you all know we are leaders for the last 25 years in importing, growing and shipping of this so well known evergreen decorative plant, the **Araucaria,** more in favor than ever, from Atlantic to Pacific Ocean. To every florist our Araucarias is interesting, therefore no argument is needed for our goods. We know what our customers need, therefore we have provided and set aside special specimen plants. Spring 1910 importation, for lawns, porches, verandas, bungalows, private summer residences, the hotels and boarding houses on the seashore and elsewhere. This plant is one of the most desirable evergreen decorative plants adopted for this above mentioned purposes. For decorative purposes, in connection with palms, they will make a fine display.

Araucaria Excelsa, raised from top cuttings, 6-7 inch pots, 4 to 5 years old 5, 6 and 7 tiers 25, 28, 30, 35, 40-in. in height..... $1.00 $1.25, $1.50, $2.00 to $2.50 each

Araucaria Excelsa Glauca and **Robusta compacta,** 6-7 in. pots, fine bushy plants ....$1.25, $1.50, $2.00 each

Araucaria Excelsa, new importation, out of 5, 5½, and 6-in. pots, 2 to 3 years old, 3, 4 and 5 tiers, 10 12, 14, 16 18 and 20 inches high... 40c, 50c 75c and $1.00 each

Robusta Compacta Excelsa Glauca, 5½ and 6-in. pots ....$1.00 to $1.25 each

Kentia Belmoreana, 4 year old, 30 to 35 inches high, $1.50

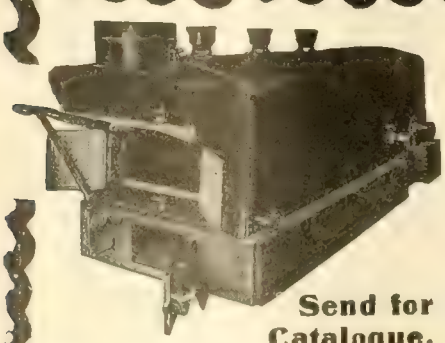
What the Users Say



Send for Catalogue.

Temperatures Easily Maintained in Zero Weather
Kroeschell Runs all Night Without Firing.

Your boiler is taking care of 3500 sq. ft. of glass but I expect to add that much more next season, Am not afraid but that the No. 1 boiler will take care of 7000 sq. ft of glass, although it is only rated at 6000 sq. ft. I have had no trouble in keeping 65° at night, and 60° to 70° in the daytime in zero weather. After we got used to firing we attended **fire about every five or six hours.** We have not fired any at night after 10:30, and not often fired any before 6:00 o'clock in the morning.

H. N. PASKINS & CO., Basil, Ohio.

KROESCHELL BROS. CO., 452 W. Erie St., Chicago, Ill.

Trouble Talk No 3

Second Series

The Truth About a Certain Grower (You Know Him) and How He Sold Himself One of Our Boilers.

IT happened up in Connecticut, where I had just fixed up some trouble. It was on Friday and I was on my way to the station when it started raining cats and dogs. Just over the hill was Jim Blank's place, but I hated like thunder to run in there for shelter, because Jim always has some kick to put up, no matter how hard you try to please him. He is one of those sour apple fellows who can make things mighty unpleasant for you, and, when you leave, offers you a cigar, and thinks it patches everything up.

Say, doesn't it make you sore when a man abuses you right and left, and then thinks he can buy your good nature back with a five cent Cremo?

The Boss says "that side of it is none of my business, for Jim is a good customer, even if he is a chronic kicker. Let him kick—he must be satisfied or he wouldn't keep buying our goods."

It was raining harder than ever by this time, so I chased into Jim's work-room and heard him downstairs giving orders. (Jim thoroughly enjoys giving orders.) Pretty soon I went down to see what the row was all about, and found Jim trying to explain to his Italian fireman how to bank half his grate with ashes and keep a live fire on the other half. By this time Jim was yelling fit to raise the roof—he seems to think all Italians are deaf.

When he caught sight of me his eyes snapped fire and he blurted out: "If your confounded old firm would make a boiler with a divided grate, so I could dump half of it at a time, I'd buy one of the blasted things."

I was determined to call his bluff just for once; so I replied: "All right, the boiler's sold. We will make you a boiler with just such a grate. Whole thing will be shipped first of April." He hemmed and hawed a considerable time, but I stuck to it that the boiler was sold fair and square and we expected him to take it. And he did.

Now, all our boilers over five sections are made with grates which shake in two halves. It's not only good for running half a fire, but when you dump it down to start fresh you can first dump half and rake the live coal over on the clean grate, and then dump the other half and spread out the live coals on the entire grate and start your new fire going in a jiffy.

So, you see, we are keenly alive to the best interests of you greenhouse men, and are always on the lookout for suggestions; so if you have any suggestions send them along. If you haven't send them anyway.

Address your letter to

The Trouble Man

Hitchings & Co, Elizabeth, N. J.

Next week's talk will be sort of an animal talk, it being mainly about boilers—the half horse, half alligator kinds.

Sketch of alligator by office boy. The boiler done with a quill pen by the Trouble Man himself.

The Burnham

"Five years ago we bought a Burnham 8 section water boiler. When we added more greenhouses, we iked the old Burnham so well that another one was bought and connected in battery. The repairs have been **nothing.** Keep the Burnham clean and it will fire quickly, and at the same time hold the fire. No night work looking after it, which is more than I can say for two or three others tried before the Burnhams were put in." Yours truly,

Edward Johnson

CROSS SECTION OF A SUNLIGHT DOUBLE GLASS SASH ON A SUNLIGHT FRAME

Here is the sash you don't have to cover

Two layers of glass instead of one. A ⅝ inch layer of dry, still air between—a perfect non-conductor—a transparent blanket—takes the place of mats and boards.

The saving in time and labor

Sunlight Double Glass Sash will pay for themselves in a single season. They never need covering—and therefore save half the time you have to give to single glass sash in covering and uncovering—in watching them on frosty nights.

Earlier, Stockier Plants

Under Sunlight Double Glass Sash **the plants get all the light all the time.** Every grower will see at once the value of the earlier, stockier plants resulting. Your crops will mature weeks ahead of the grower's who uses single glass sash—and *you will get the benefit of the high prices in the early market.*

Here is what one grower says

Harry S. Walker of Terre Haute, Ind., grew cabbage, tomatoes, eggplants and mangoes under Sunlight Double Glass Sash last season. The minimum thermometer was 15 below zero. No plants were injured. He says in part: "Plants grown under single layer sash were not to be compared with mine".

Agents wanted: A liberal commission to responsible agents where we have no agents now. Write us for details.

Get our free catalog today—It contains the details of this new invention for hot-beds and cold-frames, and testimonials from well known growers all over the U. S. who have used Sunlight Double Glass Sash successfully under all weather conditions. Use the coupon at once and get this interesting book free.

Send 4 cents in stamps for a valuable booklet on hot-bed and cold-frame gardening by Prof. W. F. Massey. There is no higher authority in the country. If booklet is wanted mark a cross (X) on square in coupon and enclose 4 cents in stamps.

Why Don't You Get Your Employer Interested in Potted Fruit?

Get him to add a house for it. You know it's the cheapest way there is to raise fruit. But little heat is needed and that little only for a short time.

Call to his attention the variety of fruits you can grow in the one house.

Make it plain to him that from August to January the house is empty for other things. Fruit half the year —'mums, bulb stuff or vegetables the other six months.

Just to help convince your employer of the great possibilities of potted fruit, why not get him to buy a few trees and try them on the centre bench of one of your regular houses? If you make a success of that, then the chances of your getting one of our standard potted fruit houses will be all the better.

Send for our new catalog. It has seven pages given over entirely to growing fruit under glass. Kindly send your employer's name and address at the same time and we will mail one to him and call his atttention particularly to the fruit section.

Annual convention and exhibition in conjunction with the St. Louis Horticultural Society, St. Louis, Mo., November 7-11, 1911. ELMER D. SMITH, Adrian, Mich., President; C. W. JOHNSON, Morgan Park, Ill., Secretary.

AMERICAN ROSE SOCIETY.

Next annual meeting and exhibition at Detroit, Mich., 1912. A. FARENWALD, Roslyn, Pa., President; PHILIP BREITMEYER, Detroit, Mich., Vice-President; BENJAMIN HAMMOND, Fishkill-on-Hudson, N. Y., Secretary.

THE AMERICAN CARNATION SOCIETY.

Next annual convention and exhibition at Detroit, Mich., January 24, 1912. J. A. VALENTINE, Denver, Colo., President; A. F. J. BAUR, Thirty-eighth St. and Rockwood Ave., Indianapolis, Ind., Secretary.

SUGGESTIONS FOR PLANT GROWERS.

Nephrolepis.

The Boston fern and its sports, which have been grown in the bench all summer, should now be potted. The bench is full of young suckers, which, if saved, will make fine stock for another year, so in lifting the old plants take a knife and cut around the plant about two inches from the center and place a trowel under the plant, leaving the young stock in the bench. They will soon start to grow, when they can be placed close together in flats and grown on in a fairly cool house until next spring, when they will make excellent stock for planting out. The plants that are lifted should be large enough to plant in a 6-inch pot. If there is a demand for larger sizes two, three or four may be planted in seven, eight or nine-inch pots. Many of the plants have probably not made an even growth, being more or less one-sided. These should be the ones selected for doubling up in the larger pots. As soon as potted they should be kept close and warm for one or two weeks and frequently syringed; they will then have obtained a good hold in the soil and should be given plenty of light and air. The call for these plants will begin by October 1 and it is much better to have them well established before they go into the residences, and to do this they should be potted by September. The greatest source of disappointment in these plants is in sending them out before they have become established. The Whitmani and finer leaved varieties are now growing rapidly and should be given room enough to spread and make fine plants.

Poinsettias.

The plants of poinsettias, in the northern section of the country, should be in the houses by September 1, for cool nights are apt to occur from that date on and the successful culture of these plants requires an even temperature. The early struck cuttings should be potted into 6-inch pots and properly staked, the smaller stock to be grown in pans can be grown until October in the small pots. Give the plants a light location in full sunlight, and space out sufficiently to allow a good circulation of air around the plants. In potting the plants if there are no arrangements so that they can be watered with manure water later, leave a good inch of space at the top so that they can be given a top-dressing when the bracts begin to form. An extra feeding at that time will greatly increase the size of the bracts and brilliancy of the color. Close the ventilators on all cool nights as soon as the temperature falls below 60° and as soon as the night temperatures begin to run lower than that point a little fire heat will be necessary. The one great point in growing poinsettias is in keeping them at an even temperature and growing rapidly.

Sweet Peas.

To have sweet peas in bloom by Christmas the seed should be sown by September 1. If it is intended to grow them to follow some crop that is now in the beds they can be sown in pots, but if the beds are now ready it is better to sow them in the beds themselves. The growers of large quantities have the rows running lengthwise of the houses, two rows in each four-foot bed, one on each side, with a path in the center, but they can also be grown in rows running across the beds, the rows being about three feet apart. This distance will be found necessary or the plants will get twined together, making a bad snarl of the vines. In sowing the seed in pots, place five or six seeds in a 4-inch pot, and in sowing in drills in the bench, plant the seeds about an inch apart. It is very easy to thin them out if they come up too thick, and one good strong plant to a pot and about eight inches apart in the row is about what should be left to grow on. It is often difficult to get good germination during the hot weather, therefore it is well to plant enough seed. Many growers have trouble with the seed rotting and also the plants damping off after they have grown to quite a height. They must be watered very sparingly until they begin to climb on the strings. The white seeded varieties are often very difficult to start; a good way which

we have found very successful is to sow the seed in the drills on top of the soil, throwing a little sphagnum moss over them until they begin to grow, when they can be lightly covered with soil, and when they begin to climb the drill can be filled in. This will prevent the seed from rotting and proper watering will remedy the damping off.

Marguerites.

The marguerites for winter blooming will soon have to be potted in their blooming pots. This can be done now at any time and if they are becoming pot-bound the sooner the better. Nine and ten-inch pots are none too large if good flowers are to be grown, and the soil should be good and rich. Pot firmly, using a rammer that the soil can be made solid, and use good drainage. Keep the buds picked off until cool weather sets in, the blooms that are made during the warm weather are of inferior quality and no good flowers will be produced until the plants get a good hold in the new soil. The plants are far better plunged in frames for some time yet than in the houses, for they may become infested with red spider under the glass. The plants in the benches will need to be frequently sprayed to keep them free from insects and the blooms should be kept picked off of them for some time yet. When cool weather approaches allow the flowers to come along. Cuttings can be made at this time which will make nice flowering plants about the turn of the year, at a time when the large plants seem to take a rest and do not bloom profusely. This will ensure a cut throughout the season.

Wallflowers.

The wallflowers that were sown in the spring should now be planted in the benches that they may get a good start before the cool weather sets in. They should be planted in a house that can be held at a cool temperature to procure the best results, a house that does not have a night temperature exceeding 50°, and even 45° is better. They will not bloom to any extent until after the turn of the year when they will stand a little higher temperature. The soil should be a good rich compost and the plants can be set about eight inches apart. Stake the plants as soon as they begin to grow and keep them tied up so that the spikes of bloom will not become crooked. Constant fumigation will be necessary for they are likely to be infected with aphis unless guarded against.

BOSTON, MASS.—The prizes annually offered by Mrs. John L. Gardner for the best flower gardens and window boxes in the north and west ends of the city were distributed August 28 in the presence of the donor.

WAYLAND, O.—A number of growers interested in gladioli met at the home of A. H. and Mrs. Austin, to inspect the large collection of seedling and new gladioli. The collection of seedlings was particularly interesting and among them were noted yellows as deep as daffodils, others pure white and no end of fine colored varieties. One celebrated grower stated that such fine seedlings varieties were to be found at no other growers' places.

THE RETAIL TRADE

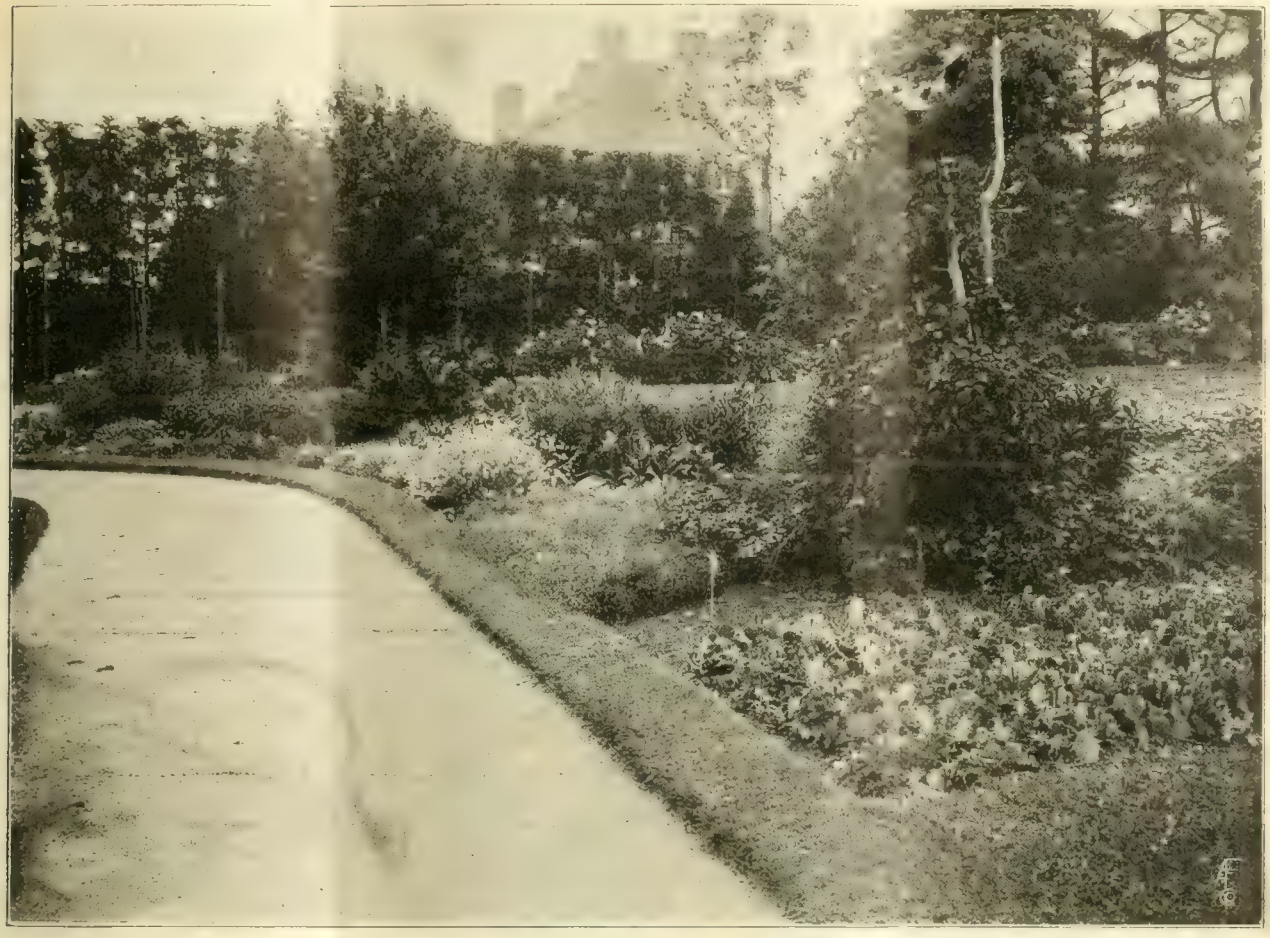
Conducted by Robt. Kift, Philadelphia, Pa.

Arranging the Floral Spray.

The floral spray has rapidly grown in popularity during the last few years and with the majority of the florists at the present time, probably more of these arrangements are put up than any other design for funerals. Attending a funeral recently we could but notice the difference in the quality of the work which was manifest in the different sprays which were to be seen. A spray well arranged is certainly a very artistic floral piece but too often it has looked to us that it seems as if the florist thought that anything was good enough for and anybody could tie a "bunch," for bunch it really is with many of these arrangements and the tying is left to the most inexperienced help. The flowers instead of being arranged lightly are crowded as closely together as possible, ofttimes in geometric precision, the whole design being perfectly flat and devoid of beauty or taste. We well remember a spray which we once saw made of a dozen white chrysanthemums arranged in four rows of three each, forming a perfect rectangle and just as flat as they could be laid. There certainly was no beauty to it and it was a travesty on floral work. The arranging of a spray or a bouquet is one of the highest accomplishments in the florist's art.

To properly arrange a spray the flowers should be selected and laid out before the designer. They should be of long, stiff-stemmed quality, and if not, should be strengthened with a long wire, for no designer can make a nice spray with weak stemmed flowers. In tying it is better to use a strong green string and not a white cotton cord, which is so often used. After the flowers have been laid out, lift three or four and arrange them so that each individual flower shows its best side and holding them in one hand well spread apart bind them with the string. Under them place some nice fronds of hardy fern or suitable green. If the spray is to be longer than the stems of the flowers, take a bouquet stick and fasten it in where the first tying of the string is made. Some suitable green, either asparagus or short ferns, should then be fastened on the stems, tied in, in order that the next flowers may be raised above those already tied. In lifting the flowers take particular pains to see which way the stems turn and tie the flowers in so that they rise above those already in the bunch, giving the spray a light, loose appearance. Be careful to avoid straight lines in placing the flowers on the spray but have them take on a more natural appearance and also not to place each flower just the same distance from the others. It is well occasionally to lift the spray to see how the flowers are going to settle, in fact, many of the best designers never arrange a spray lying flat on the table, but keep it raised in the hand in the same manner as they would make a round bouquet. In this way they are sure to have a fine light effect when finished. As the spray is made longer the ferns should be placed at the back and ferns or green filled in to keep the flowers well raised, so that they will not drop back, lying close and flat. When the long-stemmed flowers are all tied in a few shorter ones should be wired and the wires pushed in to the bunch of stems where they are tied together in such a manner so as to cover and conceal the string and the bunch of stems. A few ferns fastened in the same way with the tips pointed the other way from the bunch will also help to cover the bare stems and give the spray a better finish. A

MARGUERITES.



PERENNIALS IN THE GARDEN AT N. T. KIDDER'S, MILTON, MASS.

handsome bow tied over where the stems come together will now complete the spray but avoid making the ribbon too large a feature. Many a good spray has been spoiled by the use of too heavy a ribbon and too large a bow.

DESIGNER.

THE PERENNIALS.

Perennial Phlox.

No hardy perennial gives more satisfaction than the phlox, and by constant selection and hybridization there has been in the past few years a most wonderful improvement in this race of plants and they are now in a very high state of cultivation. Both the truss and individual flowers of the newer varieties are particularly fine, and there is now an assortment of colors that was never dreamed of a few years ago, ranging from the most gorgeous crimson, purple and scarlet shades through the most delicate of pinks to the purest of whites, and in many cases the color shading is almost indescribable.

We had the great privilege last year of seeing the best collection in Great Britain, and made notes on what we considered the best, and, having had a closer acquaintance this year with a very complete collection, the ones mentioned below are, in our opinion, among the best that are in cultivation and can be procured today:

Antonin Mercie is a beautiful variety, of medium height, and flowering about midseason; the flowers when they first open are pure white and then fade to a delicate lavender. It is a strong grower and has giant trusses which branch well, one single spike making more of a display than a whole plant of many of the older varieties.

Baron Von Dedem is a tall grower, and might be called a second early. The flowers are brilliant orange scarlet, borne on a large effective truss; this variety like most of the reds, burns a little in our strong sunshine and should be given a partially shaded situation.

Elizabeth Campbell is one of the newest and one of the most charming of the whole race. We had the pleasure of seeing it exhibited last year when it received an award of merit at the Royal Horticultural Society of England. The flowers are very large, easily covering a silver dollar, the color is old rose changing to white in the center of the flower, the flowers being borne on large pyramid shaped spikes. It is a splendid grower of medium height. It made quite a sensation when exhibited last year, and we have been anxiously watching to see how it would behave in our dry climate, and it certainly has made good. It is in our opinion the best variety we have had for some time, and we predict a great future for it.

Eugene Danzanvilliers is an early bloomer of medium height. The individual flowers although not so large as some, are carried on well shaped trusses and are of a pale heliotrope with a white center. It is a very free bloomer and continues in flower a long time. We have noticed that the ladies are particularly fond of the delicate coloring of this variety.

Flora Hornung is a midseason variety of medium height, the flowers are large milk white with carmine eye. It is a free and continuous bloomer and a general favorite.

Frau Ant. Bucher is one of the newest whites. It is of medium height, the flowers are large, pure white and borne on well shaped spikes. It flowers about two weeks ahead of the next variety.

Frau Von Lassburg is probably the best white variety in cultivation. The flowers are large and of good substance and carried on spikes of splendid form. It is a tall robust grower and especially fine for massing and groups.

G. A. Strohlein is indeed a showy variety. It has good heads of bright rosy salmon flowers, with a purple ring around the eye. It is effective and distinct and one of the best of the red varieties.

General Von Heutz is another good red variety. The flowers are brilliant salmon scarlet, with a large pure white star in the center of the flower. It is a free bloomer of medium height.

L'Aiglon is an early variety of medium height. The flowers are large and of a beautiful deep rose shade. It is a very free bloomer and keeps in good condition a long time.

Mme. Paul Dutrie is a strong grower of medium height. The flowers are large and of a soft pink, suffused with white; the coloring is very delicate, resembling a soft pink orchid. The

flowers are carried on immense panicles and have been much admired by all who have seen it.

Pantheon is a fine tall growing variety. The flowers are very large and a bright carmine rose, and is very effective when seen in a mass.

Selma—This variety is also known under the name of Eiffel Tower, although it is not the same as that which English growers call Tour Eiffel. It is a tall grower with large trusses. The flowers are also large, of a pretty delicate soft pale rose with a distinct red eye.

Sigrid Arnoldson is a tall growing variety with large panicles of flowers, of good size and of a fiery carmine red with dark center. It is quite new and has been very popular with all who have seen it.

Tapis Blanc, or Carpet of Snow—This is an exceedingly dwarf variety with very large pure white flowers of great substance, the plants rarely exceeding ten inches in height and are one mass of bloom and it lasts in flower throughout nearly the whole summer. It is much used in England for bedding, and is very effective as a ground work to the taller varieties. It is without doubt the best dwarf phlox in cultivation.

Von Hochberg is a fairly tall grower and is the ideal crimson. The flowers are borne on large panicles and are of a rich color resembling the color of a Harlowarden carnation. It stands the sunshine well and is, we believe, the best crimson yet introduced.

W. H. WAITE.

German Iris.

As the proper planting time is here for Iris Germanica, it is well to review the kinds most appropriate for the florists' use, especially as to colors, for it must be admitted that there are very many that are quite unsuitable for use in decorative work, owing to the orange, dark brown and deep purple that pervade some of the flowers, making them very difficult to use as cut flowers where the lighting is poor. Every florist should have a quantity of these iris as they flower from Decoration day on through June. This season we had a grand display at the former date, but the heat in May brought them forward.

The reason for planting at this time is, that there seems to be a period of rest, or at least inactivity, during the dry time now, the thick rhizomes take care of the plants for the time being, and new root action begins at once with the later rains, the plants become well established before winter and flower as if never disturbed, next summer. A sandy soil is best, or if the soil be naturally heavy a good layer of sand round and over the roots when planted will avoid danger of decay during wet times. We have seen fine plants ruined by too much moisture round the roots. These iris will do well under trees that furnish moderate shade, as may be seen in the illustration, and are always best, when used for effect, to plant in masses of one color, taking care to graduate from the white on through the light blue to dark and on the other way through canary yellow to orange. It is possible to so arrange the colors that they clash all the time they are in flower.

When replanting beds, the old bare rhizomes may be broken up at the joints, planted separately by themselves and these will soon make salable plants with strong shoots ready to bloom, and with the new sorts it is customary to start them in sand in the propagating bench, and the rhizomes may then be cut in pieces like potatoes to get up stock. Of late years a great improvement has taken place in this family of iris. There are some fine new ones now being offered, but for 25 years very little has been done for them, as they seed so rarely in gardens, the reason for which is obscure, but try some of these recent kinds, they are equal to the best of the older kinds, some are even better, but cost much more now.

Of the standard varieties we propose to name about a dozen that will run the gamut of color, beginning with Florentina alba and albicans, both nearly white; Donna Maria, shaded with lilac; Mme. Chereau, shaded with blue; Pallida Dalmatica, a tall light blue, the best of all for vigor and length of stem; Chas. Dickens, dark blue. From the white through the yellows begin with L'Innocence, pure white tinted with orange; then Flavescens (Canary bird) and Aurea, both of which are regarded as species; Maori King, orange with crimson veins; Britannicus, a pale pink with purple veining; and Queen of May, the best of the rose shades. The foregoing will give the possible range of color and may be added to if desired, but for the average man, a dozen good kinds are enough of which to keep track, especially if all are good.

E. O. ORPET.

A Yellow Larkspur.
Delphinium Primrose Queen.
(From the Gardeners' Magazine).

Delphinium Primrose Queen.

This beautiful and stately double flowered delphinium, Primrose Queen, which is herewith illustrated, has massive spikes of regularly placed flowers of primrose yellow. This coloring renders this variety particularly distinct among the myriads of blue and purples, says the Gardeners' Magazine. Given an award of merit by the Royal Horticultural Society June 20, exhibited by G. Ferguson (F. W. Smith, gardener), The Hollies, Weybridge.
